

Journal of Spacecraft and Rockets

VOLUME 2

JANUARY-FEBRUARY 1965

NUMBER 1

Reviewers for the Journal of Spacecraft and Rockets, 1964

It is with great pleasure that we recognize the assistance received from reviewers during our first year of publication. Conscientious review and constructive criticism of our papers is a vital part of our system, as indicated in the accompanying statement of editorial policy on p. 128. Thoughtful, detailed reviews are sincerely appreciated by both the authors and the editors.

We also wish to take this opportunity to assure the reviewers that every comment they make is carefully considered

by the editors. If the editors decide that a paper should be published against the advice of a reviewer, it is done only after all evidence from the author and the other reviewer(s) has been weighed. However, most of you will recognize that your advice has been taken and that the quality of the paper(s) that we have published has been improved accordingly.

For 1964, and for the help you may give us in 1965 and future years, we say a very warm "thank you."
