Dear customer,

please read this user manual carefully and pay special attention to the safety instructions before changing the filter !

1. Safety Instructions

Attention !

It is required to pay attention to the following chapter “Safety Instructions“ to assure health and safety of operating and servicing personnel and to make sure, that the system remains fully operational. Notpaying attention to these hints can void the warranty.

Warning !

Before starting the changing procedure, the complete test system must be switched off at the main switch. Subsequently the operator must wait as long as the fans has stopped !

1.1. Important user considerations

1.1.1. Danger references

This operating instructions contain references to possible dangers, which can occur with inappropriate handling or proceeding. These references are represented in a red framed box with red writing.

Red box with red writing means that when ignoring heavy damages to property or person can occur!

1.1.2. User information, hints, references

This operating instructions contain user information, hints and references to further documentation. These references are represented in a grey framed box with blue writing.

Grey box with blue writing gives information on user information, hints and references to further documentations!

1.1.3. Text markings

1. Numbers mark activities, which are to be accomplished in the indicated order.
- minus signs mark general enumerating

2. Changing of the filter

Warning !

Before starting the changing procedure, the complete test system must be switched off at the main switch. Subsequently the operator must wait as long as the fans has stopped !

1.

Unfix the casing of the filter with a slotted screwdriver.

2.

Take the casing of the filter down.

3.

Remove the casing of the filter.

4.

Replace the old filter with new filter.

3. Service

If you have technical questions, please contact our service department along with the problem.
