

Chronological Index

T94-001 Review of Chemical-Kinetic Problems of Future NASA Missions, II: Mars Entries. Chul Park, John T. Howe, and Richard L. Jaffe, *NASA Ames Research Center*; and Graham V. Candler, *North Carolina State University at Raleigh* (8, 1, p. 9) Survey Paper based on AIAA Paper 91-0464

T94-002 Review of Numerical Procedures for Computational Surface Thermochemistry. Frank S. Milos and Daniel J. Rasky, *NASA Ames Research Center* (8, 1, p. 24) Article based on AIAA Paper 92-2944

T94-003 Rotational Relaxation of Molecular Hydrogen at Moderate Temperatures. S. P. Sharma, *NASA Ames Research Center* (8, 1, p. 35) Article based on AIAA Paper 92-2854

T94-004 Numerical Study of the Effects of Wall Catalysis on Shock Wave/Boundary-Layer Interaction. Adam Grumet, John D. Anderson Jr., and Mark J. Lewis, *University of Maryland* (8, 1, p. 40) Article

T94-005 Experimental Investigation of a Nitrogen High-Enthalpy Flow. Stefanos Fasoulas, Monika Auweter-Kurtz, and Harald A. Habiger, *University of Stuttgart, Germany* (8, 1, p. 48) Article

T94-006 Influence of Injectant Mach Number and Temperature on Supersonic Film Cooling. K. A. Juhany, M. L. Hunt, and J. M. Sivo, *California Institute of Technology* (8, 1, p. 59) Article

T94-007 Nonisothermal Turbulent Boundary-Layer Adverse Pressure Gradient Large Scale Thermal Structure Measurements. Nader Bagheri, *California Maritime Academy*; and Bruce R. White and Ting-Kwo Lei, *University of California, Davis* (8, 1, p. 68) Article based on AIAA Paper 92-0550

T94-008 Space Transportation System Launch Pad Summer Environmental Effects. R. A. Ahmad, *Thiokol Corporation* (8, 1, p. 75) Article based on AIAA Paper 92-3850

T94-009 Modeling a Horizontal Heat-Flux Cylinder as a Line Source. Valérie Deschamps, *Conservatoire National des Arts et Métiers, France*; and Gilles Desrayaud, *IBM, France* (8, 1, p. 84) Article

T94-010 Mixed Convection Along an Isothermal Vertical Cylinder in Porous Media. W. B. Hooper, T. S. Chen, and B. F. Armaly, *University of Missouri—Rolla* (8, 1, p. 92) Article

T94-011 Analysis of Natural Convection in a Rotating Open Loop. Mark A. Stremler, David R. Sawyers, and Mihir Sen, *University of Notre Dame* (8, 1, p. 100) Article

T94-012 Nonsimilar Free Convection Boundary Layer in Non-Newtonian Fluid-Saturated Porous Media. M. A. Hossain, *University of Dhaka, Bangladesh*; and A. Nakayama, *Shizuoka University, Japan* (8, 1, p. 107) Article

T94-013 Extrinsic Effects in the Dynamics and Selection of Cellular Arrays. B. Billia, H. Jamgotchian, and H. Nguyen Thi, *Université d'Aix-Marseille, France*; P. Cerisier, *Université d'Aix-Marseille I, France*; and R. Trivedi, *Iowa State University* (8, 1, p. 113) Article based on AIAA Paper 93-0264

T94-014 Combined Forced-Convection and Correlated-Radiation Heat Transfer in Cylindrical Packed Beds. K. Kamiuto and S. Saitoh, *Oita University, Japan* (8, 1, p. 119) Article

T94-015 Transient Conductive, Radiative Heat Transfer

Coupled with Moisture Transport in Attic Insulations. R. Gorthala, K. T. Harris, J. A. Roux, and T. A. McCarty, *University of Mississippi* (8, 1, p. 125) Article

T94-016 Monte Carlo Prediction of Radiative Heat Transfer in Inhomogeneous, Anisotropic, Nongray Media. Jeff T. Farmer, *NASA Langley Research Center*; and John R. Howell, *University of Texas at Austin* (8, 1, p. 133) Article

