Overview:

The C2890 is the lowest profile cabinet in the Coliseum line. This 2 x 8-inch / 1-inch horn, 200-watt loudspeaker is designed as the ultimate box for installations where sight lines might be an issue. The C2890 can be flown vertically or horizontally. The rotatable 90° x 30° horn means that high frequency dispersion can be tailored to suit the cabinet's placement. The unique cabinet shape makes for tighter arrays and the ability to fly the cabinet much closer to walls and ceilings than conventional design loudspeaker boxes. Optional C2890BRKT mounting bracket (shown below) maximizes installation options in one simple mounting solution.
