Index of Japanese Words and Phrases 127

Preface

Students of Japanese often say that Japanese is difficult to learn because of kanji, and it is certainly true that kanji present a formidable obstacle to beginning students. But once students have gained some facility with the language, most realize that kanji are not the only problem. At the intermediate or advanced level, what is required are means of expression that are culturally textured and contextually interwoven, which I imagine is true of any foreign language. At this stage, not only must students increase their general vocabulary and store of idiomatic expressions, but also realize that previously learned words and phrases must be transformed from locutions that are simple and fixed in meaning into ones that are multidimensional and many-layered. This book is an effort to help students do precisely that.

In my previous book in the Power Japanese series, *Basic Connections: Making Your Japanese Flow*, I took up relatively basic problems that my students often had trouble with in the classroom. In this book, I have chosen to treat issues that often appear in textbooks and other publications for intermediate and advanced students, such as sentence structure, idiomatic usage, and conjunctions. In particular, I have focused on expressions, such as *ko-so-a-do* words, whose meaning changes radically according to context. Further, I have made an effort to include problems that appear in the second and third levels of the Japanese Language Proficiency Test.

In compiling and publishing this book, I have received the cooperation of many people. Among them I would particularly like to thank the graduate students in Chinese philosophy and history at the University of Hawaii as well as my colleagues and family for their unstinting support. I would also like to thank Michael Brase and Shigeyoshi Suzuki of Kodansha International for their assistance.

まえがき

日本語のクラスなどで、よく「日本語は漢字があるから難しい」という学生に出会います。たしかに漢字は初学者にとって大きなハードルになっていることでしょう。しかし「やっと日本語が使える」というレベルを越えるころになると、日本語を難しくしているものは、漢字ばかりではないことに気付くはずですが、これはどんな言語においても同じではないかと思いますが、中級、上級と進めば、より文化に密着した、ハイコンテクストな表現を学ぶ必要が生じます。従って、より広範囲の語彙、慣用句などを学ばなければならないとともに、既に学んだ単語や表現が、実は一義的、固定的なものではなく、状況に応じて多義的、重層的に意味を変化させるということを認識しなければなりません。

前回出版いたしました『Basic Connections』は、私の学生がよく間違ったり戸惑ったりする問題の中で比較的基本的な問題を扱っていますが、本書では中級から上級の初めに使用する教科書や問題集に登場する構文、慣用表現、接続表現などのうち、学生が習得に苦勞するもの—例えば前後関係によって大幅に意味の変化する「こ・そ・あ・ど」系の表現—などを取り上げてみました。また日本語能力試験の二級、三級の問題に出てくる項目もできるだけ入れるようにしています。

本書を刊行するにあたり多くの方々にご協力をいただきました。有意義で示唆に富む問題点を提供してくれたハワイ大学の中国哲学、歴史学の大学院生たち、終始変わらぬ支援で私を励ましてくださった同僚の方たちや家族、そしてこの本を出版する機会を与えてくださった講談社インターナショナルの編集者マイケル・ブレイズさん、鈴木重好さん、みなさまにお礼を申し上げます。

こそあど WORDS

This part of the book deals with so-called **こそあど** words, which are words that indicate either physical or psychological distance. Some are pronouns, some adjectives, some adverbs, and some change functions according to context. The easiest to understand are the demonstrative pronouns. A pronoun, of course, is a word that stands in place of a noun or a noun phrase. For example, in "The man is mad, but he is happy," "he" stands for "man." A demonstrative pronoun is a pronoun that points to something in terms of distance from the speaker. "This" and "that" are demonstrative pronouns in the sentence "This is my chair; that is yours."

Japanese has three types of demonstrative pronouns: **これ**, which indicates something close to the speaker or close to both the speaker and the other party to the conversation; **それ**, which indicates something at a distance from the speaker but close to the other party; and **あれ**, which indicates something distant from both parties. You will have noticed that the first syllable in these words corresponds to the first three syllables in the term "**こそあど** words." The last syllable, **ど**, would be represented by **どれ** in the list given here. **どれ**, however, is not used to indicate distance but refers to something indefinite or indicates a question; in that sense,

どれ and the other ど words are somewhat different from the first three types ofこそあど words.

Aside from the fact thatこそあど words indicate three types of distance compared to the two indicated by “this” and “that” in English, one of the major problems represented byこそあど words is that they indicate psychological as well as physical distance. This will be the principal focus of the entries in this part of the book. Another difficulty is thatこそあど words are used in idiomatic ways that are not easily understood from their surface meaning alone. For these reasons, we have chosen to take up a number of the more difficult, but also common, usages and show how they should be properly understood.

こそあど words have four main categories, and each category is comprised of six words. That is to say, the initial syllables are followed by suffixes that indicate what the word has reference to—whether a thing, a person, a direction, or something else. Below is a listing of allこそあど words, with suffixed examples listed under the main divisions.

こ = close to the speaker or close to both speaker and the other conversant

これ = this (thing, person, or event)

ここ = this (place or time)

こちら or こっち = this (direction, alternative, or person)

この = this (thing, person, or event)

こんな = this (kind of)

こう = this (way or manner of)

そ = distant from the speaker and close to the other conversant

それ = that (thing, person, or event)

そこ = that (place or time)

そちら or そっち = that (direction, alternative, or person)

その = that (thing, person, or event)

そんな = that (kind of)

そう = that (way or manner of)

あ = distant from both the speaker and the other conversant

あれ = that over there (thing, person, or event)

あそこ = that over there (place or time)

あちら or あっち = that over there (direction, alternative, or person)

あの = that over there (thing, person, or event)

あんな = that over there (kind of)

ああ = that over there (way or manner of)

ど = indefinite or interrogative

どれ = what (thing, person, or event)

どこ = what (place, location, or position)

どちら or どっち = what (direction, alternative, or person)

どの = what (thing, person, or event)

どんな = what (kind of)

どう = what (way or manner of)

In the following discussionこそあど words are taken up not in the order given above but rather in an order that facilitates their discussion.

あ Words

あ words are commonly employed when something has slipped one's mind and cannot be recalled no matter how hard one tries. In such cases, the speaker uses an あ word to get the other party's help. The other person may also respond with an あ word if he/she cannot remember either.

あれ

あれ is typically used when trying to recall a name, a place, or the like.

A: ほら、あれ!

Hora, are!

Listen ... That! (What was the name of the song? Oh, I forgot.) Don't you remember it?

B: あれ? あれ、ビートルズよね。ええとねえ……あれ……なんだっけなあ?

Are? Are, Bitoruzu yo ne. Eeto nē ... are ... nan da kke nā?

That? That's a Beatles' song, isn't it? Well ... that ... What was the name? (I can't remember either.)

A: 去年、コーヒーのおいしい喫茶店に行ったでしょう。あれ、どこだっけ?

Kyonen, kōhi no oishii kissaten ni itta deshō. Are, doko da kke?

We went to a coffee shop last year that had good coffee. Where was that? (Do you remember?)

B: ええっと、あそこはね……あれ、渋谷だったよね。あ、思い出した! あれ、駅前の喫茶店だよ。

Eetto, asoko wa ne ... are, Shibuya datta yo ne. A, omoidashita! Are, ekimae no kissaten da yo.

Let me see ... That was ... That was in Shibuya, right? Oh, I remember! That was the coffee shop in front of the station.

あれつきり／あれ以来

あれつきり and あれ以来 (いらい), both of which can be translated as "since then," refer to a time that is known from context but not specified.

A: 正子さん、今どうしてるか、知っている?

Masako-san, ima dō shite 'ru ka, shitte iru?

Do you know how Masako's doing now?

B: 去年会ったけど、あれつきり／あれ以来、音沙汰がないの。どうしてるかしら。

Kyonen atta kedo, are kkiri/are irai, otosata ga nai no. Dō shite 'ru kashira.

I met her last year, but I haven't heard a word from her since then. I wonder how she's doing.

あれだけ／あんなに

Both of these mean "to that extent" or "to that degree" and refer to something that is known from context but is not specified.

A: 電話するのが遅かったもので、切符、買えなかったんです。

Denwa suru no ga osokatta mono de, kippu, kaenakatta n' desu.

Because I called late, I couldn't get a ticket.

B: だから、あれだけ／あんなに早くしなさいって言ったのに。

Dakara, are dake/anna ni hayaku shinasai tte itta no ni.

That's why I told you so many times to do it earlier.

あの／例の

あの refers to something that happened in the past, the knowledge or experience of which is shared by the people

engaged in the conversation. 例の may be used in much the same sense.

A: 例の入社試験、どうだった？ うまくいった？

Rei no nyūsha shiken, dō datta? Umaku itta?

How was that company's hiring examination (the one you were talking about)? Did you do well?

B: あれ？ 不採用。あの試験、めちゃくちゃ難しかったのよ。

Are? Fusaiyō. Ano shiken, mechakucha muzukashikatta no yo.

That? I didn't get the job. The examination was awfully difficult.

あれやこれや／ああ言えばこう言うで／あちこち

あ words are sometimes used with こ words to refer to a random thing, place, matter, and so on.

あれやこれやと、することが多くて疲れる。

Are ya kore ya to suru koto ga ōkute tsukareru.

What with this and that, there are so many things to do I get tired out.

あの人は、ああ言えばこう言うで、理屈ばかり言うので皆に嫌われている。

Ano hito wa, ā ieba kō iu de, rikutsu bakari iu no de mina ni kirawarete iru.

He is always rationalizing and has a reason for everything. That's why no one likes him.

あちこち探してみたが、彼の気に入るような家はなかなか見つからない。

Achikochi sagashite mita ga, kare no ki ni iru yō na ie wa nakanaka mitsukaranai.

I've looked here and there, but it's hard to find the kind of house that might be to his liking.

あの人／あいつ／うちの人／うちの奴

In referring to a person who is within sight but at some distance from the speaker and listener, あの人(ひと) "that person" can be used: e.g., あの人(ひと)は誰(だれ)ですか (Who is the person over there?). However, あの人 can also be used to refer to someone close to, or intimate with, the speaker, such as a spouse or friend. In this sense, men speaking casually are more likely to use あいつ than あの人. When referring specifically to a spouse, women can also use うちの人 instead あの人 when referring to their husbands, and men うちの奴(やつ) instead of あいつ when referring to their wives.

A: どうして、この真冬にアラスカなんかに行くの？

Dōshite, kono mafuyu ni Arasuka nanka ni iku no?

Why are you going to a place like Alaska right in the middle of the winter?

B: あの人(ひと)がどうしても一緒に行こうって言うから。

Ano hito ga dōshite mo issho ni ikō tte iu kara.

Because he (my husband, boyfriend, etc.) insists that I go with him.

A: 悪ぶってるけど、あいつ(あいつ)、根(ね)はとてもいい奴(やつ)なんだよ。

Warubutte 'ru kedo, aitsu, ne wa totemo ii yatsu nan da yo.

He acts tough, but he's really good at heart.

B: でも、いじわるなことばかり言うから、嫌い。

Demo, ijiwaru na koto bakari iu kara, kirai.

Still I don't like him because he's always saying mean things.

A: 今週の週末、長野にスキーに行くんだけど、一緒に行かない？

Konshū no shūmatsu, Nagano ni suki ni iku n' da kedo, issho ni ikanai?

We're going to Nagano to ski this weekend. Want to come along?

B: 行きたいねえ。でも、先にうちの奴に聞いてみないと。
Ikitai nē. Demo, saki ni uchi no yatsu ni kiite minai to.
I'd really like to go. But I'll have to ask my wife first.
(male)

B: 行きたい。でも、先にうちの人に聞いてみないと。
Ikitai. Demo, saki ni uchi no hito ni kiite minai to.
I want to go. But I'll have to ask my husband first.
(female)

あんな

あんな ("that kind of") sometimes shows negative feelings on the speaker's part.

あんな人が好きだなんて信じられない。
Anna hito ga suki da nante shinjirarenai.
I cannot believe that you like that kind of (terrible, cheap, no good) person.

あんなの、ただでもお断りよ。
Anna no, tada de mo okotowari yo.
I'd refuse that kind of thing even if it were free.

こ Words

こ words usually refer to something or someone spatially closer to the speaker than to the listener, or spatially close to both the speaker and the listener, as in the following dialogue.

A: これは何ですか。
Kore wa nan desu ka.
What is this (close to me/in front of us)?

B: それは、本です。/これは、本です。
Sore wa, hon desu. / Kore wa, hon desu.
That (close to you) is a book. / This (in front of us) is a book.

However, こ words are also used in relation to time, degree, limits, and the like, as perceived by the speaker. こんなところ/こんなもの is used to sum up, estimate, or compromise.

これでいい?
Kore de ii?
Is this (limit, amount, price, etc.) OK?

これまでにいくつ漢字を習っていますか。
Kore made ni ikutsu kanji o naratte imasu ka.
How many *kanji* have you learned up to now?

こ words can refer to something that has just been mentioned (see first example below) or something that will be mentioned immediately after the こ word (second example below).

最近、間違った英語を書いた商品をよく見かけるが、これは無視するわけには行かない、由々しき問題である。
Saikin, machigatta eigo o kaita shōhin o yoku mikakeru ga, kore wa mushi suru wake ni wa ikanai, yuyushiki mondai de aru.

