Network problems

Symptom	Solution
The printer doesn't appear in the **Chooser**.	■ Always make network connections before turning on the printer. Turn the printer off, wait at least 15 seconds and turn the printer's power on again.
	■ Check the termination; refer to the documentation for your network adapter or connector for information on termination.
	■ Check the configuration page to get the zone name and printer name. Make sure that the correct zone and printer name have been selected in the **Chooser**.
	■ If you have changed the printer's name, did you make it a unique name (not the same as any other printer in the zone)?
	■ Make sure that the correct network is selected in the **Network Control Panel**.
