1988 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 1157–1162, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1162–1163, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1164-1168, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1988, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Integrating Nonlinear Aerodynamic and Structural Analysis for a Complete Fighter Configuration **C88-186**
Influence Function Method Applications to Tow Target Trajectory Predictions **C88-183**
Improved Thin-Airfoil Theory **C88-182**
Visualization and Measurement of the Tip Vortex Core of a Rotor Blade in Hover **C88-181**
Viscous Transonic AirFoil Workshop Compendium of Results **C88-177**
Drag Reduction Factor Due to Ground Effect **C88-176**
Application of Transient Aerodynamics to the Structural Nonlinear Flutter Problem **C88-174**
Aerodynamic Characteristics of Rectanglar Cross-Sectional Bodies at $M = 0.85$ **C88-168**
Transonic Wing Design Using Inverse Methods in Curvilinear Coordinates **C88-167**
Performance Prediction Analysis for Fully Deployed Parachute Canopies **C88-165**
Downstream Vorticity Measurements from Ultrasonic Pulses **C88-164**
Vortex Breakdown Measurements on a 70 Deg Sweepback Delta Wing **C88-163**
Rotating Air Scoop as Airfoil Boundary-Layer Control **C88-159**
Low-Speed Pressure Distribution on Axisymmetric Elliptic-Nosed Bodies **C88-157**
Winglets on Low-Aspect-Ratio Wings **C88-152**
Experimental Investigation of a Jet Impinging on a Ground Plane in Crossflow **C88-151**
Validation of Approximate Indicial Aerodynamic Functions for Two-Dimensional Subsonic Flow **C88-150**
Zonal Grid Generation Method for Complex Configurations **C88-149**
Further Comparisons of Interactive Boundary-Layer and Thin-Layer Navier-Stokes Procedures **C88-147**
Transonic Navier-Stokes Solutions for a Fighter-Like Configuration **C88-144**
Navier-Stokes Calculations of Hovering Rotor Flowfields **C88-143**
Simple Model for Predicting Time to Roll Wings Level in the A-7E **C88-141**
Integrated Aerodynamic/Structural Design of a Sailplane Wing **C88-140**
Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Glaze Ice **C88-139**
Navier-Stokes Simulation for Flow Past an Open Cavity **C88-138**
Spur-Type Instability Observed on Numerically Simulated Vortex Filaments **C88-137**
Finned, Multibody Aerodynamic Interference at Transonic Mach Numbers **C88-136**
Leading-Edge Vortex Dynamics on a Slender Oscillating Wing **C88-134**
Determination of Nonlinear Aerodynamic Coefficients Using the Estimation-Before-Modeling Method **C88-132**
F-5E Departure Warning System Algorithm Development and Validation **C88-130**
GENMAP: Computer Code for Mission Adaptive Profile Generation **C88-127**
Seaplane Takeoff Performance: Using Delta Ratio as a Method of Correlation **C88-126**
Low-Reynolds-Number Airfoil Design for the M.I.T. Daedalus Prototype: A Case Study **C88-120**
Method to Optimize Nacelle Shape in a Supersonic Cruise Aircraft **C88-119**
Navier-Stokes Solution to the Flowfield Over Ice Accretion Shapes **C88-118**
Boundary-Layer Transition Effects on Airplane Stability and Control **C88-117**
Control of Autorotational Characteristics of Light-Airplane Fuselages **C88-116**
Numerical Solutions of Induced Velocities by Semi-Infinite Tip Vortex Lines **C88-115**
Transonic Computations About Complex Configurations Using Coupled Inner and Outer Flow Equations **C88-114**
Incompressible Navier-Stokes Computations for a Round-Edged Double-Delta Wing **C88-113**
Transonic Characteristics of a Humped Airfoil **C88-112**
Thick Airfoil at Low Reynolds Number and High Incidence **C88-109**
Two-Dimensional Model for Airfoil Unsteady Drag Below Stall **C88-108**
Multilevel Decomposition Approach to the Preliminary Sizing of a Transport Aircraft Wing **C88-103**
Engineering Analysis of Slender-Body Aerodynamics Using Sychev Similarity Parameters **C88-102**
Experimental Study of Effects of Forebody Geometry on High Angle-of-Attack Stability **C88-097**
Investigations on High Reynolds Number Laminar Flow Airfoils **C88-096**
OPSGER: Computer Code for Multiconstraint Wing Optimization **C88-093**
Airfoil Dynamic Stall at Constant Pitch Rate and High Reynolds Number **C88-090**
Computation of Transonic Aerodynamically Compensating Pitot Tube **C88-089**
In-Flight Measurement of Airfoil Icing Using an Array of Ultrasonic Transducers **C88-087**
Lift of Delta Wings with Leading-Edge Blowing **C88-085**
Design of a Supercritical Airfoil **C88-082**
Sublimating Chemical Technique for Boundary-Layer Flow Visualization in Flight Testing **C88-080**
Research on Aircraft/Vortex-Wake Interactions to Determine Acceptable Level of Wake Intensity **C88-079**
Calculation of Lift-Curve Slope Using a Wing Tip Biased Vortex Distribution **C88-074**
Methodology for Analysis of Afterbodies for Three-Dimensional Aircraft Configurations **C88-072**
Evaluation of Methods for Predicting Complex Aircraft Flowfields **C88-071**
Computation of Vortical Interaction for a Sharp-Edged Double-Delta Wing **C88-069**
Comparison of Experimental and Numerical Results for Delta Wings with Vortex Flaps **C88-064**
Aerodynamics and Radar Signature: A Combination of Theoretical Methods **C88-063**
Evaluation of Two Singular Integrals from Thin Airfoil Theory **C88-059**
Effects of Surface Roughness on Two Shuttle Orbiter Models **C88-054**
Modeling of Surface Blowing as an Anti-icing Technique for Aircraft Surfaces **C88-053**
Flow-Around Airfoils with Blunt, Round, and Sharp Trailing Edges **C88-052**
Aerodynamic Characteristics and Flow Round Cross Parachutes in Steady Motion **C88-050**
Lift Modulation with Lateral Wing-Tip Blowing **C88-049**

