Chronological Index

G82-003 Estimation of Distributed Parameter Systems. David D. Schaechter, *Jet Propulsion Laboratory, California Institute of Technology* (JGCD 5, 1, p. 22) Article

Technical Comment by Charles R. Chalk, *Arvin/Calspan Advanced Technology Center* (JGCD 6, 6, p. 534)

Reply (JGCD 6, 6, p. 535)

G83-001 The History of Apollo Onboard Guidance, Navigation, and Control (History of Key Technologies). David G. Hoag, *The Charles Stark Draper Laboratory, Inc.* (JGCD 6, 1, p. 4) Article

G83-002 Fuel-Optimal Aircraft Trajectories with Fixed Arrival Times. James W. Burrows, *Boeing Computer Services Company* (JGCD 6, 1, p. 14) Article based on AIAA Paper 81-1749 CP816

G83-003 Robustness of the Independent Modal-Space Control Method. L. Meirovitch, *Virginia Polytechnic Institute and State University*; and H. Baruh, *Virginia Polytechnic Institute and State University* (JGCD 6, 1, p. 20) Article based on AIAA Paper 83-0313

G83-004 Semantic Definitions of Spacecraft Command and Control Languages Using Hierarchical Graphs. M. Elwakkad Zaghloul, *The George Washington University*; and W. Truskowski, *NASA Goddard Space Flight Center* (JGCD 6, 1, p. 26) Article

G83-005 Spacecraft Computer Resource Margin Management. Brian T. Larman, *Jet Propulsion Laboratory, California Institute of Technology* (JGCD 6, 1, p. 33) Article based on AIAA Paper 81-2123 CP817

G83-006 A Radiation-Hardened Star Scanner for Spacecraft Guidance and Control. M. M. Birnbaum and R. L. Bunker, *Jet Propulsion Laboratory, California Institute of Technology*; and J. T. Tavalacci, *Bendix Corporation* (JGCD 6, 1, p. 39) Article based on AIAA Paper 81-1826 CP816

G83-007 Optimum Yaw Motion for Satellites with a Nadir-Pointing Payload (The Netherlands). C. C. Kalweit, *European Space Agency* (JGCD 6, 1, p. 47) Article

G83-008 Design of Space Control Systems Using On-Off Thrusters. Wallace E. Vander Velde, *Massachusetts Institute of Technology*; and Jun He, *National Academy of Space Technology (China)* (JGCD 6, 1, p. 53) Article based on AIAA Paper 81-1847 CP816

G83-009 Effective Electromagnetic Shielding in Multilayer Printed Circuit Boards. K. G. Wiles and J. L. Moe, *General Dynamics* (JGCD 6, 1, p. 61) Engineering Note

G83-010 A Practical Correlation Test for Cooperative Passive Optical Sensors. Thomas R. Blackburn, *McDonnell Douglas Astronautics Company* (JGCD 6, 1, p. 62) Engineering Note

G83-011 Generic Faults and Architecture Design Considerations in Flight-Critical Systems. Stephen S. Osder, *Sperry Flight Systems* (JGCD 6, 2, p. 65) Article based on AIAA Paper 82-1595 CP825

G83-012 Fault Isolation Methodology for the L-1011 Digital Avionic Flight Control System. W. B. Noble, *Hughes Aircraft Company* (JGCD 6, 2, p. 72) Article based on AIAA Paper 81-2223 CP818

G83-013 Applications of Head-Up Displays in Commercial Transport Aircraft. J. R. Lowe and J. R. Ornelas, *Douglas Aircraft Company, McDonnell Douglas Corporation* (JGCD 6, 2, p. 77) Article based on AIAA Paper 81-2300 CP818

G83-014 A Unifying Framework for Longitudinal Flying Qualities Criteria. Robert F. Stengel, *Princeton University* (JGCD 6, 2, p. 84) Article based on AIAA Paper 81-1889 CP816

G83-015 Control Characteristics of a Buoyant Quad-Rotor Research Aircraft. B. L. Nagabhushan, D. W. Lichty and N. P. Tomlinson, *Goodyear Aerospace Corporation* (JGCD 6, 2, p. 91) Article based on AIAA Paper 81-1838 CP816

G83-016 Dynamics of a Spacecraft during Extension of Flexible Appendages. Kazuo Tsuchiya, *Mitsubishi Electric Corporation* (JGCD 6, 2, p. 100) Article

G83-017 Robust Control of Flexible Spacecraft. Robert L. Kosut, *Integrated Systems Inc.*; Horst Salzwedel and Abbas Emami-Naeini, *Systems Control Technology, Inc.* (JGCD 6, 2, p. 104) Article

