# REMOTE CONTROL FEATURES

In addition to controlling this unit, the remote control can operate other A/V components made by YAMAHA and other manufacturers. To control other components, set up the remote control with the appropriate manufacturer codes.
Control area

■ Controlling this unit

The shaded areas below can be used to control this unit when the AMP mode is selected. Press AMP to select the AMP mode.

★/★★ buttons and input selector buttons

Press AMP to control this unit.

The buttons in the dotted lines (SYSTEM POWER, STANDBY, SLEEP, 6CH INPUT, VOLUME +/– and MUTE) function in any mode.

■ Controlling other component

The shaded areas below can be used to control other components. Each button has a different function depending on the selected components. Select the component you want to control by pressing an input selector button.

★/★★ buttons and input selector buttons switch the control area for each component.
* ★/★★ buttons are to operate the other components that are not connected to this unit.

Component control area
You can control up to 9 different components by setting appropriate manufacturer codes (see page 47).

Setting the manufacturer code

You can control other components by setting a manufacturer code. Codes can be set for each of the 9 component controls.

The following table shows factory-set component (Library: component category) and the manufacturer code for each component control.

Component control (buttons)	Component category (Library)	Manufacturer	Code
CD	CD	YAMAHA	0005
MD/CD-R	MD	YAMAHA	0024
TUNER	TUNER	YAMAHA	0003
DVD	DVD	YAMAHA	0098
D-TV/CBL	–	–	–
V-AUX	–	–	–
VCR	–	–	–
★	–	–	–
★★	–	–	–

1 **Press an input selector button or ★/★★ to select the component you want to set up.**

2 **Press CODE SET using a ballpoint pen or similar object.**
The TRANSMIT indicator flashes twice.

3 **Press the numeric buttons to enter the four digit manufacturer's code for the component to be used.**
Refer to "LIST OF MANUFACTURER'S CODES" **at the end of this manual.**

The TRANSMIT indicator flashes twice.

Notes

• If the manufacturer of your component has more than one code, try each of them until you find the correct one.
• If you wait for more than 30 seconds during step 3, the setup process is canceled. If this happens, start over from step 2.

Clearing setup manufacturer codes

■ **Clearing setup manufacturer code for the component control**

1 **Press an input selector button or ★/★★ to select the component control for which you want to clear the manufacturer code.**

2 **Press CODE SET by using a ballpoint pen or similar object.**
The TRANSMIT indicator flashes twice.

Note

• If you do not press any button within 30 seconds after step 2, the clearing process cancels. If this happens, start over from step 1.

3 **Enter the code number "0000".**
The TRANSMIT indicator flashes twice, and the manufacturer code for the selected component is cleared.
☼
• You can clear all setup manufacturer codes at once by entering the code number "9990".

Controlling other components

You can operate other components if you have set the manufacturer code for your component in the remote control. Note, however, that some buttons may not operate the component correctly.
Once you select an input source, the remote control switches to the mode for operating the component.

*1 This button functions only when the original remote control of the component has a POWER button.
*2 These buttons can operate your TV without switching the input if the manufacturer code is set in D-TV/CBL or ★★. When the manufacturer code for your TV is set up in the both D-TV/CBL and ★★ areas, priority is given to the signal in the D-TV/CBL area.
*3 These buttons can operate your VCR without switching the input to VCR if the manufacturer code is set in VCR.
