# A Fifteenth Successful Year for JTHT

S UPPORT from the thermophysics and heat transfer community for the *Journal of Thermophysics and Heat Transfer (JTHT)* continues to be good. However, the downturn in the aerospace industry continues to cause a reduction in the number of submissions. Between October 31, 2000 and November 1, 2001, 113 papers were submitted to *JTHT*, with 37% originating from technical meetings. During this same time period, over 300 reviews were completed by volunteers to ensure the quality of *JTHT*. The average time between the receipt of a manuscript and the Associate Editor's decision to accept or revise was 3.6 months for the articles appearing in 2001. The average time between final acceptance and publication was 5.4 months. The total number of pages was 512, and all four issues of Volume 15 were on schedule.

#### **A Full-Spectrum Publication**

It should be re-emphasized that *JTHT* is a full-spectrum publication in the field of thermophysics and heat transfer, a breadth illustrated by the following list of pertinent topics:

Aerothermodynamics

Reentry Thermal protection Low density Laser interaction Ablation Plumes Computational

Thermal Control

Heat pipes
Thermal modeling
Electronics cooling
Large space structures
Contamination
Cryogenics
Insulation

Nonintrusive Diagnostics

IR signatures Remote sensing Laser techniques Particle sizing Scattering techniques

Thermophysical Properties

Thermodynamic Transport Optical/radiative Radiative Heat Transfer

Surface interchange Absorbing-emitting media Multiple scattering Nongray analysis Multidimensional Coupled with conduction Coupled with convection

Conduction/Phase Change

Contact conductance Composite materials Inverse problems Conjugate problems Nonlinear problems Analytical techniques Melting/solidification

Convective Heat Transfer

Forced convection Natural convection Mixed convection Internal/external flows Boiling/condensation

Numerical Heat Transfer Finite difference

Finite difference Finite element Parallel processing

A discipline-oriented publication, *JTHT* presents both original contributions of a fundamental nature and application-type papers. Analytical, numerical, and experimental approaches are all encouraged. Papers on the topics of aerothermodynamics, thermal control, and numerical heat transfer are especially encouraged. Although *JTHT* is published by AIAA, papers are not restricted to aerospace topics. Authors from the international thermophysics and heat transfer community are invited to submit papers.

### **Accuracy and Ethics**

The AIAA Publications Committee approved the following: "The AIAA journals will not accept for publication any paper reporting (1) numerical solutions of an engineering problem that fails to ade-

quately address accuracy of the computed results or (2) experimental results unless the accuracy of the data is adequately presented."The purpose of this statement is to reiterate the desire to have high-quality investigations with properly documented results published in the AIAA journals, and to clarify acceptable standards for presentation of numerical and experimental results. The editors and reviewers will remain the final judges. An ethical standards document was also approved by the Publications Committee and is reproduced in its entirety elsewhere in this issue. Prospective authors and reviewers are encouraged to study it carefully.

#### **Manuscript Disks**

Authors are requested to prepare their manuscripts electronically to reduce publication delays. Conversion of disks directly to type helps to avoid rekeyboarding and subsequent introduction of errors. Examples of easily converted software programs include TeX and LaTeX. Please retain the disk until the review process has been completed and final revisions have been incorporated into your paper.

#### 2001 AIAA Thermophysics Award Recipient

Dr. Surendra N. Tiwari, Professor and Eminent Scholar of Me-

chanical Engineering at Old Dominion University, was selected as the 2001 recipient of the AIAA Thermophysics Award. Dr. Tiwari was chosen for his significant contributions in analysis of radiation heat transfer, combustion, thermal protection of entry vehicles, and atmospheric radiation, and in education thermal sciences. The AIAA Thermophysics Award is presented for an outstanding singular or sustained tech-

nical or scientific contribution by an individual in thermophysics, specifically as related to the properties and mechanisms involved in thermal energy transfer and the study of environmental effects on such properties and mechanisms. The Thermophysics Award was presented to him at the AIAA Thermophysics Conference in June 2001 at Anaheim, CA.

