

The following describes the revision upgrade to DAQSTANDARD for DXAdvanced.

A revision upgrade will be made available for this software on March 22, 2006. If you are using revision number **R7.01** or **R7.11** of DAQSTANDARD for DXAdvanced, download and use the most recent revision according to "Installing the Software Revision Upgrade" given below.

For the procedure to check the revision number, see section 2.2, "Displaying the Version Information" in the DAQSTANDARD for DXAdvanced User's Manual (IM 04L41B01-61E) provided on the accompanying CD-ROM.

Description of the Revision Upgrade

New Functions (If the Current Revision Number Is R7.01)

The following functions will be available after installing the revision upgrade.

Parentheses () indicate pages in the DAQSTANDARD for DXAdvanced User's Manual (IM 04L41B01-61E). The explanations are in blue characters. These items are unavailable if the revision upgrade is not installed.

- Function for collective setting of a selected range (page 3-5)
- Selected range collective setting button (pages 3-5, 3-6, and 3-7)
- Function that displays a channel setting screen (page 3-6)
- Function for copying settings (page 3-8)

Viewer Operation Fix (For Revision Numbers R7.01 and R7.11)

The revision upgrade will fix the following bug.

- When display data or event data of which the acquisition period is approximately 25 days or longer, the date/time of the data is not displayed correctly. This also applies when multiple files are linked and displayed and the total acquisition period is approximately 25 days or longer.

Installing the Software Revision Upgrade

Download the latest version of the software (**R7.12 or later**) from the site below on or after March 22, 2006, and install it.
