Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Some Effects of Parameter Variations on the Lateral-Directional Stability of Aircraft G80-020

Civil Missions and Transportation

Development of an Active Flutter Margin Augmentation System for a Commercial Transport G80-061

Flight Operations

Constrained Optimum Trajectories with Specified Range G80-011

Guidance and Control

Recursive Parameter Identification for Nonlinear Stochastic Processes G80-110
Output Ensemble Average of Periodically Excited Linear Time-Varying Systems G80-108
Frequency-Shaped Cost Functionals: Extension of Linear-Quadratic-Gaussian Design Methods G80-096
Minimum Expected Cost Control of a Remotely Piloted Vehicle G80-093
Model-Following System with Assignable Error Dynamics and Its Application to Aircraft G80-092
Flight Tests of a Microprocessor Control System G80-089
Cruise-Missile-Carrier Navigation Requirements G80-088
Maximum-Endurance Return-to-Target Gliding Trajectories G80-083
Viking Orbiter 75 In-Flight Pointing Calibration of the High-Gain Antenna G80-077
Pilot-Optimal Augmentation for the Air-to-Air Tracking Task G80-076
Structural Model of the Adaptive Human Pilot G80-074
Low-Cost Autonomous Navigation Method for Moderate-*g* Missions G80-073
Neighboring Optimum Guidance of a Space-Shuttle-Orbiter-Type Vehicle G80-070
Design Criteria for Optimal Flight Control Systems G80-064
Development of an Active Flutter Margin Augmentation System for a Commercial Transport G80-061
Active Controls for Flutter Suppression and Gust Alleviation in Supersonic Aircraft G80-060
Azimuth Observability Enhancement During Inertial Navigation System In-Flight Alignment G80-059
Multivariable Control System Design Algorithm G80-056 G80-051
Pursuit-Evasion of Two Aircraft in a Horizontal Plane G80-043
Reprisal Strategies in Pursuit Games G80-042
Improved Method for Solving the Algebraic Riccati Equation G80-031
CCD Star Sensor for Fine Pointing Control of Spaceborne Telescopes G80-028
Optimizing the Gains of the Baro-Inertial Vertical Channel G80-027
Missile Guidance Laws Based on Singular Perturbation Methodology G80-025
Some Effects of Parameter Variations on the Lateral-Directional Stability of Aircraft G80-020
Implicit Model Following and Parameter Identification of Unstable Aircraft G80-019
Flight Control Design Based on Nonlinear Model with Uncertain Parameters G80-018
Method of Modeling, Parameter and State Estimation of Nonlinear Systems G80-016
State-Variable Equivalents to Continuous and Pulse Transfer Functions G80-015
Minimal and Subminimal Simplification G80-012
Constrained Optimum Trajectories with Specified Range G80-011
Analysis of Optimal Turning Maneuvers in the Vertical Plane G80-010
Attitude Control of a Flexible Spacecraft G80-005
Millimeter-Wave Missile Seeker Aimpoint Wander Phenomenon G79-001

Handling Qualities, Stability and Control

Recursive Parameter Identification for Nonlinear Stochastic Processes G80-110
Minimum Expected Cost Control of a Remotely Piloted Vehicle G80-093
Model-Following System with Assignable Error Dynamics and Its Application to Aircraft G80-092
Flight Tests of a Microprocessor Control System G80-089
Pilot-Optimal Augmentation for the Air-to-Air Tracking Task G80-076
Structural Model of the Adaptive Human Pilot G80-074
Design Criteria for Optimal Flight Control Systems G80-064
Some Effects of Parameter Variations on the Lateral-Directional Stability of Aircraft G80-020
Flight Control Design Based on Nonlinear Model with Uncertain Parameters G80-018
A Statistical Method Applied to Pilot Behavior Analysis in Multiloop Systems G80-009

Military Missions

Azimuth Observability Enhancement During Inertial Navigation System In-Flight Alignment G80-059
Pursuit-Evasion of Two Aircraft in a Horizontal Plane G80-043

Navigation, Communication, and Traffic Control

Low-Cost Autonomous Navigation Method for Moderate-*g* Missions G80-073
Alternative Approach to Multisensor Navigation G80-072
Azimuth Observability Enhancement During Inertial Navigation System In-Flight Alignment G80-059
Constrained Optimum Trajectories with Specified Range G80-011
Method of Optimizing the Update Intervals in Hybrid Navigation Systems G79-002

Performance

Pursuit-Evasion of Two Aircraft in a Horizontal Plane G80-043
Analysis of Optimal Turning Maneuvers in the Vertical Plane G80-010

