Comment on "Flow Past Nonconical Wings with Separation"

J. H. B. Smith*

Royal Aircraft Establishment,
Farnborough, Hants, United Kingdom

IT is apparent from Ref. 1 that Ramakrishnan and Subramanian have rediscovered the extension to nonconical flow of the Brown and Michael model for leading-edge separation which I published some years ago.² Since they suggest the results might be used to extend the more elaborate vortex-sheet model to the same case, it is worth pointing out that the vortex-sheet model has already been applied successfully to nonconical flow.^{3,4} Although these extensions remain within the framework of slender-body theory, more recent developments, such as Ref. 5, have been aimed at removing this limitation. A brief review of the subject may be found in Ref. 6.

I AM thankful to Smith for having pointed out the reference in regard to the similar work carried out by him. While publishing this paper we were unaware of the existence of such a publication.

Flow Past Nonconical Wings with Separation

S.V. Ramakrishnan* and N.R. Subramanian*
National Aeronautical Laboratory, Bangalore, India
[*Journal of Aircraft*, 15, 383-384 (1978)]

IN the above Engineering Note some errors were noted after its publication. The corrections are as follows:

Fig. 3, caption: Z_v should read z_v

Equation (9)

$$A \frac{dy_v}{dx} + B \frac{dZ_v}{dx} = \text{real} \left(\frac{v}{V} \right)$$

should read

$$A \frac{dy_v}{dx} + B \frac{dz_v}{dx} = \text{real} \left(\frac{v}{V} \right)$$

Equation (10)

$$C \frac{dy_v}{dx} + D \frac{dZ_v}{dx} = \text{imag} \left(\frac{v}{V} \right)$$

should read

$$A \frac{dy_v}{dx} + D \frac{dz_v}{dx} = \text{imag} \left(\frac{v}{V} \right)$$

In the right hand column page 384:

First line: "where $y_v + iZ_v = Z_v \dots$ " should read "where $y_v + iz_v = Z_v \dots$ "

Fourth line: " dy_v/dx , dZ_v/dx , and hence $\dots$ " should read " dy_v/dx , dz_v/dx , and hence $\dots$ "

Eleventh line: "a delta wing of semivortex" should read "a delta wing of semivortex".

Seventh line in Conclusion "It was also observed that the Z location $\dots$ " should read "It was observed that the z location $\dots$ "
