

Correction to the Cover Caption for Volume 14, Issue 2

M.G. Finn, Editor-in-Chief

ACS Comb. Sci. **2012**, *14* (2), cover caption.

The February, 2012, issue of *ACS Combinatorial Science* featured a cover image highlighting the work of Marcaurelle and colleagues (“A Build/Couple/Pair Strategy for the Synthesis of Stereochemically Diverse Macrolactams via Head-to-Tail Cyclization”). The explanatory caption for that cover was inadvertently omitted from the printed edition. It is reproduced here, with our apologies.

“Great art picks up where Nature ends.” –Marc Chagall.

Just as Nature serves as inspiration in art, it also serves as inspiration in chemistry. Macrocyclic natural products were a source of inspiration in the design of a library of stereochemically diverse macrolactams using a “build/couple/pair” synthesis strategy. The cover graphic was created by Peter Marcaurelle (info@marcaurellephotography.com).

See Mark E. Fitzgerald, Carol A. Mulrooney, Jeremy R. Duvall, Jingqiang Wei, Byung-Chul Suh, Lakshmi B. Akella, Anita Vrcic, and Lisa A. Marcaurelle, pp 89–96.