T94-017 Evaluation of Spatial Differencing Practices for the Discrete-Ordinates Method. John C. Chai and Suhas V. Patankar, *University of Minnesota*; and HaeOk S. Lee, *NASA Lewis Research Center* (8, 1, p. 140) Article based on AIAA Paper 93-0140

T94-018 Non-Fourier Dynamic Thermoelasticity with Temperature-Dependent Thermal Properties. David E. Glass, *Analytical Services and Materials, Inc.*; and Kumar K. Tamma, *University of Minnesota at Minneapolis St. Paul* (8, 1, p. 145) Article based on AIAA Paper 91-1174 CP911

T94-019 Heat Transfer Analysis of the Ungrooved Disk of a Cooled, Multiplate Clutch. John A. Weaver, *General Motors Corporation* (8, 1, p. 152) Article

T94-020 Experimental Study and Modeling of Thermal Contact Resistance Across Bolted Joints. S. Song, K. P. Moran, and R. Augi, *IBM*; and S. Lee, *University of Waterloo, Canada* (8, 1, p. 159) Article based on AIAA Paper 93-0844

T94-021 Startup Performance of a Liquid-Metal Heat Pipe in Near-Vacuum and Gas-Loaded Modes. R. Ponnappan, *Universal Energy Systems, Inc.*; and W. S. Chang, *Wright Laboratory* (8, 1, p. 164) Article based on AIAA Paper 90-1755

T94-022 Evaporating Extended Meniscus in a V-Shaped Channel. L. W. Swanson and G. P. Peterson, *Texas A&M University* (8, 1, p. 172) Article

T94-023 Errors in JANAF Thermodynamic Formation Functions for Acetylene. Robert S. Hiers III, *Sverdrup Technology, Inc.* (8, 1, p. 181) Technical Note

T94-024 Numerical Study of Turbulent Offset Jets with Entrainment Boundary. Yue-Tzu Yang and Yun-Yeu Yeh, *National Cheng-Kung University, Taiwan, ROC* (8, 1, p. 182) Technical Note

T94-025 Entrained Sprays from Meshed-Interface Occurring in a Heat Pipe. K. D. Kihm, B. H. Kim, and G. P. Peterson, *Texas A&M University* (8, 1, p. 184) Technical Note

T94-026 Implicit Heat Pipe Vapor Model. W. Jerry Bowman and Philip S. Beran, *Air Force Institute of Technology* (8, 1, p. 187) Technical Note

T94-027 Reference Temperature Method and Reynolds Analogy for Chemically Reacting Nonequilibrium Flowfields. David J. Debrebian and John D. Anderson Jr., *University of Maryland* (8, 1, p. 190) Technical Note

T94-028 Refractive Index and Scattering Effects on Radiation in a Semitransparent Laminated Layer. C. M. Spuckler and R. Siegel, *NASA Lewis Research Center* (8, 2, p. 193) Article

T94-029 Macroscopic Spread Function Analysis for Subsurface Scattering of Semitransparent Materials. B. K. Tsai and D. P. DeWitt, *Purdue University*; and G. H. Shaffer, *Miles Laboratories, Inc.* (8, 2, p. 202) Article based on AIAA Paper 93-2803

T94-030 Compatibility of Infrared Band Models with Scattering. R. A. Reed, D. G. Brown, R. S. Hiers III, B. K. Cromwell, and V. A. Zaccardi, *Sverdrup Technology, Inc.* (8, 2, p. 208) Article based on AIAA Paper 92-2891

T94-031 Rocket Plume Base Heating Methodology. John E. Reardon, *REMTECH, Inc.*; and H. F. Nelson, *University of Missouri—Rolla* (8, 2, p. 216) Article based on AIAA Paper 93-2823

T94-032 Measurement of Extinction Coefficients of Laser-Produced Aluminum Plumes. T. E. Mills, P. J. Bishop, and A. Minardi, *University of Central Florida* (8, 2, p. 223) Article based on AIAA Paper 93-3228

T94-033 Two-Slab Model of Plasma Mediated Laser Coupling to Surfaces. Guy Weyl, *Physical Sciences, Inc.* (8, 2, p. 229) Article

T94-034 Evaluation of Simple Rate Expressions for Vibration-Dissociation Coupling. David A. Gonzales and Philip L. Varghese, *University of Texas at Austin* (8, 2, p. 236) Article based on AIAA Paper 93-0481

