

1980 Index for Journal of Guidance and Control

Note: Beginning this year, each of the journals published by AIAA will contain its own Index in the final issue of the year. In addition, a Combined Index, referencing all of the papers published during 1980 in the six AIAA journals and the *Progress in Astronautics and Aeronautics* books, will be offered for sale early in 1981 as the start of a new service that not only will combine the several indexes but also will cumulate them from year to year.

How to Use the Index

In the Subject Index, pages 601-603, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index.

The Author Index, page 604, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index.

The Chronological Index, pages 605-608, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers.

Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1980, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.
