

Crash Simulation of Composite and Aluminum Helicopter Fuselages Using a Finite Element Program C80-104

NASA/FAA General Aviation Crash Dynamics Program—A Status Report C80-103

Effect of Adding Structural Damping on a Wing/Nacelle Hump Type Flutter Mode C80-094

Single-Mode Panel Flutter of a Wind Tunnel Flex-Wall C80-090

Aeroelastic Tailoring Studies in Fighter Aircraft Design C80-088

Investigation of the Vibration Characteristics of Shrouded Bladed Disk Rotor Stages C80-084

Vibration Measurements on Planetary Gears of Aircraft Turbine Engines C80-059

Structural Stability

Parametric Study Relating to Buckling of Stringer Stiffened Cylindrical Shells with Cutouts C80-042

Decoupler Pylon: A Simple, Effective Wing/Store Flutter Suppressor C80-032

An Elementary Explanation of the Flutter Mechanism with Active Feedback Controls C79-002

Thermal Stresses

Thermal Stress and Gas Bending Effects on Vibration of Compressor Rotor Stages C80-102

Thermophysics and Thermochemistry

Thermal Modeling and Analysis

Use of Similitude in Analyzing Aircraft Windshield Anti-Icing Performance C80-145

Thermochemistry and Chemical Kinetics

Drop Formation and Evaporation of JP-4 Fuel Jettisoned from Aircraft C80-079

Chronological Index

C77-001 Handling Quality Criterion for Heading Control. R. H. Hoh and I. L. Ashkenas, *Systems Technology, Inc.* (JA 14, 2, p. 142) Article

Technical Comment by Charles R. Chalk, *Calspan Corporation* (JA 17, 1, p. 60)

Reply (JA 17, 1, p. 63)

C78-001 Prediction of Performance of Low-Pressure-Ratio Thrust-Augmentor Ejectors. J. A. C. Kentfield, *University of Calgary* (JA 15, 12, p. 849) Article based on AIAA Paper 78-145

Technical Comment by Peter R. Payne, *Payne, Inc.* (JA 17, 7, p. 543)

Reply (JA 15, 12, p. 849)

C79-001 Calculation of Rotor Impedance for Articulated-Rotor Helicopters in Forward Flight. Kanichiro Kato and Takashi Yamane, *University of Tokyo* (JA 16, 7, p. 470) Article

Technical Comment by David A. Peters, *Washington University* (JA 17, 8, p. 607)

Reply (JA 17, 8, p. 607)

C79-002 An Elementary Explanation of the Flutter Mechanism with Active Feedback Controls. H. Horikawa and E. H. Dowell, *Princeton University* (JA 16, 4, p. 225) Article

Errata (JA 17, 9, p. 704)

C80-001 Canard-Wing Vortex Effects in Subsonic Flow. B. M. E. deSilva and R. T. Medan, *NASA Ames Research Center* (JA 17, 1, p. 5) Synoptic

C80-002 Dynamic Stability Measurements from Tunnel Unsteadiness Excited Random Response. H. Sundara Murthy, R.

V. Jategaonker and S. Balakrishna, *National Aeronautical Laboratory* (JA 17, 1, p. 7) Article based on AIAA Paper 78-831 CP783

C80-003 Flight Effects on Noise Generated by a JT8D Engine with Inverted Primary/Fan Flow. Frank G. Strout and Adolph Atencio Jr., *Boeing Commercial Airplane Company* (JA 17, 1, p. 13) Article based on AIAA Paper 79-0614

C80-004 Analysis and Design of Strake-Wing Configurations. John E. Lamar, *NASA Langley Research Center* (JA 17, 1, p. 20) Article based on AIAA Paper 78-1201

C80-005 Three-Dimensional Shock Structures for Transonic/Supersonic Compressor Rotors. David C. Prince Jr., *General Electric Co.* (JA 17, 1, p. 28) Article based on AIAA Paper 79-0043

C80-006 Application of a Higher Order Panel Method to Realistic Supersonic Configurations. E. N. Tinoco, and F. T. Johnson, *Boeing Aerospace Company*; and L. M. Freeman, *Mississippi State University* (JA 17, 1, p. 38) Article based on AIAA Paper 79-0274

C80-007 Design and Development of the 24-Ft Diam Hybrid Kevlar-29/Nylon Ribbon Parachute. William B. Pepper Jr., *Sandia Laboratories* (JA 17, 1, p. 45) Article based on AIAA Paper 79-0433 CP791

C80-008 Evaluation of Scheduled Air Passenger Service in Domestic Markets. Steven E. Eriksen, *Northeastern University*; and Nawal K. Taneja, *Massachusetts Institute of Technology* (JA 17, 1, p. 53) Article based on AIAA Paper 78-1556
