

Index of Papers Published in Journal of Aircraft

Volume 2—January through December 1965

Issue	Pages
January–February	1–64
March–April	65–160
May–June	161–256
July–August	257–352
September–October	353–464
November–December	465–560

EN, TC, and SA indicate Engineering Note, Technical Comment, and Survey Article, respectively.

AUTHORS

- Abramson, H. Norman and Ransleben, Guido E., Jr. An experimental investigation of flutter of a fully submerged subcavitating hydrofoil..... 439
- Agosta, Vito D. Diffusion in a supersonic compressor stator by means of aerodynamic control..... 302
- A'Harrah, R. C. Reply by author to second comment by I. L. Ashkenas (TC)..... 57
- Alford, J. S. and Taylor, R. P. Aerodynamic stability considerations of high-pressure ratio, variable-geometry jet nozzles..... 308
- Auslaender, J. (see Scherer, J. O.)
- Bartlett, Charles J. and Friedman, Manfred P. A method for calculating the effect of aircraft maneuvers on sonic booms..... 353
- Bashioum, Douglas L. (see Simpson, Leroy)
- Beauregard, J. P. PT6 turboprop for general aviation..... 20
- Bell, Clarence A. (see Dempster, John B.)
- Bijlaard, P. P. (see Gellatly, R. A.)
- Bishop, R. A. (see Frost, T. P.)
- Bogdanovic, J. A., Feder, A., and Wheaton, R. J. A method of determining propulsion system requirements for long-range, long-endurance aircraft..... 499
- Botman, M. Propulsion by undulating plates..... 456
- Carlson, Harry W. (see Middleton, Wilbur D.)
- Carr, Edward E. (see Simpson, Leroy)
- Carter, Edward S., Jr. Technological contributions of the CH-53A transport helicopter development program..... 430
- Clark, James W. (see Miller David P.)
- Cleveland, F. A. and Gilson, R. D. Development highlights of the C-141 StarLifter..... 278
- Cnossen, J. W. and O'Brien, R. L. Investigation of the diffusion characteristics of supersonic streams composed mainly of boundary layers..... 485
- Conolly, Alan C. Results of some recent hydrofoil work..... 443
- Cook, R. H. An automatic stall prevention control for supersonic fighter aircraft..... 171
- Cornish, Joseph J., III. Some aerodynamic and operational problems of STOL aircraft with boundary-layer control..... 78
- Covert, Eugene E. "Assumptions underlying the 'thin-skin' heat-transfer approximation" (EN)..... 255
- Erratum: Assumptions underlying the "thin-skin" heat-transfer approximation (TC)..... 557
- Davies, K. R. (see Hewson, C. T.)
- Dawson, V. C. D. NOL hydroballistics facility (EN)..... 350
- Deckert, Wallace H. (see Holzhauser, Curt A.)
- Dempster, John B. and Bell, Clarence A. Summary of flight load environmental data taken on B-52 fleet aircraft..... 398
- De Young, John. Propeller at high incidence..... 241
- Driessen, Edward A., Vermeulen, Hendrik C., and Ledebor, Karel H. Use of recorders in future aircraft operations..... 176
- Fairbairn, G. A. Structural materials for supersonic transport..... 208
- Feder, A. (see Bogdanovic, J. A.)
- Foss, R. L., Magruder, W. M., Litrownik, I., and Wyrick, D. R. Low-speed characteristics of the double-delta supersonic transport..... 470
- Friedman, Manfred P. (see Bartlett, Charles J.)
- Frost, T. P. and Bishop, R. A. Vectored thrust engines for single and multiengine aircraft..... 13
- Gaebe, H. M. Some important design considerations on the XC-142A triservice VSTOL..... 9
- Gallagher, J. T. and O'Donnell, F. B., Jr. Investigation of the application of direct translational control to VTOL aircraft..... 538
- Gallagher, R. H. (see Gellatly, R. A.)
