

# 1985 Index

## How to Use the Index

In the Subject Index, pages 1106-1112; each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 1112-1113, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1113-1120, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1985, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

## Subject Index

### Aircraft Technology, Conventional, STOL/VTOL

#### Aerodynamics

Computation of Supersonic Flows over Three-Dimensional Configurations **C85-196**  
 Nonplanar, Subsonic, Three-Dimensional Oscillatory Piecewise Continuous Kernel Function Method **C85-190**  
 Application of NLR's Calculation Methods to Transonic Flow About Oscillating Wings **C85-189**  
 Doublet Strip Method for Oscillating Swept Tapered Wings in Incompressible Flow **C85-180**  
 Theory of Wing Rock **C85-166**  
 Arrays of Bodies of Revolution for Minimum Wave Drag **C85-163**  
 Projected Advantage of an Oblique Wing Design on a Fleet Air Defense Mission **C85-162**  
 Full Potential Solutions of Three-Dimensional Supersonic Flows **C85-160**  
 Handling Qualities Related to Stall/Spin Accidents of Supersonic Fighter Aircraft **C85-159**  
 Numerical Optimization of Circulation Control Airfoil at High Subsonic Speed **C85-158**  
 Grid Generation and Flow Calculations for Aircraft Geometries **C85-156**  
 The Theoretical Minimum Induced Drag of Three-Surface Airplanes in Trim **C85-155**  
 Verification of Calculation Methods for Unsteady Airloads in the Prediction of Transonic Flutter **C85-153**  
 Wing Span Loads of Complex High-Lift Systems from Wake Measurements **C85-152**  
 Computational Aerodynamic Design of the Gulfstream IV Wing **C85-145**  
 The Influence of Laminar Separation and Transition on Low Reynolds Number Airfoil Hysteresis **C85-140**  
 Computational Technique for Compressible Vortex Flows Past Wings at Large Incidence **C85-138**  
 Convergence Characteristics of a Vortex-Lattice Method for Nonlinear Configuration Aerodynamics **C85-137**  
 Aerodynamic Characteristics of a Circulation Control Elliptical Airfoil with Two Blown Jets **C85-136**

Reconstruction of Pan Am New Orleans Accident **C85-133**  
 Transonic Aerodynamic Computations for a Canard Configuration **C85-126**  
 Transient Aerodynamic Characteristics of a Two-Dimensional Airfoil During Stepwise Incidence Variation **C85-124**  
 Iterative Three-Dimensional Transonic Wing Design Using Integral Equations **C85-123**  
 Vortex Trajectories and Breakdown on Wing-Canard Configurations **C85-121**  
 Theoretical Considerations in the Aerodynamic Effectiveness of Winglets **C85-118**  
 Aerodynamics of an Aspect Ratio 8 Wing at Low Reynolds Numbers **C85-117**  
 Multigrid Calculation of Transonic Flow Past Wing-Tail-Fuselage Combinations **C85-110**  
 Aircraft Performance in a JAWS Microburst **C85-107**  
 Computational/Experimental Pressure Distributions on a Transonic, Low-Aspect-Ratio Wing **C85-104**  
 An Inverse Boundary Element Method for Single Component Airfoil Design **C85-101**  
 Scale-Model Tests of Airfoils in Simulated Heavy Rain **C85-100**  
 Measurement of Ice Accretion Using Ultrasonic Pulse-Echo Techniques **C85-099**  
 Axisymmetric Bluff-Body Drag Reduction Through Geometrical Modification **C85-097**  
 An Investigation of the Tabbed Vortex Flap **C85-093**  
 Design Parameters for Flow Energizers **C85-092**  
 Fundamental Aerodynamic Characteristics of Delta Wings with Leading-Edge Vortex Flows **C85-091**  
 Assessment of Preliminary Prediction Techniques for Wing Leading-Edge Vortex Flows at Supersonic Speeds **C85-090**  
 Grid Generation for Wing-Tail-Fuselage Configurations **C85-089**  
 Thrust Reverser Effects on Fighter Aircraft Aerodynamics **C85-087**  
 Impact of Fuselage Incidence on the Supersonic Aerodynamics of Two Fighter Configurations **C85-077**  
 Aerodynamic Characteristics of Noncircular Bodies in Flat Spin and Coning Motions **C85-072**  
 A Harmonic Gradient Method for Unsteady Supersonic Flow Calculations **C85-070**