Unsteady Low-Speed Aerodynamic Model for Complete Aircraft Configurations C88-048
Low-Speed Aerodynamics of Apex Fences on a Tailless Delta Configuration C88-047
Stability of Airplanes in Ground Effect C88-046
Passive Devices for Axisymmetric Base Drag Reduction at Transonic Speeds C88-039
Velocity Field of a Lifting Rotor Blade in Hover C88-038
Effects of Aspect Ratio and Sidewall Boundary-Layer in Airfoil Testing C88-037
Control of Vortical Lift on Delta Wings by Tangential Leading-Edge Blowing C88-036
New Panel Method for Supersonic Flows About Arbitrary Configurations C88-035
Aircraft Dynamic Response to Variable Wing Sweep Geometry C88-033
Influence of the Aspect Ratio on the Aerodynamics of the Delta Wing at High Angle of Attack C88-031
Experimental Examination of the Leading-Edge Suction Analogy C88-030
Numerical Analysis of an NACA 0012 Airfoil with Leading-Edge Ice Accretions C88-029
Active Control of Asymmetric Forces at High Incidence C88-028
Fluid Dynamics of Airfoils with Moving Surface Boundary-Layer Control C88-024
Free-Vortex Flow Simulation Using a Three-Dimensional Euler Aerodynamic Method C88-019
In-Flight Flow Visualization of F-106B Leading-Edge Vortex Using the Vapor-Screen Technique C88-017
Experimental Study of Three-Lifting-Surface Configuration C88-016
Analysis of Wing Flap Configurations by a Nonplanar Vortex Lattice Method C88-014
Modeling Effects on the Prediction of Aerodynamic Performance of Double-Delta Wing C88-013
Force and Pressure Study of Thick Cambered/Twisted 58 deg Delta Wings C88-010
Analysis of Strake-Slender-Wing Configurations Using Slender-Wing Theory C88-004
Efficient Method for Computing Unsteady Transonic Aerodynamics of Swept Wings with Control Surfaces C88-003
Effect of Wing/Canard Interference on the Loading of a Delta Wing C88-002
Progress in Analysis and Prediction of Dynamic Stall C88-001
Unsteady Aerodynamic Modeling of a Fighter Wing in Transonic Flow C86-094

Aeroelasticity

Integrating Nonlinear Aerodynamic and Structural Analysis for a Complete Fighter Configuration C88-186
Application of Transient Aerodynamics to the Structural Nonlinear Flutter Problem C88-174
Modern Wing Flutter Analysis by Computational Fluid Dynamics Methods C88-156
Unsteady Transonic Aerodynamics and Aeroelastic Calculations at Low-Supersonic Freestreams C88-155
Static Aeroelastic Characteristics of Circulation Control Wings C88-154
Integrated Aerodynamic/Structural Design of a Sailplane Wing C88-140
Correlation and Analysis for SH-2F 101 Rotor C88-105
Efficient Algorithm for Solution of the Unsteady Transonic Small-Disturbance Equation C88-098
Flight Dynamics of Aeroelastic Vehicles C88-092
Airfoil Dynamic Stall at Constant Pitch Rate and High Reynolds Number C88-090
Divergence Study of a High-Aspect-Ratio, Forward Swept Wing C88-077
Flutter Prediction Involving Trailing-Edge Control Surfaces C88-061
Effect of Density Ratio on Binary Wing Flutter C88-043
Aeroelastic Tailoring of a Composite Wing with a Decoupler Pylon as a Wing/Store Flutter Suppressor C88-041
Computational Transonic Flutter Boundary Tracking Procedure C88-040
Improved Exponential Time Series Approximation of Unsteady Aerodynamic Operators C88-018
Aeroelastic Oscillations Caused by Transitional Boundary Layers and Their Attenuation C87-069
The Role of Structural and Aerodynamic Damping on the Aeroelastic Behavior of Wings C86-091

Avionics Systems

Stall Margin Indication C88-058

Cabin Environment, Crew Training, and Life Support

Influence of a Floor on Sound Transmission into an Aircraft Fuselage Model C88-145

Civil Missions and Transportation

Optimization of the Conceptual Design and Mission Profiles of Short-Haul Aircraft C88-101
Flight Simulation of a Wide-Body Transport Aircraft to Evaluate MLS-RNAV Procedures C88-084
Oscillating Wings and Bodies with Flexure in Supersonic Flow C88-083

