

Installing a Tektronix printer driver for Macintosh

System requirements

The Tektronix printer driver for the Macintosh requires the following hardware and software:

- An Apple Macintosh II computer (or later)
- At least 4 Mbytes of RAM
- System Software version 7.0 or later
- Optional: CD-ROM drive

Installing the driver

Note *If you want to take advantage of the **Combine Separations** option in the Tektronix driver, you need to install the **Phaser 480X Prep** file. Follow the instructions below to install all of the appropriate software.*

*Also, the **Combine Separations** option requires 96 Mbytes of printer memory.*

1. Make sure your Macintosh is turned on with System Software version 7.0 or later, installed.
2. **CD-ROM:**
 - a. Insert the Phaser 480X CD-ROM into your computer's CD-ROM drive.
 - b. Open the *Drivers* folder.

Floppy diskettes:

- Insert the Macintosh Printer Drivers diskette into the disk drive. When the diskette appears on the desktop, it should be open showing the icons inside.
3. Drag both the **Phaser 480X** driver icon and the **Phaser 480X Prep** file from the diskette to the **closed System Folder** icon on your Macintosh hard disk. At the alert message, click **OK** to automatically install the software in the *Extensions* folder.

4. Store the CD-ROM or diskette in a safe place.

Selecting the printer in the Chooser

1. Select **Chooser** from the **Apple** menu.
2. Click on the **Phaser 480X** printer driver icon on the left side of the **Chooser**. (If the printer driver icon does not appear, **Restart** your Macintosh, and repeat the printer driver installation procedure; also check the cable connections on your computer and printer.)
3. Click on the **Zone** your printer is in. See your network administrator if you have questions.

A list appears with the printers you have connected to your Macintosh or printers that are available on a network.

4. Click on your Phaser 480X printer in the list of printers on the right side of the **Chooser**.
5. Close the **Chooser** by clicking its close box.