An Assessment of Numerical Solutions of the Compressible Navier-Stokes Equations **C85-069**  
 Measured and Calculated Airloads on a Transport Wing Model **C85-059**  
 Dynamics of Forebody Flow Separation and Associated Vortices **C85-058**  
 Euler Solutions of Transonic Vortex Flows Around the Dillner Wing **C85-057**  
 Flowfield Investigation of a Supercruise Fighter Model **C85-052**  
 Discontinuous Wing Leading Edge to Enhance Spin Resistance **C85-051**  
 Approach and Landing Technologies for STOL Fighter Configurations **C85-050**  
 Wing Design with Attainable Leading-Edge Thrust Considerations **C85-044**  
 Sidewall Boundary-Layer Correction in Subsonic, Two-Dimensional Airfoil/Hydrofoil Testing **C85-042**  
 Subsonic Wing Rock of Slender Delta Wings **C85-041**  
 A Comparison of Separated Flow Airfoil Analysis Methods **C85-039**  
 Impact of Computational Fluid Dynamics on Development Test Facilities **C85-035**  
 Experimental Results for Reynolds Number Effects on Trailing Vortices **C85-031**  
 Evaluation of a Stalled Airfoil Analysis Program **C85-030**  
 Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Ice **C85-026**  
 Roll Up of Strake Leading/Trailing-Edge Vortex Sheets for Double-Delta Wings **C85-014**  
 Economical Influence Function Calibrations Using the Distributed Loads Code **C85-013**  
 The Aerodynamic Behavior of Infinite Swept Wings: Another Point of View **C85-012**  
 Flow over Double-Delta Wing and Wing Body at High  $\alpha$  **C85-011**  
 The Influence of Leading-Edge Load Alleviation on Supersonic Wing Design **C85-010**  
 Transonic Solutions for a Multielement Airfoil Using the Full-Potential Equations **C85-007**  
 A Vortex-Lattice Method for General, Unsteady Aerodynamics **C85-006**  
 Effects of Suction on Shock/Boundary-Layer Interaction and Shock-Induced Separation **C85-005**

- Aerodynamic Characteristics of an Airfoil in a Nonuniform Wind Profile C85-001  
 Induced Drag and Lift of Wing by the Piecewise Continuous Kernel Function Method C84-140  
 High-Lift Airfoil Design from the Hodograph C84-128  
 Application of Computational Aerodynamics to Airplane Design C84-062  
 Apparent-Mass Coefficients for Isosceles Triangles and Cross Sections Formed by Two Circles C83-130  
 Aerodynamic Estimation Techniques for Aerostats and Airships C83-020  
 Prediction of Subsonic Aerodynamic Characteristics: A Case for Low-Order Panel Methods C82-028