These days, you often come across merchandise with mistaken English on it. This is a serious problem that cannot be ignored.

昨日、こんなことがありました。知らない人から電話があったのですが、その人は、突然私の家を買ってほしいと言うのです。

Sakujitsu, konna koto ga arimashita. Shiranai hito kara denwa ga atta no desu ga, sono hito wa, totsuzen watashi no ie o utte hoshii to iu no desu.

You can't guess what happened yesterday (Yesterday this kind of thing happened). I got a telephone call from a stranger, and out of the blue he says he wants me to sell him my house.

こんなところ/こんなもの, literally meaning "this kind of place" and "this kind of thing," might be paraphrased as "this is about where we stand" and "this is about it." They are used to sum up a discussion or an observation, to offer

a compromise position, or to make an offer that the speaker feels is the best that can be made under the circumstances.

まあ、こんなところだね。

Maa, konna tokoro da ne.

Well, this is about it (i.e., I think I've covered everything; I think that's all I have to say at the moment; I think this is about the best offer I can make).

まあ、彼にできるのは、こんなものだろうね。

Maa, kare ni dekiru no wa, konna mono darō ne.

I don't think we can expect him to do any better than this.

そんなところ and そんなもの can be used in much the same way. However, whereas with こんなところ and こんなもの the speaker is presenting his own summation or opinion, with そんなところ and そんなもの the speaker is agreeing with the summation or opinion presented by the other party to the conversation or is summing up his or her own view of the matter that the other party has apparently agreed with.

A: 今度のコンパの会費は、10ドルぐらいまででしょうね。

Kondo no konpa no kaihi wa, jūdoru gurai made deshō ne.

I think the party fee shouldn't be over ten dollars. What do you think?

B: まあ、そんなところだろうね。

Maa, sonna tokoro darō ne.

Yeah, that's about it, I guess. / You're probably right.

A: 人生なんて、なかなか思うようにはいかないもんなんだって、やっと分かったわ。

Jinsei nante, nakanaka omou yō ni wa ikanai mon nan datte, yatto wakatta wa.

Life doesn't go as easily as expected. I have finally realized that.

B: そう、そんなものなんだよ。

Sō, sonna mono nan da yo.

Yes, that's about the size of it.

この間(あいだ) / この間(かん)

Although these two look alike because of the kanji used, they have different meanings. このあいだ means "the other day," referring to a time in the past but within the speaker's recent experience. このかん, on the other hand, means "the time between the two events in question." It is often followed by わずか or たったの ("only/as little as/no more than"), indicating that the interval in question was of short duration.

A: この間(あいだ)は、おみやげをありがとうございました。

Kono aida wa, omiyage o arigatō gozaimashita.

Thank you for the gift you gave me the other day.

B: いいえ。気に入っていただけてうれしいです。

Iie. Ki ni itte itadakete ureshii desu.

You're welcome. I'm glad you like it.

A: 目を覚まして、支度をして、家を飛び出して、バスに乗ったのが、八時ちょうど……この間(かん)、わずか / たったの十五分。すごいでしょ。

Me o samashite, shitaku o shite, ie o tobidashite, basu ni notta no ga, hachiji chōdo ... kono kan, wazuka/tatta no jūgofun. Sugoi desho.

I woke up, got ready, rushed out of the house, and got on the bus at exactly 8 o'clock ... All in only 15 minutes. Pretty amazing, huh?

B: 本当? 信じられないわ。

Hontō? Shinjirarenai wa.

Really? I can't believe it.

この頃(ごろ) / この頃(ころ)

この頃(ごろ) and この頃(ころ) are often confused, especially when they are written with kanji. They sound alike, but they are not interchangeable. このごろ simply means “recently,” while このころ means “at about this time.” It refers to a specific point in time in a specific context and is often used in stories, novels, or narrations. For instance, something happened at a certain place, and at about the same time something else happened at another place.

A: このごろ、お父さん、機嫌が悪いんだけど、何かあったの？

Kono goro, otōsan, kigen ga warui n' da kedo, nani ka atta no?

These days Dad is very edgy/in a bad mood. What happened?

B: 分からないけど、きっと仕事が忙しくて疲れてるんでしょ。
Wakaranai kedo, kitto shigoto ga isogashikute tsukarete 'ru n' desho.

I don't know. He's probably tired because he's busy at work.

六月の中旬ごろ、日本列島はうっとうしい梅雨の季節に入るが、一方北海道が美しい花の季節を迎えるのも、またこのころなのである。

Rokugatsu no chūjun goro, Nihon-rettō wa uttōshii tsuyu no kisetsu ni hairu ga, ippō Hokkaidō ga utsukushii hana no kisetsu o mukaeru no mo, mata kono koro na no de aru.

About the middle of June, the dreary rainy season starts in the Japan archipelago. However, it is also at this time that Hokkaido welcomes the beautiful season of flowers.

通報を受けた警部たちがアジトに急行したが、犯人達はこのころ、すでに国外に逃亡していた。

Tsūhō o uketa keibu-tachi ga ajito ni kyūkō shita ga, hannin-tachi wa kono koro, sude ni kokugai ni tōbō shite ita.

Detectives rushed to the hideout as soon as they received the information, but by this time the suspects had already fled abroad.

ここ

ここ, when it is followed by a time word such as 一年 “one year” or しばらく “for a while,” refers not to a place but to a current point in time. For instance, 一年 can be any one year, while ここ一年 means “this past (one) year.” このところ may replace ここしばらく (see このところ, below).

ここしばらく、暖かい日が続いたが、また急に気温が下がって夕べから雪になった。

Koko shibaraku, atatakai hi ga tsuzuita ga, mata kyū ni kion ga sagatte yūbe kara yuki ni natta.

We've had warm weather now for a while, but the temperature suddenly went down and last evening we had snow.

ここ一年、忙しくてどこにも行けなかったけど、来年こそは休暇をとって旅行したいと思っています。

Koko ichinen, isogashikute doko ni mo ikenakatta kedo, rainen koso wa kyūka o totte ryokō shitai to omotte imasu.

I couldn't go anywhere this past year because I was so busy, but next year I'm definitely going to take a vacation and travel.

このところ

このところ is not interchangeable with このごろ, which means “recently.” このところ refers to a time period shortly before the present time in a particular situation, while このごろ refers to a more general time period and situation. For instance, このごろの若(わか)い者(もの)は (“young

people these day”) is a phrase often heard when older people criticize the behavior of the younger generation, so このところ may sound awkward if used in this phrase. (See also このごろ.)

このところ、雨の日ばかり続くので、うんざりしています。
Kono tokoro, ame no hi bakari tsuzuku no de, unzari shite imasu.

Lately, we’ve had nothing but rainy days. It’s so depressing,

このところ、全然会わなかったけど、どこかに行ってたの。
Kono tokoro, zenzen awanakatta kedo, doko ka ni itte 'ta no.
I haven’t seen you around at all lately. Were you off someplace?

チャーリーは、このところお母さんの具合が悪化しているとの知らせを受けて、帰国しました。

Chārī wa, kono tokoro okāsan no guai ga akka shite iru to no shirase o ukete, kikoku shimashita.

Charley went back to his home country, having learned that his mother’s condition had recently gotten worse.

これから

これから (“from here”) refers to two different time points: “right now” and “from now on.”

では、これから試験を始めます。
Dewa, kore kara shiken o hajimemasu.
Now we will start the examination.

A: すみません。お借りした花瓶、うっかり落として割っちゃったんです。

Sumimasen. Okari shita kabin, ukkari otoshite watchatta n' desu.

I’m sorry. I carelessly dropped the vase I borrowed from you and broke it.

B: 高いものじゃないから、いいけど、これからは、もっと気をつけてね。

Takai mono ja nai kara, ii kedo, kore kara wa, motto ki o tsukete ne.

It wasn’t expensive, so it’s all right, but be more careful from now on.

この先(さき)

この先 may replace これから when it means “from now on” or “in the future”:

こんなに円安が続いたら、これから/この先、輸出入に頼っている企業は大変だろう。

Konna ni enyasu ga tsuzuitara, kore kara/kono saki, yushutsunyū ni tayotte iru kigyō wa taihen darō.

If the yen continues as weak as it is, companies depending on foreign trade are going to have a hard time from now on.

先 sometimes confuses students, because while it can mean “before in time” or “before in place,” it can also refer to a point, in time or space, which comes later. Here are examples of both usages.

お先に(失礼します)。
Osaki ni (shiturei shimasu).
(Excuse me, but) I must go/do it now (ahead of you).

先日はどうも(ありがとうございました)。
Senjitsu wa dōmo (arigatō gozaimashita).
Thank you for the other day.

この先、彼等はどこに住むのだろうか。
Kono saki, karera wa doko ni sumu no darō ka.
I wonder where they are going to live from now on.

銀行は、デパートの先です。

Ginkō wa, depāto no saki desu.

The bank is beyond the department store.

この分だと／この分なら／この分では

All three mean "If this situation/condition goes on like this." However, the implications are different. この分なら is used to imply that the outcome of the existing state, condition, or action will be good and favorable. この分だと, on the other hand, commonly introduces an undesirable or unfavorable result. この分では may be used interchangeably with この分だと, but here the outcome is rather uncertain. It commonly takes sentence endings such as *かもしれない* and *ではないか*.

Kono bun de wa, dō naru ka wakaranai yo. Ni, sannen wa daradara tsuzuku no kamo shirenai ne.

If it goes like this, you just can't tell. It may drag on for a couple more years.

これでも

これでも is often used when the speaker wishes to protest against what someone has said but tries not to sound too harsh. Literally the meaning is "even being this," but the connotation is "even though things may appear this way (which to you seems somehow insufficient or substandard)." The speaker then goes on to lodge a protest or state a contrary opinion.

A: 今日、君の誕生日だよ。四十になったんだっけ？
Kyō, kimi no tanjōbi da yo ne. Yonjū ni natta n' da kke?

Daijōbu desho. Are de mo ichiryū daigaku shusshin nan da kara.

I suppose so. He may not look like much, but he did graduate from one of the best colleges.

これまで／これっきり

Both これまで and これっきり mean "this is it" or "this is the end." However, the situations to which the expres-

sions refer are different. In case of これまで, the phrase refers to an ending point that the speaker cannot change, like the outcome of one's fate or luck. これっきり, on the other hand, refers to an end that was intentionally made by the speaker, who may still cancel it. In other words, the speaker may voluntarily change the time of ending.

A: 彼の会社、倒産したんだって？

これといった

This expression, which might be literally translated as “like this,” is followed by a negative verb and indicates that there is nothing special or particular about the noun that the phrase modifies.

お彼には、これといった趣味がない。強いて言えば、仕事が彼の趣味だと言えるだろう。

Kare ni wa, kore to itta shumi ga nai. Shiite ieba, shigoto ga kare no shumi da to ieru darō.

He doesn't have any particular hobby. If I had to name one, I would probably say it was his work.

ジミーは、これといった取り柄のある人ではないけれど、なぜかみんなに好かれている。

Jimi wa, kore to itta torie no aru hito de wa nai keredo, naze ka minna ni sukarete iru.

Jimmy doesn't have any particular strong points to speak of, but for some reason everybody likes him.

To modify a verb, これと いって is used in place of これと いった.

A: いらっしゃい。しばらくね。今日は、どんなご用件?
Irasshai. Shibaraku ne. Kyō wa, donna goyōken?

Hi! I haven't seen you for a long time. What can I do for you today?

B: これと いって、別に用はないんだけど、ちょっとあなたに会いたくなかったから。

Kore to itte, betsu ni yō wa nai n' da kedo, chotto anata ni aitaku natta kara.

I don't have any special business to speak of. I just wanted to see you.

そ Words

そ words often refer to an aforementioned statement (see Shoji pp. 34-36).

それは／それが

As seen in the following examples, それ can also refer to a later statement. This is often used in the beginning of a documentary, recollection, or a detective story.

それは、あまりにも突然の出来事だった。横転したレーサーカーのタイヤが自分たちの上に落ちてくるなんて、一体だれが予想できただろう。

Sore wa, amari ni mo totsuzen no dekgoto datta. Ōten shita rēsākā no taiya ga jibun-tachi no ue ni ochite kuru nante, ittai dare ga yosō dekita darō.

Sore ga ne. Ameagari no michi o tōtte 'tara, ushiro kara kuruma ga kite ...

Well, you see, I was walking down this street after the rain had stopped and a car came up from behind ...

それならそうと／それならそれで

These expressions might be literally translated as “if that, even so” and paraphrased as “even so, still,” indicating that even given certain disadvantageous circumstances, some-

thing could still have been done to alleviate the situation. They are commonly used when a speaker wants to complain or to show frustration, disappointment, or anger about something that another party did carelessly, improperly, or inconsiderately. The sentence containing the phrase often ends in のに, はず, or the like. そんなら そうと / そんなら それで are colloquial equivalents.

それならそれで、もっと早く手の打ちようがあったはず
です。

Sore nara sore de, motto hayaku te no uchiyō ga atta hazu desu.

Even so (even if that is true), there must have been something you could have done earlier.

そんなら そうと、早く言えればいいのに。どうして今まで
言わなかったの？

Sonnara sō to, hayaku ieba ii no ni. Dōshite ima made iwanakatta no?

