

Technical Comments

TECHNICAL COMMENTS are brief discussions of papers previously published in this journal. They should not exceed 1500 words (where a figure or table counts as 200 words). The author of the previous paper is invited to submit a reply for publication in the same issue as the Technical Comment. These discussions are published as quickly as possible after receipt of the manuscripts. Neither AIAA nor its Editors are responsible for the opinions expressed by the authors.

The original paper “Three-Dimensional Aerodynamic Simulations of Jumping Paratroopers and Falling Cargo Payloads” represents original research applications of techniques in pursuit of a solution to a real-life problem. As such, it was properly cited as to the origin of the unique application of the techniques, and the reviewers agreed.