#### 2002 Editorial Team

The editorial team includes Associate Editors and members of the Editorial Advisory Board. The Associate Editors are responsible for the technical evaluation of manuscripts, and the burden of maintaining quality rests predominantly with them. Photographs and biographies of the 2002 team are included in this issue. I encourage you to discuss your views of *JTHT* with members of the editorial team.

### Appreciation

I would like to express my personal thanks to the authors who have chosen *JTHT* as the vehicle for their research work. I also want to thank the reviewers who have contributed their time to ensure the success of *JTHT*. Their names are listed in this issue. Finally, I would like to express my appreciation to Luke McCabe (Managing Editor) Heather Cornelison (TechBooks) and Norma Brennan (Director of Publications) for their help in keeping *JTHT* on schedule.

Alfred L. Crosbie Editor-in-Chief

## **Editor-in-Chief**

ALFRED L. CROSBIE, Curators' Professor of Mechanical Engineering at the University of Missouri-Rolla, received his B.S. from the University of Oklahoma in 1964, his M.S. in 1966, and his Ph.D. in 1969 from Purdue University, all in mechanical engineering. He joined the faculty of the University of Missouri-Rolla in 1968, where he was promoted to Professor in 1975. He has been an active researcher in the field of radiative heat transfer since 1964. His current research interests include multidimensional radiative heat transfer, multiple scattering, numerical heat transfer, and laser interaction. Dr. Crosbie has served as a member of the AIAA Thermophysics Technical Committee (1976–78), Technical Program Chairman for the AIAA 15th Thermophysics Conference (1980), Editor of two thermophysics volumes in the AIAA Progress in Astronautics and Aeronautics book series (1981), Associate Editor for the AIAA Journal (1981-83), and Chairman of the AIAA Thermophysics Technical Committee (1984-86). He is a Fellow of AIAA, the American Association for the Advancement of Science, and the American Society of Mechanical Engineers, a recipient of the AIAA Thermophysics Award (1987) and the ASME Heat Transfer Memorial Award (1990), and an Associate Editor for the Journal of Quantitative Spectroscopy and Radiative Transfer (1979–2002). He was a member of the Editorial Advisory Board for Heat Transfer-Recent Contents (1996-2000). Dr. Crosbie is the author or coauthor of over 80 papers in archival journals.

## **Associate Editors**

RICHARD O. BUCKIUS, Professor of Mechanical Engineering and Head of the Department of Mechanical and Industrial Engineering at the University of Illinois at Urbana–Champaign (UIUC), received his B.S. in 1972, M.S. in 1973, and Ph.D. in 1975 from the University of California, Berkeley, all in mechanical engineering. He joined the faculty of UIUC in 1975, where he was promoted to Professor in 1984. He served as Program Director of the Thermal Systems and Engineering Program at the National Science Foundation (1987–88). His research interests include radiative heat transfer, Monte Carlo methods in scattering media, and scattering from rough interfaces. Dr. Buckius was a member of the AIAA Thermophysics Technical Committee (1984–87), Technical Program Chair of the AIAA 22nd Thrmophysics Conference (1987), and an Associate Technical Editor of the American Society of Mechanical Engineers *Journal of Heat Transfer* (1987–92). He is a Fellow of ASME and an Associate Fellow of AIAA. He is a member of the Editorial Advisory Board of *Microscale Thermophysical Engineering*, *Heat Transfer Research*, and *Heat Transfer—Japanese Research*. He is author or coauthor of over 80 papers in archival journals and a textbook on thermodynamics.

