1989 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 949–953, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 954, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 955–960, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1989, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Influence of Geometric Nonlinearities in the Dynamics of Flexible Treelike Structures G89-135

Aeroelasticity and Aeroservoelasticity

Simulation Model-Building Procedure for Dynamic Systems Integration G89-144
Comparative Results for a Special Class of Robust Nonlinear Tracking Algorithms G89-049
Active Flutter Suppression for Two-Dimensional Airfoils G89-031
Digital Robust Control Law Synthesis Using Constrained Optimization G89-029

Flight Operations

Penetration Landing Guidance Trajectories in the Presence of Windshear G89-132
Cooperative Synthesis of Control and Display Augmentation G89-008

General Aviation

Analysis of a Candidate Control Algorithm for a Ride-Quality Augmentation System G89-081

Military Missions

Three-Dimensional Energy-State Extremals in Feedback Form G89-095
Trajectory Optimization with Risk Minimization for Military Aircraft G89-052

Performance

Acceleration, Gamma, and Theta Guidance for Abort Landing in a Windshear G89-133
Penetration Landing Guidance Trajectories in the Presence of Windshear G89-132
Minimum-Time Turns Using Vectored Thrust G89-128
Study of Aircraft Cruise G89-101
Singular Trajectories in Airplane Cruise-Dash Optimization G89-051

Rotorcraft

Design of Attitude and Command Systems for Helicopters Using Eigenstructure Assignment G89-129
Structured Stability Robustness Improvement by Eigenspace Techniques: A Hybrid Methodology G89-027

Simulation

Simulation Model-Building Procedure for Dynamic Systems Integration G89-144
Mission-Function Control for Slew Maneuver of a Flexible Space Structure G89-139
Experimental Estimation of Modeling Errors in Dynamic Systems G89-104
Flying Qualities from Early Airplanes to the Space Shuttle G89-075
Simulation Evaluation of an Advanced Control Concept for a V/STOL Aircraft G89-055
Evaluation of a Command Monitoring Concept for a V/STOL Research Aircraft G89-007

Testing, Flight and Ground

Flight Evaluation of Pursuit Displays for Precision Approach of Powered-Lift Aircraft G89-083
Flight-Test Maneuver Modeling and Control G89-032

Vibration

Mission-Function Control for Slew Maneuver of a Flexible Space Structure G89-139
Recursive Form of the Eigensystem Realization Algorithm for System Identification G89-103
Single-Mode Projection Filters for Modal Parameter Identification for Flexible Structures G89-088

Fluid Dynamics

Plasmadynamics and MHD

Stability Analysis of Electro-Magneto-plasmadynamics G89-119

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Calculation of Structural Dynamic Forces and Stresses Using Mode Acceleration G89-120
Flight Investigation of Helicopter Low-Speed Response Requirements G89-100
Stability Boundaries for Aircraft with Unstable Lateral-Directional Dynamics and Control Saturation G89-009

Aircraft Guidance

Space Shuttle Guidance for Multiple Main Engine Failures During First Stage G89-142
Acceleration, Gamma, and Theta Guidance for Abort Landing in a Windshear G89-133
Penetration Landing Guidance Trajectories in the Presence of Windshear G89-132
Design of a Modalized Observer with Eigenvalue Sensitivity Reduction G89-121
Gain-Free Square Root Information Filtering Using the Spectral Decomposition G89-107
Three-Dimensional Energy-State Extremals in Feedback Form G89-095
Explicit Guidance Along an Optimal Space Curve G89-080
Trajectory Optimization with Risk Minimization for Military Aircraft G89-052
Comparative Results for a Special Class of Robust Nonlinear Tracking Algorithms G89-049
Flight-Test Maneuver Modeling and Control G89-032
Short-Range Nonlinear Feedback Strategies for Aircraft Pursuit-Evasion G89-004

Aircraft Stability and Control

Application of Output Feedback to Variable Structure Systems G89-151
Literal Singular-Value-Based Flight Control System Design Techniques G89-147
Simulation Model-Building Procedure for Dynamic Systems Integration G89-144

