## PM100 and PM300 Printer and RS232 Interface

RS232

◆ Full remote control of the analyzer using the IEEE488.2 protocol.

◆ Connections on a male 9-way 'D' - type connector.

◆ Configurable as a printer output for serial printers.

◆ Baud rates selectable via the front panel, stored during power off.

1200, 2400, 4800, 9600, and 19200.

Parallel Printer

◆ Output of ASCIII data to most printers with a centronics type (parallel) interface.

◆ Standard computer type 25-way 'D' type connector.

◆ Prints user selected numeric information in an 80 column format.
