

Correction to Focused Fluorescent Probe Library for Metal Cations and Biological Anions

Hyun-Woo Rhee, Sang-Wook Lee, Jun-Seok Lee, Young-Tae Chang,* and Jong-In Hong*

ACS Comb. Sci. 2013, 15 (9) 483–490. DOI: 10.1021/co400034x

S Supporting Information

Two schemes were omitted in the Supporting Information (Scheme 1 and Scheme 2) of the original paper. They have been included in the Supporting Information attached to this correction. In addition, an unnecessary yellow mark, on the first page of the Supporting Information was removed.

■ ASSOCIATED CONTENT

S Supporting Information

Preparation of combinatorial building blocks, characterization of probes, fluorescence excitation and emission spectra, binding affinity of probes to each metal cation, fluorescence spectrum change, metal probes' fluorescence response to pH change, fluorescence cellular imaging, expanded version of Figure 1, Job's plot, NMR spectra, absorption spectra, and fluorescence spectra. This material is available free of charge via the Internet at <http://pubs.acs.org>.