Mission-Function Control for Slew Maneuver of a Flexible Space Structure G89-139
Dynamic Modeling and Adaptive Control of a Single-Link Flexible Manipulator G89-136
Design of Attitude and Command Systems for Helicopters Using Eigenstructure Assignment G89-129
Minimum-Time Turns Using Vectored Thrust G89-128
Stability Analysis of Electro-Magnetoplasmadynamics G89-119
Bounded-Input/Bounded-Output Stability of Linear Multidimensional Time-Varying Systems G89-117
Latent Fault Markov Model for a Highly Reliable Triplex Computer System G89-115
Square-Root State Estimation for Second-Order Large Space Structures Models G89-109
Approach to Modeling and Estimation for Uncertain Systems G89-106
Issues in the Dynamics and Control of Flexible Robot Manipulators G89-105
Study of Aircraft Cruise G89-101
Flight Investigation of Helicopter Low-Speed Response Requirements G89-100
Parameter Estimation for Flight Vehicles G89-099
Optimal Evasion Against a Proportionally Guided Pursuer G89-093
Improved Time-Domain Stability Robustness Measures for Linear Regulators G89-092
Flight Evaluation of Pursuit Displays for Precision Approach of Powered-Lift Aircraft G89-083
Sequential Design of Discrete Linear Quadratic Regulators via Optimal Root-Locus Techniques G89-070
Fixed-Order Compensator Design Based on Frequency-Shaped Cost Functionals G89-067
Model-Based Analysis of Control/Display Interaction in the Hover Task G89-056
Simulation Evaluation of an Advanced Control Concept for a V/STOL Aircraft G89-055
Application of Precomputed Control Laws in a Reconfigurable Aircraft Flight Control System G89-054
Eigenstructure Assignment for the Control of Highly Augmented Aircraft G89-053
Singular Trajectories in Airplane Cruise-Dash Optimization G89-051
Sensitivity Analysis of Digital Flight Control Systems Using Singular-Value Concepts G89-050
Comparative Results for a Special Class of Robust Nonlinear Tracking Algorithms G89-049
On the Method of Matched Asymptotic Expansions G89-044
Oblique Wing Aircraft Flight Control System G89-033
Active Flutter Suppression for Two-Dimensional Airfoils G89-031
Estimating Projections of the Playable Set G89-030
Digital Robust Control Law Synthesis Using Constrained Optimization G89-029
Pulse Motor Control for Maximizing Average Velocity G89-028
Control of Flexible Structures with Spillover Using an Augmented Observer G89-026
Pitch Pointing Flight Control System Design in the Frequency Domain G89-016
Multivariable Frequency-Weighted Order Reduction G89-013
Stability Boundaries for Aircraft with Unstable Lateral-Directional Dynamics and Control Saturation G89-009
Cooperative Synthesis of Control and Display Augmentation G89-008
Combining Expert System and Analytical Redundancy Concepts for Fault-Tolerant Flight Control G89-006
The Principal Minor Test for Semidefinite Matrices G86-020
To Pursue or to Evade - That is the Question G85-028

Artificial Intelligence

Combining Expert System and Analytical Redundancy Concepts for Fault-Tolerant Flight Control G89-006

Astrodynamics

Effect of Tether Flexibility on the Tethered Shuttle Subsatellite Stability and Control G89-140
Simple Hybrid Search Technique for Finding Conic Solutions to the Intercept Problem G89-122
Combining Propulsive and Aerodynamic Maneuvers to Achieve Optimal Orbital Transfer G89-113
Explicit Guidance Along an Optimal Space Curve G89-080
Optimal Impulsive Time-Fixed Direct-Ascent Interception G89-079
Parameter Robust Linear-Quadratic-Gaussian Design Synthesis with Flexible Structure Control Applications G89-076
Gravitational Moment Exerted on a Small Body by an Oblate Body G89-072
Problem of the Dynamics of a Cantilever Beam Attached to a Moving Base G89-071
Optimal Terminal Maneuver for a Cooperative Impulsive Rendezvous G89-069
Robust Eigenstructure Assignment by a Projection Method: Applications Using Multiple Optimization Criteria G89-063
Improved Low-Altitude Constellation Design Methods G89-036
Method for Stability Analysis of an Asymmetric Dual-Spin Spacecraft G89-019
Minimum Impulse Orbital Evasive Maneuvers G89-018
Optimal Transfer from Collinear Libration Points with Limited Rotation Speed G89-017
Optimum Burn Scheduling for Low-Thrust Orbital Transfers G89-002

