

Please make the following alterations to the User's Manual IM 04L41B01-61E (see underlined text).

■ Page 1-2 "Hardware"

Monitor

- **When Using Windows 2000 or Windows XP**

A monitor supported by the OS of 800 × 600 dots or higher and 32K colors or more. A monitor of 1024 × 768 dots or higher and 65,536 colors or more is recommended.

- **When Using Windows Vista**

A video card recommended for use with Vista and a monitor supported by the OS of 1024 × 768 dots or higher and 65,536 colors or more.

■ Page 3-10 "Detect"

This can be selected when [No Logging] is turned [ON] under [Alarm] - [Alarm action] in the [Basic Setting] tab.

■ Page 3-22 "Circular Time Per revolution [/rev]"

Select the time of revolution from [20min]* to [4week].

* For release number 2 or earlier, this can only be specified on the DX2004 and DX2008. For release number 3 and later, this can also be specified in the fast sampling mode of the DX2010, DX2020, DX2030, DX2040, and DX2048.
