Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Role of Constraints in Inverse Design for Transonic Airfoils J84-347
The Circular Cylinder in Subsonic and Transonic Flow J84-339
Analysis of Airfoil Leading-Edge Separation Bubbles J84-337
Mass Flux Boundary Conditions in Linear Theory J84-334
Supersonic Axisymmetric Flow over Boattails Containing a Centered Propulsive Jet J84-286
Numerical Simulation of Wing-Fuselage Aerodynamic Interaction J84-283
A New Aerodynamic Integral Equation Based on an Acoustic Formula in the Time Domain J84-280
Separation Jump and Sudden Stall over an Ellipsoidal Wing at Incidence J84-278
A Source-Equality Kutta Condition for Panel Methods J84-246
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232
Supersonic Conical Separation Due to Shock Vorticity J84-230
Higher Order Strip Integral Method for Three-Dimensional Boundary Layers J84-210
Porous Airfoils in Transonic Flow J84-209
Transonic Full Potential Solutions by an Integral Equation Method J84-194
Aerodynamic Properties of a Two-Dimensional Inextensible Flexible Airfoil J84-191
Turbulent Spot Growth in Favorable Pressure Gradients J84-177
Progress Toward a Model to Describe Jet/Aerodynamic-Surface Interference Effects J84-160
Boundary-Layer Calculations in the Inverse Mode for Incompressible Flows over Infinite Swept Wings J84-155
Experimental Studies of the Separated Flow over a NASA GA(W)-1 Airfoil J84-108
Investigation of Mixing in a Turbofan Exhaust Duct, Part II: Computer Code Application and Verification J84-104
Laser Holographic Interferometry for an Unsteady Airfoil Undergoing Dynamic Stall J84-100
Aerodynamics of Wings in Supersonic Shear Flow J84-091
Hypersonic Interactions with Surface Mass Transfer - Part II: Unsteady Flow J84-090
Hypersonic Interactions with Surface Mass Transfer - Part I: Steady Flow J84-089
Effect of Boundary Layers on Solid Walls in Three-Dimensional Subsonic Wind Tunnels J84-071
Investigation of the Conical Flowfield Around External Axial Corners J84-069
Lateral Aerodynamics of Delta Wings with Leading-Edge Separation J84-064
Turbulent Flow over Vehicles at Angle of Attack J84-063
Sidewall Effects on Airfoil Tests J84-052
The Inverse Problem for Supersonic Airfoils J84-051
Overall Aerodynamic Performance of an Annular Flat-Plate Airfoil Cascade J84-044
Asymmetric Flowfield Development on a Slender Body at High Incidence J84-043
Rule of Forbidden Signals in a Two-Dimensional Supersonic Compressor Cascade J84-030
Three-Dimensional Turbulent Boundary-Layer Development on a Fan Rotor Blade J84-012
Maximum Likelihood Estimation of Turbulence Spectrum Parameters J84-006
A Vortex-Lattice Method for Calculating Longitudinal Dynamic Stability Derivatives of Oscillating Delta Wings J84-001

Aeroelasticity

Planar Towing and Hydroelastic Stability of Faired Underwater Cables J84-350
Flutter and Forced Response of Mistuned Rotors Using Standing Wave Analysis J84-329
Flutter of Turbofan Rotors with Mistuned Blades J84-324
An Automatic Adaptive Numerical Method for Lifting Surface Theories J84-289
General Equations of Motion for an Elastic Wing and Method of Solution J84-243
Aerodynamic Properties of a Two-Dimensional Inextensible Flexible Airfoil J84-191
Flutter Analysis of Advanced Turbopropellers J84-171
Buffeting of a Slender Circular Beam in Axial Turbulent Flows J84-136
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017
Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190
Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations J83-052
A New Solution Method for Lifting Surfaces in Subsonic Flow J82-062

Configuration Design

Classical Normal Modes in Asymmetric Nonconservative Dynamic Systems J84-220

Fuels and Fuel Systems

Influence of Laminar Flame Speed on the Blowoff Velocity of Bluff-Body-Stabilized Flames J84-298
LDV Measurements of Drop Velocity in Diesel-Type Sprays J84-267

Helicopters

The Calculation of Transonic Rotor Noise J84-212
Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces J83-197

Landing Dynamics

Limit Cycle Oscillations of a Nonlinear Rotorcraft Model J84-206

Noise

Effect of Angle of Attack on Rotor Trailing-Edge Noise J84-357
Multiple Pure Tone Generation in Aeroengine Fans at Subsonic and Supersonic Relative Tip Speeds J84-287
Geometry and Static Flow Effects on Acoustic Radiation from Ducts J84-235
Vane Stagger Angle and Camber Effects in Fan Noise Generation J84-233
The Calculation of Transonic Rotor Noise J84-212
Experiments on Sound Radiation from a Duct with a Circumferentially Varying Liner J84-167
Relationship Between Static, Flight, and Simulated Flight Jet Noise Measurements J84-093
Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces J83-197
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134

Performance

Thrust Augmenting Ejectors, Part I J83-262

Propeller and Rotor Systems

Effect of Angle of Attack on Rotor Trailing-Edge Noise J84-357
A New Aerodynamic Integral Equation Based on an Acoustic Formula in the Time Domain J84-280
Structural Dynamics of Rotating Bladed-Disk Assemblies Coupled with Flexible Shaft Motions J84-276
Flutter Analysis of Advanced Turbopropellers J84-171
Optimization of Propeller Blade Twist by an Analytical Method J84-045

Structural Design (including Loads)

Effects of Orthotropy and Width on the Compression Strength of Graphite-Epoxy Panels with Holes J84-271
Novel Concepts for Constraint Treatments and Approximations in Efficient Structural Synthesis J84-205
Generalized Modal Shock Spectra with Indeterminate Interface J84-175
Design Sensitivity Analysis Strain Energy via Distribution J84-111
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139

Structural Materials

Buckling of Anisotropic Laminated Cylindrical Plates J84-327
Injection into a Turbulent Boundary Layer Through Different Porous Surfaces J84-178
Effects of 50,000 h of Thermal Aging on Graphite/Epoxy and Graphite/Polymide Composites J84-014

Testing, Flight and Ground

Methods of Reference Basis for Identification of Linear Dynamic Structures J84-112
Effect of Boundary Layers on Solid Walls in Three-Dimensional Subsonic Wind Tunnels J84-071

Vibration

Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Steady-State Response of Vibrating Systems to Periodic Pulse Excitation J84-281

Structural Dynamics of Rotating Bladed-Disk Assemblies Coupled with Flexible Shaft Motions J84-276
Thermal Effect on Axisymmetric Vibrations of an Orthotropic Circular Plate of Variable Thickness J84-221
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part II: Numerical Results J84-207
Limit Cycle Oscillations of a Nonlinear Rotorcraft Model J84-206
Effect of Thermal Gradient on Frequencies of a Wedge-Shaped Rotating Beam J84-182
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part I: Theoretical Analysis J84-172
Dynamic Condensation J84-145
Balancing Flexible Rotating Shafts with an Initial Bend J84-135
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017
Flutter of Orthotropic Panels in Supersonic Flow Using Affine Transformations J83-052
Finite Elements for Initial Value Problems in Dynamics J81-258

Energy

Combustion

Calculation of Turbulent Diffusion Flame Using the Coherent Flame Sheet Model J84-336
A Comparison of Vaporization Models in Spray Calculations J84-299
Influence of Laminar Flame Speed on the Blowoff Velocity of Bluff-Body-Stabilized Flames J84-298
Numerical Solution for the Problem of Flame Propagation by the Random Element Method J84-296
Numerical Simulation of Convective Combustion of Ball Powders in Strong Confinement J84-169
Turbulent Properties of a Flat-Plate Boundary Layer with a Diffusion Flame J84-132
Time-Resolved Density Measurements in Premixed Turbulent Flames J84-131
Further Time-Mean Measurements in Confined Swirling Flows J84-102
Radiative Heat Transfer in Segregated Media J84-062
Trajectory of Particles Rebounding Off Plane Targets J84-039
Flow Visualization in Combustion Gases Using Nitric Oxide Fluorescence J84-028
Secondary Effects in Combustion Instabilities Leading to Flashback J84-011

Cryogenics

Thermal Conductance of Pressed Copper Contacts at Liquid Helium Temperatures J84-354
Thermoacoustic Convection Heat-Transfer Phenomenon J84-223

Lasers

Blackbody-Pumped CO_2 Laser Experiment J84-268
DF-Laser Pulse Breakdown Induced by Maritime Aerosols J84-238
Effect of Reactant-Surface Stretching on Chemical Laser Performance J84-009

Magnetohydrodynamics

Load Change Characteristics of the Discharge Structure in Noble Gas MHD Channels J84-123
Ionization Relaxation in a Closed-Cycle MHD Generator J84-068
Laser Diagnostics for Flowfields, Combustion, and MHD Applications J84-032