Simulation

Output Ensemble Average of Periodically Excited Linear Time-Varying Systems G80-108
Model-Following System with Assignable Error Dynamics and Its Application to Aircraft G80-092
Improved Local Linearization Algorithm for Solving the Quaternion Equations G80-081
Parameter Identification of an Antiaircraft Gunner Model G80-075

Testing, Flight and Ground

Millimeter-Wave Missile Seeker Aimpoint Wander Phenomenon G79-001

Vibration

Theory of the Control of Structures by Low-Authority Controllers G80-078

Interdisciplinary Topics

Analytical and Numerical Methods

Output Ensemble Average of Periodically Excited Linear Time-Varying Systems G80-108
Orbit-Averaged Behavior of Magnetic Control Laws for Momentum Unloading G80-101
Halo Orbit Formulation for the ISEE-3 Mission G80-098
Some Problems Associated with Digital Control of Dynamical Systems G80-095
Minimum Expected Cost Control of a Remotely Piloted Vehicle G80-093
Maximum-Endurance Return-to-Target Gliding Trajectories G80-083
Neighboring Optimum Guidance of a Space-Shuttle-Orbiter-Type Vehicle G80-070
Optimal Member Damper Controller Design for Large Space Structures G80-065
Deadbeat Nutation Controller for Momentum Bias Stabilized Spacecraft G80-062
Multivariable Control System Design Algorithm G80-056
Response of Vibrating Systems with Perturbed Parameters G80-053
Reprisal Strategies in Pursuit Games G80-042
Nonlinear Adaptive Estimation Procedures for Increasing the Efficiency in Monte Carlo Computations G80-041
Novel Method for Data Compression in Recursive INS Error Estimation G80-040
Improved Method for Solving the Algebraic Riccati Equation G80-031
Evaluation of Mass Properties by Finite Elements G80-030
General Expansion of the Density for Nonlinear Filtering G80-026
Method of Modeling, Parameter and State Estimation of Nonlinear Systems G80-016
Thermally Induced Response of Flexible Structures:A Method for Analysis G80-014
Minimal and Subminimal Simplification G80-012
Analysis of Optimal Turning Maneuvers in the Vertical Plane G80-010

Local Representation of the Geopotential by Weighted Orthonormal Polynomials G80-008
Computerized Algebraic Utilities for the Construction of Nonsingular Satellite Theories G80-007

Computer Communications, Information Processing and Software

Recursive Parameter Identification for Nonlinear Stochastic Processes G80-110
Sequential Estimation Algorithm Using a Continuance UDU Covariance Factorization G80-057
Novel Method for Data Compression in Recursive INS Error Estimation G80-040
Computerized Algebraic Utilities for the Construction of Nonsingular Satellite Theories G80-007

Computer Technology

Flight Tests of a Microprocessor Control System G80-089
Alternative Approach to Multisensor Navigation G80-072
Evaluation of Mass Properties by Finite Elements G80-030
Modular Strapdown Guidance Unit with Embedded Microprocessors G80-001

Human Factors

Pilot-Optimal Augmentation for the Air-to-Air Tracking Task G80-076
Parameter Identification of an Antiaircraft Gunner Model G80-075

Reliability, Maintainability, and Logistics Support

Performance of an Aided Redundant Navigator in Normal and Failure Modes G80-087

Satellite Communication Systems (including Terrestrial Stations)

Method of Optimizing the Update Intervals in Hybrid Navigation Systems G79-002

Sensor Systems

Performance of an Aided Redundant Navigator in Normal and Failure Modes G80-087
Alternative Approach to Multisensor Navigation G80-072
Novel Method for Data Compression in Recursive INS Error Estimation G80-040
CCD Star Sensor for Fine Pointing Control of Spaceborne Telescopes G80-028
Control System Design of the Annular Suspension and Pointing System G80-002
Modular Strapdown Guidance Unit with Embedded Microprocessors G80-001

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Lift-Dispersion Control of Spinning Re-entry Vehicles G80-091
A Lesson Learned about Cannon-Launched Guided Projectiles G80-024

Configurational Design

A Lesson Learned about Cannon-Launched Guided Projectiles G80-024

Dynamics and Control

Lift-Dispersion Control of Spinning Re-entry Vehicles G80-091
Multivariable Control System Design Algorithm G80-056
Optimal Thrust Control with Proportional Navigation Guidance G80-055
Instrument Modeling for Aerodynamic Coefficient Identification from Flight Test Data G80-045
Evaluation of Mass Properties by Finite Elements G80-030
Missile Guidance Laws Based on Singular Perturbation Methodology G80-025
A Lesson Learned about Cannon-Launched Guided Projectiles G80-024
State-Variable Equivalents to Continuous and Pulse Transfer Functions G80-015

