

## **GEA-NUS Pharmaceutical Technology Conference, Singapore, December 17 – 19, 2007**

GEA-NUS Pharmaceutical Processing Research Laboratory (PPRL) will hold a 10<sup>th</sup> Anniversary Commemorative Conference, December 17 – 19, in Singapore. GEA-NUS PPRL was established at the Department of Pharmacy, National University of Singapore (NUS) and is jointly funded by the National Science and Technology Board (NSTB, currently A\*STAR), NUS and GEA (Aeromatic-Fielder) to serve as an independent research center for pharmaceutical R&D. With a comprehensive range of pilot-scale equipment and analytical instruments, GEA-NUS PPRL has been serving as a successful platform for the transfer of innovative formulation sciences and advanced process technology to the pharmaceutical industry. In the past decade, GEA-NUS PPRL has also pro-

duced many well-trained individuals, especially through post-graduate education, with a solid foundation in pharmaceutical technology. In celebration, GEA-NUS Commemorative Pharmaceutical Technology Conference will cover recent developments in the pharmaceutical industry, particularly in the area of process analytical technology, manufacturing sciences, and research in novel drug delivery systems. Renowned academics and industry experts from all over the world will be sharing their expertise and research findings. There will be a focus on containment technologies by GEA - Niro Pharma Systems.