T94-035 Coupled Radiation Effects in Thermochemical Nonequilibrium Shock-Capturing Flowfield Calculations. Lin C. Hartung, Robert A. Mitcheltree, and Peter A. Gnoffo, *NASA Langley Research Center* (8, 2, p. 244) Article based on AIAA Paper 92-2868

T94-036 Comparisons Between Monte Carlo Methods and Navier-Stokes Equations for Re-Entry Flows. David R. Olynick, *NASA Ames Research Center*; and Jeff C. Taylor and H. A. Hassan, *North Carolina State University* (8, 2, p. 251) Article based on AIAA Paper 93-2810

T94-037 Combustion Shock Tunnel and Interface Compression to Increase Reservoir Pressure and Enthalpy. M. A. S. Minucci, *Instituto de Estudos Avançados—CTA, Brazil*; and H. T. Nagamatsu and L. N. Myrabo, *Rensselaer Polytechnic Institute* (8, 2, p. 259) Article based on AIAA Paper 92-0569

T94-038 Pressure-Based Computational Method for Compressible and Incompressible Flows. S. M. H. Karimian and G. E. Schneider, *University of Waterloo, Canada* (8, 2, p. 267) Article based on AIAA Paper 93-2768

T94-039 Conjugate Conduction-Convection Heat Transfer with a High-Speed Boundary Layer. Frederick L. Shope, *Arnold Engineering Development Center* (8, 2, p. 275) Article based on AIAA Paper 91-5033

T94-040 One-Dimensional Ablation Using Landau Transformation and Finite Control Volume Procedure. B. F. Blackwell and R. E. Hogan, *Sandia National Laboratories* (8, 2, p. 282) Article

T94-041 Inverse Design of Super-Elliptic Cooling Passages in Coated Turbine Blade Airfoils. George S. Dulikravich and Thomas J. Martin, *Pennsylvania State University* (8, 2, p. 288) Article based on AIAA Paper 92-4714 CP9213

T94-042 Heating Effects on Laminar Flow Through a Rotating Square Channel. Shin Fann and Wen-Jei Yang, *University of Michigan* (8, 2, p. 295) Article

T94-043 Analysis of Laminar Forced Convection Condensation Within Thin Porous Coatings. K. J. Renken, M. J. Carneiro, and K. Meechan, *University of Wisconsin—Milwaukee* (8, 2, p. 303) Article

T94-044 Power-Law Fluid Flow in Heated Vertical Ducts. A.

T. Jones and D. B. Ingham, *University of Leeds, England, UK* (8, 2, p. 309) Article

T94-045 Natural Convection of Micropolar Fluids in Concentric and Vertically Eccentric Annuli. J. S. Chiou and Y. C. Chen, *National Cheng Kung University, Taiwan, ROC* (8, 2, p. 316) Article

T94-046 Effects of Buoyancy on the Critical Heat Flux in Forced Convection. Matthew J. Brusstar and Herman Merte Jr., *University of Michigan* (8, 2, p. 322) Article based on AIAA Paper 93-0575

T94-047 Measurement of Diffusion in Fluid Systems: Applications to the Supercritical Fluid Region. Thomas J. Bruno, *National Institute of Standards and Technology* (8, 2, p. 329) Article based on AIAA Paper 93-0809

T94-048 Thermodynamic Aspects of Heat Pipe Operation. Robert Richter, *California Institute of Technology*; and Joseph M. Gottschlich, *Wright Laboratory* (8, 2, p. 334) Article based on AIAA Paper 90-1772

T94-049 Metallic Coatings for Enhancement of Thermal Contact Conductance. M. A. Lambert and L. S. Fletcher, *Texas A&M University* (8, 2, p. 341) Article based on AIAA Paper 92-2849

T94-050 Evaluation of Nonmetallic Coatings and Films for Thermal Control Applications. E. G. Marotta, M. A. Lambert, and L. S. Fletcher, *Texas A & M University* (8, 2, p. 349) Article based on AIAA Paper 92-2849

T94-051 Transverse Thermal Conductance of Thermosetting Composite Materials During Their Cure. Jeffrey D. Farmer and Eugene E. Covert, *Massachusetts Institute of Technology* (8, 2, p. 358) Article based on AIAA Paper 93-1574 CP931