### **Aeroelasticity**

- Application of NLR's Calculation Methods to Transonic Flow About Oscillating Wings C85-189  
 Flutter and Divergence Aeroelastic Characteristics for Composite Forward Swept Cantilevered Wing C85-179  
 Aeromechanical Stability Analysis of a Hybrid Heavy Lift Multirotor Vehicle in Hover C85-173  
 Subcritical Damping Ratios of a Two-Dimensional Airfoil in Transonic Flow C85-151  
 Equations of Motion of a Quasisteady Flight Vehicle Utilizing Restrained Static Aeroelastic Characteristics C85-146  
 Effects of Viscosity and Modes on Transonic Aerodynamic Characteristics of Wings C85-139  
 The Determination of Load and Slope Transformation Matrices for Aeroelastic Analyses C85-135  
 Experimental Aeroelastic Behavior of Unswept and Forward-Swept Cantilever Graphite/Epoxy Wings C85-127  
 Transonic Aerodynamic Computations for a Canard Configuration C85-126  
 Winglet Effects on the Flutter of a Twin-Engine Transport-Type Wing C85-111  
 Transonic Time Responses of the MBB A-3 Supercritical Airfoil Including Active Controls C85-073  
 Design of a Flutter Suppression System for an Experimental Drone Aircraft C85-071  
 A Harmonic Gradient Method for Unsteady Supersonic Flow Calculations C85-070  
 Nonplanar Doublet Lattices C85-046  
 Determination of Subcritical Damping in CF-5 Flight Flutter Tests C85-015  
 Steady and Unsteady Transonic Airloads on a Supercritical Wing C85-004

### **Avionics Systems**

- Measurement of Ice Accretion Using Ultrasonic Pulse-Echo Techniques C85-099

### **Cabin Environment, Crew Training, and Life Support**

- Review of Recent Research on Interior Noise of Propeller Aircraft C85-170  
 Acoustic Intensity Techniques for Airplane Cabin Applications C85-164  
 Pool Fire-Ventilation Crossflow Experiments in a Simulated Aircraft Cabin Interior C85-157  
 Airplane Designer's Checklist for Occupant Injury Prevention C85-082

### **Civil Missions and Transportation**

- Propulsion System Integration Configurations for Future Prop-Fan Powered Aircraft C85-188  
 The Determination of Optimum Flight Profiles for Short-Haul Routes C85-125

### **Configuration Design**

- Interactive Graphics for Geometry Generation--A Program with a Contemporary Design C85-192  
 Projected Advantage of an Oblique Wing Design on a Fleet Air Defense Mission C85-162  
 The Theoretical Minimum Induced Drag of Three-Surface Airplanes in Trim C85-155  
 Computational Aerodynamic Design of the Gulfstream IV Wing C85-145  
 Low-Cost Demonstrators for Maturing Technologies C85-144  
 Theoretical Considerations in the Aerodynamic Effectiveness of Winglets C85-118  
 Application of the Single-Cycle Optimization Approach to Aerodynamic Design C85-096  
 An Investigation of the Tabbed Vortex Flap C85-093  
 Design Parameters for Flow Energizers C85-092  
 Aerodynamic Canard/Wing Parametric Analysis for General-Aviation Applications C85-074  
 Discontinuous Wing Leading Edge to Enhance Spin Resistance C85-051  
 Induced Drag and Lift of Wing by the Piecewise Continuous Kernel Function Method C84-140  
 Apparent-Mass Coefficients for Isosceles Triangles and Cross Sections Formed by Two Circles C83-130

### **Crew Stations**

- Airplane Designer's Checklist for Occupant Injury Prevention C85-082

### **Deceleration Systems**

- A Nonlinear Solution for Parachute Suspension Line Deformation C85-167  
 A 73-ft Cross Parachute for Cargo Delivery C85-060  
 Approach and Landing Technologies for STOL Fighter Configurations C85-050

### **Flight Operations**

- High-Speed Braking of an Aircraft Tire on Grooved Surfaces C85-198  
 Surface Wetting Effects on a Laminar Flow Airfoil in Simulated Heavy Rain C85-191  
 Reconstruction of Pan Am New Orleans Accident C85-133  
 The Determination of Optimum Flight Profiles for Short-Haul Routes C85-125  
 Aircraft Performance in a JAWS Microburst C85-107  
 Recent Data from the Airlines Lightning Strike Reporting Project C85-078  
 Identification of Vortex-Induced Clear Air Turbulence Using Airline Flight Records C85-025  
 Nonlinear Simulation of Flight Along Wind Compensating Curved Glidepaths C85-020

