**UNIDEN INTRODUCES NEW NETWORKING SOLUTIONS FOR  
SMALL BUSINESSES AND HOMES AT CONNECTIONS, DALLAS, TX**

***UNIDEN Showcases its new Line of Routers, Switches, Adapters and Wireless Products***

**Fort Worth, Texas (5/1/02)** – Uniden America Corporation, a global leader in designing, manufacturing and marketing telephony products, will showcase its latest lines of networking products at the Connections Conference May 14 – 16, 2002 in Dallas, TX. Uniden will display their new family of Cable/DSL routers and switches that allow multiple computers in the home/office environment to share one broadband Internet connection while providing state-of-the-art protection against hackers. They will also be displaying their new family of 802.11b wireless access points and related accessories.

“Uniden has created new lines of wired and wireless networking products to complement our market strength in the home / SOHO and small business markets,” said Greg Fadul, Vice President of Uniden’s Business Networking Systems Division. “During the past few years via internal development and acquisitions, Uniden has been able to create some new and exciting products. Our initial launch this week is just the tip of the iceberg. Look to Uniden for additional converged networking products throughout 2002.”

“Uniden is excited about providing our best in class distribution partners with quality products to serve the small business and home,” said Al Silverberg, President of Uniden America Corporation. “As telephony and networking truly converge, Uniden is continually positioning ourselves to be a market leader with best in class products.”

Uniden’s new wireless and wired networking products will be available starting in August 2002. For pricing plans, distribution, and development partnerships, please contact Greg Fadul at 817-858-2809 or gfadul@uniden.com.

-more-
