

2. “What RFID Products Does WJ Make?”

WJ designs and manufactures a line of multi-protocol, UHF RFID Cards that operate in the 902-928MHz ISM bands. The ultra-compact Multi-Protocol RFID Card (MPR) family utilizes the PCMCIA Type II form factor standards-based communications protocol. The initial MPR products include the MPR 5000 and MPR 6000 models that currently operate with EPC Class 0, EPC Class 1 and the 0+ tag protocols and have upgradeable flash memory provisions to accommodate ISO 18000-6, ETSI and other standards in the future.