### **General Aviation**

- Effects of Acoustic Treatment on the Interior Noise of a Twin-Engine Propeller Airplane C85-143

- Model of the Wind Field in a Downburst C85-112  
 Measurement of Ice Accretion Using Ultrasonic Pulse-Echo Techniques C85-099  
 Evaluation of Interior Noise Control Treatments for Advanced Turboprop Aircraft C85-098  
 Droplet Sized Distribution Effects on Aircraft Ice Accretion C85-095  
 Design Parameters for Flow Energizers C85-092  
 Noise Transmission Through an Acoustically Treated and Honeycomb-Stiffened Aircraft Sidewall C85-079  
 Recent Data from the Airlines Lightning Strike Reporting Project C85-078  
 Aerodynamic Canard/Wing Parametric Analysis for General-Aviation Applications C85-074  
 Theoretical Design of Acoustic Treatment for Noise Control in a Turboprop Aircraft C85-056  
 Field-Incidence Noise Transmission Loss of General Aviation Aircraft Double-Wall Configurations C85-024

### **Ground Effect Machines**

- Skirt Material Effects on Air Cushion Dynamic Heave Stability C85-022

### **Guidance and Control**

- Classical and Neo-Classical Cruise-Dash Optimization C85-106  
 Design of a Flutter Suppression System for an Experimental Drone Aircraft C85-071  
 Nonlinear Simulation of Flight Along Wind Compensating Curved Glidepaths C85-020

### **Handling Qualities, Stability and Control**

- The Numerical Computation of Aircraft Response to Arbitrary Vertical Gust Distributions C85-177  
 Impact of Flying Qualities on Mission Effectiveness for Helicopter Air Combat C85-174  
 Theory of Wing Rock C85-166  
 Handling Qualities Related to Stall/Spin Accidents of Supersonic Fighter Aircraft C85-159  
 Equations of Motion of a Quasisteady Flight Vehicle Utilizing Restrained Static Aeroelastic Characteristics C85-146  
 Subsonic Wing Rock of Slender Delta Wings C85-041  
 Aerodynamic Characteristics of an Airfoil in a Nonuniform Wind Profile C85-001  
 Thrust Vector Control of a V/STOL Airship C84-068  
 Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169

### **Helicopters**

- Helicopter Linear Noise C85-187  
 Impact of Flying Qualities on Mission Effectiveness for Helicopter Air Combat C85-174  
 Aeromechanical Stability Analysis of a Hybrid Heavy Lift Multirotor Vehicle in Hover C85-173  
 Performance Degradation of Helicopter Rotor in Forward Flight Due to Ice C85-132  
 Studies of Convertible Turboshaft/Turbobfan Engines for High-Speed Rotorcraft C85-053  
 Coupled Helicopter Rotor/Body Aeromechanical Stability Comparison of Theoretical and Experimental Results C85-029

- Analysis of a Split-Flow Inertial Particle Separator by Finite Elements C85-027  
 Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Ice C85-026

### **Landing Dynamics**

- High-Speed Braking of an Aircraft Tire on Grooved Surfaces C85-198  
 Nonlinear Simulation of Flight Along Wind Compensating Curved Glidepaths C85-020

### **Lighter-than-Airships**

- Generalized Math Model for Simulation of High-Altitude Balloon Systems C85-130  
 Thrust Vector Control of a V/STOL Airship C84-068  
 Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169  
 Aerodynamic Estimation Techniques for Aerostats and Airships C83-020

### **Military Missions**

- Impact of Flying Qualities on Mission Effectiveness for Helicopter Air Combat C85-174  
 Projected Advantage of an Oblique Wing Design on a Fleet Air Defense Mission C85-162

### **Navigation, Communication, and Traffic Control**

- Comparison of NMC Analysis Model Winds and Temperatures with Aircraft Measurements C85-116

