

Margins and print area

When the printer places an image on media, the image (print area) is a bit smaller than the media size. You may need to adjust the page margins in your application software to match the print area.

Note *To assure the correct page margins, use the drivers with the Tektronix software (PPDs).*

The following table and illustration show the page sizes, the largest print areas, and the margins for the media sizes supported on this printer.