- Gebhardt, George T. Acoustical design features of Boeing model 727..... 272
- Gellatly, R. A., Bijlaard, P. P., and Gallagher, R. H. Thermal stress and instability of sandwich cylinders on rigid supports..... 44
- , Bijlaard, P. P., and Gallagher, R. H. Buckling of sandwich panels under nonuniform stress..... 224
- Gilson, R. D. (see Cleveland, F. A.)
- Gold, Theodore and Workman, Joseph D. Research in the application of windshield projection displays to the all-weather landing task..... 328
- Goldschmied, Fabio R. An approach to turbulent incompressible separation under adverse pressure gradients..... 108
- Gonzalez, J. I. (see Kendall, P. J.)
- Goodwin, Frederick K. (see Nielsen, Jack N.)
- Gracey, William. Recent developments in pressure altimetry..... 161
- Grande, Donald L. and Showalter, Noah D., Jr. Some affects of stability on low-altitude ride quality..... 379
- Gratzer, L. B. and O'Donnell, T. J. The development of a BLC high-lift system for high-speed airplanes..... 477
- Gregory, Thomas J., Petersen, Richard H., and Wyss, John A. Performance tradeoffs and research problems for hypersonic transports..... 266
- Gyorgyfalvy, Dezso. Effect of pressurization on airplane fuselage drag..... 531
- Hackman, Lloyd E., Stotler, Charles L., Worthington, D. Gene, and Molella, Ross J. Structural fiber glass aircraft component-program results..... 216
- Hall, Gordon R. Experimental investigation of a novel VTOL thrust vectoring nozzle..... 312
- Hewson, C. T. and Davies, K. R. Status report on liftjets..... 417
- Hicks, Raymond M. and Mendoza, Joel P. An evaluation of the far field overpressure integral (EN)..... 154
- Higgins, H. C. and Shomber, H. A. Effect of variable sweep on supersonic transport handling qualities..... 465
- Hogan, E. T. and Nadeau, R. L. Operational concept of the integrated helicopter avionics system..... 546
- Holzhauser, Curt A., Deckert, Wallace H., Quigley, Hervey C., and Kelly, Mark W. Design and operating considerations of commercial STOL transports..... 87
- Hughes, P. F. (see McDonald, H.)
- Jacobson, Daniel H. An evaluation of lift engines in tactical VTOL aircraft..... 424
- Johnston, E. W. Current and advanced X-15..... 493
- Johnston, George S. and Lantz, Robert B. Efficiency of waffle grid panels under compressive loading (EN)..... 437
- Johnston, G. W. Some recent aerodynamic advances in STOL aircraft..... 390
- Jones, R. D. (see Thurston, S.)
- June, R. R. (see Nylander, J. N.)
- Kelly, J. B. (see Nylander, J. N.)
- Kelly, Mark W. (see Holzhauser, Curt A.)
- Kendall, P. J. and Gonzalez, J. I. An analytical model for predicting thermal response in honeycomb sandwich panels (EN)..... 551
- Ketola, R. N. A full-scale structural fatigue test program..... 407
- Kosin, Ruediger E. Laminar flow control by suction as applied to the X-21A airplane..... 381
- Kriebel, Anthony R. (see Nielsen, Jack N.)
- Landgraf, S. K. Some applications of performance optimization techniques to aircraft (EN)..... 153
- Lantz, Robert B. (see Johnston, George S.)
- Lawrence, Robert E. (see Wykes, John H.)
- Lawrence, Robert L. Afterbody flow fields and skin friction on short duct fan nacelles..... 318
- Ledebor, Karel H. (see Driessen, Edward A.)
- Leland, Trafford J. W. and Taylor, Glenn R. Effects of tread wear on the wet runway braking effectiveness of aircraft tires..... 72
- Lin, Y. K. Transfer matrix representation of flexible airplanes in gust response study..... 116
- Litrownik, I. (see Foss, R. L.)