If that's the way it is, you should have told me earlier.
Why did you keep it to yourself till now?

それなら それで、そうと 言ったださればよかったですよ。

Sonnara sore de, sō to itte kudasareba yokatta n' desu yo.

If that's the case, you should have told me so.

それこそ

こそ is a particle used to intensify the preceding word or statement, which in this case is それ. Here, それ refers to a preceding statement. The whole phrase is used to point out the degree or extent of the effect, or result of, what is mentioned in the preceding statement. The statement following the phrase spells out the degree or result.

彼にそんなことを言ったら、それこそ大変なことになるよ。

Kare ni sonna koto o ittara, sore koso taihen na koto ni naru yo.

If you said something like that to him, there would be trouble for sure.

その痛さったら、それこそ言葉では言い表せないぐらい。
Sono itasa ttara, sore koso kotoba de wa iiarawasenai gurai.

The pain of it—it just can't be expressed in words.

Okinawa no umi no iro wa, sore koso me ga sameru yō na aosa datta.

The color of the sea of Okinawa—it was a truly brilliant and dazzling blue (lit., a blue that opens the eyes).

そういえば

This phrase might be literally translated as “if you (or someone) says that” or “if that is said,” but in actual usage the literal meaning of “say” has been almost entirely lost. The connotation is that something (said, heard, felt) has lead by association to another thought, which leads the speaker to recall some matter from his or her memory.

A: あの頃、英語のクラスは人気があったから教室はいつもいっぱいだったよね。

Ano koro, eigo no kurasu wa ninki ga atta kara kyōshitsu wa itsumo ippai datta yo ne.

The English class then was popular, so the classroom was always full, wasn't it.

B: そういえば、あのクラスに淳子さんっていう人、いたでしょう。今どうしてるかしら。

Sō ieba, ano kurasu ni Junko-san tte iu hito, ita deshō. Ima dō shite 'ru kashira.

That reminds me. There was a girl named Junko in the class, right? I wonder what she is doing now.

A: 子供のころ、小さな白黒テレビでよくアメリカのホームドラマを見たね。

Kodomo no koro, chiisana shirokuro-terebi de yoku Amerika no hōmu-dorama o mita ne.

When we were kids, we used to watch dramas centered around American family life on small black and white televisions.

B: そういえば、あのころはカラーテレビなんかなかったんだよね。

Sō ieba, ano koro wa karā-terebi nanka nakatta n' da yo ne.
Now that you mention it, there wasn't any color TV in those days.

そうそう

そう literally means “it is like that,” and そうそう is a simple repetition for emphasis. Both are commonly used to agree with what someone has said, possibly translated, respectively, as “Yes, it is like that” and “Yes, yes, it is like that.” そうそう in particular, however, has another function, which is to indicate that the speaker has suddenly recalled something—a forgotten errand, task, or incident from the past. The phrase is used both when talking to others and when talking to oneself, as illustrated below.

そうそう、ジムからのメッセージが入ってたよ。電話してって。

Sōsō, Jimu kara no messēji ga haitte 'ta yo. Denwa shite tte.
Oh, yes. You got a voice message from Jim. He said to call.

明日は何をするんだったかな。あ、そうそう、郵便局に行かなきゃいけないんだ。

Now, what was I supposed to do tomorrow? Oh, I know. I'm supposed to go the post office.

そうしてみると

Literally the phrase means “when looked at in that way” and refers back to a previous statement that causes the speaker to see things in a new light or which leads to another thought.

A: きのうのテスト、みんなできなかつたんですって。だれもAはとらなかつたそうよ。

Kinō no tesuto, minna dekinakatta n' desu tte. Dare mo A wa toranakatta sō yo.

I heard that no one did well on yesterday's test. They say nobody got an A.

B: そうか。そうしてみると、僕のBは、悪くはないんだよな。
Sō ka. Sō shite miru to, boku no B wa, waruku wa nai n' da yo na.

Is that right? In that case, my B is not so bad, is it.

A: 大雪で新幹線が運行停止になったんだって。昔の汽車は雪なんかで止まったりしなかつたよね。

Ōyuki de Shinkansen ga unkō-teishi ni natta n' da tte. Mukashi no kisha wa yuki nanka de tomattari shinakatta yo ne.

I heard that the bullet trains were held up due to a heavy snowfall. In the old days trains weren't held up by a little snow, were they.

B: そうだよな。そうしてみると、昔の汽車の方が頑丈だったのかな。

Sō da yo ne. Sō shite miru to, mukashi no kisha no hō ga jōbu datta no ka na.

You're right. Thinking about it, I wonder if trains in the old days were more solidly built.

彼の息子がもう35歳……そうして見ると、彼ももうすぐ還暦というわけか。

Kare no musuko ga mō sanjūgo-sai ... sō shite miru to, kare mo mō sugu kanreki to iu wake ka.

His son is already thirty-five.... In that case, he himself must be nearing sixty.

くせ(に)

くせ(に) always implies an emotional reaction or feeling of resentment against the subject on the part of the speaker. When その precedes the phrase, it refers to a previously mentioned or understood matter, statement, or bit of information. Compare the following examples. What the speaker means is the same.

彼は、いつも勝手に人のものを使うくせに、自分のものは絶対に貸してくれないんです。

Kare wa, itsumo katte ni hito no mono o tsukau kuse ni, jibun no mono wa zettai ni kashite kurenai n' desu.

彼は、いつも勝手に人のものを使うんです。そのくせ、自分のものは絶対に貸してくれないんですから。

Kare wa, itsumo katte ni hito no mono o tsukau n' desu. Sono kuse, jibun no mono wa zettai ni kashite kurenai n' desu kara.

He always uses other people's things without permission, but he himself never lends you anything of his own.

のに may be used in place of くせに, but くせに is stronger and harsher. When のに directly follows a noun, it becomes なのに, while くせに becomes のくせに.

ここは静かなのに、眠れない。

Koko wa shizuka na no ni, nemurenai.

It's quiet here, but still I can't sleep.

浩子は小学生のくせに生意気だから、一緒に出かけたくない。

Hiroko wa shōgaku-sei no kuse ni namaiki da kara, issho ni deketaku nai.

For an elementary school kid, Hiroko is such a smart aleck that I don't want to take her out with me.

それはそうと

This expression (lit., with that being like that) is used when the speaker tries to change the topic of conversation. While similar in meaning to ところで ("by the way" or "incidentally") it is more commonly used when the topic relates to something shared by the speaker and the listener.

それはそうと、最近ケンを見かけないけど……。

Sore wa sō to, saikin Ken o mikakenai kedo ...

By the way, I haven't seen Ken around recently.

A: それはそうと、京都で、ばったりジョンに会ったんです。

Sore wa sō to, Kyōto de, battari Jon ni atta n' desu.

By the way, I ran into John in Kyoto.

B: 奇遇ね。驚いたでしょう?

Kigū ne. Odoroita deshō?

What a coincidence! A big surprise for you, I bet.

そんな(あ)

そんな literally means "that kind of" and is commonly used in that sense. However, it is also used—probably more commonly by women—to softly protest or complain about something shocking to the speaker that has suddenly surfaced in the course of conversation. Generally it stands on its own as an independent expression, but a full-blown sentence would read something like one of the following, with the ellipses being replaced by such words as ひどい (awful), 意地が悪い (いじがわるい; mean), 薄情な (はくじょうな; coldhearted), or 冷たい (つめたい; cold).

そんなの／ことを言うのは、……です。

Sonna no/koto o iu no wa, ... desu.

It's ... of you to say something like that.

そんな……ことを言わないでください。

Sonna ... koto o iwanai de kudasai.

Please don't say such a ... thing.

Here are some samples in full-sentence form.

A: また授業料が上がるんだって。

Mata jugyō-ryō ga agaru n' da tte.

I heard that they are going to raise the tuition again.

B: そんな!!

Sonna!!

That's terrible!

A: 来月からお小遣いを減らしますからね。五千円ね。

Raigetsu kara okozukai o herashimasu kara ne. Gosen-en ne.

You'll have less spending money from next month.

Down to ¥5,000.

B: そんな!! それじゃやっつけていけないよ。

Sonna!! Sore ja yatte ikenai yo.

You're kidding! I can't get by on that.

それで／で

それで might be literally translated as “with that” and understood as its truncated form, and they could be paraphrased as “and then” and “and.” They serve as short, convenient ways of encouraging the speaker to continue with his or her story.

A: いい人だと思ったからしばらく付き合ってたんだけど、就職して東京に行っちゃって。

Ii hito da to omotta kara shibaraku tsukiatte 'ta n' da kedo, shūshoku shite Tōkyō ni itte shimatte.

I thought he was a nice person, so I was dating for a while, but he found a job and moved to Tokyo, so ...

B: それで? / へ?

Sore de? / De?

And then?

A: それっきり。

Sore kkiri.

That's the last I heard from him.

As a conjunctive, それで may also be used in a statement to give a reason, meaning “that's why” or “therefore.”

A: きのうは、なぜクラスを休んだんですか。

Kinō wa, naze kurasu o yasunda n' desu ka.

Why didn't you come to class yesterday?

B: すみません。頭がががんとしてどうしても起きられなかったんです。それで仕方なく、アスピリンを飲んで寝ていたんです。

Sumimasen. Atama ga gangan shite dōshite mo okirarenakatta n' desu. Sore de shikata naku, asupirin o nonde nete ita n' desu.

I'm sorry. I had this pounding headache and simply couldn't get up. So I had no choice but to take some aspirin and stay in bed.

それからというもの(は)

This phrase (lit., the thing after that) is similar in meaning to the everyday conjunction それから (“after that”), but whereas それから focuses on a simple sequence of events, それからというもの(は) indicates that some substantive change has taken place since the point of time in question.

今日は、東京駅で待ち合わせて一緒に食事をした。それから渋谷に映画を見に行った。

Kyō wa, Tōkyō-eki de machiawasete issho ni shokuji o shita. Sore kara Shibuya ni eiga o mi ni itta.

Today we met at Tokyo Station and went to eat together. And then we went to Shibuya to see a movie.

それからというもの、おじいさんは、毎日、黄金の入った竹を見つけるようになった。

Sore kara to iu mono, ojiisan wa, mainichi, kogane no haitta take o mitsukeru yō ni natta.

Everyday since that day (when he found a tiny princess inside a shiny bamboo tree), the old man began to find a bamboo tree filled with gold.

それからというもの、彼はまったく車に乗ることをやめてしまった。

Sore kara to iu mono, kara wa mattaku kuruma ni noru koto o yamete shimatta.

Since that day, he completely quit driving.

それ以来 may replace それからというもの(は) :

それ以来、彼はまったく車に乗ることをやめてしまった。

Sore irai, kare wa mattaku kuruma ni noru koto o yamete shimatta.

Since then, he has given up driving altogether.

そのそばから……～ていく / そのそばから……～てしまう

そば (“nearby,” “side”) generally shows location, but when it is followed by から, it indicates that two actions have occurred one after another. The verb preceding そば is in the dictionary form.

余程お腹が空いているとみえて、つくるそばから、食べてしまう。

Yohodo onaka ga suite iru to miete, tsukuru soba kara, tabete shimau.

He must have been awfully hungry. He ate it up as fast as I could make it.

When there is some break between the two activities, the ～た form of a verb is used instead of the dictionary form.

When this happens, ～たと思ったら (“just as I thought”) precedes the phrase and そば is replaced by はし.

やっと工事が済んだと思ったら、済んだはしから又やり直している。

Yatto kōji ga sunda to omottara, sunda hashi kara mata yarinaoshite iru.

Just as I was thinking that they had finally finished the construction work, now they’re starting all over again.

タンポポが可愛い花を咲かせたと思ったら、咲かせたはしから子供たちが摘んで行ってしまった。

Tanpopo ga kawaii hana o sakaseta to omottara, sakaseta hashi kara kodomo-tachi ga tsumande itte shimatta.

Just as I was thinking the dandelions had produced such cute little blossoms, some children came right along and picked them all.

When the verb is understood from context or from an immediately preceding statement, その replaces the verb. The phrase そのそば often follows a verb ending in ～ても (“even if”) and precedes such verb endings as ～てしまう (“completely/unfortunately”) or ～ていく (“keep doing”).

せっかく苗を植えても、そのそばから犬が来て掘り返してしまふ。

Sekkaku nae o uete mo, sono soba kara inu ga kite horikaeshite shimau.

Even though I go to a lot of trouble to plant the seedlings, a dog comes around right after that and digs them up.

どちらかといえば

The phrase literally means “if I say which (of the two)” and is used when the speaker has to make a choice between two things. In casual conversation, どちらかといえば can also be used.

どこそこ

どこそこ (lit., where-there) refers to an unspecified location

or place and might be translated as “so-and-so” or “such-and-such.”

「どこそこのフランス料理はおいしい」とか「どこそこの店は安い」とか、他愛のない話に花が咲いている。

“Dokosoko no furansu ryōri wa oishii” toka “dokosoko no mise wa yasui” toka, tawai no nai hanashi ni hana ga saite iru.

They are engaged in such small talk as “The French cuisine at such-and-such a restaurant is good” or “Things are cheaper at such-and-such a store.”