G83-018 Model Reference Adaptive Control of Large Structural Systems. I. Bar-Kana, H. Kaufman and M. Balas, *Rensselaer Polytechnic Institute* (JGCD 6, 2, p. 112) Article

G83-019 Observers as Noise Filters in an Automatic Aircraft Landing System. Charles L. Phillips, Robert F. Wilson and Edward R. Graf, *Auburn University*; and Scott A. Starks, *University of Texas at Arlington* (JGCD 6, 2, p. 119) Engineering Note

G83-020 ARINC 429 Digital Data Communications for Commercial Aircraft. Randall K. Chun, *Boeing Aerospace Company* (JGCD 6, 2, p. 120) Engineering Note based on AIAA Paper 81-2267 CP818

G83-021 Nonlinear Filter for Pilot's Remnant Attenuation. G. R. Sarma, *National Aeronautical Laboratory (India)* (JGCD 6, 2, p. 123) Engineering Note

G83-022 Gravitational Three-Body Problem in 120 deg Axial Coordinates. W. E. Bleick, *Naval Postgraduate School* (JGCD 6, 2, p. 124) Engineering Note

G83-023 Efficient Square Root Algorithm for Measurement Update in Kalman Filtering. Bar-Itzhack I. Y. and Y. Medan

Technion-Israel Institute of Technology (JGCD 6, 3, p. 129) Article

G83-024 Space Shuttle Primary Onboard Software: STS-1 to Operational Use. A. J. Macina, *International Business Machines Corporation* (JGCD 6, 3, p. 135) Article based on AIAA Paper 81-2135 CP817

G83-025 PMUX--The Interface for Engine Data to AIDS. Joseph A. Bluish and William Lorenz, *The Bendix Corporation* (JGCD 6, 3, p. 143) Article based on AIAA Paper 82-1127

G83-026 Development and Test of an Integrated Sensory System for Advanced Aircraft. W. K. Toolan and A. M. Zislin, *Grumman Aerospace Corporation* (JGCD 6, 3, p. 150) Article

G83-027 Minuteman Inertial Guidance Assessment: The Next Best Thing to Flight Tests. M. H. Andre and J. J. Czaja, *Rockwell International Corporation* (JGCD 6, 3, p. 156) Article

G83-028 Analysis of In-Trail Following Dynamics of CDTI-Equipped Aircraft. John A. Sorensen and Tsuyoshi Goka, *Analytical Mechanics Associates, Inc.* (JGCD 6, 3, p. 162) Article based on AIAA Paper 82-1330

G83-029 Determination of Horizontal Tail Load and Hinge Moment Characteristics from Flight Data. Gary D. Park and Mike H. Abba, *Gates Learjet Corporation* (JGCD 6, 3, p. 170) Article based on AIAA Paper 82-0183

G83-030 Test Demonstration of Digital Control of Wing/Store Flutter. E. H. Johnson, C. Hwang, W. S. Pi, D. F. Kesler and D. S. Joshi, *Northrop Corporation*; and C. A. Harvey, *Honeywell, Inc.* (JGCD 6, 3, p. 176) Article based on AIAA Paper 82-0645 CP824

G83-031 Control Techniques to Improve Space Shuttle Solid Rocket Booster Separation. Donald Dean Tomlin, *NASA George C. Marshall Space Flight Center* (JGCD 6, 3, p. 182) Article

G83-032 Experimental Demonstration of Static Shape Control. Daniel Eldred and David Schaechter, *Jet Propulsion Laboratory, California Institute of Technology* (JGCD 6, 3, p. 188) Article based on AIAA Paper 81-1755 CP816

G83-033 Symbolic Representation of Translatory Motion in Multivarying-Link Mechanisms. Itzhack Y. Bar-Itzhack, *Technion-Israel Institute of Technology* (JGCD 6, 3, p. 193) Article

G83-034 An Onboard Navigator for the Extremely Low-Altitude Satellite Utilizing Accelerometers. Hidehiko Mori, *National Aerospace Laboratory (Japan)* (JGCD 6, 3, p. 200) Article

G83-035 Missile Guidance Design Tradeoffs for High-Altitude Air Defense. F. William Nesline and Paul Zarchan, *Raytheon Company* (JGCD 6, 3, p. 207) Article

G83-036 Sensing Relative Attitudes for Automatic Docking. Letitia Korbly, *University of Alabama* (JGCD 6, 3, p. 213) Engineering Note