T94-052 Natural Convection Within a Vertical Finite-Length Channel in Free Space. S. C. Lin, K. P. Chang, and Y. H. Hung, *National Tsing Hua University, Taiwan, ROC* (8, 2, p. 366) Technical Note

T94-053 Prediction of Radiative Transfer from Potential Core of a Hot Jet. Srinath S. Heragu and K. V. L. Rao, *Aeronautical Development Agency, India*; and B. N. Raghunandan, *Indian Institute of Science* (8, 2, p. 368) Technical Note

T94-054 Numerical Study of Non-Darcy Mixed Convection in a Vertical Porous Channel. A. Hadim, *Stevens Institute of Technology* (8, 2, p. 371) Technical Note

T94-055 Combined Surface Radiation and Free Convection in Cavities. C. Balaji and S. P. Venkateshan, *Indian Institute of Technology* (8, 2, p. 373) Technical Note

T94-056 Natural Convection in Horizontal Porous Annuli with Circumferential Baffles. F. C. Lai, *University of Oklahoma* (8, 2, p. 376) Technical Note based on AIAA Paper 93-0919

T94-057 Transient Compressible Flow in Variable Permeability Media. R. Polehn, M. Keyhani, and M. Parang, *University of Tennessee* (8, 2, p. 378) Technical Note

T94-058 Effects of Nonequilibrium Chemistry on the Reference Temperature Method and Reynolds Analogy. James D. Ott and John D. Anderson Jr., *University of Maryland* (8, 2, p. 381) Technical Note

T94-059 Cooled Pitot Tube in Plasma Jet: an Impact-Pressure Recovery Model. B. Porterie, M. Larini, and J-C. Loraud, *Institut Universitaire des Systèmes Thermiques Industriels, France*; and L.

Jestin, *Electricité de France* (8, 3, p. 385) Article based on AIAA Paper 92-4004

T94-060 Quantifying Specular Approximations for Angular Scattering from Perfectly Conducting Random Rough Surfaces. Ralph A. Dimenna and Richard O. Buckius, *University of Illinois* (8, 3, p. 393) Article

T94-061 Effective Radiative Properties of Fibrous Composites Containing Spherical Particles. Siu-Chun Lee, *Applied Sciences Laboratory, Inc.*; Susan White, *NASA Ames Research Center*; and Jan A. Grzesik, *Applied Sciences Laboratory, Inc.* (8, 3, p. 400) Article based on AIAA Paper 93-2729

T94-062 Impact of Thermal Boundary Resistance on Laser Inclusion Damage. J. P. Longtin, T. Q. Qiu, and C. L. Tien, *University of California at Berkeley* (8, 3, p. 406) Article based on AIAA Paper 94-0125

T94-063 High-Temperature, Normal Spectral Emittance of Silicon Carbide Based Materials. Michael A. Postlethwait, Kamal K. Sikka, Michael F. Modest, and John R. Hellmann, *Pennsylvania State University* (8, 3, p. 412) Article based on AIAA Paper 93-2759

T94-064 Finite Volume Method for Radiation Heat Transfer. John C. Chai, *University of Minnesota*; HaeOk S. Lee, *NASA Lewis Research Center*; and Suhas V. Patankar, *University of Minnesota* (8, 3, p. 419) Article based on AIAA Paper 93-2731

T94-065 Finite Element Formulation of the Discrete-Ordinates Method for Multidimensional Geometries. W. A. Fiveland and J. P. Jessee, *Babcock & Wilcox Company* (8, 3, p. 426) Article

T94-066 Radiative Heat Transfer in Finite Cylindrical Enclosures with Nonhomogeneous Participating Media. Pei-Feng Hsu and Jerry C. Ku, *Wayne State University* (8, 3, p. 434) Article

T94-067 Measurements of Ultraviolet Radiation from a 5-km/s Bow Shock. Peter W. Erdman and Edward C. Zipf, *University of Pittsburgh*; Patrick Espy and L. Carl Howlett, *Utah State University*; Deborah A. Levin, *Institute for Defense Analyses*; and Robert J. Collins and Graham V. Candler, *University of Minnesota* (8, 3, p. 441) Article based on AIAA Paper 92-2870