どこ吹く風

どこ吹く風 (lit., where does the wind blow) is used in reference to someone who could care less about a certain matter, is not interested in hearing about it, and is unaffected by what others say in relation to that matter.

彼女は、なにを言っても「どこ吹く風」だから、話しても無駄です。

Kanojo wa, nani o itte mo “doko fuku kaze” da kara, hanashite mo muda desu.

It's no use talking to her. No matter what you say, it's like water off a duck's back.

Kanako wa, oya no iu koto nanka doko fuku kaze de, aso-biaruite iru.

Kanako is always out having fun, turning a deaf ear to what her parents say.

どこの馬の骨

どこの馬の骨 (lit., bones of a horse from who knows where) refers to someone whose family background is not clear or who is considered of lower social standing. Needless to say, it is used in a highly derogatory sense. It often appears in the phrase どこの馬の骨だかしらないけれど.

彼は、どこの馬の骨だかも分らない男に可愛い娘をとられたとって、ぶつぶつ言っている。

Kare wa, doko no uma no hone da ka mo wakaranai otoko ni kawaii musume o torareta to itte, butsubutsu itte iru.

He keeps grumbling that he lost his dear daughter to some Joe Blow from who knows where.

Anna no, doko no uma no hone da ka shiranai kedo, iya na kanji.

Oh, that creep. I don't know what woodwork he crawled out of, but he sure puts you off.

どこのどいつ

どいつ is the vulgar equivalent of だれ, or "who," and is mainly used by men. Most often it has derogatory connotations.

大事にしていた壺を割ったりしたのはどこのどいつだ!?
Daiji ni shite ita tsubo o wattari shita no wa doko no doitsu da!?

Who in the dickens broke my precious vase?

どこのどいつが言ったのかしらないけど、俺がそんなこと言うはずないだろう。

Doko no doitsu ga itta no ka shiranai kedo, ore ga sonna koto iu hazu nai darō.

I don't know who on earth told you, but you should know better than to think I'd say anything like that.

どこからともなく

どこからともなく (lit., from nowhere at all) tells that something or someone suddenly appears or comes out of nowhere. The opposite is どこへともなく, in which the subject goes away to an uncertain place. In other words, the former suggests that *from where* is uncertain, while the latter suggests that *to where* is uncertain.

あの猫は、夕食の支度を始めると、どこからともなく現れる。

Ano neko wa, yūshoku no shitaku o hajimeru to, doko kara to mo naku arawareru.

Whenever I start preparing supper, that cat appears out of nowhere.

どうにかこうにか／どうやらこうやら

どう means “which way” and こう “this way.” They combine as shown above into set phrases meaning “somehow or other.” They are interchangeable and indicate that the subject is somehow handling a knotty problem or surviving a difficult situation.

A: 新しい仕事、どう?

Atarashii shigoto, dō?

How's your new job?

B: どうにかこうにかやっています。だんだん慣れてきました。

Dō ni ka kō ni ka yatte 'masu. Dandan narete kimashita.

どこまで appears in questions with the meaning “how far.” It can be used both literally and figuratively.

A: この高速道路は、どこまで続いているの?

どこまで～たっけ

っけ is an interrogative ending that indicates the speaker has lost his or her train of thought. The question is addressed either to the speaker him- or herself or to another party. By saying, どこまで～たっけ, the speaker is in effect saying, "Where was I?"

A: ええっと、どこまでいったっけ?

Ētto, doko made itta kke?

Now, where was I?

B: 横浜のレストランに行ったところまで。

Yokohama no resutoran ni itta toko made.

Now, what was I doing? Ah, now I remember. I was going to put this into the word processor.

Other examples of っけ are:

私、そんなこと言ったっけ?

Watashi, sonna koto itta kke?

Did I say that?

何しにきたんだっけ?

Nani shi ni kita n' da kke?

What did I come to do? / What did I come here for?

あれ、誰だっけ?

Are, dare da kke?

Now, who was that? / Now, what was her name?

どことなく

どことなく might be more or less literally translated as "not anywhere specifically" and has the meaning of "in some vague way." It is very similar to なんとなく ("not anything specifically"), but the former generally indicates that the speaker cannot pinpoint "what or where," whereas the latter does not specify "why or how." Both are used to express impressions concerning feelings or appearances.

A: あの子、どことなく島さんに似てると思わない?
Ano ko, doko to naku Shima-san ni nite 'ru to omowanai?
Doesn't that young man over there remind you somehow of Mr. Shima?

B: あたりまえよ。あの子、島さんの息子さんだもの。

今日は、なんとなく疲れちゃった。どうしてかな。
Kyō wa, nan to naku tsukarechatta. Dōshite ka na.
I don't know why, but I feel tired today.

どうしようもない

しようがない literally means "there is no way," but as a set phrase it means "cannot be helped" or "there is no other choice." It often indicates a feeling of regret, disappointment, or frustration. When どう precedes the phrase, the particle が changes to も, and the phrase becomes a more emphatic representation of the speaker's feelings. To add a feeling of being too late or overdue, add もう to the beginning

of the phrase. どうしようもない may be replaced by どうにもならない with little change in meaning.

迎えに来てもらえなかったら、タクシーで行くより仕方がない/しようがない。

Mukae ni kite moraenakattara, takushi de iku yori shikata ga nai/shiyō ga nai.
If no one comes to pick me up, I'll have no choice but to take a taxi.

しようがない人ねえ。

A: Cなんてひどい。Bはくれると思っていたのに。

B: しようがない/しかたがないでしょ。自分がサボってたんだから。

Ima to natte wa, mō dō shiyō mo nai/dō ni mo naranai yo. Iikagen akirameyō.

It's too late to do anything about it now. Let's just forget about it.

どうにも

When どうにも is used with a negative ending, it indicates that nothing can be done to resolve a situation. When it precedes a descriptive word, the ending verb is not negative but the overall connotation is; see the last example below.

どうにもならないことに、いつまでもくよくよしていないで。元気だしなさいよ。

Dō ni mo naranai koto ni, itsu made mo kuyokuyo shite inai de. Genki dashinasai yo.

Don't be continually fretting over things you can't do anything about. Cheer up.

A: あれ、どうにかならないのかしら?

Are, dō ni ka naranai no kashira.

Can't they do something about that?

B: 言ってみただけど、どうにもならないんだっていうのよ。

Itte mita n' da kedo, dō ni mo naranai n' da tte iu no yo.

I mentioned it, but they said nothing could be done.

Kono hen no ie ga hoshii to omotta kedo, dō ni mo takai no de akirameta.

I wanted to buy a house in this area, but they're so awfully expensive I gave up.

どうかすると

どうかすると refers to both possibilities and tendencies. In the first sense, it is often followed by ~可能性がある and ~かねない; in the second sense ~がちだ. ややもすると or ややもすれば can be used in the same way, but only when indicating a tendency, not a possibility.

Kono ude-dokei wa, yaya mo suru to okuregachi nan desu.

This watch tends to be slow.

な Words

While な words do not belong to theこそあど group, there are a number of interesting phrases that should be noted. な words usually appear as interrogatives, such as なに (“what”) and なぜ (“why”). Among the な words, the most commonly used in set phrases is なに.

なにがなんでも

なにがなんでも is used to intensify the following statement, such as a strong intention or an expression of determination. It may be used interchangeably with なにがあるうと.

いったん始めたら、なにがなんでもやり通すべきです。
Ittan hajimetara, nani ga nan de mo yaritōsu beki desu.
Once started, you should carry through at any cost.

欲しいと思ったものはなにがなんでも手に入れるというのがミカの主義らしいです。
Hoshii to omotta mono wa nani ga nan de mo te ni ireru to iu no ga Mika no shugi rashii desu.
It seems that Mika's philosophy of life is to get whatever she wants, no matter what.

何があろうと、必ずまた会いに来ます。
Nani ga arō to, kanarazu mata ai ni kimasu.
No matter what happens, I'll definitely come to see you once again.

なにからなにまで

This phrase means "from A to Z," covering everything. It is often used in regard to gratitude or appreciation.

あの方には、なにからなにまでお世話になり、大変感謝しております。
Ano kata ni wa, nani kara nani made osewa ni nari, taihen kansha shite orimasu.
She took care of everything for me. I appreciate it very much.

なにからなにまで人にやらせておいて、礼も言わない。
Nani kara nani made hito ni yarasete oite, rei mo iwanai.
He has me/you do everything for him but never says a word of thanks.

なにもかも

なにもかも also means "everything," but it often has negative connotations. The difference between なにからなに

まで (discussed immediately above) and なにもかも is that the former looks at the whole in terms of individual units whereas the latter refers to the entire entity.

これでなにもかも終わりです。また一からやり直さなければ。
Kore de nanimo kamo owari desu. Mata ichi kara yari-naosanakereba.
It's all over now. I've got to start all over again from scratch.

いっぺんになにもかもやれって言っても無理ですよ。
Ippen ni nanimo kamo yare tte itte mo muri desu yo.
It's impossible to do everything at once, no matter what you say.

なにもかもいやになった。こんな仕事、もう辞めたいよ。
Nanimo kamo iya ni natta. Konna shigoto, mō yametai yo.
I'm sick and tired of everything. I've had more than enough of this kind of work.

何気なく／何気ない

何気(なにげ)なく／何気ない (lit., no intention whatsoever) indicates that something was done in a very casual manner or unintentionally. Sometimes it refers to a pretense.

彼は、何気ない口調で「結婚しよう」と言った。
Kara wa, nanige nai kuchō de "kekkon shiyō" to itta.
In a casual tone, he said, "Let's get married."

犯人は、隣人を装い何気ない素振りで被害者に話しかけてきたという。
Hannin wa, rinjin o yosooi nanige nai soburi de higaisha ni hanashikakete kita to iu.

何気なく外をみると、いつの間にか雪になっていた。

Nanige naku soto o miru to, itsu no ma ni ka yuki ni natte ita.

When I happened to look outside, I saw it had started to snow.

何が何だか

何が何だか (lit., what is what?) suggests that the speaker is puzzled or confused. It always has a negative connotation.

動転していたので、何が何だか判断する力さえ失っていた。

Dōten shite ita no de, nani ga nan da ka handan suru chikara sae ushinatte ita.

Upset and confused, I didn't know which end was up and couldn't make a decision.

あんまり問題が複雑で、何が何だかわからなくなってしまった。

Anmari mondai ga fukuzatsu de, nani ga nan da ka wakaranaku natte shimatta.

The problem was so complicated that I couldn't tell what was what anymore.

何より

何(なに)より indicates that something is a superlative example of its kind. It is also used in greetings to show that the speaker is pleased about some news or a situation.

私が何より(も)嫌いなのは、ゴキブリです。

Watashi ga nani yori (mo) kirai na no wa, gokiburi desu.

What I hate most are cockroaches.

A: 何もありませんが……。

元気で活躍なさっていらっしゃるとのこと、何よりです。

Genki de katsuyaku nasatte irassharu to no koto, nani yori desu.

I am happy to hear that you have been in good health and are as active as ever.

何分

何分(なにぶん), literally meaning "whatever degree," is used in two ways. One is to replace どうぞ in a request. In this case, the equally formal 何卒(なにとぞ) may replace 何分. In the second usage of 何分, it may be used in explanation or excuse, meaning "after all" or "in any case." 何せ may also be used in this sense.

お忙しいところ申し訳ありませんが、何分/何卒よろしく
お願い申し上げます。

*Oisogashii tokoro mōshiwake arimasen ga, nanibun/

なにかにつけ／なにくれとなく

なにかにつけ (lit., concerning something or other) and なにくれとなく (without this or that) are used in similar ways, both meaning “various” or “sundry.” However, whereas the former has both positive and negative usages, the latter seems to be used mostly in a positive sense.

母は、なにかにつけ愚痴を言う。

Haha wa, nani ka ni tsuke guchi o iu.

My mother complains about all kinds of things.

あの人は、今でもなにかにつけ便りをくれます。

Ano hito wa, ima de mo nani ka ni tsuke tayori o kuremasu.

Senpai ya dōryō ga, nani kure to naku tasukete kureru no de shigoto ga shiyasui desu.

People senior to me and my other colleagues help me in various ways, making my work much easier.

なにやかや(と)

なにやかや(と) is used to list indefinite things, like English “this and that” or “one thing and another.”

なにやかやと雑用に追われていたもので、返事が遅れてしまいました。

Naniya kaya to zatsuyō ni owarete ita mono de, henji ga okurete shimaimashita.

Unfortunately, with all kinds of busy work coming up, I was unable to respond (to your letter) immediately.

What with buying this and that, I ended up spending all of \$500.

IDIOMATIC EXPRESSIONS

Part 2 deals with idiomatic expressions that, on the whole, are not properly explained in textbooks and dictionaries, or are presented in such simple forms that the student remains unprepared for more complicated instances. By definition, idiomatic expressions cannot be understood literally or in a grammatically orthodox manner. Over time they have acquired particular characteristics that must be studied on their own. Here, we discuss and exemplify idiomatic expressions that are commonly found in intermediate textbooks and Japanese language proficiency tests.

いつの間にか

This expression (lit., at whatever time) indicates that something has occurred without the speaker noticing or realizing it. It is often used in a statement about habitual or general phenomena, as seen in the first example below. The ～た form of the verb (indicating past or perfective tense) may occur with ようだ, らしい, or とみえる ("It seems that") when the statement is conjectural.