Reciprocating Machinery

Formation and Destruction of Vortices in a Motored Four-Stroke Piston-Cylinder Configuration J84-203

Rotating Machinery

Flutter of Turbofan Rotors with Mistuned Blades J84-324
A "Similarity" Solution for Laminar Swirling Core Flows J84-140
Balancing Flexible Rotating Shafts with an Initial Bend J84-135
Optimization of Propeller Blade Twist by an Analytical Method J84-045
Trajectory of Particles Rebounding Off Plane Targets J84-039

Fluid Dynamics

Aeroacoustics

Thermal Performance of a Logarithmic-Spiral Resonance Tube J84-358
Effect of Angle of Attack on Rotor Trailing-Edge Noise J84-357
Wave Envelope and Infinite Element Schemes for Fan Noise Radiation from Turbofan Inlets J84-340
Numerical Simulation of Near-Critical and Unsteady, Subcritical Inlet Flow J84-288
Multiple Pure Tone Generation in Aeroengine Fans at Subsonic and Supersonic Relative Tip Speeds J84-287
A New Aerodynamic Integral Equation Based on an Acoustic Formula in the Time Domain J84-280
An Experimental Investigation of Wake Edge Tones J84-265
Two-Dimensional Acoustic Field in a Nonuniform Duct Carrying Compressible Flow J84-264
Uniform Asymptotic Approximations for Duct Acoustic Modes in a Thin Boundary-Layer Flow J84-263
An Acoustic Evaluation of Circumferentially Segmented Duct Liners J84-262
Acoustic Near-Field Properties Associated with Broadband Shock Noise J84-259
Geometry and Static Flow Effects on Acoustic Radiation from Ducts J84-235
Vane Stagger Angle and Camber Effects in Fan Noise Generation J84-233
The Calculation of Transonic Rotor Noise J84-212
Acoustic Nonlinearities and Power Losses at Orifices J84-168
Experiments on Sound Radiation from a Duct with a Circumferentially Varying Liner J84-167
Acoustic Measurements in High-Speed Subsonic Jets J84-162
Recovery of Burner Acoustic Source Structure from Far-Field Sound Spectra J84-128
Relationship Between Static, Flight, and Simulated Flight Jet Noise Measurements J84-093
Jet Noise Modification by the "Whistler Nozzle" J84-067
Jet Noise at Low Reynolds Number J84-035
A New Method for Calculating Ducted Flows J84-021
The Optical Quality of Shear Layers: Prediction and Improvement Thereof J84-008
Aeroacoustic Computation of Cylinder Wake Flow J84-007
Derivation of the Fundamental Equation of Sound Generated by Moving Aerodynamic Surfaces J83-197
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134

Boundary Layers and Convective Heat Transfer-Laminar

Surface Phenomena in a Three-Dimensional Skewed Shock Wave/Laminar Boundary-Layer Interaction J84-346
Application of the Implicit MacCormack Scheme to the Parabolized Navier-Stokes Equations J84-345
Lift Hysteresis of an Oscillating Slender Ellipse J84-342
Prediction of Compressible, Laminar Viscous Flows Using a Time-Marching Control Volume and Multiple-Grid Technique J84-317
Heat Transfer and Transition Mechanism on a Shock-Tube Wall J84-310
Separation Jump and Sudden Stall over an Ellipsoidal Wing at Incidence J84-278
Further Solutions in Streamwise Corner Flow with Wall Suction J84-247
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234
Frozen-Plasma Boundary-Layer Flows over Adiabatic Flat Plates J84-217
Similar Solutions and Integral Quantities of the Rotating Compressible Laminar Boundary Layer J84-158
Thermally Developing Laminar Flow in a Duct with External Radiation and Convection J84-146
A Local Similarity Solution for the Viscous Boundary-Layer Flow Longitudinal to a Cylinder J84-141
Supersonic Separated Flow past a Cylindrical Obstacle on a Flat Plate J84-125
Separation Criteria for Three-Dimensional Boundary-Layer Calculations J84-109
Free Liquid Surface Response Induced by Fluctuations of Thermal Marangoni Convection J84-081
Frozen Plasma Boundary-Layer Flows over Isothermal Flat Plates - Parametric Study J84-053
Calculations of Viscous Transonic Flow over Airfoils J84-037
Supersonic Compressive Ramp Without Laminar Boundary-Layer Separation J84-004

Boundary Layers and Convective Heat Transfer-Turbulent

Linearization of Turbulent Boundary-Layer Equations J84-356
Measurements of Turbulent Flow Behind a Flat Plate Mounted Normal to the Wall J84-355
A Characteristics Approach to Swept Shock-Wave/Boundary-Layer Interactions J84-325

Effect of a Buried-Wire Gage on the Separation Bubble--Numerical Study J84-312
Heat Transfer and Transition Mechanism on a Shock-Tube Wall J84-310
Turbulence Modeling for Three-Dimensional Shear Flows over Curved Rotating Bodies J84-295
A Wall Law for Turbulent Boundary Layers in Adverse Pressure Gradients J84-290
Quasisteady Modeling of Periodic Turbulent Pipe Flows J84-285
Wall Shear Fluctuations in a Turbulent Boundary Layer J84-279
The Structure of Turbulence in a Supersonic Shock-Wave/Boundary-Layer Interaction J84-266
Comparison of Three Radiative Formulations for Interactions in Three-Dimensional Boundary Layers J84-244
Digital Image Filtering in Visualized Boundary Layers J84-240
Turbulent Boundary Layer Behind Constant Velocity Shock Including Wall Blowing Effects J84-229
Prediction of Transonic Separated Flows J84-215
Nikuradse's Experiment J84-214
Scaling and Modeling of Three-Dimensional, Pressure-Driven Turbulent Boundary Layers J84-198
Turbulence Measurements in a Compressible Reattaching Shear Layer J84-195
Three-Dimensional Flow Simulations for Supersonic Mixed-Compression Inlets at Incidence J84-193
Turbulent Boundary-Layer Relaxation with Application to Skin-Friction Drag Reduction J84-192
Explicit Representations of the Complete Velocity Profile in a Turbulent Boundary Layer J84-180
Momentum/Heat-Transfer Analogy for Turbulent Boundary Layers in Mild Pressure Gradients J84-179
Injection into a Turbulent Boundary Layer Through Different Porous Surfaces J84-178
Turbulent Spot Growth in Favorable Pressure Gradients J84-177
Flow and Heat Transfer Measurements Along a Cooled Supersonic Diffuser J84-166
Mean Streamwise Spacing of Organized Structures in Transitional and Developed Bounded Turbulent Flows J84-164
Boundary-Layer Calculations in the Inverse Mode for Incompressible Flows over Infinite Swept Wings J84-155
The Nondimensional Coefficient of Thermal Conductivity J84-153
Supersonic Separated Flow past a Cylindrical Obstacle on a Flat Plate J84-125
Hot-Wire Investigation of an Unseparated Shock-Wave/Turbulent Bounday-Layer Interaction J84-121
A Laser Interferometer for Measuring Skin Friction in Three-Dimensional Fows J84-110
Separation Criteria for Three-Dimensional Boundary-Layer Calculations J84-109
Mesolayer Theory for Turbulent Flows J84-083
Effect of Boundary Layers on Solid Walls in Three-Dimensional Subsonic Wind Tunnels J84-071
Balance of Turbulent Energy in the Linear Wall Region of Channel Flow J84-057
Contribution to the Reynolds Stress Model as Applied to Near-Wall Region J84-055
Injection-Induced Turbulence in Stagnation-Point Bounday Layers J84-040
Calculations of Viscous Transonic Flow over Airfoils J84-037
Cylindrical and Conical Flow Regimes of Three-Dimensional Shock/Bounday-Layer Interactions J84-036
Wall Mass Transfer and Pressure Gradient Effects on Turbulent Skin Friction J84-022
Three-Dimensional Turbulent Boundary-Layer Development on a Fan Rotor Blade J84-012
Unsteady Turbulent Boundary Layers in Adverse Pressure Gradients J84-003
Numerical Computations of Turbulence Amplification in Shock-Wave Interactions J84-002

Boundary-Layer Stability and Transition

Analysis of Airfoil Leading-Edge Separation Bubbles J84-337
Wavelength Selection and Growth of Gortler Vortices J84-311
Heat Transfer and Transition Mechanism on a Shock-Tube Wall J84-310
Gortler Instability of Compressible Boundary Layers J84-284
Turbulent Spot Growth in Favorable Pressure Gradients J84-177
Mean Streamwise Spacing of Organized Structures in Transitional and Developed Bounded Turbulent Flows J84-164
Separation Criteria for Three-Dimensional Boundary-Layer Calculations J84-109
A Nonlinear Structural Concept for Drag-Reducing Compliant Walls J84-077
Calculation of Three-Dimensional Instability of a Blasius Boundary Layer J84-054
Instability of Compressible Bounday Layers Along Curved Walls with Suction or Cooling J84-038