Avionics Systems

Hierarchical Partitions in Cyclic Closed Systems: A Hardware-Oriented Approach G89-084
Combining Expert System and Analytical Redundancy Concepts for Fault-Tolerant Flight Control G89-006

Computer Science

Hierarchical Partitions in Cyclic Closed Systems: A Hardware-Oriented Approach G89-084
Computational Complexities and Storage Requirements of Some Riccati Equation Solvers G89-077

Computer Systems

Latent Fault Markov Model for a Highly Reliable Triplex Computer System G89-115
Hierarchical Partitions in Cyclic Closed Systems: A Hardware-Oriented Approach G89-084

Control System Design

Parameter Estimation for Flight Vehicles G89-099

Flight Displays

Evaluation of Takeoff Performance Monitoring System Display G89-102
Parameter Estimation for Flight Vehicles G89-099
Flight Evaluation of Pursuit Displays for Precision Approach of Powered-Lift Aircraft G89-083
Effect of Head-Up Display Dynamics on Fighter Flying Qualities G89-082
Model-Based Analysis of Control/Display Interaction in the Hover Task G89-056
Simulation Evaluation of an Advanced Control Concept for a V/STOL Aircraft G89-055

Handling Qualities

Application of Output Feedback to Variable Structure Systems G89-151
Literal Singular-Value-Based Flight Control System Design Techniques G89-147
Theory for Aircraft Handling Qualities Based upon a Structural Pilot Model G89-130
Design of Attitude and Command Systems for Helicopters Using Eigenstructure Assignment G89-129
Evaluation of Takeoff Performance Monitoring System Display G89-102
Effect of Head-Up Display Dynamics on Fighter Flying Qualities G89-082
Analysis of a Candidate Control Algorithm for a Ride-Quality Augmentation System G89-081
Explicit Guidance Along an Optimal Space Curve G89-080
Flying Qualities from Early Airplanes to the Space Shuttle G89-075
Model-Based Analysis of Control/Display Interaction in the Hover Task G89-056
Oblique Wing Aircraft Flight Control System G89-033
Cooperative Synthesis of Control and Display Augmentation G89-008

Information Processing

Tracking with Paired Angle Measurement Sensors G89-156
Intercomputer Communication Architecture for a Mixed Redundancy Distributed System G89-085
High-Fidelity Low-pass Finite-Impulse-Response Filters G89-065

Launch Vehicle Dynamics

Calculation of Structural Dynamic Forces and Stresses Using Mode Acceleration G89-120
Stability Analysis of Electro-Magnetoplasmadynamics G89-119
Bounded-Input/Bounded-Output Stability of Linear Multidimensional Time-Varying Systems G89-117
Fixed-Order Compensator Design Based on Frequency-Shaped Cost Functionals G89-067

Launch Vehicle Guidance and Control

Investigation of the Time Required for Control of Structures G89-138

Sequential Design of Discrete Linear Quadratic Regulators via Optimal Root-Locus Techniques G89-070
Aeroassisted Orbital Maneuvering Using Lyapunov Optimal Feedback Control G89-037
Comparison of Classical and Modern Missile Autopilot Design and Analysis Techniques G89-035
Structured Stability Robustness Improvement by Eigenspace Techniques: A Hybrid Methodology G89-027
Control of Flexible Structures with Spillover Using an Augmented Observer G89-026
Efficacy of the Gibbs-Appell Method for Generating Equations of Motion for Complex Systems G89-015
Short-Range Nonlinear Feedback Strategies for Aircraft Pursuit-Evasion G89-004
To Pursue or to Evade - That is the Question G85-028

Missile Dynamics

Some Special Cases of Spin-Yaw Lock-In G89-127
Passive Means for Stabilizing Projectiles with Partially Restrained Internal Members G89-023
High Spin Effect on the Dynamics of a High *l*/d Finned Projectile from Free-Flight Tests G89-022

