

Correction to Synergistic Anticancer Activity of Fluorescent Copper Nanoclusters and Cisplatin Delivered through a Hydrogel Nanocarrier

Rama Ghosh, Upashi Goswami, Siddhartha Sankar Ghosh, Anumita Paul,* and Arun Chattopadhyay*

ACS Appl. Mater. Interfaces 2015, 7 (1), 209–222. DOI: 10.1021/am505799q

Pages 214 and 215. A calculation mistake in the FFT analysis has been realized and hence is corrected herein. Thus, the last sentence in second column (p 214) is to be read as “Further, high-resolution TEM (HRTEM) analysis did not reveal the clear lattice fringes for the smaller particles; however, for some of the bigger particles (with diameter >2 nm), fringes with lattice spacing 0.28 nm, corresponding to the (110) plane of CuO (Figure 3A, inset i and ii) could be observed.” The caption of Figure 3A is to be read as “Figure 3. (A) TEM image of as-synthesized Cu NCs (with 10 nm scale bar). Inset i is the HRTEM images of a large CuO nanoparticle and ii IFFT image of the nanoparticle with lattice spacing of 0.28 nm corresponding to the (110) plane of CuO.” The X-axis in Figure 10A should be read as “Cu NCs in Hydrogel composite”.

In addition, in the figure caption of Figure S4, the naming of line 2 and line 3 has mistakenly been interchanged. Thus, the figure caption of Figure S4 is to be read as “Quantum yield (Q_y) determination of as-synthesized Cu NCs with respect to quinine sulfate as the reference. Line 1 represents data for quinine sulfate, line 2 represents data for as-synthesized Cu NCs at pH 8.5, and line 3 represents data for Cu NCs at pH 4.5.” An incorrect figure had been uploaded in the Supporting Information and is corrected herein. Thus, Figure S17 is to be replaced by the following figure.

The above corrections, however, do not alter the conclusions of the article.

Figure S17.
