

Pocket Power for the Digital World

The XPower Pocket Inverter 100 utilizes advanced electronics to convert the 12 volt DC battery power from a vehicle or airplane into 115 volt household AC electricity, so if your laptop battery runs down, you can just plug straight into the AC outlet on the inverter and keep working away, just like you're at home. In addition to the AC power outlet, this inverter includes a USB charge port which can power or charge iPod™, BlackBerry™, iPaq™, Palm™ and a wide range of other 'can't live without' electronic devices. The thinnest inverter on the market today, and only 0.5lbs, makes this inverter easy to fit inside even the most overburdened carry-on or laptop bag. With the integrated Vehicle and Airline connector you can keep your iPod music flowing, your cell phone charged and your laptop running nearly anywhere you're on the go.