G83-037 A Core Software Concept for Integrated Control. Ellis F. Hitt, Michael Kluse and Robert Broderson, *Battelle Columbus Laboratories* (JGCD 6, 3, p. 215) Engineering Note based on AIAA Paper 81-2256 CP818

G83-038 Excessive Roll Damping Can Cause Roll Ratchet. C. R. Chalk, *Arvin/Calspan Corporation* (JGCD 6, 3, p. 218) Engineering Note based on AIAA Paper 82-1606 CP825

G83-039 Time-Optimized North-South Stationkeeping. Charles F. Gartrell, *General Research Corporation* (JGCD 6, 3, p. 220) Engineering Note

G83-040 Roll Resonance Probability for Ballistic Missiles with Random Configurational Asymmetry. M. D. Bennett, *Sandia National Laboratories* (JGCD 6, 3, p. 222) Engineering Note

G83-041 Computer Performance Monitoring during the Centaur Launch Countdown. William F. Thomas, *NASA Kennedy Space Center* (JGCD 6, 4, p. 225) Article based on AIAA Paper 81-2397

G83-042 HiMAT Onboard Flight Computer System Architecture and Qualification. Albert F. Myers and Michael R. Earls, *NASA Ames Research Center*; and Larry A. Callizo, *Rockwell International* (JGCD 6, 4, p. 231) Article based on AIAA Paper 81-2107 CP817

G83-043 Covariance Analysis of a Charge Carrier Device Processing Algorithm for Stellar Sensors. Burton Boxenhorn, *The Charles Stark Draper Laboratory, Inc.* (JGCD 6, 4, p. 239) Article based on AIAA Paper 81-1825 CP816

G83-044 A Position-Modulated Alignment Test Technique in the Presence of Ship's Flexure. Burton Boxenhorn and Brock S. Dew, *The Charles Stark Draper Laboratory, Inc.* (JGCD 6, 4, p. 246) Article based on AIAA Paper 81-1769 CP816

G83-045 Design and Analysis of a Digitally Controlled Integrated Flight/Fire Control System. John H. Blakelock, *Applications Research Corporation* (JGCD 6, 4, p. 251) Article based on AIAA Paper 81-2245

G83-046 Piloted Simulated of Hover and Transition of a Vertical Attitude Takeoff and Landing Aircraft. Gary C. Hill, *NASA Ames Research Center* (JGCD 6, 4, p. 258) Article based on AIAA Paper 81-2636

G83-047 Space Shuttle Stability and Control Derivatives Estimated from the First Entry. Kenneth W. Iliff and Richard E. Maine, *NASA Ames Research Center*; and Douglas R. Cooke, *NASA Johnson Space Center* (JGCD 6, 4, p. 264) Article based on AIAA Paper 81-2451

G83-048 Stability of Aircraft Motion in Critical Cases. J. E. Cochran Jr. and C.S. Ho, *Auburn University* (JGCD 6, 4, p. 272) Article based on AIAA Paper 81-1885 CP816

G83-049 Angular Motion of a Spinning Projectile with a Viscous Liquid Payload. C. H. Murphy, *U. S. Army Armament Research and Development Command, Aberdeen Proving Ground* (JGCD 6, 4, p. 280) Article

G83-050 A New Strapdown Attitude Algorithm. Robin B. Miller, *Aeronautical Research Laboratories, Defence Science and Technology Organisation (Australia)* (JGCD 6, 4, p. 287) Article

G83-051 Onboard Orbit Estimation with Tracking and Data Relay Satellite System Data. J. B. Dunham, A. C. Long, H. M. Sielski and K. A. Preiss, *Computer Sciences Corporation* (JGCD 6, 4, p. 292) Article

G83-052 A Comparison of Control Techniques for Large Flexible Systems. L. Meirovitch, H. Baruh and H. Oz, *Virginia Polytechnic Institute and State University* (JGCD 6, 4, p. 302) Article

G83-053 Relativistic Rocket Motion via Minkowski's Formalism. Hector H. Brito, *Instituto de Investigacion Aeronautica y Espacial (Argentina)* (JGCD 6, 4, p. 311) Engineering Note

G83-054 Nonstationary Shaping Filters for Simulation of Gravity Uncertainty Effects on Missile Trajectories. S. L. Baumgartner, *The Analytic Sciences Corporation* (JGCD 6, 4, p. 313) Engineering Note based on AIAA Paper 82-1503 CP825

