

Correction to Two-Dimensional Tin Selenide Nanostructures for Flexible All-Solid-State Supercapacitors [*ACS Nano* 2014, 8, 3761–3770. DOI: 10.1021/nn5004315]. Chunli Zhang, Huanhuan Yin, Min Han,* Zhihui Dai, Huan Pang,* Yulin Zheng, Ya-Qian Lan, Jianchun Bao,* and Jianmin Zhu

In the main body, pages 3767 and 3768, the units of the X-axis for Figure 4C,D and Figure 6 should be E (V) or Potential (V) rather than E (V) vs. SCE. Similarly, on the page S10 and page S11 of the Supporting Information section, the units of the Y-axis for Figure S10A,B and the units of the X-axis for Figure S11 should be E (V) or Potential (V) rather than E (V) vs. SCE. These are due to the typing errors, and the changes do not affect any parameters and conclusions in this paper.