Computational Methods

Linearization of Turbulent Boundary-Layer Equations J84-356
Role of Constraints in Inverse Design for Transonic Airfoils J84-347
Application of the Implicit MacCormack Scheme to the Parabolized Navier-Stokes Equations J84-345
A General Perturbation Approach for Computational Fluid Dynamics J84-344
Computation of Strongly Swirling Axisymmetric Free Jets J84-343
Grid Adaption for Problems in Fluid Dynamics J84-338
Calculation of Turbulent Diffusion Flame Using the Coherent Flame Sheet Model J84-336
Mass Flux Boundary Conditions in Linear Theory J84-334
Application of the Godunov Method and Its Second-Order Extension to Cascade Flow Modeling J84-322
A Time-Split Finite-Volume Algorithm for Three-Dimensional Flowfield Simulation J84-316
A Class of Bidiagonal Schemes for Solving the Euler Equations J84-315
Effect of a Buried-Wire Gage on the Separation Bubble--Numerical Study J84-312
Grid Generation Techniques in Computational Fluid Dynamics J84-309
Turbulence Modeling for Three-Dimensional Shear Flows over Curved Rotating Bodies J84-295
Interactive Phenomena in Supersonic Jet Mixing Problems, Part II: Numerical Studies J84-292
Symbolic Manipulation and Computational Fluid Dynamics J84-291
An Automatic Adaptive Numerical Method for Lifting Surface Theories J84-289
Supersonic Axisymmetric Flow over Boattails Containing a Centered Propulsive Jet J84-286
Quasisteady Modeling of Periodic Turbulent Pipe Flows J84-285
Viscous-Inviscid Interactive Procedure for Rotational Flow in Cascades of Airfoils J84-270
Second-Order Accurate Boundary Conditions for Compressible Flows J84-261
A Source-Equality Kutta Condition for Panel Methods J84-246
New Implicit Boundary Procedure--Theory and Applications J84-236
A Hybrid Explicit-Implicit Numerical Algorithm for the Three-Dimensional Compressible Navier-Stokes Equations J84-231
Supersonic Conical Separation Due to Shock Vorticity J84-230
Numerical Simulation of Two-Dimensional Unsteady Transonic Flows Using the Full-Potential Equation J84-228
A New Consistent Spatial Differencing Scheme for the Transonic Full-Potential Equation J84-227
Comparison of Measured and Predicted Transonic Flow Around an Airfoil J84-226
Nozzle Flow Using the Galerkin Finite Element Method J84-216
Prediction of Transonic Separated Flows J84-215
Axisymmetric Nonconical Supersonic Potential Flow with Embedded Subsonic Regions J84-213
Higher Order Strip Integral Method for Three-Dimensional Boundary Layers J84-210
Porous Airfoils in Transonic Flow J84-209
Improved Design of Subcritical and Supercritical Cascades Using Complex Characteristics and Boundary-Layer Correction J84-204
Formation and Destruction of Vortices in a Motored Four-Stroke Piston-Cylinder Configuration J84-203
Pseudospectral Solutions of One- and Two-Dimensional Inviscid Flows with Shock Waves J84-200
The Baldwin-Lomax Turbulence Model for Two-Dimensional Shock-Wave/Boundary-Layer Interactions J84-199
Calculations of a Plane Turbulent Jet J84-196
Transonic Full Potential Solutions by an Integral Equation Method J84-194
Three-Dimensional Flow Simulations for Supersonic Mixed-Compression Inlets at Incidence J84-193
Nonisentropic Potential Formulation for Transonic Flows J84-165
A New and Improved Computational Technique for Two-Dimensional, Unsteady, Compressible Flows J84-163
Boundary-Layer Calculations in the Inverse Mode for Incompressible Flows over Infinite Swept Wings J84-155
The Nondimensional Coefficient of Thermal Conductivity J84-153
Closed-Form Model for Three-Dimensional Vacuum Plumes from a Scarfed Nozzle J84-142

Conical, Noncircular, Second-Order, Potential Theory of Supersonic Flow J84-126
A Contribution to the Numerical Prediction of Unsteady Flows J84-124
Analysis of Two-Dimensional Viscous Flow over Cylinders in Unsteady Motion J84-122
Numerical Calculation of Unsteady Transonic Potential Flow over Three-Dimensional Wings with Oscillating Control Surfaces J84-096
Investigation of Mixing in a Turbofan Exhaust Duct, Part I: Analysis and Computational Procedure J84-073
Three-Dimensional Grid Generation Using Elliptic Equations with Direct Grid Distribution Control J84-070
A Nonlinear Hybrid Vortex Method for Wings at Large Angle of Attack J84-065
Turbulent Flow over Vehicles at Angle of Attack J84-063
Contribution to the Reynolds Stress Model as Applied to Near-Wall Region J84-055
The Inverse Problem for Supersonic Airfoils J84-051
Finite Area Method for Nonlinear Supersonic Conical Flows J84-041
An Embedded-Mesh Potential Flow Analysis J84-033
Behavior of the Flow Through a Numerically Captured Shock Wave J84-026
Eddy Viscosity Models for Wakes and Separated Flows J84-024
Nonunique Solutions to the Transonic Potential Flow Equation J84-023
Aeroacoustic Computation of Cylinder Wake Flow J84-007
Maximum Likelihood Estimation of Turbulence Spectrum Parameters J84-006
Supersonic Compressive Ramp Without Laminar Boundary-Layer Separation J84-004
Numerical Computations of Turbulence Amplification in Shock-Wave Interactions J84-002
A Low Mach Number Euler Formulation and Application to Time-Iterative LBI Schemes J83-268
Generalized Coordinate Forms of Governing Fluid Equations and Associated Geometrically Induced Errors J82-243

Hydrodynamics

Laser-Driven Shock Waves in an Aerosol-Induced Breakdown in Air J84-348
Gortler Instability of Compressible Boundary Layers J84-284
Vortex Stability and Breakdown: Survey and Extension J84-258
Turbulent Nonreacting Swirling Flows J84-181
Free Liquid Surface Response Induced by Fluctuations of Thermal Marangoni Convection J84-081
Two Types of Instream Stagnation J84-066
Instability of Compressible Bounday Layers Along Curved Walls with Suction or Cooling J84-038

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Measurements of Turbulent Flow Behind a Flat Plate Mounted Normal to the Wall J84-355
Computation of Strongly Swirling Axisymmetric Free Jets J84-343
Analysis of Airfoil Leading-Edge Separation Bubbles J84-337
Application of Photon Correlation to Turbulent Fluid Mechanics J84-335
Interferometric Measurement of Heterogeneous Shear-Layer Spreading Rates J84-314
Experiments in Dilution Jet Mixing J84-297
Interactive Phenomena in Supersonic Jet Mixing Problems, Part II: Numerical Studies J84-292
Supersonic Axisymmetric Flow over Boattails Containing a Centered Propulsive Jet J84-286
Viscous-Inviscid Interactive Procedure for Rotational Flow in Cascades of Airfoils J84-270
LDV Measurements of Drop Velocity in Diesel-Type Sprays J84-267
The Structure of Turbulence in a Supersonic Shock-Wave/Boundary-Layer Interaction J84-266
An Experimental Investigation of Wake Edge Tones J84-265
Acoustic Near-Field Properties Associated with Broadband Shock Noise J84-259
A Quasivariational Principle for Fluid-Solid Interaction J84-249
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232
A Hybrid Explicit-Implicit Numerical Algorithm for the Three-Dimensional Compressible Navier-Stokes Equations J84-231
The Baldwin-Lomax Turbulence Model for Two-Dimensional Shock-Wave/Boundary-Layer Interactions J84-199
Interactive Phenomena in Supersonic Jet Mixing Problems, Part I: Phenomenology and Numerical Modeling Techniques J84-197
Calculations of a Plane Turbulent Jet J84-196
Acoustic Measurements in High-Speed Subsonic Jets J84-162
Progress Toward a Model to Describe Jet/Aerodynamic-Surface Interference Effects J84-160
A Fast Viscous Correction Method for Unsteady Transonic Flow About Airfoils J84-157
Closed-Form Model for Three-Dimensional Vacuum Plumes from a Scarfed Nozzle J84-142
A "Similarity" Solution for Laminar Swirling Core Flows J84-140
Two-Component LDA Measurement in a Two-Phase Turbulent Jet J84-127
Hot-Wire Investigation of an Unseparated Shock-Wave/Turbulent Bounday-Layer Interaction J84-121
Interaction of Gun Exhaust Flowfields J84-103
Limit Amplitude of Galloping Bluff Cylinders J84-098
Prediction of the Intermittency Factor for Turbulent Shear Flows J84-097
Relationship Between Static, Flight, and Simulated Flight Jet Noise Measurements J84-093
Effects of Viscosity and Surface Tension on a Jet Plume in Supersonic Crossflow J84-092
Hypersonic Interactions with Surface Mass Transfer - Part II: Unsteady Flow J84-090
Hypersonic Interactions with Surface Mass Transfer - Part I: Steady Flow J84-089
Ignition in Gun Exhaust Plumes J84-085
An Enhanced Flow Visualization Technique for Planar Free Shear Layers J84-084
Investigation of Mixing in a Turbofan Exhaust Duct, Part I: Analysis and Computational Procedure J84-073
Comparison of Temperature and Velocity Spectra in a Slightly Heated Turbulent Plane Jet J84-059
Jet Noise at Low Reynolds Number J84-035
Eddy Viscosity Models for Wakes and Separated Flows J84-024
A Theoretical and Experimental Investigation of a Transonic Projectile Flowfield J84-005
Thrust Augmenting Ejectors, Part I J83-262