Configuration Design

Winglets on Low-Aspect-Ratio Wings C88-152
GENMAP: Computer Code for Mission Adaptive Profile Generation C88-127
Investigations on High Reynolds Number Laminar Flow Airfoils C88-096
OPSGER: Computer Code for Multiconstraint Wing Optimization C88-093
Design of a Supercritical Airfoil C88-082
Review of Unconventional Aircraft Design Concepts C88-060
Low-Speed Aerodynamics of Apex Fences on a Tailless Delta Configuration C88-047
Experimental Study of Three-Lifting-Surface Configuration C88-016

Deceleration Systems

New Solution Method for Steady-State Canopy Structural Loads C88-172
Performance Prediction Analysis for Fully Deployed Parachute Canopies C88-165
Aerodynamic Characteristics and Flow Round Cross Parachutes in Steady Motion C88-050

Economics

General Aviation Cost Effectiveness C88-146
Risk Analysis Approach to Transport Aircraft Technology Assessment C88-015

Flight Displays

Stall Margin Indication C88-058

Flight Operations

Classifying and Forecasting Microburst Activity in the Denver, Colorado, Area C88-086
Research on Aircraft/Vortex-Wake Interactions to Determine Acceptable Level of Wake Intensity C88-079
Use, Nonuse, and Abuse of Weather Radar C88-070
In-Flight Flow Visualization of F-106B Leading-Edge Vortex Using the Vapor-Screen Technique C88-017

General Aviation

General Aviation Cost Effectiveness C88-146
Seaplane Takeoff Performance: Using Delta Ratio as a Method of Correlation C88-126
Optimization of the Conceptual Design and Mission Profiles of Short-Haul Aircraft C88-101

Ground Effect Machines

Drag Reduction Factor Due to Ground Effect C88-176
Stability of Airplanes in Ground Effect C88-046

Ground Support

Use, Nonuse, and Abuse of Weather Radar C88-070

Guidance and Control

Active Control of Asymmetric Forces at High Incidence C88-028
Integrated Aeroservoelastic Tailoring of Lifting Surfaces C88-011

Handling Qualities, Stability and Control

Boundary-Layer Transition Effects on Airplane Stability and Control C88-117
Control of Autorotational Characteristics of Light-Airplane Fuselages C88-116
Experimental Study of Effects of Forebody Geometry on High Angle-of-Attack Stability C88-097
Flight Dynamics of Aeroelastic Vehicles C88-092
Stability of Airplanes in Ground Effect C88-046
F-16XL Demonstrates New Capabilities in Flight Test at Edwards Air Force Base C88-032

Helicopters

Visualization and Measurement of the Tip Vortex Core of a Rotor Blade in Hover C88-181
Navier-Stokes Calculations of Hovering Rotor Flowfields C88-143
Numerical Solutions of Induced Velocities by Semi-Infinite Tip Vortex Lines C88-115
Correlation and Analysis for SH-2F 101 Rotor C88-105
Efficient Sizing of Cargo Rotorcraft C88-088
Helicopter Transmission Fatique Life Estimation C88-073
Prediction of Helicopter Rotor Discrete Frequency Noise for Three Scale Models C88-066

Velocity Field of a Lifting Rotor Blade in Hover C88-038
Spectral Characteristics of Rotor Blade/Vortex Interaction Noise C88-009

Landing Dynamics

Takeoff Drag Prediction for Airbus A300-600 and A310 Compared with Flight Test Results C88-178
Dynamic Tire/Soil Contact Surface Interaction Model for Aircraft Ground Operations C88-171
Experimental Investigation of a Jet Impinging on a Ground Plane in Crossflow C88-151
Exploratory Evaluation of Moving-Model Technique for Measurement of Dynamic Ground Effects C88-091
Insights from Linear Predictions of Aircraft Response to Damaged Airfields C88-065

Lighter-than-Airships

Static and Dynamic Analysis of Airships C88-131

Military Missions

Efficient Sizing of Cargo Rotorcraft C88-088
Aerodynamics and Radar Signature: A Combination of Theoretical Methods C88-063

Navigation, Communication, and Traffic Control

Flight Simulation of a Wide-Body Transport Aircraft to Evaluate MLS-RNAV Procedures C88-084
Oscillating Wings and Bodies with Flexure in Supersonic Flow C88-083
Use, Nonuse, and Abuse of Weather Radar C88-070

Noise

Acoustic Transmissibility of Advanced Turboprop Aircraft Windows C88-153
Influence of a Floor on Sound Transmission into an Aircraft Fuselage Model C88-145
Structure-Borne Noise Control for Propeller Aircraft C88-124
Cruise Noise of the 2/9 Scale Model SR-7A Propeller C88-122
Prediction of Propfan Noise by a Frequency-Domain Scheme C88-067
High-Speed Propeller Noise Predictions: Effects of Boundary Conditions Used in Blade Loading Calculations C88-023
Spectral Characteristics of Rotor Blade/Vortex Interaction Noise C88-009