T94-068 Examination of Theory for Bow Shock Ultraviolet Rocket Experiments—I. Deborah A. Levin, *Institute for Defense Analyses*; Graham V. Candler, *North Carolina State University*; Robert J. Collins, *University of Minnesota*; Peter W. Erdman and Edward C. Zipf, *University of Pittsburgh*; and L. Carl Howlett, *Utah State University* (8, 3, p. 447) Article based on AIAA Paper 92-2871

T94-069 Examination of Theory for Bow Shock Ultraviolet Rocket Experiments—II. Deborah A. Levin and Matthew Braunstein, *Institute for Defense Analyses*; Graham V. Candler and Robert J. Collins, *University of Minnesota*; and Gregory P. Smith, *SRI International* (8, 3, p. 453) Article based on AIAA Paper 92-2871

T94-070 Model for Oxygen Recombination on Reaction-Cured Glass. E. J. Jumper, *University of Notre Dame*; and W. A. Seward, *National Aero-Space Plane Office* (8, 3, p. 460) Article

T94-071 Analysis of the Argon Additive Influence on a Nitrogen Arcjet Flow. A. T. Schönemann, M. Auweter-Kurtz, H. A. Habiger, P. C. Sleziona, and T. Stöckle, *Institut für Raumfahrtssysteme, University of Stuttgart, Germany* (8, 3, p. 466) Article based on AIAA Paper 93-2829

T94-072 Measurements of Temperature and Seed Atom Den-

sity in High-Speed MHD Flows. Leslie E. Bauman, Weishun Wang, John C. Luthe, and R. Arun Kumar, *Mississippi State University* (8, 3, p. 473) Article based on AIAA Paper 93-3215

T94-073 Monte Carlo Simulation of Radiating Re-Entry Flows. Jeff C. Taylor, *North Carolina State University*; Ann B. Carlson, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (8, 3, p. 478) Article based on AIAA Paper 93-2809

T94-074 Feasibility of Determining Haze Properties During High-Speed Titan Entry. H. F. Nelson, *University of Missouri—Rolla* (8, 3, p. 486) Article based on AIAA Paper 93-2762

T94-075 Viscous Shock-Layer Analysis of Two-Dimensional and Axisymmetric Flows. Roop N. Gupta and Ernest V. Zoby, *NASA Langley Research Center*; and Kam-Pui Lee, *ViGYAN, Inc.* (8, 3, p. 494) Article based on AIAA Paper 93-2751

T94-076 Use of the Second Law for Artificial Dissipation in Compressible Flow Discrete Analysis. G. F. Naterer and G. E. Schneider, *University of Waterloo, Canada* (8, 3, p. 500) Article based on AIAA Paper 92-2942

T94-077 Numerical and Experimental Study of Three-Dimensional Liquid Sloshing Flows. Kuo-Huey Chen, *University of Toledo/NASA Lewis Research Center*; and Franklyn J. Kelecny and Richard H. Pletcher, *Iowa State University* (8, 3, p. 507) Article based on AIAA Paper 92-0829

T94-078 Nonlinear Dynamics of Laminar Boundary Layers in Pulsatile Stagnation Flows. E. C. Miladin and D. A. Zumbunnen, *Clemson University* (8, 3, p. 514) Article

T94-079 Hot-Gas-Side and Coolant-Side Heat Transfer in Liquid Rocket Engine Combustors. Ten-See Wang and Van Luong, *NASA Marshall Space Flight Center* (8, 3, p. 524) Article based on AIAA Paper 92-3151

T94-080 Experimental Modeling of Central Axis and Jet-Ring Turbine Disk Cooling. Yong W. Kim and Darryl E. Metzger, *Arizona State University* (8, 3, p. 531) Article based on AIAA Paper 91-0343

T94-081 Fluid Flow and Heat Transfer of an Extended Slot Jet Impingement. Y. J. Chou and Y. H. Hung, *National Tsing Hua University, Taiwan, ROC* (8, 3, p. 538) Article

T94-082 Heat Transfer from Continuously Moving Material in Channel Flow for Thermal Processing. B. H. Kang and Y. Jaluria, *Rutgers University* (8, 3, p. 546) Article

T94-083 Effects of Turbulator Profile and Spacing on Heat Transfer and Friction in a Channel. M. E. Taslim, *Northeastern University*; and S. D. Spring, *General Electric Aircraft Engines* (8, 3, p. 555) Article