あの猫は、夕食時になると、いつの間にかどこからか現れるんですよ。

Ano neko wa, yūshoku-doki ni naru to, itsu no ma ni ka doko kara ka arawareru n' desu yo.

Without your realizing it, the cat appears out of nowhere around dinnertime.

外は、いつの間にか、雪になったようだ。

Soto wa, itsu no ma ni ka, yuki ni natta yō da.

It seemed to have started snowing outside without my realizing it.

いつの間にか、列車の網棚に置いてあった鞆がなくなっていた。

Itsu no ma ni ka, ressha no amidana ni oite atta kaban ga nakunatte ita.

Without my realizing it, the bag I had put up on the train rack had disappeared.

～たばかりに……～てしまった／～たばかりに……
～ざるを得なくなった

～たばかりに indicates the sole reason for an adverse result. It is often used in combination with verb endings like ～てしまった, which express the speaker's regret, or the set phrase ～ざるを得ない ("cannot help but do.")

上司にたてついたばかりに、彼は会社を辞めざるを得なくなった。

Jōshi ni tatetsuita bakari ni, kare wa kaisha o yamezaru o enaku natta.

For the simple reason that he stood up to his boss, he finally had no choice but to quit the company.

なまじ ("carelessly," "thoughtlessly," or "halfway") may be added as an intensifier. なまじっか is a colloquial variation.

なまじ金持ちになったばかりに、ジョンの人生は孤独なものとなってしまった。

Namaji kanemochi ni natta bakari ni, Jon no jinsei wa kodoku na mono to natte shimatta.

For the simple reason that John became wealthy, his life turned out to be a lonely one.

なまじっか今日は給料日だなんて口にしたばかりにおご
らせられちゃった／おごらされちゃった。

*Namajikka kyō wa kyūryō-bi da nante kuchi ni shita
bakari ni ogoraserarechatta/ogorasarechatta.*

Just because I carelessly mentioned that today was pay-
day, I had to treat everyone.

下手(を)すると

下手(を)すると (lit., if you do it unskillfully) suggests a worst
case scenario. The statement that follows shows the possi-
ble undesirable outcome.

下手をすると、快復するまでに一カ月はかかるだろうと、
医者に言われた。

*Heta o suru to, kaifuku suru made ni ikkagetsu wa ka-
karu darō to, isha ni iwareta.*

I was told by my doctor that, if worse comes to worst, it
could take a month before I fully recover.

A: この試験の成績、見て。
Kono shiken no seiseki, mite.
Look at these test results.

B: 悪いですねえ。下手すると、高校生より悪いかもしれ
ませんよ。

*Warui desu nē. Heta suru to, kōkō-sei yori warui kamo
shiremasen yo.*

That's bad, isn't it. It's so bad that even a high school
student might do better.

(この雪だと)、下手すると今夜は帰れないかもしれない。
*(Kono yuki da to), heta suru to konya wa kaerenai kamo
shirenai.*

(With this snow) I may not be able to get home tonight,
if worse comes to worst.

せめて

せめて ("at least") expresses the speaker's minimal or least
expectation. ~たい (want to), (~て)ほしい (want some-
thing from someone else), or ~れば／たらいいのに (why
don't you ... /you should ...) may follow.

A: お金があったら、世界旅行するんだけどな。
Okane ga attara, sekai-ryokō suru n' da kedo na.
I'd make a trip around the world if I had the money.

B: 私はせめて一生に一度、海外に行ってみたい。
Watashi wa semete issō ni ichido, kaigai ni itte mitai.
I'd like to go abroad at least once in my life.

これだけ一生懸命勉強しているんだから、せめてBはつ
けてほしいんだけど……。

*Kore dake issō-kenmei benkyō shite iru n' da kara, se-
mete B wa tsukete hoshii n' da kedo.*

Since I'm studying this hard, I hope the teacher will at
least give me a B.

せめて、理由ぐらい言ってやればよかったのに。
Semete, riyū gurai itte yareba yokatta no ni.
You should have at least told her the reason.

~ては

The basic function of ~て is to connect verb phrases (see
also Shoji, pp. 44-66). When ~て is followed by は, it has
the following functions. First, it may be translated as "if":

行ってはいけない。
Itte wa ikenai.

You shouldn't go. (Lit., If you go, things won't turn out
well.)

今さらそんなことを言っては、困ります。

Ima sara sonna koto o itte wa, komarimasu.

It's a little late to be saying something like that. (Lit., If you say such a thing at this time, it may cause a problem.)

It describes a repeated occurrence:

あの子は、いたずらをしては先生を怒らせている。

Ano ko wa, itazura o shite wa sensei o okorasete iru.

That child keeps getting into mischief and making the teacher angry.

落ち葉が、風に吹かれては舞い上がった。

Ochiba ga, kaze ni fukarete wa maiagatta.

Fallen leaves kept dancing in the wind. (Lit., Everytime the wind blew, fallen leaves flew up in the air.)

Compare:

落ち葉が、風に吹かれて舞い上がった。

Ochiba ga, kaze ni fukarete maiagatta.

The wind blew, and fallen leaves flew up into the air.

These two sentences look alike, but they are not necessarily the same. ～ては in the first sentence describes a repetitive occurrence, while ～て in the second sentence is a one-time occurrence. Thus, ～ては has two functions: one, to show cause and two, through the addition of は, to show repetition.

It is important to note that because ～て has other connective functions, its use to indicate cause is somewhat limited (see Shoji pp. 46-48). The relationship of cause and effect has to be fairly clear from context for ～て to function in this capacity. For example, look at these two sentences.

彼女が病氣になって、お見舞いに行くんです。

Kanojo ga byōki ni natte, omimai ni iku n' desu.

She got sick, and I am going to visit her.

雨が降って、行けなかったんです。

Ame ga futte, ikenakatta n' desu.

Due to the rain, I couldn't go.

The first sentence sounds awkward because the relationship between the two events is not clear enough (though clear enough from a strictly logical point of view). In the second sentence, even though it has the same grammatical structure as the first, the relationship of cause and effect is perfectly clear. The first sentence can be made acceptable by changing it in either of the following ways:

彼女が病氣になって、お見舞いに行くことになりました。

彼女が病氣になったので、お見舞いに行くんです。

The point here is that ～て should not be used to indicate cause unless it is absolutely clear (not just in the speaker's mind) that the relationship between the two clauses is one of cause and effect.

あのう

あのう is a filler used when the proper word refuses to come to mind, the speaker is hesitant, or the speaker is attempting to draw someone's attention.

あのう……ご迷惑でなければ、私も一緒に行かせていただけませんか。

Anō ... gomeiwaku de nakereba, watashi mo issho ni ikasete itadakemasen ka.

Excuse me ... if it's not a bother, would you mind if I went along with you?

あのう、すみませんが、田中さんのオフィスはどちらでしようか。

Anō, sumimasen ga, Tanaka-san no ofisu wa dochira deshō ka.

Ah, excuse me, but could you tell me where Mr. Tanaka's office is?

あのう、ここ、空いていますか。

Anō, koko, aite imasu ka.

Excuse me ... is this seat taken?

せいぜい

せいぜい (“at most”) indicates the speaker’s maximum expectations or the limit or range of something, such as price, amount, or ability. It is commonly used with endings such as X までだ (X is the limit), ~ば / ~たらいいほうだ (it’s impossible to expect any more than X), and X ぐらいだ / ぐらいのものだ (what can be expected is just about X). This expression often follows the adverbial phrase ~ても (even if).

遠いといっても、せいぜい三十分もあれば行けます。

Tōi to itte mo, seizei sanjūppun mo areba ikemasu.

You may think it’s far, but you can get there in thirty minutes at most.

高くても、せいぜい五千円ぐらいでしょう。

Takakute mo, seizei gosen-en gurai deshō.

Even if expensive, it’ll be about ¥5,000 at most.

せいぜい一年に一度会えれば、いいほうなんです。

Seizei ichinen ni ichido aereba, ii hō nan desu.

If we can see each other even once a year, we are not doing bad.

あの学生にできるのは、せいぜいこれぐらいだと思う。

Ano gakusei ni dekiru no wa, seizei kore gurai da to omou.

I think this is about the best that student can do.

せいぜい is sometimes used in expressions of goodwill, meaning “as much as possible” or “if nothing else.”

せいぜい旅行をお楽しみください。

Seizei ryokō o otanoshimi kudasai.

Enjoy your trip as much as possible.

少なくとも / 少なくとも

Both 少なくとも and 少なくとも (“at least”) express the speaker’s least expectation, estimate, or a condition. 少なくとも is a little more colloquial than 少なくとも.

少なくとも一時間十ドルは払ってもらえるだろう。

Sukunaku tomo ichijikan jūdoru wa haratte moraeru darō.

They will probably pay me \$10 per hour at least.

忙しいのはわかるけど、少なくともうちに電話ぐらいはすべきだ。

Isogashii no wa wakaru kedo, sukunakute mo uchi ni denwa gurai wa subeki da.

I know you’re busy, but you should at least call home.

ますます / どんどん

どんどん refers to an action, movement, or phenomenon that is carried out energetically or with notable progress. For instance, the sentence 彼女(かのじょ)はどんどん歩(ある)いて行った means “she kept walking on at a steady pace.” This is different from 速(はや)く歩く, where the focus is only on speed. ますます, on the other hand, suggests an increase or acceleration in some quality (e.g., speed, tendency, force, degree) in relation to some previously mentioned or inferred point. For example, 成長(せいちょう)して、彼女(かのじょ)はますますきれいになった (“Growing up, she has gotten prettier and prettier”) suggests that she was pretty even as a child.

意見があったら、どんどん言ってください。

Iken ga attara, dondon itte kudasai.

Sonia wa, masumasu okāsan ni nite kimashita ne.
Sonia looks more and more like her mother.

いくら～からって／いくら～からといって

This phrase, which might be paraphrased as “Just because it's ...,” presents the object that is to be criticized in the rest of the sentence, usually by suggesting that the matter or person in question is excessive or has gone to extremes. It is often followed by a verb such as すぎる (to be excessive, to be too much).

いくらブランド品だからって、これは高すぎます。
Ikura burando-hin da kara tte, kore wa takasugimasu.
Even though it's a brand name, it's still too expensive.

いくら上司だからといって、少し横暴すぎるんじゃない？
Ikura jōshi da kara to itte, sukoshi ōbō sugiru n' ja nai?
Even though he's our boss, he's too high-handed, don't you think?

In an understood context, いくらなんだって or なんぼなんだって may be used interchangeably in conversation, but not in serious writing.

なんぼなんだって、高すぎるよ。
Nanbo nan da tte, takasugiru yo.
No matter what anybody says, it's too expensive.

と言えないことはない／と言えないこともない

This expression, which might be roughly translated as “it is not impossible to say that,” is used to acknowledge another's opinion but, at the same time, to deny it partially by introducing a new and contrary factor. The statement before と is understood from context, and そう (“that”) may replace と.

A: 絶対に有罪だね。無罪になる余地はないよ。
Zettai ni yūzai da ne. Muzai ni naru yochi wa nai yo.
I am sure he's guilty. There is no chance he'll be acquitted.

B: まあ、そう／と言えないこともないけど、彼はいい弁護士が雇えるから……どうかしらねえ。
Mā, sō/to ienai koto mo nai kedo, kare wa ii bengoshi ga yatoeru kara ... dō kashira nē.
Well, you could say that, but he can hire a good lawyer, so I wonder ...

A: あそこの料理、どうだった？ 期待通り？
Asoko no ryōri, dō datta? Kitai dōri?
How was the food there? As good as you expected?

B: まあ、料理はそう言えないこともないけど、ちょっと時間がかかりすぎると思うよ。

Mā, ryōri wa sō ienai koto mo nai kedo, chotto jikan ga kakarisugiru to omou yo.

Well, I think you could say that, but they do take a little too long.

が／は

The particles が and は display subtle differences in usage. As a general rule, が marks the subject of the immediately following verb; if there is only one verb in the sentence, of course が marks the subject of that verb. However, if が marks the subject of a verb in a subordinate sentence, the subject of the main verb will be either specified or understood from context, but will not be that marked by が (see the discussion of commas below for an exception to the rule). The following sentence shows an example in which が marks the subject of the subordinate sentence; the subject of the main sentence is understood from context and is different from that marked by が. (See Shoji, pp. 24–34, for more on は and が.)

私がもう買ったからいいです。

Watashi ga mō katta kara ii desu.

I already bought it, so (understood subject) doesn't need it.

Using this same sentence but substituting は for が, we get a slightly different situation. は marks the subject-topic of the main verb (that of the main sentence), but the subject of the verb in the subordinate sentence is determined by context; it can be the same as that in the main sentence, but it may also be different.

私はもう買ったからいいです。

Watashi wa mō katta kara ii desu.

(“I” or understood subject) already bought it, so I don't need it.

Here are two more contrasting examples with が and は.

私がこの間来た時買いました。

Watashi ga kono aida kita toki kaimashita.

(Understood subject) bought it when I came here the other day.

私はこの間来た時買いました。

Watashi wa kono aida kita toki kaimashita.