Guidance

Linear-Angle Solution to the Optimal Rocket Steering Problem G80-109
Lift-Dispersion Control of Spinning Re-entry Vehicles G80-091
Cruise-Missile-Carrier Navigation Requirements G80-088
Observability Considerations for an Inertial Gyrocompass G80-058
Optimal Thrust Control with Proportional Navigation Guidance G80-055
New Higher-Order Ballistic Wind Compensation Method G80-044
State-Variable Equivalents to Continuous and Pulse Transfer Functions G80-015
Modular Strapdown Guidance Unit with Embedded Microprocessors G80-001

Missile Systems

Cruise-Missile-Carrier Navigation Requirements G80-088
Optimal Thrust Control with Proportional Navigation Guidance G80-055
Missile Guidance Laws Based on Singular Perturbation Methodology G80-025
Millimeter-Wave Missile Seeker Aimpoint Wander Phenomenon G79-001

Simulation

Nonlinear Adaptive Estimation Procedures for Increasing the Efficiency in Monte Carlo Computations G80-041

Sounding Rocket Systems

New Higher-Order Ballistic Wind Compensation Method G80-044

Subsystem Design and Ground Support

Observability Considerations for an Inertial Gyrocompass G80-058

Trajectories and Tracking Systems

General Expansion of the Density for Nonlinear Filtering G80-026
Method of Modeling, Parameter and State Estimation of Nonlinear Systems G80-016

Spacecraft Technology

Configurational and Structural Design (including Loads)

Active Local Vibration Isolation Applied to a Flexible Space Telescope G80-037

Data Sensing, Presentation, and Transmission

Viking Orbiter 75 In-Flight Pointing Calibration of the High-Gain Antenna G80-077
Instrument Modeling for Aerodynamic Coefficient Identification from Flight Test Data G80-045

Dynamics and Control

Stability of a Precision Attitude Determination Scheme G80-112
Optimal Large-Angle Single-Axis Rotational Maneuvers of Flexible Spacecraft G80-103
Modal-Space Control of Large Flexible Spacecraft Possessing Ignorable Coordinates G80-102
Orbit-Averaged Behavior of Magnetic Control Laws for Momentum Unloading G80-101
Model Reduction by Euclidean Methods G80-100
Halo Orbit Formulation for the ISEE-3 Mission G80-098
Frequency-Shaped Cost Functionals: Extension of Linear-Quadratic-Gaussian Design Methods G80-096
Modal Damping Enhancement in Large Space Structures Using AMCD's G80-084
Controllability and Observability for Flexible Spacecraft G80-079
Theory of the Control of Structures by Low-Authority Controllers G80-078
Numerical Solution of the Constrained Reentry Vehicle Trajectory Problem via Quasilinearization G80-071
Passive Dissipation of Energy in Large Space Structures G80-066
Optimal Member Damper Controller Design for Large Space Structures G80-065
Adaptive Modal Control of Large Flexible Spacecraft G80-063
Deadbeat Nutation Controller for Momentum Bias Stabilized Spacecraft G80-062
Theory, Simulation, and Practical Tests of a Counterspun Nutation Damper for Prolate Spinners G80-052
Satellite Attitude Estimation from Communications Signal Strength G80-047
Gyro-Based Attitude Reference Systems for Communications Satellites G80-039
Energy-Sink Analysis of Systems Containing Driven Rotors G80-038
Active Local Vibration Isolation Applied to a Flexible Space Telescope G80-037
Optimal Modal-Space Control of Flexible Gyroscopic Systems G80-036
Optimal Continuous Torque Attitude Maneuvers G80-035
On-Orbit Evaluation of the Control System/Structural Mode Interactions on OSO-8 G80-034
High Pointing Accuracy with a Momentum Bias Attitude Control System G80-033
Controllability and Observability of Large Flexible Spacecraft in Noncircular Orbits G80-029
Modal-Space Control of Distributed Gyroscopic Systems G80-022
Solar Pressure Three-Axis Attitude Control G80-021
Formulation of Equations of Motion for Complex Spacecraft G80-017
Thermally Induced Response of Flexible Structures:A Method for Analysis G80-014
Dynamics of a Flexible Body in Orbit G80-013
New Solar Attitude Control Approach for Satellites in Elliptic Orbits G80-006
Attitude Control of a Flexible Spacecraft G80-005

Dual-Spin Spacecraft Dynamics During Platform Spinup G80-004
Nutation Dampers vs Precession Dampers for Asymmetric Spacecraft G80-003