### **Noise**

- Noise of Counter-rotation Propellers with Nonsynchronous Rotors C85-199  
 Helicopter Linear Noise C85-187  
 Review of Recent Research on Interior Noise of Propeller Aircraft C85-170  
 Acoustic Intensity Techniques for Airplane Cabin Applications C85-164  
 Effects of Acoustic Treatment on the Interior Noise of a Twin-Engine Propeller Airplane C85-143  
 Noise Radiation Patterns of Counter-Rotation and Unsteadily Loaded Single-Rotation Propellers C85-142  
 Approach to Interior Noise Control Part II: Self-Supporting Damped Interior Shell C85-134  
 Approach to Interior Noise Control Part I: Damped Trim Panels C85-115  
 Noise of Counter-rotation Propellers C85-114  
 Evaluation of Interior Noise Control Treatments for Advanced Turboprop Aircraft C85-098  
 A Composite Model of Aircraft Noise C85-081  
 Noise Transmission Through an Acoustically Treated and Honeycomb-Stiffened Aircraft Sidewall C85-079  
 Theoretical Design of Acoustic Treatment for Noise Control in a Turboprop Aircraft C85-056  
 Noise Transmission Through Aircraft Panels C85-054  
 Field-Incidence Noise Transmission Loss of General Aviation Aircraft Double-Wall Configurations C85-024  
 Propagation of Propeller Tone Noise Through a Fuselage Boundary Layer C85-009

### **Performance**

- The MCA Method of Determining Thrust of Jet Aircraft in Flight C85-161  
 The Theoretical Minimum Induced Drag of Three-Surface Airplanes in Trim C85-155  
 Effects of a Central Fence on Upwash Flows C85-141  
 Performance Degradation of Helicopter Rotor in Forward Flight Due to Ice C85-132  
 The Determination of Optimum Flight Profiles for Short-Haul Routes C85-125  
 Classical and Neo-Classical Cruise-Dash Optimization C85-106  
 An Investigation of the Tabbed Vortex Flap C85-093  
 Discontinuous Wing Leading Edge to Enhance Spin Resistance C85-051  
 Approach and Landing Technologies for STOL Fighter Configurations C85-050  
 A Method for Flight-Test Determination of Propulsive Efficiency and Drag C85-038  
 Unsteady Response of an Axial Flow Compressor to Planar Temperature Transients C85-002

### **Powerplant Design**

- Propulsion System Integration Configurations for Future Prop-Fan Powered Aircraft C85-188  
 Studies of Convertible Turboshaft/Turbopan Engines for High-Speed Rotorcraft C85-053

### **Propeller and Rotor Systems**

- Noise of Counter-rotation Propellers with Nonsynchronous Rotors C85-199  
 Aeromechanical Stability Analysis of a Hybrid Heavy Lift Multirotor Vehicle in Hover C85-173  
 Noise Radiation Patterns of Counter-Rotation and Unsteadily Loaded Single-Rotation Propellers C85-142  
 Performance Degradation of Helicopter Rotor in Forward Flight Due to Ice C85-132  
 Propeller Aerodynamic Performance by Vortex-Lattice Method C85-122  
 Noise of Counter-rotation Propellers C85-114  
 A Theorem on Swirl Loss in Propeller Wakes C85-061  
 A Method for Flight-Test Determination of Propulsive Efficiency and Drag C85-038  
 Coupled Helicopter Rotor/Body Aeromechanical Stability Comparison of Theoretical and Experimental Results C85-029  
 Propagation of Propeller Tone Noise Through a Fuselage Boundary Layer C85-009  
 Compressible Lifting Surface Theory for Propeller Performance Calculation C85-003  
 Aerodynamic Measurements About a Rotating Propeller with a Laser Velocimeter C84-047