I bought it when (“I” or understood subject) came here the other day.

The following two sentences are grammatically the same as the ones above, but there is a logical difference in the sentence containing は. As with the above, it is grammatically possible for the noun marked by は to be the subject-topic of both verbs in the sentence, but since it is logically impossible for 私 to “come here” but also “not be here,” the subject of the main sentence must be someone else, who is understood from context. This is an example of where logic takes precedence over grammar.

私がこの間来た時いませんでした。

Watashi ga kono aida kita toki imasen deshita.

When I came the other day, (understood subject) was not here.

私はこの間来た時いませんでした。

Watashi wa kono aida kita toki imasen deshita.

When (understood subject) came the other day, I was not here.

Usually the role of punctuation in Japanese is not as significant as in English, but when the subject marker が is followed by a comma, the comma is important in that it indicates that the noun marked by が is the subject of the main verb of the sentence and possibly also the verb in the subordinate sentence. It should be noted, however, that

not all writers follow this convention, so that it is possible that sentences without a comma after が should actually be read as if a comma were present.

私が、この間来た時買いました。

Watashi ga, kono aida kita toki kaimashita.

I (am the one who) bought it when ("I" or understood subject) came the other day.

There are other cases when the presence of a comma is important: for instance, after a noun-modifying clause the comma indicates that it is not to modify the following noun but the one after that. In the sentence below, the comma indicates that 八月に開催される modifies not the immediately following 今回, but rather オリンピック.

八月に開催される、今回のオリンピック

hachigatsu ni kaisai sareru, konkai no orinpikku

this coming Olympics that is to be held in August

の

Identifying the grammatical roles of の is of vital importance. の does not always mean "of," though this is, of course, one of its more common meanings. Here are some tips about the usage of の. (See Shoji, pp. 19-24, for more on this topic.)

1. Common noun Proper name/pronoun
 A の B

A and B are in apposition (i.e., explanatory equivalents) or A is modifying B.

医者のジムさん

A B

isha no Jimu-san

Jim, a doctor. Or, Jim who is a doctor.

2. Dictionary form of verb + の (see also #4, below)

Here, の is a nominalizer. In other words, の makes the verb into a noun like an English gerund (... ing) or infinitive (to ...).

行くのはいやだ。

Iku no wa iya da.

I hate to go.

3. Noun の Verb + Noun

の immediately followed by a verb marks the subject. In other words, it has the same function as the subject marker が. Note that adjectives and adjectival nouns (e.g., おいしい, きれい) function in the same manner as verbs in this respect.

私の買った車

A の V N

watashi no katta kuruma

the car that I bought

夕日のきれいな浜辺

N の Adj N

yūhi no kirei na hamabe

a beach where the sunset is beautiful

コーヒーの美味しい店

N の Adj N

kōhi no oishii mise

a coffee shop where the coffee is good

4. ~のは、~です。

A B

In an A-is-B type sentence, when B is a noun, の functions

as a pronominal, and の is defined by B. When B is a descriptive word, の functions as a nominalizer of the preceding verb.

日本に行くのはジョンです。

pronom.は B です。

Nihon ni iku no wa Jon desu.

The one going to Japan is John. (John is the one going to Japan.)

日本に行くのは、来週です。

Nihon ni iku no wa, raishū desu.

The time when I go to Japan is next week. (I go to Japan next week.)

日本に行くのはいやです。

Nihon ni iku no wa iya desu.

I don't want to go to Japan. (Lit., Going to Japan is not desirable.)

これだけの漢字を一日で覚えるのは、無理です。

Kore dake no kanji o ichinichi de oboeru no wa, muri desu.

It is impossible to memorize this many kanji in one day.

In the first sentence above, B is ジョン, so の is a pronominal and replaces 人 (person), while in the second sentence, の replaces 時 (time) because B, 来週, is a time word.

5. ~のです。

The usage of のです (or its variations, んです, のだ, んだ, or simply の) as discussed here changes the tone of a sentence from a direct statement to an explanation or an attempt to persuade. All of these forms occur at the end of a main or subordinate sentence.

すみません。来るつもりだったのですけれど、風邪をひいて寝込んでしまったものだから。

Sumimasen. Kuru tsumori datta no desu keredo, kaze o hiite nekonde shimatta mono desu kara.

I'm so sorry. I was planning to come, but I caught a cold and had to stay in bed.

Or, less formally:

ごめん。来るつもりだったんだけど、風邪をひいて寝込んでしまったの。

Gomen. Kuru tsumori datta n' da kedo, kaze o hiite nekonde shimatta no.

I'm sorry. I was expecting to come, but I caught a cold and ended up in bed.

のです, in the form of ので, can also be used at the end of a clause to offer an explanation for what is to follow in the rest of the sentence. Be careful to note the difference between から, which offers a direct reason, and ので, which offers an explanation. In situations like those represented by the two examples below, either word could be used, although ので would be softer and more indirect.

今晚は宿題がたくさんあるので、早く帰らないといけません。

Konban wa shukudai ga takusan aru no de, hayaku kaeranaï to ikemasen.

I have a lot of homework tonight, so I have to go home early.

すみません。勉強中に停電になったので、宿題が半分しかできませんでした。

Sumimasen. Benkyō-chū ni teiden ni natta no de, shukudai ga hanbun shika dekimasen deshita.

I'm sorry, but right in the middle of my homework we had a power failure, so I could only get half of it done.

When making requests, however, and offering a reason for the request, から is not likely to be used because it lays stress on one's own, egocentric needs and reasons. Thus the fol-

lowing example would not be acceptable, even though it contains an explanatory の.

交換留学生プログラムに申し込みたいの／んですから、推薦状を書いていただけませんか。

Kōkan-ryūgakusei puroguramu ni mōshikomitai no/n' desu kara, suisen-jō o kaite itadakemasen ka.

Since I'd like to apply for the student exchange program, could you possibly write me a letter of recommendation?

In the above sentence, ので would be much better than から, but given the fact that で is still pointing to one's own reasons, it is not perfect. の／んですが or んだけど would be the best solution since they contain the explanatory の as well as が and けど, which simply connect the two clauses without pointing overtly to a personal reason for the request. The following two examples show this in practice, the first being a rewording of the example above.

交換留学生プログラムに申し込みたいの／んですが、推薦状を書いていただけませんか。

Kōkan-ryūgakusei puroguramu ni mōshikomitai no/n' desu ga, suisen-jō o kaite itadakemasen ka.

I would like to apply for the student exchange program, and I was wondering if you could write a letter of recommendation for me.

郵便局まで行きたいんだけど、乗せて行ってくれない？

Yūbin-kyoku made ikitai n' da kedo, nosete itte kurenai?

I'd like to go the post office. Could you give me a ride?

かねない

かねない indicates the possibility of something happening. It is preceded by a pre-ます form (e.g., しかかねない、なりかねない). It is negative in connotation, suggesting that something undesirable may happen in the future. In other words,

this expression indicates feelings of mistrust, worry, or concern on the part of the speaker.

今何とかしなければ、最悪の状態にもなりかねない。

Ima nan to ka shinakereba, saiaku no jōtai ni mo narikannenai.

Unless we do something now, the situation may deteriorate disastrously.

A: あの学生は、よくカンニングするんですよ。

Ano gakusei wa, yoku kanningu suru n' desu yo.

That student often cheats on his tests.

B: 今度もまたしかかねないから、気をつけて。

Kondo mo mata shikanenai kara, ki o tsukete.

He might do it again this time, so keep an eye on him.

かねない and おそれがある (lit., there is a fear that) may be used interchangeably, though the latter is more formal. おそれがある is preceded by the dictionary form instead of a pre-ます form.

最悪の状態になるおそれがある。

Saiaku no jōtai ni naru osore ga aru.

またするおそれがある。

Mata suru osore ga aru.

ということ(は)

ということ (lit., which is to say) is used at the end of sentences in two ways: one, to indicate hearsay, meaning that the speaker is passing on information learned from a third party; and two, in explanation, clarifying or restating what has been stated earlier.

夕べ、富士山に初雪が降ったということです。

Yūbe, Fuji-san ni hatsuyuki ga futta to iu koto desu.

They say that the first snow (of the year) fell on Mt. Fuji last night.

A: すみません。明日は急用ができて来られないんですが。
Sumimasen. Ashita wa kyūyō ga dekite korarenai n' desu ga.
I'm sorry, but some urgent business has come up, so I won't be able to come tomorrow.

B: あした試験を受けられないということですか。
Ashita shiken o ukerarenai to iu koto desu ka.
Does that mean you won't be able to take the test tomorrow?

In its explanatory or clarifying sense, ということ may appear at the beginning of a sentence. The following may be used instead of B in the sample dialogue immediately above.

ということは、あした試験を受けられないんですね。
To iu koto wa, ashita shiken o ukerarenai n' desu ne.
Which is to say, you won't be able to take the test tomorrow. Is that right?

Here are some other examples of this phrase:

A: あしたの朝は、空港まで友達を送りに行かなければいけないもので……。 *Ashita no asa wa, kūkō made tomodachi o okuri ni ikanakereba ikenai mono de ...*

Tomorrow morning I have to go to the airport to see a friend off, so ...

B: ということは、あしたの授業には、出られないということですね。

To iu koto wa, ashita no jugyō ni wa, dararenai to iu koto desu ne.

That means, then, that you cannot attend tomorrow's class.

A: 私は、ああいうタイプの男性は嫌いなよ。
Watashi wa, ā iu taipu no dansei wa kirai na no yo.
I really hate that type of man.

B: ということは、彼とは結婚しないのね。

To iu koto wa, kare to wa kekkon shinai no ne.

Which means, I suppose, that you aren't going to marry him.

行こうか行くまいか／行こうが行くまいが

行こうか行くまいか (lit., whether to go or not) and 行こうが行くまいが (lit., whether [understood subject] goes or not) are exactly the same in structure except for the use of か and が. The first indicates hesitation between two choices; the second suggests that no matter which choice is made, the result will be the same.

A: あしたのパーティ、行く?

Ashita no pāti, iku?

Are you going to the party tomorrow?

B: 今、行こうか行くまいか、迷ってるところ。

Ima, ikō ka iku mai ka, mayotte 'ru tokoro.

I am debating with myself whether I should go or not.

A: 彼女も行くの?

Kanojo mo iku no?

Is she going, too?

B: あんな人、行こうが行くまいが、私の知ったことじゃないわよ。

Anna hito, ikō ga iku mai ga, watashi no shitta koto ja nai wa yo.

Oh, her. Whether she goes or not has nothing to do with me.

Both patterns can take verbs other than 行く, and both can take subjects other than "I," although in the pattern with か, using a subject other than "I" might be considered to be an example of indirect discourse, where the speaker is reporting the thoughts, feelings, or speech of another.

彼女は彼に会おうか会うまいか迷っている。

Kanojo wa kare ni aō ka au mai ka mayotte iru.

She can't make up her mind whether to meet him or not.

Xに入って/Xになって

When X is a time period, に入(はい)って and になって are interchangeable, as in 十月に入って and 十月になって. Both suggest that some kind of change occurred after or since the time period in question began.

十月に入って、やっと涼しい日が続くようになった。

Jūgatsu ni haitte, yatto suzushii hi ga tsuzuku yō ni natta.

Entering October, we finally began to have some cool days.

日本人は、明治になって、ようやく許可なしで国内を移動する自由を与えられた。

Nihonjin wa, Meiji ni natte, yōyaku kyōka nashi de kokunai o idō suru jiyū o ataerareta.

With the coming of the Meiji period, the Japanese people were finally given the freedom to move about the country without special permission.

Xにあって

Xにあって simply means "right in the middle of X" or "during the time period of X." No change from a previous time period is suggested, as it is with に入って and になって.

この不況の時代にあって、あれだけの業績があげられるということは、驚くべきことだ。

Kono fukyō no jidai ni atte, are dake no gyōseki ga agerareru to iu koto wa, odoroku beki koto da.

To produce such results in the midst of this depression is truly astounding.

職場にあっては、上司に口答えをすることなどとてもできなかったのだ。

Shokuba ni atte wa, jōshi ni kuchigotae o suru koto nado totemo dekinakatta no da.

To talk back to one's superior in a place of work was something I simply could not do.

~と思った/~かと思った/~のかと思った

All of these phrases mean "I thought (mistakenly) that ...," with only a slight difference in stress (the stronger on the right). They can be used interchangeably. The phrase is preceded by a dictionary form or a ~た form.

音がしたから、誰か来たかと思ったんだけど、風だった。

Oto ga shita kara, dare ka kita to omotta n' da kedo, kaze datta.

I heard a noise, so I thought someone had come, but it was the wind.

行かないの？ 一緒に行くのかと思ってたわ。

Ikanai no? Issho ni iku no ka to omotte 'ta wa.

You're not going? I thought you'd be going with us.

あのお客さん、ハンドバッグをいろいろ見せてほしいって言うから一つぐらいは買うのかと思った。

Ano okyaku-san, handobaggu o iroiro misete hoshii tte iu kara hitotsu gurai wa kau no ka to omotta.

That customer asked to see various handbags, so I thought she was going to buy at least one.