Multiphase Flows

Blowing Model for Turbulent Boundary-Layer Dust Ingestion J84-318
LDV Measurements of Drop Velocity in Diesel-Type Sprays J84-267
Dusty Hypersonic Flow past Thick Wedges J84-139
Two-Component LDA Measurement in a Two-Phase Turbulent Jet J84-127

Nonsteady Aerodynamics

Thermal Performance of a Logarithmic-Spiral Resonance Tube J84-358
Lift Hysteresis of an Oscillating Slender Ellipse J84-342
Forced Oscillations of Transonic Channel and Inlet Flows with Shock Waves J84-319
Effect of a Buried-Wire Gage on the Separation Bubble--Numerical Study J84-312
An Automatic Adaptive Numerical Method for Lifting Surface Theories J84-289
Numerical Simulation of Near-Critical and Unsteady, Subcritical Inlet Flow J84-288
Quasisteady Modeling of Periodic Turbulent Pipe Flows J84-285
General Equations of Motion for an Elastic Wing and Method of Solution J84-243
Digital Image Filtering in Visualized Boundary Layers J84-240
Vane Stagger Angle and Camber Effects in Fan Noise Generation J84-233
Numerical Simulation of Two-Dimensional Unsteady Transonic Flows Using the Full-Potential Equation J84-228
Application of Riemann Problem Solvers to Wave Machine Design J84-219
Shock Shape over a Sphere Cone in Hypersonic High Enthalpy Flow J84-218
A Flutter Eigenvalue Program Based on the Newton-Raphson Method J84-211
A Fast Viscous Correction Method for Unsteady Transonic Flow About Airfoils J84-157
A Contribution to the Numerical Prediction of Unsteady Flows J84-124
Analysis of Two-Dimensional Viscous Flow over Cylinders in Unsteady Motion J84-122
Unsteady Newton-Busemann Flow Theory - Part IV: Three Dimensional J84-120
Vortex Motion in Axisymmetric Piston-Cylinder Configurations J84-101
Laser Holographic Interferometry for an Unsteady Airfoil Undergoing Dynamic Stall J84-100
Limit Amplitude of Galloping Bluff Cylinders J84-098
Numerical Calculation of Unsteady Transonic Potential Flow over Three-Dimensional Wings with Oscillating Control Surfaces J84-096

Forced Oscillation Experiments in Supercritical Diffuser Flows J84-094
Hypersonic Interactions with Surface Mass Transfer - Part II: Unsteady Flow J84-090
Two Types of Instream Stagnation J84-066
A Nonlinear Hybrid Vortex Method for Wings at Large Angle of Attack J84-065
Lateral Aerodynamics of Delta Wings with Leading-Edge Separation J84-064
Doublet-Point Method for Supersonic Unsteady Lifting Surfaces J84-034
A Uniformly Valid Asymptotic Solution for Unsteady Subresonant Flow Through Supersonic Cascades J84-029
Aeroacoustic Computation of Cylinder Wake Flow J84-007
A New Solution Method for Lifting Surfaces in Subsonic Flow J82-062

Nozzle and Channel Flow

Application of the Godunov Method and Its Second-Order Extension to Cascade Flow Modeling J84-322
Forced Oscillations of Transonic Channel and Inlet Flows with Shock Waves J84-319
Experiments in Dilution Jet Mixing J84-297
Numerical Simulations of Unsteady Transonic Flow in Diffusers J84-242
Prediction of the Flowfield in Laser Propulsion Devices J84-237
Frozen-Plasma Boundary-Layer Flows over Adiabatic Flat Plates J84-217
Nozzle Flow Using the Galerkin Finite Element Method J84-216
Flow and Heat Transfer Measurements Along a Cooled Supersonic Diffuser J84-166
A New and Improved Computational Technique for Two-Dimensional, Unsteady, Compressible Flows J84-163
Performance Prediction of High-Inlet-Blockage Diffusers J84-156
Forced Oscillation Experiments in Supercritical Diffuser Flows J84-094
Balance of Turbulent Energy in the Linear Wall Region of Channel Flow J84-057
A New Method for Calculating Ducted Flows J84-021
The Optical Quality of Shear Layers: Prediction and Improvement Thereof J84-008

Plasmadynamics and MHD

Ion Flow Experiments in a Multipole Discharge Chamber J84-313
A Model for Mercury Orificed Hollow Cathodes: Theory and Experiment J84-293
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234
Current Distribution in a Quasisteady MPD Arcjet with Various Anode Geometries J84-159
Load Change Characteristics of the Discharge Structure in Noble Gas MHD Channels J84-123
Ionization Relaxation in a Closed-Cycle MHD Generator J84-068
Nonequilibrium Arc Modeling J84-025
Atmospheric Propagation of Two CO2 Laser Pulses J84-010

Radiatively Coupled Flows and Heat Transfer

Unsteady Radiative Heat Transfer in a Scattering-Dominant Medium J84-353
Ablation of Carbonaceous Materials in a Hydrogen-Helium Arcjet Flow J84-306
Comparison of Three Radiative Formulations for Interactions in Three-Dimensional Boundary Layers J84-244
Prediction of the Flowfield in Laser Propulsion Devices J84-237
Two-Dimensional Material Response of a Transpiration-Cooled System in a Radiative/Convective Environment J84-176
Radiative Heat Transfer in Segregated Media J84-062

Rarefied Flows

Purging Flow Protection of Infrared Telescopes J84-137

Reactive Flows

Turbulent Mixing and Combustion in a Reacting Shear Layer J84-170
Turbulent Properties of a Flat-Plate Boundary Layer with a Diffusion Flame J84-132
Density Fluctuations in a Flame in a Karman Vortex Sheet J84-130
Ignition in Gun Exhaust Plumes J84-085
Effect of Reactant-Surface Stretching on Chemical Laser Performance J84-009

Shock Waves and Detonations

Laser-Driven Shock Waves in an Aerosol-Induced Breakdown in Air J84-348
Surface Phenomena in a Three-Dimensional Skewed Shock Wave/Laminar Boundary-Layer Interaction J84-346
Grid Adaption for Problems in Fluid Dynamics J84-338
A Time-Split Finite-Volume Algorithm for Three-Dimensional Flowfield Simulation J84-316
Multiple Pure Tone Generation in Aeroengine Fans at Subsonic and Supersonic Relative Tip Speeds J84-287
Momentum Transfer to a Surface When Irradiated by a High-Power Laser J84-269
Turbulent Boundary Layer Behind Constant Velocity Shock Including Wall Blowing Effects J84-229
Shock Shape over a Sphere Cone in Hypersonic High Enthalpy Flow J84-218
Pseudospectral Solutions of One- and Two-Dimensional Inviscid Flows with Shock Waves J84-200
Numerical Simulation of Convective Combustion of Ball Powders in Strong Confinement J84-169
Flow and Heat Transfer Measurements Along a Cooled Supersonic Diffuser J84-166
A Contribution to the Numerical Prediction of Unsteady Flows J84-124
Interaction of Gun Exhaust Flowfields J84-103
Forced Oscillation Experiments in Supercritical Diffuser Flows J84-094
Ignition in Gun Exhaust Plumes J84-085
Pressure Distribution Behind a Nonstationary Reflected-Diffracted Oblique Shock Wave J84-056
Cylindrical and Conical Flow Regimes of Three-Dimensional Shock/Bounday-Layer Interactions J84-036
Numerical Computations of Turbulence Amplification in Shock-Wave Interactions J84-002

