

# 1994 *Journal of Thermophysics and Heat Transfer* Index

## How to Use the Index

In the Subject Index, pages 814–818, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 819, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 820–824, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the “CP” or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1993, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.