G83-055 Active Attitude Control of a Spinning Symmetrical Satellite in an Elliptic Orbit. R. A. Calico Jr. and G. S. Yeakel, *Air Force Institute of Technology* (JGCD 6, 4, p. 315) Engineering Note

G83-056 Recursive Relationships for Body Axis Rotation Rates. David M. Henderson, *TRW Houston Systems Services* (JGCD 6, 4, p. 318) Engineering Note

G83-057 A Kalman Filter Algorithm for Terminal-Area Navigation with Sensors of Moderate Accuracy. Luigi S. Circolani and Gerd Kanning, *NASA Ames Research Center*; and Stanley F. Schmidt, *Analytical Mechanics Associates, Inc.* (JGCD 6, 5, p. 321) Article

G83-058 Ground Simulation Investigation of Helicopter Decelerating Instrument Approaches. J. V. Lebacqz, *NASA Ames Research Center* (JGCD 6, 5, p. 330) Article based on AIAA Paper 82-1346

G83-059 An Optimal Control Approach to Pilot/Vehicle Analysis and the Neal-Smith Criteria. Barton J. Bacon and David K. Schmidt, *Purdue University* (JGCD 6, 5, p. 339) Article based on AIAA Paper 82-1357

G83-060 A Model-Based Investigation of Manipulator Characteristics and Pilot/Vehicle Performance. Ronald A. Hess, *NASA Ames Research Center* (JGCD 6, 5, p. 348) Article

G83-061 Space Shuttle Response to Ascent Wind Profiles. Orvel E. Smith, *NASA George C. Marshall Space Flight Center*; and Lambert D. Austin Jr., *NASA Lyndon B. Johnson Space Center* (JGCD 6, 5, p. 355) Article based on AIAA Paper 81-1856 CP816

G83-062 Dislocated Actuator/Sensor Positioning and Feedback Design for Flexible Structures. G. Schulz and G. Heimbald, *Deutsche Forschungs-und Versuchsanstalt fuer Luft-und Raumfahrt e.V. (FRG)* (JGCD 6, 5, p. 361) Article based on AIAA Paper 82-1590 CP825

G83-063 Effects of Energy Addition and Dissipation on Dual-Spin Spacecraft Attitude Motion. J. E. Cochran Jr. and P. H. Shu, *Auburn University* (JGCD 6, 5, p. 368) Article

G83-064 Identification of Structural Dynamics Systems Using Least-Square Lattice Filters. N. Sundararajan and R. C. Montgomery, *NASA Langley Research Center* (JGCD 6, 5, p. 374) Article based on AIAA Paper 82-1565 CP825

G83-065 Tracking Geosynchronous Satellites by Very-Long-Baseline Interferometry. Thomas P. Yunck and Sien-Chong Wu, *Jet Propulsion Laboratory, California Institute of Technology* (JGCD 6, 5, p. 382) Article based on AIAA Paper 82-1446

G83-066 New Nonsingular Forms of Perturbed Satellite Equations of Motion. Ahmed Aly Kamel, *Ford Aerospace and Communication Corporation* (JGCD 6, 5, p. 387) Article based on AIAA Paper 82-0074

G83-067 Experience with Flight Test Trajectory Guidance. Eugene L. Duke, Michael R. Swann, Einar K. Enevoldson and Thomas D. Wolf, *Dryden Flight Research Facility, NASA Ames Research Center* (JGCD 6, 5, p. 393) Article based on AIAA Paper 81-2504

G83-068 Closed-Loop Control Performance Sensitivity to Parameter Variations. David B. Schaechter, *Lockheed Palo Alto Research Laboratory* (JGCD 6, 5, p. 399) Article

G83-069 Core Resource Management for Large Real-Time Computer Program Development. Pravin L. Kadakia and David J. Herman, *RCA Government Systems Division* (JGCD 6, 5, p. 403) Article based on AIAA Paper 81-2222 CP818

G83-070 Organizing Space Shuttle Parametric Data for Maintainability. R. C. Angier, *IBM Corporation* (JGCD 6, 5, p. 407) Article based on AIAA Paper 81-2101 CP817

G83-071 Adaptive Kalman Filter for Tracking Maneuvering Targets. Esmat Bekir, *Hughes Aircraft Company* (JGCD 6, 5, p. 414) Engineering Note

G83-072 Postflight Evaluation of the Shuttle Guidance, Navigation, and Control During Powered-Ascent Flight Phase. LeRoy M. Olson, *McDonnell Douglas Technical Services Company*; and John W. Sunkel, *NASA Johnson Space Center* (JGCD 6, 6, p. 418) Article based on AIAA Paper 82-1554 CP825