Subsonic Flow

Effect of Initial Conditions on Turbulent Reattachment Downstream of a Backward-Facing Step J84-341
The Circular Cylinder in Subsonic and Transonic Flow J84-339
Interferometric Measurement of Heterogeneous Shear-Layer Spreading Rates J84-314
Wall Shear Fluctuations in a Turbulent Boundary Layer J84-279
An Experimental Investigation of Wake Edge Tones J84-265
Two-Dimensional Hydrodynamic Characteristics of a Bluff Symmetrical Fairing Section J84-260
A Source-Equality Kutta Condition for Panel Methods J84-246
Turbulent Boundary-Layer Relaxation with Application to Skin-Friction Drag Reduction J84-192
Turbulent Nonreacting Swirling Flows J84-181
A New and Improved Computational Technique for Two-Dimensional, Unsteady, Compressible Flows J84-163
Progress Toward a Model to Describe Jet/Aerodynamic-Surface Interference Effects J84-160
An Enhanced Flow Visualization Technique for Planar Free Shear Layers J84-084
Two Types of Instream Stagnation J84-066
A Nonlinear Hybrid Vortex Method for Wings at Large Angle of Attack J84-065
Overall Aerodynamic Performance of an Annular Flat-Plate Airfoil Cascade J84-044
Unsteady Turbulent Boundary Layers in Adverse Pressure Gradients J84-003
A Low Mach Number Euler Formulation and Application to Time-Iterative LBI Schemes J83-268

Supersonic and Hypersonic Flow

Surface Phenomena in a Three-Dimensional Skewed Shock Wave/Laminar Boundary-Layer Interaction J84-346
Application of the Implicit MacCormack Scheme to the Parabolized Navier-Stokes Equations J84-345
A Characteristics Approach to Swept Shock-Wave/Boundary-Layer Interactions J84-325
A Time-Split Finite-Volume Algorithm for Three-Dimensional Flowfield Simulation J84-316
Numerical Simulation of Wing-Fuselage Aerodynamic Interaction J84-283
The Structure of Turbulence in a Supersonic Shock-Wave/Boundary-Layer Interaction J84-266
Acoustic Near-Field Properties Associated with Broadband Shock Noise J84-259
New Implicit Boundary Procedure--Theory and Applications J84-236
A Hybrid Explicit-Implicit Numerical Algorithm for the Three-Dimensional Compressible Navier-Stokes Equations J84-231
Supersonic Conical Separation Due to Shock Vorticity J84-230
Shock Shape over a Sphere Cone in Hypersonic High Enthalpy Flow J84-218
Frozen-Plasma Boundary-Layer Flows over Adiabatic Flat Plates J84-217
Axisymmetric Nonconical Supersonic Potential Flow with Embedded Subsonic Regions J84-213

Pseudospectral Solutions of One- and Two-Dimensional Inviscid Flows with Shock Waves J84-200
The Baldwin-Lomax Turbulence Model for Two-Dimensional Shock-Wave/Boundary-Layer Interactions J84-199
Turbulence Measurements in a Compressible Reattaching Shear Layer J84-195
Closed-Form Model for Three-Dimensional Vacuum Plumes from a Scarfed Nozzle J84-142
Dusty Hypersonic Flow past Thick Wedges J84-139
Conical, Noncircular, Second-Order, Potential Theory of Supersonic Flow J84-126
Supersonic Separated Flow past a Cylindrical Obstacle on a Flat Plate J84-125
Hot-Wire Investigation of an Unseparated Shock-Wave/Turbulent Bounday-Layer Interaction J84-121
Unsteady Newton-Busemann Flow Theory - Part IV: Three Dimensional J84-120
Hypersonic Interactions with Surface Mass Transfer - Part II: Unsteady Flow J84-090
Hypersonic Interactions with Surface Mass Transfer - Part I: Steady Flow J84-089
Investigation of Mixing in a Turbofan Exhaust Duct, Part I: Analysis and Computational Procedure J84-073
Investigation of the Conical Flowfield Around External Axial Corners J84-069
Turbulent Flow over Vehicles at Angle of Attack J84-063
Frozen Plasma Boundary-Layer Flows over Isothermal Flat Plates - Parametric Study J84-053
The Inverse Problem for Supersonic Airfoils J84-051
Finite Area Method for Nonlinear Supersonic Conical Flows J84-041
Cylindrical and Conical Flow Regimes of Three-Dimensional Shock/Bounday-Layer Interactions J84-036
Rule of Forbidden Signals in a Two-Dimensional Supersonic Compressor Cascade J84-030
A Uniformly Valid Asymptotic Solution for Unsteady Subresonant Flow Through Supersonic Cascades J84-029
Supersonic Compressive Ramp Without Laminar Boundary-Layer Separation J84-004

Transonic Flow

Role of Constraints in Inverse Design for Transonic Airfoils J84-347
A General Perturbation Approach for Computational Fluid Dynamics J84-344
The Circular Cylinder in Subsonic and Transonic Flow J84-339
Forced Oscillations of Transonic Channel and Inlet Flows with Shock Waves J84-319
A Class of Bidiagonal Schemes for Solving the Euler Equations J84-315
Subsonic Airfoils with a Given Pressure Distribution J84-257
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232
Numerical Simulation of Two-Dimensional Unsteady Transonic Flows Using the Full-Potential Equation J84-228
A New Consistent Spatial Differencing Scheme for the Transonic Full-Potential Equation J84-227
Comparison of Measured and Predicted Transonic Flow Around an Airfoil J84-226
Nozzle Flow Using the Galerkin Finite Element Method J84-216
Prediction of Transonic Separated Flows J84-215
Axisymmetric Nonconical Supersonic Potential Flow with Embedded Subsonic Regions J84-213
Porous Airfoils in Transonic Flow J84-209
Improved Design of Subcritical and Supercritical Cascades Using Complex Characteristics and Boundary-Layer Correction J84-204
Transonic Full Potential Solutions by an Integral Equation Method J84-194
Nonisentropic Potential Formulation for Transonic Flows J84-165
A Fast Viscous Correction Method for Unsteady Transonic Flow About Airfoils J84-157
Numerical Calculation of Unsteady Transonic Potential Flow over Three-Dimensional Wings with Oscillating Control Surfaces J84-096
Sidewall Effects on Airfoil Tests J84-052
Finite Area Method for Nonlinear Supersonic Conical Flows J84-041
Calculations of Viscous Transonic Flow over Airfoils J84-037
An Embedded-Mesh Potential Flow Analysis J84-033
Behavior of the Flow Through a Numerically Captured Shock Wave J84-026
Nonunique Solutions to the Transonic Potential Flow Equation J84-023
A Theoretical and Experimental Investigation of a Transonic Projectile Flowfield J84-005

Viscous Nonboundary-Layer Flows

Measurements of Turbulent Flow Behind a Flat Plate Mounted Normal to the Wall J84-355
Effect of Initial Conditions on Turbulent Reattachment Downstream of a Backward-Facing Step J84-341
Interferometric Measurement of Heterogeneous Shear-Layer Spreading Rates J84-314
Interactive Phenomena in Supersonic Jet Mixing Problems, Part II: Numerical Studies J84-292
Numerical Simulation of Wing-Fuselage Aerodynamic Interaction J84-283
Calculation of Viscous Hypersonic Flow over a Severely Indented Nosetip J84-201
Interactive Phenomena in Supersonic Jet Mixing Problems, Part I: Phenomenology and Numerical Modeling Techniques J84-197
Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows over Complex Geometries J84-161
Analysis of Two-Dimensional Viscous Flow over Cylinders in Unsteady Motion J84-122
Further Time-Mean Measurements in Confined Swirling Flows J84-102
Vortex Motion in Axisymmetric Piston-Cylinder Configurations J84-101
Similar Solutions of Gas Pressure Within Semi-infinite Capillary Tubes J84-095
Investigation of the Conical Flowfield Around External Axial Corners J84-069
Asymmetric Flowfield Development on a Slender Body at High Incidence J84-043

Wave Motion and Sloshing

Dynamics of a Near-Resonant Fluid-Filled Gyroscope J84-302
Sloshing of Liquids in Cylindrical Tanks J84-058

Interdisciplinary Topics

Analytical and Numerical Methods

Multiobjective Optimization in Structural Design with Uncertain Parameters and Stochastic Processes J84-331
An Efficient Feasible Directions Algorithm for Design Synthesis J84-326
Grid Generation Techniques in Computational Fluid Dynamics J84-309
Statistical Treatment of Transverse Crack Propagation in Aligned Composites J84-305
ADS-1: A New General-Purpose Optimization Program J84-300
Symbolic Manipulation and Computational Fluid Dynamics J84-291
Stability of Time Finite Elements J84-248
A New Consistent Spatial Differencing Scheme for the Transonic Full-Potential Equation J84-227
Higher Order Strip Integral Method for Three-Dimensional Boundary Layers J84-210
Novel Concepts for Constraint Treatments and Approximations in Efficient Structural Synthesis J84-205
Structural Optimization by Mathematical Programming Methods J84-185
Generalized Modal Shock Spectra with Indeterminate Interface J84-175
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144
The Affine Equivalence of Local Stress and Displacement Distributions in Damaged Composites and Batdorf's Electric Analog J84-087
Path-Independent Integral and Moving Isoparametric Elements for Dynamic Crack Propagation J84-079
Substructure Synthesis and Its Iterative Improvement for Large Nonconservative Vibratory Systems J84-047
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139