~と思ったら/~かと思ったら

These two phrases, which essentially mean "Just as I thought (a certain thing had happened)," indicate that at the moment the speaker became aware of something, it

had already ceased to exist or had changed into something else. The first part of the sentence, ending in 思ったら, refers to what the speaker perceived; the second part refers to what happened next or what resulted. In contrast to the phrase かと思っただiscussed immediately above, の cannot precede かと思っただら.

今来たかと思っただら、もう帰ってしまったの？ いったい、何しに来たのかしら。

Ima kita ka to omottara, mō kaette shimatta no? Ittai, nani shi ni kita no kashira.

I thought he had just come. You mean he's left already? I wonder why he came at all.

疲れているとみえて、今床についたと思っただら、もういびきをかいている。

Tsukarete iru to miete, ima toko ni tsuita to omottara, mō ibiki o kaite iru.

Looking tired, he had just gotten into bed I thought, when here he is already snoring.

～が早いか

～が早いか (roughly, "which is quicker?") can be used in place of ～た(か)と思っただら, but the focus here is on what actually happened rather than on what the speaker perceived.

床につくが早いか、いびきをかいて眠っている。

Toko ni tsuku ga hayai ka, ibiki o kaite nemutte iru.

No sooner is he in bed than he is snoring.

彼は、朝食を食べるが早いか、家を飛び出していった。

Kare wa, chōshoku o taberu ga hayai ka, ie o tobidashite itta.

No sooner had he finished eating breakfast than he rushed out of the house.

～次第／～たら、すぐ

Both of these phrases indicate that one thing follows quickly upon another. ～次第 (which literally means "order" or "procedure") is preceded by a pre-ます form, as in 着き次第, and is characteristic of formal or written usage rather than casual conversation. It might be translated as "immediately upon" to bring out its formal nuance. In casual conversation, -たら、すぐ ("as soon as this, that") is more common.

A: ホテルの部屋の電話番号、分かりますか？

Hoteru no heya no denwa-bangō, wakarimasu ka.

Do you know the telephone number of your room at the hotel?

B: まだ分からないんですけど、分り次第そちらにご連絡しますので。

Mada wakaranai n' desu keredo, wakari-shidai sochira ni gorenroku shimasu no de.

I don't know it yet, but as soon as I do, I'll let you know.

A: 今、どこからかけてるの？

Ima, doko kara kakete 'ru no?

Where are you calling from?

B: 新幹線の中。東京駅に着いたらすぐ電話するから迎えに来て。

Shinkansen no naka. Tōkyō-eki ni tsuitara sugu denwa suru kara mukae ni kite.

From the Shinkan-sen (bullet train). I'll call you as soon as I get to Tokyo Station, so come and pick me up.

In the above examples, which involve requests, とすぐ cannot be used (see Shoji, pp. 99-114). とすぐ is possible only with habitual occurrences or routines.

いつも帰るとすぐシャワーを浴びます。

Itsumo kaeru to sugu shawā o abimasu.

As soon as I get back, I always take a shower.

いつも、東京駅に着くとすぐ、電話だけはすることにしています。

Itsumo, Tōkyō-eki ni tsuku to sugu, denwa dake wa suru koto ni shite imasu.

I always call (my family) as soon as I arrive at Tokyo Station.

～なり

～なり has the same etymological roots as the verb 成る (なる; “to become”) and originally referred to a shape or condition. This original meaning gradually took on many forms, as we will see here. In the first two senses below, ～なり is preceded by nouns or adjectives; the following three senses are preceded by verbs.

1. NounなりにV/NなりのN

Here なり has the meaning of a condition suitable or appropriate to the noun that precedes it and can be roughly translated as “to the best of N’s ability” or “in keeping with N’s character.” It is often used to justify behavior or ward off criticism.

それでも、私は私なりに努力しているんです。

Kore de mo, watashi wa watashi nari ni doryoku shite iru n’ desu.

It may not seem like it, but in my own way I am doing my best.

彼には彼なりの考え方があるのだから……。

Kare ni wa kare nari no kangaekata ga aru no da kara ...

He has his own way of thinking, so ...

2. Adjective + なりに

This phrase is similar to the above in that it means “given

the character of the adjective” or “as one might expect from the character of the adjective.” What follows after the phrase indicates what is expected. けれど can be substituted for なりに, though there would be an obvious change in focus.

このセーターは、高いなりにものがいい。

Kono sētā wa, takai nari ni mono ga ii.

The quality of this sweater is good, as you might expect from the price.

それなりのお礼はいたします。

Sore nari no orei wa itashimasu.

I’ll compensate you accordingly (I’ll express my thanks [gratitude] in an appropriate manner).

3. ～なり～なり + sentence-ending verb

This pattern suggests alternatives to be acted upon. ～なり may be preceded by nouns or by verbs in dictionary form. The second verb can be the negative form of the verb that precedes the first なり or it can be a different verb.

とにかく、電話をするなりファックスを送るなり(して)すぐ知らせたほうがいい。

Tonikaku, denwa o suru nari fakkusu o okuru nari (shite) sugu shiraseta hō ga ii.

In any case, you should let them know right away, either by calling or by sending a fax.

会うなり会わないなり、はっきりしなさい。

Au nari awanai nari, hakkiri shinasai.

Whether you’re going to meet her or not, make up your mind.

今夜なり明日の朝なり、ご都合のいい時にお電話ください。

Konya nari ashita no asa nari, gotsugō no ii toki ni odenwa kudasai.

Please call me tonight or tomorrow morning, whichever is convenient.

4. Verb なり + sentence-ending verb

This pattern indicates that two actions happen almost simultaneously.

淳子は、学校から帰ってくるなり泣き出した。
Junko wa, gakkō kara kaette kuru nari nakidashita.
Junko started to cry the moment she got home from school.

先生は、教室に入ってくるなり試験を始めた。
Sensei wa, kyōshitsu ni haitte kuru nari shiken o hajimeta.
The teacher had no sooner entered the classroom than she began the test.

5. ～たなり

In this pattern, なり is preceded by a verb in the た form. The verb indicates that a change has taken place, and なり states that the condition brought about by the verb is still in effect, that no further change has occurred.

彼は、部屋に入ったなり一日中出てこなかった。
Kare wa, heya ni haitta nari ichinichi-jū dete konakatta.
He went into his room and didn't come out all day long.

あの子供の父親は、出稼ぎに行ったなり帰ってこないのだという。
Ano kodomo no chichioya wa, dekasegi ni itta nari kaette konai no da to iu.

They say that the child's father has gone to Tokyo as a seasonal worker and never come back.

Here, ～なり may be replaced by the more colloquial ～きり, again indicating that the condition brought about by the verb remains unchanged.

一郎は、アメリカに行ったきり、帰ってこない。
Ichirō wa, Amerika ni itta kiri, kaette konai.
Ichirō went to America and has never come back.

～(た)まま／～(た)きり／～っぱなし

These three phrases are easily confused in that they all refer to an ongoing state or condition.

1. ～(た)まま

まま indicates a condition that remains unchanged and might be translated "as is." The preceding た verb defines the condition. その etc. can come before まま if its meaning is understood from context.

読む暇がなくて、本を買ったまま置きっぱなしになっている。
Yomu hima ga nakute, hon o katta mama okippanashi ni natte iru.

Since I don't have any time to read, the books I bought are just left sitting there.

五千年も前の遭難者が、雪の中から凍死したままの姿で発見された。
Gosennen mo mae no sōnan-sha ga, yuki no naka kara tōshi shita mama no sugata de hakken sareta.

A man who had met with a fatal accident some five thousand years ago was discovered unchanged (as he was) since freezing to death in the snow.

包まなくても、そのままでけっこうです。
Tsutsumanakute mo, sono mama de kekkō desu.

You don't have to wrap it. It's fine as it is.

2. ～たきり

～たきり may be used in much the same way as ～たまま, but the focus is placed on the discontinuation of the action indicated by the verb (きり meaning "cut-off"). In other words, something was done, but nothing occurred afterwards, and the original condition continues.

父は、徴兵されたきり帰ってこなかったのです。

Chichi wa, chōhei sareta kiri, kaette konakatta no desu.

My father was drafted and never came back.

あの子ったら、お使いに行ったきりなのよ。

Ano ko ttara, otsukai ni itta kiri na no yo.

That little rascal! She went out on a errand and hasn't come back.

彼女と最後に会ったのは、去年の暮れでした。それきり音沙汰がないんです。

Kanojo to saigo ni atta no wa, sakunen no kure deshita. Sore kkiri otosata ga nai n' desu.

It was at the end of last year when I met her last. I haven't heard a word from her since.

3. ~っぱなし

This phrase also refers to an ongoing condition, but it generally indicates an active ongoing state rather than a static one. It often connotes criticism, implying that the condition in question is the result of laziness, sloppiness, or carelessness.

出しっぱなしにしないで、読み終わったら本棚に戻しておきなさいよ。

Dashippanashi ni shinai de, yomiowattara hondana ni modoshite okinasai yo.

Don't leave them lying around like that. When you're done reading, put them back on the bookshelf.

手紙を書きっぱなしにして、出すのを忘れていた。

Tegami o kakippanashi ni shite, dasu no o wasurete ita.

I left the letter I wrote lying there and forgot to send it.

電気をつけっぱなしにしないでね。

Denki o tsukeppanashi ni shinai de ne.

Don't forget to turn the lights off. (Lit., Don't leave the light turned on.)

~たとたんに

とたん can be paraphrased as "exactly at that moment," and thus the whole phrase (preceded by a た verb) is similar to なり and が早いか. However, in the case of A ~たとたんに B, the subject of A and B cannot be the same, whereas the subject of A なり B is usually the same.

ひかり31号は、彼が飛び乗ったとたんに／飛び乗るが早いか、発車した。

Hikari sanjūichi-gō wa, kare ga tobinotta totan ni/tobinoru ga hayai ka, hassha shita.

As soon as he jumped aboard, Hikari No. 31 (bullet train) departed.

彼は、部屋に荷物を置くが早いか／置くなり、また出て行ってしまった。

Kare wa, heya ni nimotsu o oku ga hayai ka/oku nari, mata dete itte shimatta.

As soon as he had put his luggage in his room, he went out again.

おずおず(と)／おどおど(と)／びくびく(と)

Although these three onomatopoeic words are characterized by hesitation, nervousness, or timidity, there are certain differences.

1. おずおず(と)

This describes an action that is carried out with hesitation due to worry or lack of confidence. The action described is not expansive, but shrinking and withdrawn.

先生に名前を呼ばれた新入生は、おずおずとクラス全員の前に立ってあいさつをした。

Sensei ni namae o yobareta shinnyū-sei wa, ozuozu to kurasu zen'in no mae ni tatte aisatsu o shita.

The new student whose name was called out by the teacher timidly stood in front of the class and introduced himself.

少年がおそおそと開いて見せた手のひらには、一羽のひな鳥がいた。

2. おどおど(と)

おどおど describes an action characterized by nervousness or restlessness due to tension or apprehension.

Hajimete okugai ni tsuredasareta koinu wa, odoodo shita metsuki de atari o mimawashite iru.

The puppy, taken outside for the first time, is looking around him nervously.

Kanningu o shite yobidasareta gakusei wa, odoodo to kyōin-shitsu ni haitte kita.

Having been summoned after cheating on a test, the student nervously entered the teachers' room.

3. びくびく(と)

The primary meaning of びくびく is to tremble physically, but here we are concerned with the psychological aspect of the word, which might be paraphrased as "an inner trembling." In this case, the fear comes from the expectation that something bad is going to happen. This fear may not be apparent to others, distinguishing this word from

the otherwise very similar おどおど, which indicates an action always apparent on the surface. In the first example below, what the fugitive fears is that he will be apprehended.

自首してきた逃亡犯は、びくびくしながら暮らすことに耐えられなくなったのだと言った。

Jishu shite kita tōbō-han wa, bikubiku shinagara kurasu koto ni taerarenaku natta no da to itta.

Shaking in his shoes, the fugitive turned himself over to the police, saying that he could no longer bear the life he was leading.

Shukudai o shite konakatta no de, sensei ni namae o yobaretara dō shiyō ka to, bikubiku shite ita.

Because I didn't do my homework, I was worried to death that the teacher might call my name.

途中／中途

Although these two compounds are often translated as "halfway," they are not necessarily interchangeable. 途中 simply means "on one's way to" or "in the middle of," while 中途 implies that something is "half done," that it has been left uncompleted or unfinished. It has a negative tone.

仕事の途中で人に来られてしまったもので、予定通り仕上げるができなかった。

Shigoto no tochū de hito ni korarete shimatta mono de, yotei-dōri shiageru koto ga dekinakatta.

Because someone came to see me in the middle of my work, I was unable to finish it as planned.

渋谷駅に行く途中(で)竹下さんに会いましたけど、元気そうでした。

Kanojo wa, shigoto ga chūto de mo, jikan ga kuru to sassa to kaette shimau n' desu yo.

中途半端 is also commonly used in various situations, with its negative implications even clearer than 中途.

彼女は、二つの文化の中で育ったので、どちらも半分半分で中途半端になっているところがあるようだ。

Kanojo wa, futatsu no bunka no naka de sodatta no de, dochira mo hanbun hanbun de chūto-hanpa ni natte iru tokoro ga aru yō da.

Because she was raised in two cultures, with each half learned, in some ways it seems she knows neither completely.