### **Simulation**

- A Wind Tunnel Inlet Flow Simulation C85-168  
 Effects of a Central Fence on Upwash Flows C85-141  
 Generalized Math Model for Simulation of High-Altitude Balloon Systems C85-130  
 An Assessment of Numerical Solutions of the Compressible Navier-Stokes Equations C85-069

- Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Ice C85-026  
 Thrust Vector Control of a V/STOL Airship C84-068  
 Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169

### **Structural Design (including Loads)**

- A Methodology for Analyzing Laser-Induced Structural Damage C85-202  
 Stresses Around Holes in Pin-Loaded Orthotropic Plates C85-200  
 Bonded-Bolted Composite Joints C85-178  
 Time-Invariant Structure of Nonstationary Atmospheric Turbulence C85-150  
 Probabilistic Combination of Vehicle Dynamic Vibration and Acoustically Induced Random Accelerations C85-149  
 Equations of Motion of a Quasisteady Flight Vehicle Utilizing Restrained Static Aeroelastic Characteristics C85-146  
 The Determination of Load and Slope Transformation Matrices for Aeroelastic Analyses C85-135  
 Pilot Production of Superplastically Formed/Diffusion Bonded T-38 Main Landing Gear Doors C85-108  
 The Catastrophic Failure of Pressurized Graphite/Epoxy Cylinders Initiated by Slits at Various Angles C85-088  
 Dynamics of Forebody Flow Separation and Associated Vortices C85-058  
 Induced Drag and Lift of Wing by the Piecewise Continuous Kernel Function Method C84-140

### **Structural Materials**

- Bonded-Bolted Composite Joints C85-178  
 Preliminary Investigation of the Strength and Durability of Superplastic Formed Aluminum C85-129  
 Recent Data from the Airlines Lightning Strike Reporting Project C85-078

### **Testing, Flight and Ground**

- High-Speed Braking of an Aircraft Tire on Grooved Surfaces C85-198  
 Surface Wetting Effects on a Laminar Flow Airfoil in Simulated Heavy Rain C85-191  
 Improved Drag Element for Wind Tunnel Sting Balances C85-175  
 Is Any Free Flight/Wind Tunnel Equivalence Concept Valid for Unsteady Viscous Flow? C85-165  
 The MCA Method of Determining Thrust of Jet Aircraft in Flight C85-161  
 Sunrise, the World's First Solar-Powered Airplane C85-154  
 Low-Cost Demonstrators for Maturing Technologies C85-144  
 Vortex Trajectories and Breakdown on Wing-Canard Configurations C85-121  
 Applications of State Estimation in Aircraft Flight-Data Analysis C85-105  
 Flight-Test Evaluation of Engine Power Effects on Lift and Drag C85-075  
 Progress Toward Magnetic Suspension and Balance Systems for Large Wind Tunnels C85-048  
 A Slotted Test Section Numerical Model for Interference Assessment C85-040  
 A Method for Flight-Test Determination of Propulsive Efficiency and Drag C85-038  
 Computation of Wind Tunnel Wall Effects in Ducted Rotor Experiments C85-036  
 Impact of Computational Fluid Dynamics on Development Test Facilities C85-035

- Flowfield Analysis of Low Bypass Ratio Test Cells C85-021  
 Determination of Subcritical Damping in CF-5 Flight Flutter Tests C85-015  
 Flow over Double-Delta Wing and Wing Body at High  $\alpha$  C85-011

## Energy

### Photovoltaic Power

- Sunrise, the World's First Solar-Powered Airplane C85-154

## Fluid Dynamics

### Aeroacoustics

- Noise of Counter-rotation Propellers with Nonsynchronous Rotors C85-199  
 Evaluation of a Correction for Sound Propagation Through Free-Jet Shear Layers C85-194  
 Helicopter Linear Noise C85-187  
 Review of Recent Research on Interior Noise of Propeller Aircraft C85-170  
 Noise Radiation Patterns of Counter-Rotation and Unsteadily Loaded Single-Rotation Propellers C85-142  
 Noise of Counter-rotation Propellers C85-114  
 Noise Transmission Through an Acoustically Treated and Honeycomb-Stiffened Aircraft Sidewall C85-079  
 Field-Incidence Noise Transmission Loss of General Aviation Aircraft Double-Wall Configurations C85-024  
 Propagation of Propeller Tone Noise Through a Fuselage Boundary Layer C85-009  
 Flight Study of Induced Turbofan Inlet Acoustic Radiation with Theoretical Comparisons C85-008

