Enabling and disabling the startup page

You can enable and disable printing of the startup page in several ways:

■ On a PC, send a PostScript language utility file to the printer. For more information, refer to the *Phaser 340 Drivers and Utilities Printing Reference* manual.

■ On a Macintosh, use the *LaserWriter utility.*

■ Use your World Wide Web browser. Refer to the *PhaserShare Network Cards and Software User Manual* for more information.

■ Through the printer's front panel, according to the following instructions:

1. While the Ready message is displayed, press the **Menu** button. The printer displays the first item in the setup menu:

   ```
   Help Pages
   <----    ---->      Menu
   ```

2. Using the left arrow (<----) or right arrow (---->) buttons, scroll through the selections until the following message appears:

   ```
   Printer Defaults
   <----    ---->      Menu
   ```

3. Press the **Menu** button to access the printer defaults settings.

4. Using the left arrow (<----) or right arrow (---->) buttons, scroll through the selections until the following message appears:

   ```
   Startup Page
   <----    ---->      Menu
   ```

5. Press the **Menu** button to access the startup page settings.

6. Press the right arrow (---->) button once for the following message:

```
Startup Page:Disabled
<----     ---->      OK
```

7. Press the OK button to disable printing of the startup page.

8. To return to the top level of the menu, press the (Exit↑) button until the printer displays the Ready message.