Missile Guidance and Control

Stability Parameter and Roll Rate From Early Re-Entry Radar or Optical Data G89-143
Control Decoupling Analysis for Gyroscopic Effects in Rolling Missiles G89-131
Improved Guidance Law Design Based on the Mixed-Strategy Concept G89-114
Analytical Solution of Optimal Trajectory-Shaping Guidance G89-094
Optimal Evasion Against a Proportionally Guided Pursuer G89-093
Component Mode Synthesis for Model Order Reduction of Nonclassically Damped Systems G89-089
Comparison of Classical and Modern Missile Autopilot Design and Analysis Techniques G89-035
Structured Stability Robustness Improvement by Eigenspace Techniques: A Hybrid Methodology G89-027
Assumed Density Filter with Application to Homing Missile Guidance G89-001

Navigation

Geodetic Position Estimation for a Geosynchronous Satellite G89-154
Solving the Two-Body Problem by Geometric Construction G89-149
Optimal Impulsive Time-Fixed Direct-Ascent Interception G89-079
Orbital Formationkeeping with Differential Drag G89-014

Optimization Techniques

Optimal Evasion Against a Proportionally Guided Pursuer G89-093

Pointing Systems

Tracking Accuracy for LEOSTAT-GEOSTAT Laser Links G89-073

Signal Processing

Expert Systems Approach for Generalized Traveling Salesman Problem G88-074

Software Technology

Intercomputer Communication Architecture for a Mixed Redundancy Distributed System G89-085
Flight Control System Design for an In-Flight Simulator G89-057
Evaluation of a Command Monitoring Concept for a V/STOL Research Aircraft G89-007

Spacecraft Dynamics

Application of Actuators to Control Beam Flexure in a Large Space Structure G89-141
Reduced-Order Models of a Large Flexible Spacecraft G89-137
Influence of Geometric Nonlinearities in the Dynamics of Flexible Treelike Structures G89-135
Calculation of Structural Dynamic Forces and Stresses Using Mode Acceleration G89-120
Bounded-Input/Bounded-Output Stability of Linear Multidimensional Time-Varying Systems G89-117
Representation of Control Systems for Preliminary Space Station Design G89-110
Suboptimal Feedback Vibration Control of a Beam with a Proof-Mass Actuator G89-108
Motivating Kane's Method for Obtaining Equations of Motion for Dynamic Systems G89-091
Adaptive Identification of a Flexible Structure by Lattice Filters G89-086
Eigenvalue and Eigenvector Derivatives of a Nondefective Matrix G89-078
Parameter Robust Linear-Quadratic-Gaussian Design Synthesis with Flexible Structure Control Applications G89-076
Gravitational Moment Exerted on a Small Body by an Oblate Body G89-072
Problem of the Dynamics of a Cantilever Beam Attached to a Moving Base G89-071
Effects of Amospheric Density Gradient on Control of Tethered Subsatellites G89-068
Dynamics and Control of the Tether Elevator/Crawler System G89-064
Robust Eigensystem Assignment for Flexible Structures G89-061
Quaternion Feedback Regulator for Spacecraft Eigenaxis Rotations G89-060
Eigenvector Derivatives of Repeated Eigenvalues Using Singular Value Decomposition G89-046
Control-Structure Interaction in Precision Pointing Servo Loops G89-040
Linear-Quadratic Stationkeeping for the STS Orbiter G89-039
Optimal Transfer from Collinear Libration Points with Limited Rotation Speed G89-017
Effects of Propellant Mass Loss on Fuel-Optimal Rendezvous Near Keplerian Orbit G89-003