T94-084 Analysis of Forced Convection Enhancement in a Channel Using Porous Blocks. P. C. Huang and K. Vafai, *Ohio State University* (8, 3, p. 563) Article

T94-085 Augmented Heat Transfer in Triangular Ducts with Full and Partial Ribbed Walls. Y. M. Zhang and W. Z. Gu, *Chinese Academy of Sciences, PRC*; and J. C. Han, *Texas A&M University* (8, 3, p. 574) Article

T94-086 Effect of Torsion on Heat Transfer in the Curved Annular Sector Duct. G. Yang and M. A. Ebdian, *Florida International University* (8, 3, p. 580) Article

T94-087 Perturbation Analysis of Convective Heat Transfer in Helicoidal Pipes with Substantial Pitch. Y. Gong, G. Yang, and

M. A. Ebadian, *Florida International University* (8, 3, p. 587) Article

T94-088 Heat Convection in a 180-Deg Turning Duct with Different Turn Configurations. Ten-See Wang, *NASA Marshall Space Flight Center*; and Mingking K. Chyu, *Carnegie Mellon University* (8, 3, p. 595) Article

T94-089 Experimental and Analytical Investigation of a Capillary Pumped Loop. J. T. Dickey and G. P. Peterson, *Texas A & M University* (8, 3, p. 602) Article

T94-090 Void Profiles in Unidirectional Solidification: The Role of Capillary Forces and Gravity. C. D. Sulfridge, K. A. Tagavi, and L. C. Chow, *University of Kentucky* (8, 3, p. 608) Article

T94-091 Rapid Cooling by Direct Expansion of Coolant Through an Orifice. I. C. Hsu, *Lockheed Research and Development Division*; and J. H. Ambrose, *Lockheed Space Systems Division* (8, 3, p. 616) Article based on AIAA Paper 93-2858

T94-092 Heat Conduction Across a Sandwiched Plate with Stringers. C. Y. Wang, *Michigan State University*, (8, 3, p. 622) Technical Note

T94-093 Thermal Modeling of Heat Transfer. S. Antony Raj, *Government Arts College, India*; and M. Chandrasekar, *Presidency College, India* (8, 3, p. 624) Technical Note

T94-094 Refractive Index Effects on Local Radiative Emission from a Rectangular Semitransparent Solid. Robert Siegel, *NASA Lewis Research Center* (8, 3, p. 625) Technical Note

T94-095 Surface Radiation for Rectangular Enclosures Using the Discrete-Ordinates Method. J. R. Ehlert and T. F. Smith, *University of Iowa* (8, 3, p. 628) Technical Note

T94-096 Measurement of the Absorption of Light by Polaroid Sheet. D. C. Look Jr., *University of Missouri—Rolla* (8, 3, p. 631) Technical Note

T94-097 Review of Elastic and Plastic Contact Conductance Models: Comparison with Experiment. M. R. Sridhar and M. M. Yovanovich, *University of Waterloo, Canada* (8, 4, p. 633) Article

T94-098 Dependent vs Independent Scattering in Fibrous Composites Containing Parallel Fibers. Siu-Chun Lee, *Applied Sciences Laboratory, Inc.* (8, 4, p. 641) Article

T94-099 Simulation of Heat and Momentum Transfer in Complex Microgeometries. Ali Beskok and George E. Karniadakis, *Brown University* (8, 4, p. 647) Article

T94-100 Time-Resolved Surface Heat Flux Measurements in the Wing/Body Junction Vortex. D. J. Lewis, R. L. Simpson, and T. E. Diller, *Virginia Polytechnic Institute and State University* (8, 4, p. 656) Article

T94-101 Transient Conjugate Heat Transfer Between a Laminar Stagnation Zone and a Solid Disk. Moh'd K. Alkam and P. Barry Butler, *University of Iowa* (8, 4, p. 664) Article

T94-102 Proportional-Integral-Derivative-Controlled Numerical Model for the Programmable Multizone Furnace. C. H. Panzarella and M. Kassemi, *NASA Lewis Research Center* (8, 4, p. 670) Article