Performance

Takeoff Drag Prediction for Airbus A300-600 and A310 Compared with Flight Test Results C88-178
Simple Model for Predicting Time to Roll Wings Level in the A-7E C88-141
Seaplane Takeoff Performance: Using Delta Ratio as a Method of Correlation C88-126
Investigations on High Reynolds Number Laminar Flow Airfoils C88-096
Stall Margin Indication C88-058
Experimental Study of Three-Lifting-Surface Configuration C88-016

Powerplant Design

Further Development of Pneumatic Thrust-Deflecting Powered-Lift Systems C88-051
Review of Liquid-Cooled Aircraft Engine Installation Aerodynamics C88-034
Potential Application of Advanced Propulsion Systems to Civil Aircraft C88-021

Propeller and Rotor Systems

Laser Sheet Technique for Visualizing a Periodic Rotor Wake C88-187
Visualization and Measurement of the Tip Vortex Core of a Rotor Blade in Hover C88-181
Downstream Vorticity Measurements from Ultrasonic Pulses C88-164
Prediction of Aircraft-Propeller-Induced, Structure-Borne Interior Noise C88-125
Cruise Noise of the 2/9 Scale Model SR-7A Propeller C88-122
Prediction of Propfan Noise by a Frequency-Domain Scheme C88-067
Velocity Field of a Lifting Rotor Blade in Hover C88-038
High-Speed Propeller Noise Predictions: Effects of Boundary Conditions Used in Blade Loading Calculations C88-023
Potential Application of Advanced Propulsion Systems to Civil Aircraft C88-021
Spectral Characteristics of Rotor Blade/Vortex Interaction Noise C88-009

Simulation

Efficient Numerical Simulation of a One-Dimensional Electrothermal Deicer Pad C88-179
Simulation of a Birdstrike Impact on Aircraft Canopy Material C88-107
Response of Airline Pilots to Variations in Flight Simulator Motion Algorithms C88-104
Flight Simulation of a Wide-Body Transport Aircraft to Evaluate MLS-RNAV Procedures C88-084
Oscillating Wings and Bodies with Flexure in Supersonic Flow C88-083
Langley Advanced Real-Time Simulation (ARTS) System C88-025

Stealth

Lift of Delta Wings with Leading-Edge Blowing C88-085
Aerodynamics and Radar Signature: A Combination of Theoretical Methods C88-063
Lift Modulation with Lateral Wing-Tip Blowing C88-049

Structural Design (including Loads)

Integrating Nonlinear Aerodynamic and Structural Analysis for a Complete Fighter Configuration C88-186
Design Studies of Primary Aircraft Structures in ARALL Laminates C88-169
Evaluation of Aluminum-Lithium Alloys in Compression-Stiffened Aircraft Structures C88-166
New Design Procedures Applied to Landing Gear Development C88-148
Integrated Aerodynamic/Structural Design of a Sailplane Wing C88-140
Preliminary Weight Estimation of Conventional and Joined Wings Using Equivalent Beam Models C88-094
Topics in Landing Gear Dynamics Research at NASA Langley C88-012

Structural Materials

Evaluation of Aluminum-Lithium Alloys in Compression-Stiffened Aircraft Structures C88-166

Subsystem Design

Dynamic Tire/Soil Contact Surface Interaction Model for Aircraft Ground Operations C88-171
Review of Liquid-Cooled Aircraft Engine Installation Aerodynamics C88-034

Testing, Flight and Ground

Takeoff Drag Prediction for Airbus A300-600 and A310 Compared with Flight Test Results C88-178
Dynamic Tire/Soil Contact Surface Interaction Model for Aircraft Ground Operations C88-171
Influence of a Floor on Sound Transmission into an Aircraft Fuselage Model C88-145
Simple Model for Predicting Time to Roll Wings Level in the A-7E C88-141
Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Glaze Ice C88-139
Convergence Schemes for an Adaptive-Wall Wind Tunnel C88-121
Flight-Test Determination of Aircraft Cruise Characteristics Using Acceleration and Deceleration Techniques C88-095
Exploratory Evaluation of Moving-Model Technique for Measurement of Dynamic Ground Effects C88-091
In-Flight Measurement of Airfoil Icing Using an Array of Ultrasonic Transducers C88-087
Electro-Impulse Deicing of the NASA Lewis Altitude Wind Tunnel Turning Vanes C88-081
Sublimating Chemical Technique for Boundary-Layer Flow Visualization in Flight Testing C88-080
Effects of Aspect Ratio and Sidewall Boundary-Layer in Airfoil Testing C88-037
F-16XL Demonstrates New Capabilities in Flight Test at Edwards Air Force Base C88-032
Influence of Support Oscillation in Dynamic Stability Tests C88-026

Vibration

Application of Transient Aerodynamics to the Structural Nonlinear Flutter Problem C88-174
Modern Wing Flutter Analysis by Computational Fluid Dynamics Methods C88-156
Acoustic Transmissibility of Advanced Turboprop Aircraft Windows C88-153
Flutter Modes of High Aspect Ratio Tailless Aircraft C88-075