### Boundary Layers and Convective Heat Transfer-Laminar

- Numerical and Experimental Determination of Secondary Separation on Delta Wings in Subsonic Flow C85-113

### Boundary Layers and Convective Heat Transfer-Turbulent

- Analysis of Low-Altitude Wind Speed and Direction Shears C85-131  
 Transonic Shock Interaction with a Tangentially Injected Turbulent Boundary Layer C85-094

### Boundary-Layer Stability and Transition

- The Influence of Laminar Separation and Transition on Low Reynolds Number Airfoil Hysteresis C85-140  
 Scale-Model Tests of Airfoils in Simulated Heavy Rain C85-100  
 Dynamics of Forebody Flow Separation and Associated Vortices C85-058  
 Computation of Three-Dimensional Viscous Flows Using a Space-Marching Method C85-055

### Computational Methods

- Interactive Graphics for Geometry Generation--A Program with a Contemporary Design C85-192  
 Evaluation of Low Reynolds Number Turbulence Models for Attached and Separated Flows C85-182

### Free-Falling Autorotating Plate--A Coupled Fluid and Flight Mechanics Problem

- C85-176  
 A Wind Tunnel Inlet Flow Simulation C85-168  
 Full Potential Solutions of Three-Dimensional Supersonic Flows C85-160  
 Numerical Optimization of Circulation Control Airfoil at High Subsonic Speed C85-158  
 Grid Generation and Flow Calculations for Aircraft Geometries C85-156  
 Computational Aerodynamic Design of the Gulfstream IV Wing C85-145  
 Effects of Viscosity and Modes on Transonic Aerodynamic Characteristics of Wings C85-139  
 Computational Technique for Compressible Vortex Flows Past Wings at Large Incidence C85-138  
 Convergence Characteristics of a Vortex-Lattice Method for Nonlinear Configuration Aerodynamics C85-137  
 Transonic Aerodynamic Computations for a Canard Configuration C85-126  
 Dynamic Ground Effects on a Two-Dimensional Flat Plate C85-120  
 Numerical and Experimental Determination of Secondary Separation on Delta Wings in Subsonic Flow C85-113  
 Multigrid Calculation of Transonic Flow Past Wing-Tail-Fuselage Combinations C85-110  
 An Inverse Boundary Element Method for Single Component Airfoil Design C85-101  
 Application of the Single-Cycle Optimization Approach to Aerodynamic Design C85-096  
 Assessment of Preliminary Prediction Techniques for Wing Leading-Edge Vortex Flows at Supersonic Speeds C85-090  
 Grid Generation for Wing-Tail-Fuselage Configurations C85-089  
 Impact of Fuselage Incidence on the Supersonic Aerodynamics of Two Fighter Configurations C85-077  
 The Unsuitability of Ellipsoids as Test Cases for Line-Source Methods C85-062  
 Euler Solutions of Transonic Vortex Flows Around the Dillner Wing C85-057  
 Computation of Three-Dimensional Viscous Flows Using a Space-Marching Method C85-055  
 Flowfield Investigation of a Supercruise Fighter Model C85-052  
 An Analytical and Experimental Investigation of Annular Propulsive Nozzles C85-049  
 A Slotted Test Section Numerical Model for Interference Assessment C85-040  
 A Comparison of Separated Flow Airfoil Analysis Methods C85-039  
 Efficient Algorithm for Unsteady Transonic Aerodynamics of Low-Aspect-Ratio Wings C85-037  
 Computation of Wind Tunnel Wall Effects in Ducted Rotor Experiments C85-036  
 Impact of Computational Fluid Dynamics on Development Test Facilities C85-035  
 Evaluation of a Stalled Airfoil Analysis Program C85-030  
 Transonic Solutions for a Multielement Airfoil Using the Full-Potential Equations C85-007  
 Compressible Lifting Surface Theory for Propeller Performance Calculation C85-003  
 Application of Computational Aerodynamics to Airplane Design C84-062