T94-103 Finite Element Analysis of Low-Speed Compressible Flows Within Convectively Cooled Structures. Phillip W. Yarrington, *Lockheed Engineering and Sciences Company, Inc.*; and Earl A. Thornton, *University of Virginia* (8, 4, p. 678) Article

T94-104 Adaptive Remeshing for Convective Heat Transfer with Variable Fluid Properties. Dominique Pelletier, Florin Ilinca, and Jean-François Hétu, *Ecole Polytechnique de Montréal, Canada* (8, 4, p. 687) Article based on AIAA Paper 93-2767

T94-105 Laminar Mixed Convection from a Circular Cylinder Using a Body-Fitted Coordinate System. Cha'o-Kuang Chen, Yue-Tzu Yang, and Sang-Ru Wu, *National Cheng Kung University, Taiwan, ROC* (8, 4, p. 695) Article

T94-106 Heat Transfer in Two-Phase Flow Through a Circular Tube at Reduced Gravity. Raymond W. Rite and Kamiel S. Rezkallah, *University of Saskatchewan, Canada* (8, 4, p. 702) Article based on AIAA Paper 93-2851

T94-107 Evaporation from an Extended Meniscus for Non-isothermal Interfacial Conditions. K. P. Hallinan and H. C. Chebaro, *University of Dayton*; S. J. Kim, *IBM, Inc.*; and W. S. Chang, *Wright Laboratory* (8, 4, p. 709) Article

T94-108 Film Cooling Effectiveness in a Particle-Laden Flow. George J. Nacouzi, *TRW, Inc.*; and Donald K. Edwards, *University of California, Irvine* (8, 4, p. 717) Article based on AIAA Paper 92-4063

T94-109 Thermal Analysis of an Arc-Heater Electrode with a Rotating Arc Foot. Frank S. Milos, *NASA Ames Research Center*; and Charles E. Shepard, *Eloret Institute* (8, 4, p. 723) Article based on AIAA Paper 93-2855

T94-110 Strongly Coupled Radiative Transfer and Joule Heating in an Arc Heater Cathode. P. Durgapal and Grant Palmer, *NASA Ames Research Center* (8, 4, p. 730) Article based on AIAA Paper 93-2801

T94-111 Measurement and Analysis of Nitric Oxide Radiation in an Arcjet Flow. Dikran S. Babikian, Nigel K. J. M. Gopaul, and Chul Park, *NASA Ames Research Center* (8, 4, p. 737) Article based on AIAA Paper 93-2800

T94-112 Radiation Transport Calculation in High Enthalpy Environments for Two-Dimensional Axisymmetric Geometries. T. H. Gogel, M. Dupuis, and E. W. Messerschmid, *University of Stuttgart, Germany* (8, 4, p. 744) Article based on AIAA Paper 93-2804

T94-113 Flow Resolution and Domain of Influence in Rarefied Hypersonic Blunt-Body Flows. Brian L. Haas, *NASA Ames Research Center*; and Michael A. Fallavollita, *Stanford University* (8, 4, p. 751) Article

T94-114 Direct Simulation of Diatomic Gases Using the Generalized Hard Sphere Model. D. B. Hash, *North Carolina State University*; James N. Moss, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (8, 4, p. 758) Article

T94-115 Nonequilibrium Thermal Radiation from Air Shock Layers Modeled with Direct Simulation Monte Carlo. M. A. Gallis and J. K. Harvey, *Imperial College of Science, Technology and Medicine, England, UK* (8, 4, p. 765) Article based on AIAA Paper 94-0353

T94-116 Thermochemical Nonequilibrium Viscous Shock-Layer Analysis for a Mars Aerocapture Vehicle. Kojiro Suzuki and Takashi Abe, *Institute for Space and Astronautical Science, Japan* (8, 4, p. 773) Article based on AIAA Paper 93-2839

T94-117 Two-Temperature Modeling of Laser Sustained Hydrogen Plasmas. Ayhan E. Mertogul and Herman Krier, *University of Illinois at Urbana-Champaign* (8, 4, p. 781) Article based on AIAA Paper 93-3224

T94-118 Complete Radiative Terms for the Electron/Electronic Energy Equation. S. A. Stanley, *University of California, San Diego*; and L. A. Carlson, *Texas A&M University* (8, 4, p. 791) Technical Note

