

## Correction to Growth Dynamics for DNA-Guided Nanoparticle Crystallization

[*ACS Nano* **2013**, *7*, 10948–10959.

DOI: 10.1021/nn404476f]. Subas Dhakal, Kevin L. Kohlstedt, George C. Schatz, Chad A. Mirkin, and Monica Olvera de la Cruz\*

This article was submitted to *ACS Nano* with animations showing temporal evolution of the bcc crystallite growth. The first animation (nn404476f\_si\_002.avi) shows how Wulff shapes emerge by slowly cooling the system below the melting temperature and the subsequent coalescence of faceted grains, and the second animation (nn404476f\_si\_003.avi) demonstrates the coalescence of two bcc grains. However, the animation files were inadvertently omitted in the version of the article published on November 26, 2013. The animation files were discussed and described in the original publication and have now been added to the Supporting Information files that accompany the article online.