Spacecraft Guidance and Control

Flexible Manipulator Modeling for Control System Development G89-155
Control of Distributed Structures with Small Nonproportional Damping G89-150
Noisy Satellite Pursuit-Evasion Guidance G89-145
Stability Parameter and Roll Rate From Early Re-Entry Radar or Optical Data G89-143
Space Shuttle Guidance for Multiple Main Engine Failures During First Stage G89-142
Dynamic Modeling and Adaptive Control of a Single-Link Flexible Manipulator G89-136
Accuracy of Eigenvalue Derivatives from Reduced-Order Structural Models G89-134
Motion of Particulate Material Ejected from a Rotating Space Platform G89-126
Design of a Modalized Observer with Eigenvalue Sensitivity Reduction G89-121
Nutation Damping Using a Pivotable Momentum Wheel G89-118
Optimal Control of Large Space Structures Using Distributed Gyrcity G89-112
New Approach to Attitude/Momentum Control for the Space Station G89-111
Square-Root State Estimation for Second-Order Large Space Structures Models G89-109
Vibration Compensation in Optical Tracking Systems G89-090
Component Mode Synthesis for Model Order Reduction of Nonclassically Damped Systems G89-089
Optimal Impulsive Time-Fixed Direct-Ascent Interception G89-079
Computational Complexities and Storage Requirements of Some Riccati Equation Solvers G89-077
Sequential Design of Discrete Linear Quadratic Regulators via Optimal Root-Locus Techniques G89-070
Optimal Terminal Maneuver for a Cooperative Impulsive Rendezvous G89-069
Robust Eigenstructure Assignment by a Projection Method: Applications Using Multiple Optimization Criteria G89-063
Analysis of Limit Cycle in Control Systems for Joint-Dominated Structures G89-062
Robust Eigensystem Assignment for Flexible Structures G89-061
Quaternion Feedback Regulator for Spacecraft Eigenaxis Rotations G89-060
Design of a Payload Pointing Control System for Tracking Moving Objects G89-059
Tether Static Shape for Rotating Multimass, Multitether, Spacecraft for "Triangle" Michelson Interferometer G89-042
Low-Authority Control of Large Space Structures by Using a Tendon Control System G89-041
Linear-Quadratic Stationkeeping for the STS Orbiter G89-039
Mission Function Control for Deployment and Retrieval of a Subsatellite G89-038
Aeroassisted Orbital Maneuvering Using Lyapunov Optimal Feedback Control G89-037
Estimating Projections of the Playable Set G89-030
Digital Robust Control Law Synthesis Using Constrained Optimization G89-029
Pulse Motor Control for Maximizing Average Velocity G89-028
Control of Flexible Structures with Spillover Using an Augmented Observer G89-026
New Generalized Structural Filtering Concept for Active Vibration Control Synthesis G89-025
Method for Stability Analysis of an Asymmetric Dual-Spin Spacecraft G89-019
Efficacy of the Gibbs-Appell Method for Generating Equations of Motion for Complex Systems G89-015
Orbital Formationkeeping with Differential Drag G89-014

Robustness Optimization of Structural and Controller Parameters G89-012
Near-Minimum Time Open-Loop Slewing of Flexible Vehicles G89-011
Planar, Time-Optimal, Rest-to-Rest Slewing Maneuvers of Flexible Spacecraft G89-010

State Estimation

Geodetic Position Estimation for a Geosynchronous Satellite G89-154
Dynamics of a Rotationally Accelerated Beam G89-153
Multipoint Smoothing Algorithm for Discrete Linear Systems G89-148
Extension to Modified Polar Coordinates and Applications with Passive Measurements G89-146
Square-Root State Estimation for Second-Order Large Space Structures Models G89-109
Gain-Free Square Root Information Filtering Using the Spectral Decomposition G89-107
Algorithm for Ranked Assignments, with Applications to Multiobject Tracking G89-058
Assumed Density Filter with Application to Homing Missile Guidance G89-001

Structural Control

Active Suppression of Traveling Waves in Structures G89-087

System Identification

Dynamics of a Rotationally Accelerated Beam G89-153
Experimental Estimation of Modeling Errors in Dynamic Systems G89-104
Recursive Form of the Eigensystem Realization Algorithm for System Identification G89-103
Single-Mode Projection Filters for Modal Parameter Identification for Flexible Structures G89-088
Adaptive Identification of a Flexible Structure by Lattice Filters G89-086

Trajectory Optimization

Tracking with Paired Angle Measurement Sensors G89-156
Noisy Satellite Pursuit-Evasion Guidance G89-145
Trajectory Optimization with Risk Minimization for Military Aircraft G89-052