Energy

Ocean Wave and Tidal

Thick Airfoil at Low Reynolds Number and High Incidence C88-109

Wind Power

Thick Airfoil at Low Reynolds Number and High Incidence C88-109

Fluid Dynamics

Aeroacoustics

Acoustic Transmissibility of Advanced Turboprop Aircraft Windows C88-153
Prediction of Aircraft-Propeller-Induced, Structure-Borne Interior Noise C88-125
Results of Acoustic Tests of a Prop-Fan Model C88-106
Prediction of Propfan Noise by a Frequency-Domain Scheme C88-067
Prediction of Helicopter Rotor Discrete Frequency Noise for Three Scale Models C88-066

Rain Simulation Studies for High-Intensity Acoustic Nose Cavities C88-042
F-111 Generic Weapons Bay Acoustic Environment C88-022

Boundary Layers and Convective Heat Transfer-Laminar

Local Heat-Transfer Characteristics of Glaze-Ice Accretions on an NACA 0012 Airfoil C88-184
Effects of Compressibility on Design of Subsonic Fuselages for Natural Laminar Flow C88-129
Wing Laminar Boundary Layer in the Presence of a Propeller Slipstream C88-099

Boundary Layers and Convective Heat Transfer-Turbulent

Local Heat-Transfer Characteristics of Glaze-Ice Accretions on an NACA 0012 Airfoil C88-184
Estimation of the Parameters of Convection Dynamics C88-142
Wing Laminar Boundary Layer in the Presence of a Propeller Slipstream C88-099
Flow-Around Airfoils with Blunt, Round, and Sharp Trailing Edges C88-052
Fair Weather Convection and Light Aircraft, Helicopter, and Glider Accidents C88-008

Boundary-Layer Stability and Transition

Rotating Air Scoop as Airfoil Boundary-Layer Control C88-159
Boundary-Layer Transition Effects on Airplane Stability and Control C88-117
Boundary-Layer Measurements on an Airfoil at Low Reynolds Numbers C88-100
Fluid Dynamics of Airfoils with Moving Surface Boundary-Layer Control C88-024
Aeroelastic Oscillations Caused by Transitional Boundary Layers and Their Attenuation C87-069

Computational Methods

Navier-Stokes Calculations of Transonic Viscous Flow About Wing/Body Configuations C88-180
Viscous Transonic AirFoil Workshop Compendium of Results C88-177
Transonic Wing Design Using Inverse Methods in Curvilinear Coordinates C88-167
Modern Wing Flutter Analysis by Computational Fluid Dynamics Methods C88-156
Validation of Approximate Indicial Aerodynamic Functions for Two-Dimensional Subsonic Flow C88-150
Zonal Grid Generation Method for Complex Configurations C88-149
Further Comparisons of Interactive Boundary-Layer and Thin-Layer Navier-Stokes Procedures C88-147
Transonic Navier-Stokes Solutions for a Fighter-Like Configuration C88-144
Navier-Stokes Simulation for Flow Past an Open Cavity C88-138
Spur-Type Instability Observed on Numerically Simulated Vortex Filaments C88-137
Finned, Multibody Aerodynamic Interference at Transonic Mach Numbers C88-136
Grid Generation and Inviscid Flow Computation About a Cranked-Winged Airplane Geometry C88-135
F-5E Departure Warning System Algorithm Development and Validation C88-130
Method to Optimize Nacelle Shape in a Supersonic Cruise Aircraft C88-119
Navier-Stokes Solution to the Flowfield Over Ice Accretion Shapes C88-118
Transonic Computations About Complex Configurations Using Coupled Inner and Outer Flow Equations C88-114
Incompressible Navier-Stokes Computations for a Round-Edged Double-Delta Wing C88-113
Two-Dimensional Model for Airfoil Unsteady Drag Below Stall C88-108
Multilevel Decomposition Approach to the Preliminary Sizing of a Transport Aircraft Wing C88-103
Computation of Transonic Aerodynamically Compensating Pitot Tube C88-089
Calculation of Lift-Curve Slope Using a Wing Tip Biased Vortex Distribution C88-074
Methodology for Analysis of Afterbodies for Three-Dimensional Aircraft Configurations C88-072
Evaluation of Methods for Predicting Complex Aircraft Flowfields C88-071
Computation of Vortical Interaction for a Sharp-Edged Double-Delta Wing C88-069
Euler Calculations for Wing-Alone Configuration C88-068
Comparison of Experimental and Numerical Results for Delta Wings with Vortex Flaps C88-064
Two Complementary Approaches to Transonic Potential Flow About Oscillating Airfoils C88-062
Modeling of Surface Blowing as an Anti-icing Technique for Aircraft Surfaces C88-053
Unsteady Low-Speed Aerodynamic Model for Complete Aircraft Configurations C88-048
New Panel Method for Supersonic Flows About Arbitrary Configurations C88-035
Numerical Analysis of an NACA 0012 Airfoil with Leading-Edge Ice Accretions C88-029
High-Speed Propeller Noise Predictions: Effects of Boundary Conditions Used in Blade Loading Calculations C88-023
Free-Vortex Flow Simulation Using a Three-Dimensional Euler Aerodynamic Method C88-019