G83-073 Shuttle Orbiter Stellar-Inertial Reference System. F. E. Smith and M. E. Campbell, *Rockwell International*; T. J. Blucker, C. E. Manry and I. Saulietis, *NASA Johnson Space Center* (JGCD 6, 6, p. 424) Article based on AIAA Paper 82-1560 CP825

G83-074 Minimum Impulse Limit Cycle Design to Compensate for Measurement Uncertainties. E. T. Kubiak, *NASA Johnson Space Center*; and M. W. Martin, *Lockheed Engineering and Management Services Company, Inc.* (JGCD 6, 6, p. 432) Article based on AIAA Paper 82-1578 CP825

G83-075 Digital Autopilot for Thrust Vector Control of the Shuttle Orbital Maneuvering System. A. Penchuk and S. Croopnick, *The Charles Stark Draper Laboratory, Inc.* (JGCD 6, 6, p. 436) Article based on AIAA Paper 82-1579 CP825

G83-076 Space Shuttle Entry Guidance Performance Results. Jon C. Harpold, *NASA Johnson Space Center*; and Donald E. Gavert, *Rockwell International* (JGCD 6, 6, p. 442) Article based on AIAA Paper 82-1600 CP825

G83-077 Analyses of Shuttle Orbiter Approach and Landing. Irving L. Ashkenas and Roger H. Hoh, *Systems Technology, Inc.*; and Gary L. Teper, *Sperry/Systems Management-Secor* (JGCD 6, 6, p. 448) Article based on AIAA Paper 82-1607 CP825

G83-078 Dynamic Stability Testing of the Orbiter Flight Control System/Flexible Body Interaction. R. G. E. Epple and R. E. Altenbach, *Rockwell International Corporation* (JGCD 6, 6, p. 456) Article based on AIAA Paper 82-1531 CP825

G83-079 Satellite Attitude Dynamics and Control in the Presence of Environmental Torques--A Brief Survey. S. K. Shrivastava, *University of British Columbia*; and V. J. Modi, *Indian Institute of Science* (JGCD 6, 6, p. 461) Survey Paper based on AIAA Paper 82-1414 CP825

G83-080 Inertial Attitude Determination for a Dual-Spin Planetary Spacecraft. E. C. Wong and W. G. Breckenridge, *Jet Propulsion Laboratory, California Institute of Technology* (JGCD 6, 6, p. 491) Article based on AIAA Paper 81-1764 CP816

G83-081 An Error Criterion for the Pointing of Axially Symmetric Spacecraft Payloads. Thomas C. Coffey, *The Aerospace Corporation* (JGCD 6, 6, p. 484) Article

G83-082 Magnetic Desaturation of a Momentum Bias System. K. L. Lebsack, *RCA Astro-Electronics* (JGCD 6, 6, p. 477) Article based on AIAA Paper 82-1468 CP825

G83-083 Dynamics and Control of a Deformable Gyrostat, Utilizing Continuum Vehicle Modes. Hari B. Hablani, *Rockwell International* (JGCD 6, 6, p. 499) Article based on AIAA Paper 82-1613 CP825

G83-084 Satellite Selection for the Global Positioning System. W. T. Higgins Jr., *Arizona State University*; D. C. Mossman and J. L. McClurg, *Sperry Flight Systems* (JGCD 6, 6, p. 472) Article

G83-085 Torque from Solar Radiation Pressure Gradient During Eclipse. G. B. Sincarsin and P. C. Hughes, *Institute for Aerospace Studies, University of Toronto* (JGCD 6, 6, p. 511) Article based on AIAA Paper 82-1612 CP825

G83-086 A Guidance Law for General Surface Targets. W. R. Chadwick and C. M. Rose, *Naval Surface Weapons Center* (JGCD 6, 6, p. 526) Article

G83-087 Gain Indexing Schemes for Low-Thrust Perturbation Guidance. Thomas P. Bauer, Lincoln J. Wood and Thomas K. Caughey, *California Institute of Technology* (JGCD 6, 6, p. 518) Article based on AIAA Paper 82-1430 CP825

G83-088 Space Shuttle as a Dynamic Test Tool for Missile Guidance Systems. Thomas P. Nosek, *TRW Defense Systems Group* (JGCD 6, 6, p. 530) Engineering Note based on AIAA Paper 82-1502 CP825

G83-089 Some Effects of High-Rate Springs in Elevator Control Systems. M. E. Eshelby, *Cranfield Institute of Technology (England)* (JGCD 6, 6, p. 531) Engineering Note