Interdisciplinary Topics

Aerospace Technology Utilization

Dynamics and Control of the Tether Elevator/Crawler System G89-064

Analytical and Numerical Methods

Geodetic Position Estimation for a Geosynchronous Satellite G89-154
Enhancement of Data Separability in Multisensor-Multitarget Tracking Problems G89-152
Solving the Two-Body Problem by Geometric Construction G89-149
Acceleration, Gamma, and Theta Guidance for Abort Landing in a Windshear G89-133
Design of a Modalized Observer with Eigenvalue Sensitivity Reduction G89-121
Nature of Coupling in Nonconservative Lumped Parameter Systems G89-116
Representation of Control Systems for Preliminary Space Station Design G89-110
Eigenstructure of the State Matrix of Balanced Realizations G89-096
Three-Dimensional Energy-State Extremals in Feedback Form G89-095
Computational Complexities and Storage Requirements of Some Riccati Equation Solvers G89-077
Measures of Modal Controllability and Observability for First- and Second-Order Linear Systems G89-066
High-Fidelity Low-pass Finite-Impulse-Response Filters G89-065
Analysis of Limit Cycle in Control Systems for Joint-Dominated Structures G89-062
Algorithm for Ranked Assignments, with Applications to Multiobject Tracking G89-058
Eigenstructure Assignment for the Control of Highly Augmented Aircraft G89-053
Sensitivity Analysis of Digital Flight Control Systems Using Singular-Value Concepts G89-050
Eigenvector Derivatives of Repeated Eigenvalues Using Singular Value Decomposition G89-046
Simple Scheme for the Integration of Stiff Differential Equations G89-045
On the Method of Matched Asymptotic Expansions G89-044
Markov Reliability Models for Digital Flight Control Systems G89-034
Oblique Wing Aircraft Flight Control System G89-033
Pulse Motor Control for Maximizing Average Velocity G89-028
Pitch Pointing Flight Control System Design in the Frequency Domain G89-016
Transmission-Zero Bounds for Large Space Structures, with Applications G89-005
Expert Systems Approach for Generalized Traveling Salesman Problem G88-074

Human Factors

Theory for Aircraft Handling Qualities Based upon a Structural Pilot Model G89-130
Effect of Head-Up Display Dynamics on Fighter Flying Qualities G89-082
Flying Qualities from Early Airplanes to the Space Shuttle G89-075

Lasers and Laser Applications

Tracking Accuracy for LEOSTAT-GEOSTAT Laser Links G89-073

Reliability, Maintainability, and Logistics Support

Flight Control System Design for an In-Flight Simulator G89-057
Markov Reliability Models for Digital Flight Control Systems G89-034
Sensor Failure Detection Using Generalized Parity Relations for Flexible Structures G89-020

Sensor Systems

Generation of Infrared Earth Radiance for Attitude Determination G89-043
Improved Low-Altitude Constellation Design Methods G89-036

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Combining Propulsive and Aerodynamic Maneuvers to Achieve Optimal Orbital Transfer G89-113
High Spin Effect on the Dynamics of a High *l*/d Finned Projectile from Free-Flight Tests G89-022

Launch Vehicle and Sounding Rocket Systems

To Pursue or to Evade - That is the Question G85-028

Missile System

Extension to Modified Polar Coordinates and Applications with Passive Measurements G89-146
Control Decoupling Analysis for Gyroscopic Effects in Rolling Missiles G89-131
Improved Guidance Law Design Based on the Mixed-Strategy Concept G89-114
Short-Range Nonlinear Feedback Strategies for Aircraft Pursuit-Evasion G89-004

Simulation

Extrusion of a Beam from a Rotating Base G89-024

Trajectories and Tracking Systems

Dynamics of a Rotationally Accelerated Beam G89-153
Extension to Modified Polar Coordinates and Applications with Passive Measurements G89-146

Vibration

Active Suppression of Traveling Waves in Structures G89-087

Space Technology

Mission Design and Analysis

Optimal Terminal Maneuver for a Cooperative Impulsive Rendezvous G89-069
Minimum Impulse Orbital Evasive Maneuvers G89-018