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Method of Cold Smoke Generation for Vortex Core Tagging C88-175
Flow Unsteadiness Considerations in High-Alpha Testing C88-170
Vortex Breakdown Measurements on a 70 Deg Sweepback Delta Wing C88-163
Moving Wall Effects in Unsteady Flow C88-162
Three-Dimensional Vortex Systems of Finite Wings C88-158
Experimental Investigation of a Jet Impinging on a Ground Plane in Crossflow C88-151
Further Comparisons of Interactive Boundary-Layer and Thin-Layer Navier-Stokes Procedures C88-147
Spur-Type Instability Observed on Numerically Simulated Vortex Filaments C88-137
Leading-Edge Vortex Dynamics on a Slender Oscillating Wing C88-134
Combined Translation/Pitch Motion: A New Airfoil Dynamic Stall Simulation C88-133
Circular Cylinder Response to Kármán Vortex Shedding C88-128
Exploratory Evaluation of Moving-Model Technique for Measurement of Dynamic Ground Effects C88-091
Lift of Delta Wings with Leading-Edge Blowing C88-085
Research on Aircraft/Vortex-Wake Interactions to Determine Acceptable Level of Wake Intensity C88-079
Spanwise Displacement of a Line Vortex Above a Wing-A Simple Calculation Scheme C88-076
Flow-Around Airfoils with Blunt, Round, and Sharp Trailing Edges C88-052
Lift Modulation with Lateral Wing-Tip Blowing C88-049
Passive Devices for Axisymmetric Base Drag Reduction at Transonic Speeds C88-039

Multiphase Flows

Method of Cold Smoke Generation for Vortex Core Tagging C88-175
Modeling of Surface Blowing as an Anti-icing Technique for Aircraft Surfaces C88-053
Rain Simulation Studies for High-Intensity Acoustic Nose Cavities C88-042

Nonsteady Aerodynamics

Downstream Vorticity Measurements from Ultrasonic Pulses C88-164
Unsteady Transonic Aerodynamics and Aeroelastic Calculations at Low-Supersonic Freestreams C88-155
Validation of Approximate Indicial Aerodynamic Functions for Two-Dimensional Subsonic Flow C88-150
Combined Translation/Pitch Motion: A New Airfoil Dynamic Stall Simulation C88-133
Circular Cylinder Response to Kármán Vortex Shedding C88-128
Two-Dimensional Model for Airfoil Unsteady Drag Below Stall C88-108
Wing Laminar Boundary Layer in the Presence of a Propeller Slipstream C88-099
Efficient Algorithm for Solution of the Unsteady Transonic Small-Disturbance Equation C88-098
Experimental Study of Effects of Forebody Geometry on High Angle-of-Attack Stability C88-097
Airfoil Dynamic Stall at Constant Pitch Rate and High Reynolds Number C88-090
Euler Calculations for Wing-Alone Configuration C88-068
Two Complementary Approaches to Transonic Potential Flow About Oscillating Airfoils C88-062
Flutter Prediction Involving Trailing-Edge Control Surfaces C88-061
Unsteady Low-Speed Aerodynamic Model for Complete Aircraft Configurations C88-048
Computational Transonic Flutter Boundary Tracking Procedure C88-040
Influence of Support Oscillation in Dynamic Stability Tests C88-026
Fluid Dynamics of Airfoils with Moving Surface Boundary-Layer Control C88-024
Improved Exponential Time Series Approximation of Unsteady Aerodynamic Operators C88-018
Progress in Analysis and Prediction of Dynamic Stall C88-001
The Role of Structural and Aerodynamic Damping on the Aeroelastic Behavior of Wings C86-091

Nozzle and Channel Flow

Methodology for Analysis of Afterbodies for Three-Dimensional Aircraft Configurations C88-072

Radiatively Coupled Flows and Heat Transfer

Local Heat-Transfer Characteristics of Glaze-Ice Accretions on an NACA 0012 Airfoil C88-184

Subsonic Flow

Method of Cold Smoke Generation for Vortex Core Tagging C88-175
Rotating Air Scoop as Airfoil Boundary-Layer Control C88-159
Low-Speed Pressure Distribution on Axisymmetric Elliptic-Nosed Bodies C88-157
Experimental Aerodynamic Characteristics of an NACA 0012 Airfoil with Simulated Glaze Ice C88-139
Navier-Stokes Simulation for Flow Past an Open Cavity C88-138
Combined Translation/Pitch Motion: A New Airfoil Dynamic Stall Simulation C88-133
Low-Reynolds-Number Airfoil Design for the M.I.T. Daedalus Prototype: A Case Study C88-120
Incompressible Navier-Stokes Computations for a Round-Edged Double-Delta Wing C88-113
Boundary-Layer Measurements on an Airfoil at Low Reynolds Numbers C88-100
Computation of Vortical Interaction for a Sharp-Edged Double-Delta Wing C88-069
Low-Speed Aerodynamics of Apex Fences on a Tailless Delta Configuration C88-047
Rain Simulation Studies for High-Intensity Acoustic Nose Cavities C88-042
Influence of the Aspect Ratio on the Aerodynamics of the Delta Wing at High Angle of Attack C88-031
In-Flight Flow Visualization of F-106B Leading-Edge Vortex Using the Vapor-Screen Technique C88-017
Analysis of Wing Flap Configurations by a Nonplanar Vortex Lattice Method C88-014