Atmospheric and Space Sciences

Using Satellite-Observed uv Intensities to Deduce Electron Density Profiles J84-202
The Voyager Encounters with Saturn (Dryden Lecture) J84-099
Atmospheric Propagation of Two CO_2 Laser Pulses J84-010
Maximum Likelihood Estimation of Turbulence Spectrum Parameters J84-006

Computer Science

Symbolic Manipulation and Computational Fluid Dynamics J84-291

Computer Software

An Efficient Feasible Directions Algorithm for Design Synthesis J84-326
ADS-1: A New General-Purpose Optimization Program J84-300
Structural Optimization by Mathematical Programming Methods J84-185
A Computational Study of Transformation Methods for Optimal Design J84-106

Lasers and Laser Applications

Laser-Driven Shock Waves in an Aerosol-Induced Breakdown in Air J84-348
Momentum Transfer to a Surface When Irradiated by a High-Power Laser J84-269
Blackbody-Pumped CO_2 Laser Experiment J84-268
Reduction of Flow-Measurement Uncertainties in Laser Velocimeters with Nonorthogonal Channels J84-239
DF-Laser Pulse Breakdown Induced by Maritime Aerosols J84-238
Comparison of Measured and Predicted Transonic Flow Around an Airfoil J84-226
Density Fluctuations in a Flame in a Karman Vortex Sheet J84-130
Two-Component LDA Measurement in a Two-Phase Turbulent Jet J84-127
A Laser Interferometer for Measuring Skin Friction in Three-Dimensional Fows J84-110
Laser Holographic Interferometry for an Unsteady Airfoil Undergoing Dynamic Stall J84-100
Holographic Vibration Measurement of a Rotating Fluttering Fan J84-042
Laser Diagnostics for Flowfields, Combustion, and MHD Applications J84-032
Flow Visualization in Combustion Gases Using Nitric Oxide Fluorescence J84-028
The Use of Nitrogen as a Diluent in cw DF Lasers J84-027
Atmospheric Propagation of Two CO_2 Laser Pulses J84-010
Effect of Reactant-Surface Stretching on Chemical Laser Performance J84-009
Spectral Analysis Algorithms for the Laser Velocimeter: A Comparative Study J83-134

Numerical Analysis

An Implicit Solution Procedure for Finite Difference Modeling of the Stefan Problem J84-333
Grid Generation Techniques in Computational Fluid Dynamics J84-309
An Acoustic Evaluation of Circumferentially Segmented Duct Liners J84-262
Stability of Time Finite Elements J84-248
An Efficient Numerical Method for Solving Inverse Conduction Problem in a Hollow Cylinder J84-188
Dynamic Condensation J84-145
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144
Load Change Characteristics of the Discharge Structure in Noble Gas MHD Channels J84-123
A Computational Study of Transformation Methods for Optimal Design J84-106
Optimization of Shallow Trusses Against Limit Point Instability J84-078
Three-Dimensional Grid Generation Using Elliptic Equations with Direct Grid Distribution Control J84-070
Sloshing of Liquids in Cylindrical Tanks J84-058
An Embedded-Mesh Potential Flow Analysis J84-033
Finite Elements for Initial Value Problems in Dynamics J81-258

Research Facilities and Instrumentation

Application of Riemann Problem Solvers to Wave Machine Design J84-219
A Laser Interferometer for Measuring Skin Friction in Three-Dimensional Fows J84-110
Experimental Studies of the Separated Flow over a NASA GA(W)-1 Airfoil J84-108
An Enhanced Flow Visualization Technique for Planar Free Shear Layers J84-084
Sidewall Effects on Airfoil Tests J84-052
Holographic Vibration Measurement of a Rotating Fluttering Fan J84-042
Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136

Satellite Communication Systems (including Terrestrial Stations)

Reduction of Root-Mean-Square Error in Faceted Space Antennas J84-332

Sensor Systems

Purging Flow Protection of Infrared Telescopes J84-137
Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136

Space Processing

Thermoacoustic Convection Heat-Transfer Phenomenon J84-223

System Identification

Linear System Identification via Poisson Moment Functionals J84-114

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Cubic Spline Numerical Solution of an Ablation Problem with Convective Backface Cooling J84-250

Aerodynamics

New Implicit Boundary Procedure--Theory and Applications J84-236
Calculation of Viscous Hypersonic Flow over a Severely Indented Nosetip J84-201
Experimental Studies of the Separated Flow over a NASA GA(W)-1 Airfoil J84-108
Asymmetric Flowfield Development on a Slender Body at High Incidence J84-043
A Theoretical and Experimental Investigation of a Transonic Projectile Flowfield J84-005

Dynamics and Control

Dynamics of a Near-Resonant Fluid-Filled Gyroscope J84-302

Propulsion and Propellant Systems

Effects of Viscosity and Surface Tension on a Jet Plume in Supersonic Crossflow J84-092

Marine Technology

Hydrodynamics, Vessel and Control Surface

Two-Dimensional Hydrodynamic Characteristics of a Bluff Symmetrical Fairing Section J84-260

Mooring Systems and Cable Mechanics

Planar Towing and Hydroelastic Stability of Faired Underwater Cables J84-350
Two-Dimensional Hydrodynamic Characteristics of a Bluff Symmetrical Fairing Section J84-260

Propulsion

Airbreathing Propulsion

Flutter and Forced Response of Mistuned Rotors Using Standing Wave Analysis J84-329
Application of the Godunov Method and Its Second-Order Extension to Cascade Flow Modeling J84-322
A Comparison of Vaporization Models in Spray Calculations J84-299
Turbulence Modeling for Three-Dimensional Shear Flows over Curved Rotating Bodies J84-295
Geometry and Static Flow Effects on Acoustic Radiation from Ducts J84-235
Application of Riemann Problem Solvers to Wave Machine Design J84-219
Improved Design of Subcritical and Supercritical Cascades Using Complex Characteristics and Boundary-Layer Correction J84-204
Formation and Destruction of Vortices in a Motored Four-Stroke Piston-Cylinder Configuration J84-203
Scaling and Modeling of Three-Dimensional, Pressure-Driven Turbulent Boundary Layers J84-198
Three-Dimensional Flow Simulations for Supersonic Mixed-Compression Inlets at Incidence J84-193
Turbulent Mixing and Combustion in a Reacting Shear Layer J84-170
Recovery of Burner Acoustic Source Structure from Far-Field Sound Spectra J84-128
Investigation of Mixing in a Turbofan Exhaust Duct, Part II: Computer Code Application and Verification J84-104
Vortex Motion in Axisymmetric Piston-Cylinder Configurations J84-101
Effects of Viscosity and Surface Tension on a Jet Plume in Supersonic Crossflow J84-092
A Coalescence/Dispersion Model for Turbulent Flame Stability J84-075
Optimization of Propeller Blade Twist by an Analytical Method J84-045
Overall Aerodynamic Performance of an Annular Flat-Plate Airfoil Cascade J84-044
Trajectory of Particles Rebounding Off Plane Targets J84-039
Rule of Forbidden Signals in a Two-Dimensional Supersonic Compressor Cascade J84-030
A Uniformly Valid Asymptotic Solution for Unsteady Subresonant Flow Through Supersonic Cascades J84-029
Three-Dimensional Turbulent Boundary-Layer Development on a Fan Rotor Blade J84-012
Secondary Effects in Combustion Instabilities Leading to Flashback J84-011
Thrust Augmenting Ejectors, Part I J83-262
Application of a Three-Sensor Hot-Wire Probe for Incompressible Flow J83-136

Combustion and Combustor Designs

Calculation of Turbulent Diffusion Flame Using the Coherent Flame Sheet Model J84-336

Prediction of an Axisymmetric Combusting Flow J84-321
A Comparison of Vaporization Models in Spray Calculations J84-299
Experiments in Dilution Jet Mixing J84-297
Numerical Solution for the Problem of Flame Propagation by the Random Element Method J84-296
Aluminum Agglomeration in Solid-Propellant Combustion J84-241
Time-Resolved Density Measurements in Premixed Turbulent Flames J84-131
Recovery of Burner Acoustic Source Structure from Far-Field Sound Spectra J84-128
A Comprehensive Model for AP-Based Composite Propellant Ignition J84-105
Further Time-Mean Measurements in Confined Swirling Flows J84-102
A Coalescence/Dispersion Model for Turbulent Flame Stability J84-075
Distributed Combustion Effects on Particle Damping J84-074