Yamada-kun wa, itsumo yoji-han ni naru to, kaette itte shimau n' desu. Shigoto ga chūto-hanpa de mo, ki ni naranai rashii desu ne.

Yamada always goes home at 4:30. It seems that he doesn't mind if the work is only half done.

彼の考え方が中途半端なので、いらいらします。

Kare no kangaekata ga chūto-hanpa na no de, iraira shimasu.

His thinking is so half-baked that I get frustrated.

(今にして) 思えば

今にして思えば ("now that I think about it") is followed by a description of something that happened or existed in the past and shows the speaker's emotional involvement and subjective interpretation of the matter. Although the speaker did not take the matter seriously at the time, he or she now becomes aware of its value or significance. This statement may imply regret, compassion, or some other such emotion.

今にして思えば、あんな人の口車に乗った自分が恥ずかしい。

Ima ni shite omoeba, anna hito no kuchiguruma ni notta jibun ga hazukashii.

～じみた

～じみた is derived from the verb 染みる(じみる), which has the primary meaning of “to dye” and secondary meanings of “to stain,” “to smack of,” “to look like,” and “to act like.” It is the secondary meanings that are carried over into the suffix ～じみた, which usually has a negative connotation.

Sonna toshiyori-jimita iikata, shinai de.
Don't talk like an old man in that way.

いい年してそんな子供じみたことをするの、やめなさいよ。

Heya no naka ni wa, aka-jimita shatsu dake ga okippa-nashi ni natte ita.

Only a filthy shirt was left lying in the room.

Xだらけ/Xまみれ

だらけ indicates 1) that there is a lot of X, or 2) that X is scattered completely over a surface. The connotations are negative. まみれ indicates that X is smeared over a surface,

making it filthy. This meaning overlaps with the second meaning of だらけ, though they each, of course, retain their own nuances. Another difference between the two is that the X in Xだらけ may refer to either countable or uncountable items, while the X in Xまみれ refers generally only to uncountable items. In the first two examples below, the two are basically interchangeable.

子供達が泥まみれになって遊んでいる。
Kodomo-tachi ga doro-mamire ni natte asonde iru.
The children are playing, all covered with mud.

Murabito-tachi ga kizu-darake ni natte taorete ita tabibito o tasuketa.

煩(わづら)わしい

煩わしい, which might be translated as “troublesome,” “irk-some,” or “vexing,” describes the speaker’s feelings in regard to a certain matter, usually one that is complicated and difficult to deal with, such as human relations in the workplace.

髪の毛が長いと、煩わしいからいやなんです。

Kami no ke ga nagai to, wazurawashii kara iya nan desu.

Isogashikute, sonna wazurawashii koto ni wa kakawatte ru hima nante nai desu yo.

I am too busy to get involved in a troublesome matter like that.

うるさい

うるさい may be translated as “noisy,” but the cause of annoy-

ance is not always sound. When it is sound, うるさい indicates that the sound is irritating. Secondly, the word indicates that somebody or something is bothering the speaker by being persistent, unrelenting, or fussy.

夕べは、隣の部屋の話し声がうるさくて眠れなかった。

Yūbe wa, tonari no heya no hanashi-goe ga urusakute, nemurenakatta.

I wasn’t able to sleep last night because the people next door were talking so loud.

Ano jōshi wa, urusai koto bakari iu no de kirawarete iru.

When the cause of annoyance is a noise or voice, やかましい may be more commonly used.

隣のパーティーがやかましくて、眠れない。

Tonari no pāti ga yakamashikute, nemurenai.

I can’t sleep because of the ruckus from the party next door.

工事の音がやかましいんですけど、窓を閉めてもらえませんか。

Kōji no oto ga yakamashii n' desu kedo, mado o shimete moraemasen ka.

The noise from the construction work is getting on my nerves. Would you mind closing the window?

せっかく

せっかく is used, first, to express appreciation for someone's kindness or goodwill. Second, it may indicate disappointment that one's goodwill was not appreciated by the party on the receiving end. Third, it may simply indicate disappointment that one's efforts in some endeavor did not result in success.

せっかくのご厚意、ありがたくお受けします。

Sekkaku no gokōi, arigataku ouke shimasu.

I am very grateful for your solicitude on my behalf.

せっかく招待してくれたんだから、行ったほうがいいよ。

Sekkaku shōtai shite kureta n' da kara, itta hō ga ii yo.

Since they so kindly invited you, I think you should go.

せっかく晴れたんだから、散歩にでも行こうよ。

Sekkaku hareta n' da kara, sanpo ni de mo ikō yo.

Since the weather has cleared up, let's take advantage of it and go for a walk.

せっかく来てくださったのに、留守をされていてごめんなさい。

Sekkaku kite kudasatta no ni, rusu o shite ite gomennasai.

Sekkaku no ryokō ga taifū de dai-nashi ni natte, hontō ni gakkari shita.

The typhoon completely wrecked the trip I had planned. What a disappointment!

わざわざ

わざわざ may be used in situations similar to that of せっかく, but they are not always interchangeable. Even if they are used in the same situation, the speaker's focus will be different. わざわざ refers to a physical act or the time spent for that act, while せっかく mainly refers to the doer's kindness or goodwill.

わざわざ切符を買いに行ったのに、売り切れてしまっていたのがっかりした。

Wazawaza kippu o kai ni itta no ni, urikirete shimatte ita no de gakkari shita.

Though I went all the way there to buy a ticket, I was disappointed to find them all sold out.

わざわざ高い入場料を払って買ったのに、ヤンキースが負けちゃった。

Wazawaza takai nyūjō-ryō o haratte haitta no ni, Yankisu ga makechatta.

Here I paid a mint to buy these expensive tickets, but the Yankees lost.

Although *せっかく* could be substituted for *わざわざ* in the sentences above (with the aforementioned change in focus), it could not in the following dialogue because appreciation is being shown specifically for the time and trouble it took to bring over the mail, not for a general act of goodwill.

A: お宅の郵便が間違って配送されたもので。
Otaku no yūbin ga machigatte haisō sareta mono de.
Your mail got delivered to us by mistake, so ...

B: あ、どうもわざわざすみません。
A, dōmo wazawaza sumimasen.
Thank you for taking the trouble.

よほど／よっぽど

よほど and *よっぽど* basically mean “by far” and are used for comparison. They are interchangeable, but the latter is more emphatic and typical of the spoken language.

A: あれ、どう？
Are, dō?
How about that one?

B: あれ？ だめ。これのほうがよっぽどいいよ。
Are? Dame. Kore no hō ga yoppodo ii yo.
That one? No way. This is much better.

Either word may indicate difficulty in making a decision or choice.

A: あの赤い車、買ったの？
Ano akai kuruma, katta no?
Did you buy that red car?

B: ん。気に入ったから、よほど買おうかと思ったんだけどね、赤いのは、やっぱりちょっとはで過ぎるよ。

N. Ki ni itta kara, yohodo kaō ka to omotta n' da kedo ne, akai no ha, yappari chotto hade sugiru yo.

Yeah, I liked it a lot, so I was really thinking of buying it, but red is a little too flashy after all.

よほど and *よっぽど* can indicate speculation based on observation or secondhand information.

A: 彼、もう居眠りしてるよ。
Kare, mō inemuri shite 'ru yo.
He's already dozing off.

B: よっぽど疲れているんだね。
Yoppodo tsukarete iru n' da ne.
He must be really tired.

In this example, B is offering an opinion based on A's observation, but in the following example, the observation is made by the speaker.

もう居眠りを始めたところを見ると、よほど疲れているらしい。

Mō inemuri o hajimeta tokoro o miru to, yohodo tsukarete iru rashii.

He must be really tired. He's already started to doze off.

かえって

かえって is often translated as “rather” or “all the more,” but “instead” or “contrary to expectation” would be more accurate in *AかえってB* patterns in which B indicates a result or outcome that is opposed to, or different from, the speaker's or common expectation.

A: 薬飲んだ？

Kusuri nonda?

You take the medicine?

B: 薬を飲んだら、かえって気分が悪くなっちゃた。

Kusuri o nondara, kaette kibun ga waruku natchatta.

I took it, but I feel worse instead.

かえって is often used in combination with こちらこそ (“I am the one who ...”) in polite expressions such as the following:

A: 手伝っていただいて、ありがとうございます。

Tetsudatte itadaite, arigatō gozaimasu.

Thank you very much for helping out.

B: いいえ。かえってこちらこそごちそうになってしまって。

Iie. Kaette kochira koso gochisō ni natte shimatte.

Oh, don't mention it. Rather I should thank you for the lovely meal.

AことはB(けど/が)C

In this pattern, A and B are the same word: for example, いく is いく けど. A rough English equivalent might be, “As to the matter of going, well, I am going, but” or, more simply, “I *am* going, but.” This partially acknowledges the validity of what the other party has said, but then goes on to point out that there are other factors to consider.

A: どうしたの？ 買い物にいったんじゃないの？

Dō shita no? Kaïmono ni itta n' ja nakatta no?

What happened? I thought you went shopping.

B: 行ったことは行ったけど、あんまり込んでいますから帰ってきちゃったの。

Itta koto wa itta n' da kedo, anmari konde iru kara kaette kitchatta no.

I did go, but it was so crowded that I came back.

A: 新しいレストラン、どうだった？ おいしかった？

Atarashii resutoran, dō datta? Oishikatta?

How was the new restaurant? Was it good?

B: おいしいことはおいしいけど、私にはちょっと高すぎる。

Oishii koto wa oishii kedo, watashi ni wa chotto takasugiru.

It was good all right, but a little too expensive for me.

No, rather than beer ... I actually prefer sake if I have a choice.

今ごろ／今ごろになって

今ごろ shares with このごろ the meaning “these days,” but it has another meaning that it does not share, which is “about now” or “right now.” It is often related to the speaker’s thoughts about what is happening at this moment somewhere else. 今ごろになって carries this a step further, usually in a critical fashion, as we will see below.

【今ごろの若い者は何を考えているのかさっぱり分からない】と、祖父がぼやいています。

“*Ima goro no wakai mono wa nani o kangaete iru no ka sappari wakaranai*” to, *sofu ga boyaiite imasu.*

My grandfather often complains, saying, “I don’t understand what young people these days are thinking.”

A: あの人、今ごろ、何してるかな。

Ano hito, ima goro, nani shite ’ru ka na.

I wonder what he is doing (right) now.

B: 今、向こうは朝の十時ごろだから、もう仕事してるんじゃない？

Ima, mukō wa asa no jūji goro da kara, mō shigoto shite ’ru n’ ja nai?

Now it’s about 10:00 in the morning over there, so he’s already working, I guess.

A: あと十分早く来ていたら、今ごろは、もう東京駅に着いていたのに……。

Ato juppun hayaku kite itara, ima goro wa, mō Tōkyō-eki ni tsuite ita no ni ...

If you had come ten minutes earlier, we’d be at Tokyo Station by now.

B: ごめんなさい。寝坊しちゃったのよ。

A: 去年の今ごろは、箱根に行ってたんだよね。

Kyonen no ima goro wa, Hakone ni itte ’ta n’ da yo ne.

About this time last year, we were in Hakone, weren’t we.

B: 覚えてる。桜がきれいだったわね。

Oboete ’ru. Sakura ga kirei datta wa ne.

I remember. The cherry blossoms were lovely, weren’t they.

今ごろになって is usually followed by an ending that expresses the speaker’s frustration, regret, or a complaint, implying “It’s too late now ...”

A: 若いうちに、もっとまじめに英語の勉強しておけばよかった……。

Wakai uchi ni, motto majime ni Eigo no benkyō shite okeba yokatta ...

I should have studied English more seriously when I was young.

B: 今ごろになってそんなこといっても、もう手遅れよ。

Ima goro ni natte sonna koto itte mo, mō teokure yo.

A: 切符、売り切れだって。あの試合、見たかったのがっかりだなあ。

B: 今ごろになってそんなこと言ったって、どうにもならないよ。

Ima goro ni natte sonna koto itta tte, dō ni mo naranai yo.

It’s a little late to be complaining now. There’s nothing you can do about it.

以(もって)

以(もって) is characteristic of the written language or of formal or official usage. In less formal situations, で may replace it.

1. To end or close an event.

本日は、これをもって閉会といたします。

Honjitsu wa, kore o motte heikai to itashimasu.

Today we hereby bring these proceedings (this conference etc.) to a close.

2. To tell "with what" or "by means of what."

I apologize for communicating by letter. (I know I should personally come to see you, but I cannot.)

皆の力をもってすれば、不可能なことではない。

Mina no chikara o motte sureba, fu-kanō na koto de wa nai.

3. To spell out the subject.

彼の研究をもって学界の定説としている。

Kare no kenkyū o motte gakkai no teisetsu to shite iru.

His research has become the establish theory in the academic world.

Verb + しかない

When しかない follows a noun, as in 本(ほん)しかない, it indicates that there is nothing but a 本. When it follows a verb, it indicates that there is only one choice, that represented by the verb.

A: 私は、明日もあさっても忙しくてだめ。

Watashi wa, ashita mo asatte mo isogashikute dame.

Both tomorrow and the day after are no good for me.
I'm too busy.

B: そう。それじゃあ、きょう行くしかないね。