Earth-Orbital Trajectories

Orbital Decay Due to Drag in an Exponentially Varying Atmosphere G80-111
Linear-Angle Solution to the Optimal Rocket Steering Problem G80-109
Halo Orbit Formulation for the ISEE-3 Mission G80-098
Semianalytic Theory for a Close-Earth Artificial Satellite G80-054
Keplerian Representation of a Non-Keplerian Orbit G80-023
Local Representation of the Geopotential by Weighted Orthonormal Polynomials G80-008
Computerized Algebraic Utilities for the Construction of Nonsingular Satellite Theories G80-007

Entry Vehicle Dynamics and Control

Numerical Solution of the Constrained Reentry Vehicle Trajectory Problem via Quasilinearization G80-071

Entry Vehicle Mission Studies and Flight Mechanics

Nonlinear Adaptive Estimation Procedures for Increasing the Efficiency in Monte Carlo Computations G80-041

Entry Vehicles and Landers

Orbital Decay Due to Drag in an Exponentially Varying Atmosphere G80-111

Lunar and Interplanetary Trajectories

Optimal Low-Thrust Maneuvers Near the Libration Points G80-107
Trajectories and Orbital Maneuvers for the First Libration-Point Satellite G80-099
Time-Optimal Orbit Transfer Trajectory for Solar Sail Spacecraft G80-097

Navigation, Guidance, and Flight-Path Control

Stability of a Precision Attitude Determination Scheme G80-112
Trajectories and Orbital Maneuvers for the First Libration-Point Satellite G80-099
Time-Optimal Orbit Transfer Trajectory for Solar Sail Spacecraft G80-097
Performance of an Aided Redundant Navigator in Normal and Failure Modes G80-087
Co-Apsidal Autonomous Terminal Rendezvous in Mars Orbit G80-082
Improved Local Linearization Algorithm for Solving the Quaternion Equations G80-081
Neighboring Optimum Guidance of a Space-Shuttle-Orbiter-Type Vehicle G80-070
Sequential Estimation Algorithm Using a Continuance UDU Covariance Factorization G80-057
Satellite Attitude Estimation from Communications Signal Strength G80-047
Reduced-Order Kalman Filtering with Incomplete Observability G80-046
Optimal Continuous Torque Attitude Maneuvers G80-035
Viking Orbit Trim Maneuvers G80-032
Local Representation of the Geopotential by Weighted Orthonormal Polynomials G80-008

Simulation

Orbit-Averaged Behavior of Magnetic Control Laws for Momentum Unloading G80-101
Energy-Sink Analysis of Systems Containing Driven Rotors G80-038
Active Local Vibration Isolation Applied to a Flexible Space Telescope G80-037
Optimal Continuous Torque Attitude Maneuvers G80-035
Formulation of Equations of Motion for Complex Spacecraft G80-017

Systems

Stability of a Precision Attitude Determination Scheme G80-112
Sequential Estimation Algorithm Using a Continuance UDU Covariance Factorization G80-057
Gyro-Based Attitude Reference Systems for Communications Satellites G80-039
High Pointing Accuracy with a Momentum Bias Attitude Control System G80-033
Dual-Spin Spacecraft Dynamics During Platform Spinup G80-004
Control System Design of the Annular Suspension and Pointing System G80-002

Testing, Flight and Ground

On-Orbit Evaluation of the Control System/Structural Mode Interactions on OSO-8 G80-034

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Active Controls for Flutter Suppression and Gust Alleviation in Supersonic Aircraft G80-060

Structural Design

Active Controls for Flutter Suppression and Gust Alleviation in Supersonic Aircraft G80-060

Structural Dynamics

Modal-Space Control of Large Flexible Spacecraft Possessing Ignorable Coordinates G80-102
Shaped Torque Techniques G80-080
Controllability and Observability for Flexible Spacecraft G80-079
Theory of the Control of Structures by Low-Authority Controllers G80-078
Passive Dissipation of Energy in Large Space Structures G80-066
Development of an Active Flutter Margin Augmentation System for a Commercial Transport G80-061
Response of Vibrating Systems with Perturbed Parameters G80-053
Optimal Modal-Space Control of Flexible Gyroscopic Systems G80-036
On-Orbit Evaluation of the Control System/Structural Mode Interactions on OSO-8 G80-034
Modal-Space Control of Distributed Gyroscopic Systems G80-022
Thermally Induced Response of Flexible Structures:A Method for Analysis G80-014
Dynamics of a Flexible Body in Orbit G80-013

Structural Stability

Dynamics of a Flexible Body in Orbit G80-013

Thermophysics and Thermochemistry

Thermochemistry and Chemical Kinetics

General Expansion of the Density for Nonlinear Filtering G80-026