Combustion Stability, Ignition, and Detonation

Grid Adaption for Problems in Fluid Dynamics J84-338
Influence of Laminar Flame Speed on the Blowoff Velocity of Bluff-Body-Stabilized Flames J84-298
Pulse-Triggered Instability in Solid Rocket Motors J84-294
Turbulent Nonreacting Swirling Flows J84-181
Numerical Simulation of Convective Combustion of Ball Powders in Strong Confinement J84-169
Turbulent Properties of a Flat-Plate Boundary Layer with a Diffusion Flame J84-132
Time-Resolved Density Measurements in Premixed Turbulent Flames J84-131
Density Fluctuations in a Flame in a Karman Vortex Sheet J84-130
A Comprehensive Model for AP-Based Composite Propellant Ignition J84-105
Interaction of Gun Exhaust Flowfields J84-103
A Coalescence/Dispersion Model for Turbulent Flame Stability J84-075
Distributed Combustion Effects on Particle Damping J84-074
The Effect of Nonlinear Heat Conduction on the Pressure-Coupled Response of Solid Propellants J84-072

Electric and Advanced Space Propulsion

Ion Flow Experiments in a Multipole Discharge Chamber J84-313
A Model for Mercury Orificed Hollow Cathodes: Theory and Experiment J84-293
Prediction of the Flowfield in Laser Propulsion Devices J84-237

Environmental Effects

Experiments on Sound Radiation from a Duct with a Circumferentially Varying Liner J84-167

Fuels and Propellants, Properties of

Specific Heat of HMX J84-320
Pulse-Triggered Instability in Solid Rocket Motors J84-294
Aluminum Agglomeration in Solid-Propellant Combustion J84-241
Low Burning Rate Aluminized Propellants in Acceleration Fields J84-129

Solid and Hybrid Rocket Engines

Specific Heat of HMX J84-320
Pulse-Triggered Instability in Solid Rocket Motors J84-294
An Efficient Numerical Method for Solving Inverse Conduction Problem in a Hollow Cylinder J84-188
Low Burning Rate Aluminized Propellants in Acceleration Fields J84-129
Distributed Combustion Effects on Particle Damping J84-074
The Effect of Nonlinear Heat Conduction on the Pressure-Coupled Response of Solid Propellants J84-072

Spacecraft Technology

Configurational and Structural Design (including Loads)

Reduction of Root-Mean-Square Error in Faceted Space Antennas J84-332
Optimum Placement of Controls for Static Deformations of Space Structures J84-272

Dynamics and Control

Optimum Placement of Controls for Static Deformations of Space Structures J84-272
Effect of Solar Radiation Disturbance on a Flexible Beam in Orbit J84-134

Entry Vehicle Aerodynamic Heating

Ablation of Carbonaceous Materials in a Hydrogen-Helium Arcjet Flow J84-306
Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows over Complex Geometries J84-161

Entry Vehicle Aerodynamics

Calculation of Viscous Hypersonic Flow over a Severely Indented Nosetip J84-201
Unsteady Newton-Busemann Flow Theory - Part IV: Three Dimensional J84-120

Temperature Control

Thermal Constriction Resistance with Arbitrary Heating in a Convectively Cooled Plate J84-308
Thermal Resistance of Circular Cylinder Cross Sections with Convective and Flux Prescribed Boundaries J84-187

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Planar Towing and Hydroelastic Stability of Faired Underwater Cables J84-350
Flutter and Forced Response of Mistuned Rotors Using Standing Wave Analysis J84-329
A Finite Element for Vibration Analysis of Twisted Blades Based on Beam Theory J84-328
A Quasivariational Principle for Fluid-Solid Interaction J84-249
A Flutter Eigenvalue Program Based on the Newton-Raphson Method J84-211
Supersonic Flutter of Short Panels on an Elastic Foundation J84-186
Flutter Analysis of Advanced Turbopropellers J84-171
Buffeting of a Slender Circular Beam in Axial Turbulent Flows J84-136
Limit Amplitude of Galloping Bluff Cylinders J84-098
Frequency Determination Techniques for Cantilevered Plates with Bending-Torsion Coupling J84-080
Holographic Vibration Measurement of a Rotating Fluttering Fan J84-042
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017
Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190

Materials, Properties of

Effect of Residual Stresses on Crack Growth from a Hole J84-349
Control of the Properties of Carbon Fiber-Reinforced Plastics J84-330
Statistical Failure Prediction Models for Brittle Materials J84-020
Environmental and High Strain Rate Effects on Composites for Engine Applications J84-019
Biaxial Stress Behavior of Graphite and Kevlar 49 Fiber/Epoxy Composites and Hybrids J84-016
Effects of 50,000 h of Thermal Aging on Graphite/Epoxy and Graphite/Polymide Composites J84-014

Structural Composite Materials

Control of the Properties of Carbon Fiber-Reinforced Plastics J84-330
Buckling of Anisotropic Laminated Cylindrical Plates J84-327
Statistical Treatment of Transverse Crack Propagation in Aligned Composites J84-305
Pin-Loaded Holes in Large Orthotropic Plates J84-304
Thermal Stresses in Annular Glass-to-Metal Seals Under Thermal Shock J84-303
Effects of Orthotropy and Width on the Compression Strength of Graphite-Epoxy Panels with Holes J84-271
Viscoelastic Analysis of Laminated Plate Buckling J84-208
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part II: Numerical Results J84-207
Vibration of Orthotropic Thick Circular Plates J84-184
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part I: Theoretical Analysis J84-172
The Affine Equivalence of Local Stress and Displacement Distributions in Damaged Composites and Batdorf's Electric Analog J84-087
Adhesive Bonded Orthotropic Structures with a Part-Through Crack J84-086
Frequency Determination Techniques for Cantilevered Plates with Bending-Torsion Coupling J84-080
Buckling of Composite Plates with a Free Edge in Edgewise Bending and Compression J84-076
Postbuckling Behavior of Anisotropic Laminated Plates Under Pure Shear and Shear Combined with Compressive Loading J84-049
Edge Delamination in Angle-Ply Composite Laminates J84-046
Environmental and High Strain Rate Effects on Composites for Engine Applications J84-019

Biaxial Stress Behavior of Graphite and Kevlar 49 Fiber/Epoxy Composites and Hybrids J84-016
Probabilistic Static Failure of Composite Material J84-015
Effects of 50,000 h of Thermal Aging on Graphite/Epoxy and Graphite/Polymide Composites J84-014

Structural Design

Reduction of Root-Mean-Square Error in Faceted Space Antennas J84-332
Multiobjective Optimization in Structural Design with Uncertain Parameters and Stochastic Processes J84-331
An Efficient Feasible Directions Algorithm for Design Synthesis J84-326
A Characteristics Approach to Swept Shock-Wave/Boundary-Layer Interactions J84-325
Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Pin-Loaded Holes in Large Orthotropic Plates J84-304
ADS-1: A New General-Purpose Optimization Program J84-300
Static Analysis of Stiffened Plates J84-282
Inverse Perturbation Method for Structural Redesign with Frequency and Mode Shape Constraints J84-274
Structural Design Sensitivity Analysis with Generalized Global Stiffness and Mass Matrices J84-273
Optimum Placement of Controls for Static Deformations of Space Structures J84-272
Effects of Orthotropy and Width on the Compression Strength of Graphite-Epoxy Panels with Holes J84-271
Novel Concepts for Constraint Treatments and Approximations in Efficient Structural Synthesis J84-205
Structural Optimization by Mathematical Programming Methods J84-185
Toward a Consistent Beam Theory J84-173
Optimality Criterion Techniques Applied to Frames Having General Cross-Sectional Relationships J84-133
Post-Buckling Behavior of a Thick Circular Plate J84-113
Design Sensitivity Analysis Strain Energy via Distribution J84-111
A Computational Study of Transformation Methods for Optimal Design J84-106
Adhesive Bonded Orthotropic Structures with a Part-Through Crack J84-086
Optimization of Shallow Trusses Against Limit Point Instability J84-078
Postbuckling Behavior of Anisotropic Laminated Plates Under Pure Shear and Shear Combined with Compressive Loading J84-049
Edge Delamination in Angle-Ply Composite Laminates J84-046

Structural Durability (including Fatigue and Fracture)

Effect of Residual Stresses on Crack Growth from a Hole J84-349
Statistical Treatment of Transverse Crack Propagation in Aligned Composites J84-305
A Two-Dimensional Shear Spring Element J84-301
Time-Domain Quasilinear Identification of Nonlinear Dynamic Systems J84-174
Singular Propagation Behavior of Cracks in Stiffened Cylindrical Shells J84-143
Adhesive Bonded Orthotropic Structures with a Part-Through Crack J84-086
Path-Independent Integral and Moving Isoparametric Elements for Dynamic Crack Propagation J84-079
Edge Delamination in Angle-Ply Composite Laminates J84-046
Statistical Failure Prediction Models for Brittle Materials J84-020
Environmental and High Strain Rate Effects on Composites for Engine Applications J84-019
An Alternating Method for Analysis of Surface-Flawed Aircraft Structural Components J83-139