Loomis, James P. (see Porter, Richard F.)	
Loughman, R. R. (see Sheets, H. E.)	
Magruder, W. M. (see Foss, R. L.)	
McDonald, H. and Hughes P. F. A correlation of high subsonic afterbody drag in the presence of a propulsive jet or support sting....	202
Mendoza, Joel P. (see Hicks, Raymond M.)	
Middleton, Wilbur D. and Carlson, Harry W. Numerical method of estimating and optimizing supersonic aerodynamic characteristics of arbitrary planform wings.....	261
Middleton, William A. Solution of an integral occurring in propeller theory (EN).....	556
Miller, David P. and Clark, James W. Research on VTOL aircraft handling qualities criteria.....	194
Miller, R. E., Jr. Structural analysis flexible grid technique for SST wing parametric studies.....	257
Molella, Ross J. (see Hackman, Lloyd E.)	
Monical, Richard E. A method of representing fan-wing combinations for three-dimensional potential flow solutions.....	527

SUBJECTS

GENERAL

Aluminaut. H. E. Sheets and R. R. Loughman.....	450
---	-----

AERODYNAMICS OF BODIES, COMBINATIONS, AND INTERNAL FLOW

A correlation of high subsonic afterbody drag in the presence of a propulsive jet or support sting. H. McDonald and P. F. Hughes.....	202
Aerodynamic stability considerations of high-pressure ratio, variable-geometry jet nozzles. J. S. Alford and R. P. Taylor.....	308
Experimental investigation of a novel VTOL thrust vectoring nozzle. Gordon R. Hall.....	312
Afterbody flowfields and skin friction on short duct fan nacelles. Robert L. Lawrence.....	318
Effect of inlet additive drag on aircraft performance. Joseph S. Mount.....	374
Some recent aerodynamic advances in STOL aircraft. G. W. Johnston.....	390
Effect of pressurization on airplane fuselage drag. Dezso Gyorgyfalvy.....	531
Examination of an aerodynamic coupling phenomenon. Richard F. Porter and James P. Loomis (EN).....	553

AERODYNAMICS OF WINGS, ROTORS, AND CONTROL SURFACES

Theoretical aerodynamics of one-lobed flexible parawings at low speeds. Jack N. Nielsen, Anthony R. Kriebel, and Frederick K. Goodwin....	127
Propeller at high incidence. John De Young.....	241
Numerical method of estimating and optimizing supersonic aerodynamic characteristics of arbitrary planform wings. Wilbur D. Middleton and Harry W. Carlson.....	261
Dihedral effect of a flexible wing. William P. Rodden.....	368
Results of some recent hydrofoil work. Alan C. Conolly.....	443
A method of representing fan-wing combinations for three-dimensional potential flow solutions. Richard E. Monical.....	527
Subsonic induced drag. Karl L. Sanders (EN).....	347
Multitapered wings. B. Saelman (EN).....	348
Solution of an integral occurring in propeller theory. William A. Middleton (EN).....	000

AIRCRAFT

X-22A design development. Vincent B. Paxhia and Edward Y. Sing..	2
Some important design considerations on the XC-142A triservice V/STOL. H. M. Gaebe.....	9
Influence of fan and ducting characteristics on the stability of ground effect machines. Norman K. Walker.....	25
The neutral point in stability and control analysis. Edward J. Rodgers.....	33
A system to vary the stability and control of a deflected-jet, fixed-wing VTOL aircraft. Frank A. Pauli.....	39
Effects of tread wear on the wet runway braking effectiveness of aircraft tires. Trafford J. W. Leland and Glenn R. Taylor.....	72
Design and operating considerations of commercial STOL transports. Curt A. Holzhauser, Wallace H. Deckert, Hervey C. Quigley, and Mark W. Kelly.....	87
Lift fan V/STOL concept for future applications. J. M. Peterson....	94
Cost analysis as an aid to aircraft design. Edward H. Yates.....	100
Peripheral fans for GEM. Peter R. Payne.....	233
Development highlights of the C-141 StarLifter. F. A. Cleveland and R. D. Gilson.....	278
Variations of landing distance of fixed-wing aircraft in STOL operations. Paul A. Puvrez.....	288
A method for calculating the effect of aircraft maneuvers on sonic booms. Charles J. Bartlett and Manfred P. Friedman.....	353
Problems unique to VTOL automatic flight control. Leo J. Mueller....	357
Aircraft design: present and future. George S. Schairer.....	361
Some effects of stability on low-altitude ride quality. Donald L. Grande and Noah D. Showalter Jr.....	379
Summary of flight load environmental data taken on B-52 fleet aircraft. John B. Dempster and Clarence A. Bell.....	398
Technological contributions of the CH-53A transport helicopter development program. Edward S. Carter Jr.....	430
Current and advanced X-15. E. W. Johnston.....	493
Investigation of the application of direct translational control to VTOL aircraft. J. T. Gallagher and F. B. O'Donnell Jr.....	493
Operational concept of the integrated helicopter avionics system. E. T. Hogan and R. L. Nadeau.....	493
A new method for numerical integration of airplane equations of motion. J. Roskam (EN).....	56
Some applications of performance optimization techniques to aircraft. S. K. Landgraf (EN).....	153
An evaluation of the far field overpressure integral. Raymond M. Hicks and Joel P. Mendoza (EN).....	154
Reply by author to second comment by I. L. Ashkenas. R. C. A'Hara (TC).....	57
Erratum: "Some opportunities for progress in aircraft performance." George S. Schairer (TC).....	58