T94-119 Magnetized Plasma Flow over an Insulator at High Magnetic Reynolds Number. J. M. G. Chanty, *Massachusetts Institute of Technology* (8, 4, p. 795) Technical Note

T94-120 Unsteady Heat Transfer from a Thick Hot-Film Sensor. Chong H. Park and Kevin D. Cole, *University of Nebraska at Lincoln* (8, 4, p. 797) Technical Note

T94-121 Unsteady Heat Transfer from a Sphere at Low Reynolds and Strouhal Numbers. Y. Bayazitoglu, C. F. Anderson, R. D. Cohen, and R. W. Shampine, *Rice University* (8, 4, p. 799) Technical Note based on AIAA Paper 93-0915

T94-122 DSMC- and BGK-Based Calculations for Return Flux Contamination of an Outgassing Spacecraft. Charles R.

Justiz and Ronald M. Sega, *NASA Johnson Space Center*; and Charles Dalton and Alex Ignatiev, *University of Houston* (8, 4, p. 802) Technical Note based on AIAA Paper 93-0725

T94-123 Thermophysical Properties of Cyclotrimethylene-trinitramine. Martin S. Miller, *U.S. Army Research Laboratory* (8, 4, p. 803) Technical Note

T94-124 Non-Darcy Mixed Convection in a Vertical Porous Channel with Asymmetric Wall Heating. H. A. Hadim and G. Chen, *Stevens Institute of Technology* (8, 4, p. 805) Technical Note

T94-125 Wideband Spectral Models for the Absorption Coefficient of Water Vapor. Kouichi Kamiuto and Yuji Tokita, *Oita University, Japan* (8, 4, p. 808) Technical Note

T94-126 Finite Element Analysis of the Heat Transfer in Concentric-Tube Heat Exchangers. C. L. Ko, *Oakland University* (8, 4, p. 810) Technical Note

U.S. Postal Service STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION <small>Required by 39 U.S.C. 3685</small>			
1A. Title of Publication Journal of Thermophysics and Heat Transfer		1B. PUBLICATION NO. 0 0 0 7 6 5	2. Date of Filing 9/30/94
3. Frequency of Issue Quarterly		3A. No. of Issues Published Annually 4	3B. Annual Subscription Price \$36.00
4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers) 370 L'Enfant Promenade, S.W., Washington, D.C. 20024			
5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher (Not printers) same as above			
6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)			
Publisher (Name and Complete Mailing Address) American Institute of Aeronautics and Astronautics, Inc. (same as above)			
Editor (Name and Complete Mailing Address) Alfred L. Crosbie (same as above)			
Managing Editor (Name and Complete Mailing Address) Jacqueline Dupree (same as above)			
7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)			
Full Name		Complete Mailing Address	
American Institute of Aeronautics and Astronautics, Inc.		same as above	
8. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages or Other Securities (If there are none, so state)			
Full Name		Complete Mailing Address	
none			
9. For Completion by Nonprofit Organizations Authorized to Mail at Special Rates (DMM Section 423.12 only) The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one)			
(1) <input checked="" type="checkbox"/> Has Not Changed During Preceding 12 Months		(2) <input type="checkbox"/> Has Changed During Preceding 12 Months <small>(If changed, publisher must submit explanation of change with this statement.)</small>	
10. Extent and Nature of Circulation <small>(See instructions on reverse side)</small>		Average No. Copies Each Issue During Preceding 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
A. Total No. Copies (Net Press Run)		1575	1400
B. Paid and/or Requested Circulation		---	---
1. Sales through dealers and carriers, street vendors and counter sales			
2. Mail Subscription (Paid and/or requested)		994	1000
C. Total Paid and/or Requested Circulation (Sum of 10B1 and 10B2)		994	1000
D. Free Distribution by Mail, Carrier or Other Means Samples, Complimentary, and Other Free Copies		97	95
E. Total Distribution (Sum of C and D)		1091	1095
F. Copies Not Distributed		484	305
1. Office use, left over, unaccounted, spoiled after printing			
2. Return from News Agents		---	---
G. TOTAL (Sum of E, F1 and 2—should equal net press run shown in A)		1575	1400
11. I certify that the statements made by		Signature and Title of Editor, Publisher, Business Manager, or Owner <i>Glenn J. Brennan</i> Division Director, Journals