Structural Dynamics

Application of the Generalized Inverse in Structural System Identification J84-360
Proper Definition of Curvature in Nonlinear Beam Kinematics J84-359
Nonlinear Behavior of Thin Columns Under a Parametrically Excited Load J84-351
Multiobjective Optimization in Structural Design with Uncertain Parameters and Stochastic Processes J84-331
Control of the Properties of Carbon Fiber-Reinforced Plastics J84-330
A Finite Element for Vibration Analysis of Twisted Blades Based on Beam Theory J84-328
Buckling of Anisotropic Laminated Cylindrical Plates J84-327
Flutter of Turbofan Rotors with Mistuned Blades J84-324
Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Dynamics of a Near-Resonant Fluid-Filled Gyroscope J84-302
Steady-State Response of Vibrating Systems to Periodic Pulse Excitation J84-281
Structural Dynamics of Rotating Bladed-Disk Assemblies Coupled with Flexible Shaft Motions J84-276
Time Finite Element Discretization of Hamilton's Law of Varying Action J84-275
Inverse Perturbation Method for Structural Redesign with Frequency and Mode Shape Constraints J84-274
Stability of Time Finite Elements J84-248
General Equations of Motion for an Elastic Wing and Method of Solution J84-243
Response of a Cylindrical Shell to the Sudden Breakdown of a Ring Stiffener J84-222
Classical Normal Modes in Asymmetric Nonconservative Dynamic Systems J84-220
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part II: Numerical Results J84-207
Limit Cycle Oscillations of a Nonlinear Rotorcraft Model J84-206
Supersonic Flutter of Short Panels on an Elastic Foundation J84-186
Vibration of Orthotropic Thick Circular Plates J84-184
Generalized Modal Shock Spectra with Indeterminate Interface J84-175
Time-Domain Quasilinear Identification of Nonlinear Dynamic Systems J84-174
Vibration and Damping Analysis of a Multilayered Cylindrical Shell, Part I: Theoretical Analysis J84-172
Dynamic Condensation J84-145
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144
Buffeting of a Slender Circular Beam in Axial Turbulent Flows J84-136
Balancing Flexible Rotating Shafts with an Initial Bend J84-135
Effect of Solar Radiation Disturbance on a Flexible Beam in Orbit J84-134
Linear System Identification via Poisson Moment Functionals J84-114
Methods of Reference Basis for Identification of Linear Dynamic Structures J84-112
Vibration of a Three-Layered Ring on Periodic Radial Supports J84-107
Frequency Determination Techniques for Cantilevered Plates with Bending-Torsion Coupling J84-080
A Nonlinear Structural Concept for Drag-Reducing Compliant Walls J84-077
The Beam-Like Behavior of Space Trusses J84-048
Substructure Synthesis and Its Iterative Improvement for Large Nonconservative Vibratory Systems J84-047
Minimum-Weight Design of an Orthotropic Shear Panel with Fixed Flutter Speed J83-190
Hamilton's Principle, Hamilton's Law---6n Correct Formulations J82-130
Finite Elements for Initial Value Problems in Dynamics J81-258

Structural Stability

Proper Definition of Curvature in Nonlinear Beam Kinematics J84-359
Nonlinear Behavior of Thin Columns Under a Parametrically Excited Load J84-351
A Finite Element for Vibration Analysis of Twisted Blades Based on Beam Theory J84-328
Thermal Postbuckling Behavior of Tapered Columns J84-307
Viscoelastic Analysis of Laminated Plate Buckling J84-208
Thermal Postbuckling of Columns J84-183
Post-Buckling Behavior of a Thick Circular Plate J84-113
Optimization of Shallow Trusses Against Limit Point Instability J84-078
A Nonlinear Structural Concept for Drag-Reducing Compliant Walls J84-077
Buckling of Composite Plates with a Free Edge in Edgewise Bending and Compression J84-076
Stability of Annular Sector Plates with Variable Thickness J84-061
Postbuckling Behavior of Anisotropic Laminated Plates Under Pure Shear and Shear Combined with Compressive Loading J84-049

Structural Statics

Proper Definition of Curvature in Nonlinear Beam Kinematics J84-359
Pin-Loaded Holes in Large Orthotropic Plates J84-304
Static Analysis of Stiffened Plates J84-282
Toward a Consistent Beam Theory J84-173
Methods of Reference Basis for Identification of Linear Dynamic Structures J84-112
The Beam-Like Behavior of Space Trusses J84-048
Experimental Stress Analysis of a Thin Walled Pressurized Torus Loaded by Contact with a Plane J84-018
A Simple, Refined Theory for Bending and Stretching of Homogeneous Plates J84-013

Thermal Stresses

Thermal Stresses in Annular Glass-to-Metal Seals Under Thermal Shock J84-303
Effect of Thermal Gradient on Frequencies of a Wedge-Shaped Rotating Beam J84-182
Non-Fourier Thermal Stresses in a Circular Disk J84-115

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Ablation of Carbonaceous Materials in a Hydrogen-Helium Arcjet Flow J84-306
Cubic Spline Numerical Solution of an Ablation Problem with Convective Backface Cooling J84-250
Chemistry of Combustion of Double-Base Propellants Through Sliver Analysis J84-060
Injection-Induced Turbulence in Stagnation-Point Bounday Layers J84-040

Experimental Methods of Diagnostics

Turbulent Mixing and Combustion in a Reacting Shear Layer J84-170
Laser Diagnostics for Flowfields, Combustion, and MHD Applications J84-032

Heat Conduction

Thermal Constriction Resistance with Arbitrary Heating in a Convectively Cooled Plate J84-308
Simplified Laplace Transform Inversion for Unsteady Surface Element Method for Transient Conduction J84-277
Cubic Spline Numerical Solution of an Ablation Problem with Convective Backface Cooling J84-250
Thermoacoustic Convection Heat-Transfer Phenomenon J84-223
An Efficient Numerical Method for Solving Inverse Conduction Problem in a Hollow Cylinder J84-188
Thermal Resistance of Circular Cylinder Cross Sections with Convective and Flux Prescribed Boundaries J84-187
Heat Transfer Between Counterflowing Fluids Separated by a Heat-Conducting Plate J84-138
Hybrid Perturbation/Bubnov-Galerkin Technique for Nonlinear Thermal Analysis J84-050
Nonequilibrium Arc Modeling J84-025

Radiation and Radiative Heat Transfer

The Fuel Property/Flame Radiation Relationship for Gas Turbine Combustors J84-361
Radiative Heat Transfer in Absorbing, Emitting, and Anisotropically Scattering Boundary-Layer Flows J84-245
Two-Dimensional Material Response of a Transpiration-Cooled System in a Radiative/Convective Environment J84-176
Effect of Solar Radiation Disturbance on a Flexible Beam in Orbit J84-134
Anisotropic Two-Dimensional Scattering Part II: Finite Depth and Refractive Index Effects J84-116
A Formulation of Radiation View Factors from Conical Surfaces J84-082
Radiative Heat Transfer in Segregated Media J84-062
Hybrid Perturbation/Bubnov-Galerkin Technique for Nonlinear Thermal Analysis J84-050

Radiatively Coupled Flows and Heat Transfer

Natural Convection-Radiation Interaction in Boundary-Layer Flow over Horizontal Surfaces J84-352
Comparison of Three Radiative Formulations for Interactions in Three-Dimensional Boundary Layers J84-244
DF-Laser Pulse Breakdown Induced by Maritime Aerosols J84-238
Two-Dimensional Material Response of a Transpiration-Cooled System in a Radiative/Convective Environment J84-176
Thermally Developing Laminar Flow in a Duct with External Radiation and Convection J84-146
A Formulation of Radiation View Factors from Conical Surfaces J84-082

Thermal Control

An Implicit Solution Procedure for Finite Difference Modeling of the Stefan Problem J84-333

Thermal Modeling and Analysis

Thermal Conductance of Pressed Copper Contacts at Liquid Helium Temperatures J84-354
An Implicit Solution Procedure for Finite Difference Modeling of the Stefan Problem J84-333
Simplified Laplace Transform Inversion for Unsteady Surface Element Method for Transient Conduction J84-277
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234
Thermal Effect on Axisymmetric Vibrations of an Orthotropic Circular Plate of Variable Thickness J84-221
Thermal Resistance of Circular Cylinder Cross Sections with Convective and Flux Prescribed Boundaries J84-187
Heat Transfer Between Counterflowing Fluids Separated by a Heat-Conducting Plate J84-138
Purging Flow Protection of Infrared Telescopes J84-137
Free Liquid Surface Response Induced by Fluctuations of Thermal Marangoni Convection J84-081
Hybrid Perturbation/Bubnov-Galerkin Technique for Nonlinear Thermal Analysis J84-050

Thermochemistry and Chemical Kinetics

Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows over Complex Geometries J84-161
Chemistry of Combustion of Double-Base Propellants Through Sliver Analysis J84-060

Thermophysical Properties of Matter

Thermal Constriction Resistance with Arbitrary Heating in a Convectively Cooled Plate J84-308
Effect of Thermal Gradient on Frequencies of a Wedge-Shaped Rotating Beam J84-182