## Hydrodynamics

- The Unsuitability of Ellipsoids as Test Cases for Line-Source Methods C85-062  
 Sidewall Boundary-Layer Correction in Subsonic, Two-Dimensional Airfoil/Hydrofoil Testing C85-042  
 High-Lift Airfoil Design from the Holograph C84-128

### Jets, Wakes, and Viscid-Inviscid Flow Interactions

- Wing Span Loads of Complex High-Lift Systems from Wake Measurements C85-152  
 Effects of a Central Fence on Upwash Flows C85-141  
 Aerodynamic Characteristics of a Circulation Control Elliptical Airfoil with Two Blown Jets C85-136  
 Dynamic Overshoot of the Static Stall Angle C85-119  
 Transonic Shock Interaction with a Tangentially Injected Turbulent Boundary Layer C85-094  
 Thrust Reverser Effects on Fighter Aircraft Aerodynamics C85-087  
 A Possible Causative Flow Mechanism for Body Rock C85-080  
 Experimental Definition of Nonaxisymmetric Exhaust Nozzle Plumes C85-033  
 Experimental Results for Reynolds Number Effects on Trailing Vortices C85-031  
 Ground Interference Effects on Subsonic Dynamic Stall in Pitch and Plunge C85-023  
 Aerodynamic Characteristics of an Airfoil in a Nonuniform Wind Profile C85-001  
 Aerodynamic Measurements About a Rotating Propeller with a Laser Velocimeter C84-047

### Nonsteady Aerodynamics

- Nonplanar, Subsonic, Three-Dimensional Oscillatory Piecewise Continuous Kernel Function Method C85-190  
 Application of NLR's Calculation Methods to Transonic Flow About Oscillating Wings C85-189  
 Doublet Strip Method for Oscillating Swept Tapered Wings in Incompressible Flow C85-180  
 The Numerical Computation of Aircraft Response to Arbitrary Vertical Gust Distributions C85-177  
 Free-Falling Autorotating Plate--A Coupled Fluid and Flight Mechanics Problem C85-176  
 Separated Flow Unsteady Aerodynamic Theory C85-172  
 Is Any Free Flight/Wind Tunnel Equivalence Concept Valid for Unsteady Viscous Flow? C85-165  
 Verification of Calculation Methods for Unsteady Airloads in the Prediction of Transonic Flutter C85-153  
 Subcritical Damping Ratios of a Two-Dimensional Airfoil in Transonic Flow C85-151  
 Transient Aerodynamic Characteristics of a Two-Dimensional Airfoil During Stepwise Incidence Variation C85-124  
 Dynamic Ground Effects on a Two-Dimensional Flat Plate C85-120  
 Dynamic Overshoot of the Static Stall Angle C85-119  
 A Possible Causative Flow Mechanism for Body Rock C85-080

- Transonic Time Responses of the MBB A-3 Supercritical Airfoil Including Active Controls C85-073
- Measured and Calculated Airloads on a Transport Wing Model C85-059
- Subsonic Wing Rock of Slender Delta Wings C85-041
- Efficient Algorithm for Unsteady Transonic Aerodynamics of Low-Aspect-Ratio Wings C85-037
- Ground Interference Effects on Subsonic Dynamic Stall in Pitch and Plunge C85-023