Supersonic and Hypersonic Flow

Coupled Flow, Thermal, and Structural Analysis of Aerodynamically Heated Panels C88-173
Method to Optimize Nacelle Shape in a Supersonic Cruise Aircraft C88-119
Engineering Analysis of Slender-Body Aerodynamics Using Sychev Similarity Parameters C88-102
New Panel Method for Supersonic Flows About Arbitrary Configurations C88-035

Transonic Flow

Navier-Stokes Calculations of Transonic Viscous Flow About Wing/Body Configuations C88-180
Viscous Transonic AirFoil Workshop Compendium of Results C88-177
Transonic Wing Design Using Inverse Methods in Curvilinear Coordinates C88-167
Unsteady Transonic Aerodynamics and Aeroelastic Calculations at Low-Supersonic Freestreams C88-155
Winglets on Low-Aspect-Ratio Wings C88-152
Transonic Navier-Stokes Solutions for a Fighter-Like Configuration C88-144
Finned, Multibody Aerodynamic Interference at Transonic Mach Numbers C88-136
F-5E Departure Warning System Algorithm Development and Validation C88-130
Convergence Schemes for an Adaptive-Wall Wind Tunnel C88-121
Transonic Computations About Complex Configurations Using Coupled Inner and Outer Flow Equations C88-114
Efficient Algorithm for Solution of the Unsteady Transonic Small-Disturbance Equation C88-098
Computation of Transonic Aerodynamically Compensating Pitot Tube C88-089
Design of a Supercritical Airfoil C88-082
Euler Calculations for Wing-Alone Configuration C88-068
Two Complementary Approaches to Transonic Potential Flow About Oscillating Airfoils C88-062
Computational Transonic Flutter Boundary Tracking Procedure C88-040
Passive Devices for Axisymmetric Base Drag Reduction at Transonic Speeds C88-039

Viscous Nonboundary-Layer Flows

Boundary-Layer Measurements on an Airfoil at Low Reynolds Numbers C88-100

Interdisciplinary Topics

Aerospace Management

General Aviation Cost Effectiveness C88-146

Aerospace Technology Utilization

Efficient Sizing of Cargo Rotorcraft C88-088
Risk Analysis Approach to Transport Aircraft Technology Assessment C88-015

Analytical and Numerical Methods

Low-Speed Pressure Distribution on Axisymmetric Elliptic-Nosed Bodies C88-157
Optimization of the Conceptual Design and Mission Profiles of Short-Haul Aircraft C88-101
Preliminary Weight Estimation of Conventional and Joined Wings Using Equivalent Beam Models C88-094
Flight Dynamics of Aeroelastic Vehicles C88-092
Evaluation of Two Singular Integrals from Thin Airfoil Theory C88-059
Aircraft Dynamic Response to Variable Wing Sweep Geometry C88-033
Modeling Effects on the Prediction of Aerodynamic Performance of Double-Delta Wing C88-013
Analysis of Strake-Slender-Wing Configurations Using Slender-Wing Theory C88-004

Atmospheric and Space Sciences

Estimation of the Parameters of Convection Dynamics C88-142
Classifying and Forecasting Microburst Activity in the Denver, Colorado, Area C88-086
Fair Weather Convection and Light Aircraft, Helicopter, and Glider Accidents C88-008

Computer Communications, Information Processing and Software

Langley Advanced Real-Time Simulation (ARTS) System C88-025

Computer Technology

New Design Procedures Applied to Landing Gear Development C88-148

Human Factors

Response of Airline Pilots to Variations in Flight Simulator Motion Algorithms C88-104

Lasers and Laser Applications

Laser Sheet Technique for Visualizing a Periodic Rotor Wake C88-187

Numerical Analysis

Efficient Numerical Simulation of a One-Dimensional Electrothermal Deicer Pad C88-179

Reliability, Maintainability, and Logistics Support

Helicopter Transmission Fatique Life Estimation C88-073

Research Facilities and Instrumentation

Convergence Schemes for an Adaptive-Wall Wind Tunnel C88-121
Aerodynamic Characteristics and Flow Round Cross Parachutes in Steady Motion C88-050
Langley Advanced Real-Time Simulation (ARTS) System C88-025

Safety

In-Flight Measurement of Airfoil Icing Using an Array of Ultrasonic Transducers C88-087
Fair Weather Convection and Light Aircraft, Helicopter, and Glider Accidents C88-008

State Estimation

Determination of Nonlinear Aerodynamic Coefficients Using the Estimation-Before-Modeling Method C88-132

System Identification

Determination of Nonlinear Aerodynamic Coefficients Using the Estimation-Before-Modeling Method C88-132
Classifying and Forecasting Microburst Activity in the Denver, Colorado, Area C88-086

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Thermal Environment of Transatmospheric Vehicles C88-055

Aerodynamics

Engineering Analysis of Slender-Body Aerodynamics Using Sychev Similarity Parameters C88-102
Evaluation of Methods for Predicting Complex Aircraft Flowfields C88-071
Force and Pressure Study of Thick Cambered/Twisted 58 deg Delta Wings C88-010
Analysis of Samara-Wing Decelerator Steady-State Characteristics C88-006
Analysis of Strake-Slender-Wing Configurations Using Slender-Wing Theory C88-004

