

## Correction to Creating Water Vapor Barrier Coatings from Hydrophilic Components

Gerald Findenig, Simon Leimgruber, Rupert Kargl,\* Stefan Spirk, Karin Stana-Kleinschek, and Volker Ribitsch

*ACS Appl. Mater. Interfaces* **2012**, *4* (6), 3199–3206; 10.1021/am300542h

All water vapor transmission rate (WVTR) values in this publication refer to a substrate size of 0.25 m<sup>2</sup> instead of 1 m<sup>2</sup>. The WVTR unit in this publication should therefore be g 0.25 m<sup>-2</sup> day<sup>-1</sup>. The authors apologize for this calculation error.
