

Wavecrest products for STC ATE systems July 8, 2004

1

Module Description: SIA-3100T Signal Integrity analyzer, 2-8diff channels, 1.3GHz TIA & 6GHz bandwidth Oscilloscope and time / jitter analyzer for clocks, serial & parallel data streams.

Member name: Wavecrest Corporation

Expected Date for certification/first shipment: September 15, 2004

2

Module Description: SIA-3300T Signal Integrity analyzer, 2-8diff channels, 2.5GHz TIA & 6GHz bandwidth Oscilloscope and time / jitter analyzer for clocks, serial & data streams and parallel data streams, with auto pattern arming and CDR

Member name: Wavecrest Corporation

Expected Date for certification/first shipment: September 15, 2004

3

Module Description: SIA-3600T Signal Integrity analyzer, 2-8diff channels, 6GHz TIA & 6GHz bandwidth Oscilloscope and time / jitter analyzer for clocks, serial data streams and parallel data streams, with auto pattern arming and CDR

Member name: Wavecrest Corporation

Expected Date for certification/first shipment: September 15, 2004

4

Module Description: DSM-16D4 Signal Matrix Test Head Module, 16diff channels, 6GHz bandwidth with 2 channels of calibration.

Member name: Wavecrest Corporation

Expected Date for certification/first shipment: March 15, 2005