Dynamics and Control

Analysis of Samara-Wing Decelerator Steady-State Characteristics C88-006

Missile Systems

Influence Function Method Applications to Tow Target Trajectory Predictions C88-183

Testing, Flight and Ground

Flow Unsteadiness Considerations in High-Alpha Testing C88-170

Vibration

Efficient Vibration Mode Analysis of Aircraft with Multiple External Store Configurations C88-123

Propulsion

Airbreathing Propulsion

Review of Liquid-Cooled Aircraft Engine Installation Aerodynamics C88-034
Potential Application of Advanced Propulsion Systems to Civil Aircraft C88-021

Environmental Effects

Numerical Analysis of an NACA 0012 Airfoil with Leading-Edge Ice Accretions C88-029

Spacecraft Technology

Electric Power

Parametric Weight Evaluation of Joined Wings by Structural Optimization C88-185

Entry Vehicle Aerodynamic Heating

Thermal Environment of Transatmospheric Vehicles C88-055

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Static Aeroelastic Characteristics of Circulation Control Wings C88-154
Circular Cylinder Response to Kármán Vortex Shedding C88-128
Divergence Study of a High-Aspect-Ratio, Forward Swept Wing C88-077
Flutter Prediction Involving Trailing-Edge Control Surfaces C88-061
General Formulation for the Aeroelastic Divergence of Composite Swept-Forward Wing Structures C88-056
Effect of Density Ratio on Binary Wing Flutter C88-043
Aeroelastic Tailoring of a Composite Wing with a Decoupler Pylon as a Wing/Store Flutter Suppressor C88-041
Improved Exponential Time Series Approximation of Unsteady Aerodynamic Operators C88-018
Integrated Aeroservoelastic Tailoring of Lifting Surfaces C88-011
Aeroelastic Oscillations Caused by Transitional Boundary Layers and Their Attenuation C87-069

Materials, Properties of

Evaluation of Aluminum-Lithium Alloys in Compression-Stiffened Aircraft Structures C88-166
Fatigue Crack Growth Predictions in Aramid Reinforced Aluminum Laminates (ARALL) C88-020
Control and Use of Residual Stresses in Aircraft Structural Parts C88-007
Residual Stresses in 2024-T81 Aluminum Using Caustics and Moiré Interferometry C87-072

Structural Composite Materials

Design Studies of Primary Aircraft Structures in ARALL Laminates C88-169
Buckling and Failure of Sandwich Plates with Graphite-Epoxy Faces and Various Cores C88-057
General Formulation for the Aeroelastic Divergence of Composite Swept-Forward Wing Structures C88-056
Aeroelastic Tailoring of a Composite Wing with a Decoupler Pylon as a Wing/Store Flutter Suppressor C88-041
Effect of Bolt Load Proportioning on the Capacity of Multiple-Bolt Composite Joints C88-027
Fatigue Crack Growth Predictions in Aramid Reinforced Aluminum Laminates (ARALL) C88-020

Structural Design

Parametric Weight Evaluation of Joined Wings by Structural Optimization C88-185
Design Studies of Primary Aircraft Structures in ARALL Laminates C88-169
Simulation of a Birdstrike Impact on Aircraft Canopy Material C88-107
Preliminary Weight Estimation of Conventional and Joined Wings Using Equivalent Beam Models C88-094
Buckling and Failure of Sandwich Plates with Graphite-Epoxy Faces and Various Cores C88-057
Effect of Bolt Load Proportioning on the Capacity of Multiple-Bolt Composite Joints C88-027
Static Test of an Ultralight Airplane C88-005
Residual Stresses in 2024-T81 Aluminum Using Caustics and Moiré Interferometry C87-072

Structural Durability (including Fatigue and Fracture)

New Design Procedures Applied to Landing Gear Development C88-148
Helicopter Transmission Fatique Life Estimation C88-073
Fatigue Crack Growth Predictions in Aramid Reinforced Aluminum Laminates (ARALL) C88-020
Control and Use of Residual Stresses in Aircraft Structural Parts C88-007
Residual Stresses in 2024-T81 Aluminum Using Caustics and Moiré Interferometry C87-072

Structural Dynamics

Flutter Modes of High Aspect Ratio Tailless Aircraft C88-075
Topics in Landing Gear Dynamics Research at NASA Langley C88-012

Structural Stability

Parametric Weight Evaluation of Joined Wings by Structural Optimization C88-185
Divergence Study of a High-Aspect-Ratio, Forward Swept Wing C88-077
Buckling and Failure of Sandwich Plates with Graphite-Epoxy Faces and Various Cores C88-057

Structural Statics

Effect of Bolt Load Proportioning on the Capacity of Multiple-Bolt Composite Joints C88-027

Thermal Stresses

Coupled Flow, Thermal, and Structural Analysis of Aerodynamically Heated Panels C88-173
Control and Use of Residual Stresses in Aircraft Structural Parts C88-007

Thermophysics and Thermochemistry

Thermal Modeling and Analysis

Efficient Numerical Simulation of a One-Dimensional Electrothermal Deicer Pad C88-179
Coupled Flow, Thermal, and Structural Analysis of Aerodynamically Heated Panels C88-173
Thermal Environment of Transatmospheric Vehicles C88-055