Mission Trajectories (Earth and Interplanetary)

Motion of Particulate Material Ejected from a Rotating Space Platform G89-126
Combining Propulsive and Aerodynamic Maneuvers to Achieve Optimal Orbital Transfer G89-113
Aeroassisted Orbital Maneuvering Using Lyapunov Optimal Feedback Control G89-037
Minimum Impulse Orbital Evasive Maneuvers G89-018
Optimal Transfer from Collinear Libration Points with Limited Rotation Speed G89-017
Effects of Propellant Mass Loss on Fuel-Optimal Rendezvous Near Keplerian Orbit G89-003
Optimum Burn Scheduling for Low-Thrust Orbital Transfers G89-002

Space Systems

Dynamic Modeling and Adaptive Control of a Single-Link Flexible Manipulator G89-136
New Approach to Attitude/Momentum Control for the Space Station G89-111
Dynamics and Control of the Tether Elevator/Crawler System G89-064
Design of a Payload Pointing Control System for Tracking Moving Objects G89-059

Spacecraft Attitude Determination

Gain-Free Square Root Information Filtering Using the Spectral Decomposition G89-107
Generation of Infrared Earth Radiance for Attitude Determination G89-043

Spacecraft Structural Configuration, Design, and Analysis

Robustness Optimization of Structural and Controller Parameters G89-012

Spacecraft Test and Evaluation

Stability Parameter and Roll Rate From Early Re-Entry Radar or Optical Data G89-143

Structural Mechanics and Materials

Structural Design

Accuracy of Eigenvalue Derivatives from Reduced-Order Structural Models G89-134
Eigenvalue and Eigenvector Derivatives of a Nondefective Matrix G89-078

Structural Dynamics and Characterization

Flexible Manipulator Modeling for Control System Development G89-155
Enhancement of Data Separability in Multisensor-Multitarget Tracking Problems G89-152
Control of Distributed Structures with Small Nonproportional Damping G89-150
Application of Actuators to Control Beam Flexure in a Large Space Structure G89-141
Effect of Tether Flexibility on the Tethered Shuttle Subsatellite Stability and Control G89-140
Investigation of the Time Required for Control of Structures G89-138
Influence of Geometric Nonlinearities in the Dynamics of Flexible Treelike Structures G89-135
Accuracy of Eigenvalue Derivatives from Reduced-Order Structural Models G89-134
Optimal Control of Large Space Structures Using Distributed Gyrcity G89-112
Representation of Control Systems for Preliminary Space Station Design G89-110
Suboptimal Feedback Vibration Control of a Beam with a Proof-Mass Actuator G89-108
Issues in the Dynamics and Control of Flexible Robot Manipulators G89-105
Recursive Form of the Eigensystem Realization Algorithm for System Identification G89-103
Motivating Kane's Method for Obtaining Equations of Motion for Dynamic Systems G89-091
Component Mode Synthesis for Model Order Reduction of Nonclassically Damped Systems G89-089
Single-Mode Projection Filters for Modal Parameter Identification for Flexible Structures G89-088
Adaptive Identification of a Flexible Structure by Lattice Filters G89-086
Eigenvalue and Eigenvector Derivatives of a Nondefective Matrix G89-078
Robust Eigensystem Assignment for Flexible Structures G89-061
Eigenvector Derivatives of Repeated Eigenvalues Using Singular Value Decomposition G89-046
Low-Authority Control of Large Space Structures by Using a Tendon Control System G89-041
Extrusion of a Beam from a Rotating Base G89-024
Robustness Optimization of Structural and Controller Parameters G89-012
Planar, Time-Optimal, Rest-to-Rest Slewing Maneuvers of Flexible Spacecraft G89-010
Transmission-Zero Bounds for Large Space Structures, with Applications G89-005
Expert Systems Approach for Generalized Traveling Salesman Problem G88-074

Structural Stability

Active Flutter Suppression for Two-Dimensional Airfoils G89-031

Thermal Effects

Tether Static Shape for Rotating Multimass, Multitether, Spacecraft for "Triangle" Michelson Interferometer G89-042