PING CHENG, Professor and Head of Mechanical Engineering at the Hong Kong University of Science and Technology (HKUST), received his B.S. in mechanical engineering from Oklahoma State University in 1958, his M.S. in mechanical engineering from the Massachusetts Institute of Technology in 1960, and his Ph.D. in aeronautics and astronautics from Stanford University in 1965. Before joining HKUST in 1995, he held positions at New York University (1965–67), NASA Ames Research Center (1967–68), National Taiwan University (1968–70), and the University of Hawaii (1970–94). His recent research centers on convection, boiling and condensation in porous media, reciprocating flow and oscillatory heat transfer and transport processes in micro-systems. Dr. Cheng is a member of the AIAA Thermophysics Technical Committee and is a Fellow of the American Society of Mechanical Engineers and Associate Fellow of AIAA. He is the author or coauthor of over 160 publications. He has also contributed chapters on heat transfer in geothermal systems and porous media to Advances in Heat Transfer, Handbook of Heat Transfer Applications, and Annual Review of Heat Transfer. He is a member of the editorial board of the International Journal of Heat and Mass Transfer, Numerical Heat Transfer, Experimental Heat Transfer, Journal of Porous Media, and Revue Générale de Thermique. He is a recipient of the ASME Heat Transfer Memorial Award (1996).

RONALD L. DOUGHERTY, Professor and Chair of Mechanical Engineering at the University of Kansas (KU), received his B.S. in 1972, M.S. in 1974, and Ph.D. in 1978 from the University of Missouri–Rolla, all in mechanical engineering. Before joining KU in 1999, he held positions at Pratt-Whitney Aircraft (1978–83), Terra Tek, Inc. (1983–85), and Oklahoma State University (1985–99). His recent research centers on radiative transfer in participating media, dynamic light scattering/photon spectroscopy, and particle characterization by nonintrusive laser diagnostics. Dr. Dougherty was a member of the AIAA Thermophysics Technical Committee (1986–89), Thermophysics Technical Program Chair at the AIAA 30th Aerospace Sciences Meeting (1992), and Chair of the Oklahoma Section of AIAA (1995–96). He has been a member of the American Society of Mechanical Engineers Heat Transfer Division's committee on Theory and Fundamental Research since 1993. He has chaired 10 thermophysics sessions at AIAA meetings. He is the author or coauthor of over 40 publications.

**H. FREDERICK NELSON,** Professor of Aerospace Engineering at the University of Missouri-Rolla, received his B.S. in Aerospace Engineering from Iowa State University in 1961, and his M.S and Ph.D. in Aeronautical Engineering from Purdue University in 1964 and 1968, respectively. He joined the faculty of the University of Missouri-Rolla in 1968, where he was promoted to Professor in 1978. He has taken sabbatical leaves at the Jet Propulsion Laboratory (1974–75), Rocket Propulsion Laboratory at Edwards (1981–82), and NASA Ames Research Center (1988–89). His research interests include aerothermodynamics of planetary entry, nonequilibriumionization and chemistry in gas dynamics, shock wave structure, and plume radiation. Dr. Nelson was a member of the AIAA Thermophysics Technical Committee (1979–81, 89), General Program Chairman of the 19th AIAA Thermophysics Conference (1984), Chairman of the AIAA Thermophysics Technical Committee (1990–92), and Editor of a thermophysics volume in the AIAA Progress in Astronautics and Aeronautics book series (1985). He is an Associate Fellow of AIAA and a recipient of the AIAA National Faculty Advisor Award (1991). Dr. Nelson is author or coauthor of over 70 papers in archival journals.

GEORGE P. "BUD" PETERSON, Provost at Rensselar Polytechnic Institute, received his B.S. in mechanical engineering in 1975, his B.S. in mathematics in 1977, and his M.S. in engineering in 1980, all from Kansas State University, and his Ph.D. in mechanical engineering from Texas A&M University in 1981. He joined the faculty of Texas A&M University in 1981, where he was promoted to Professor in 1990, Tenneco Professor in 1991, Head of Mechanical Engineering in 1993, Associate Vice-Chancellorand Executive Associate Dean of Engineering in 1996. He served as Program Director of Thermal Transport and Thermal Processing at the National Science Foundation (1993-94). His research interests include phase change heat transfer, thermal control, conduction, and thermal contact resistance. He was a member of the AIAA Thermophysics Technical Committee (1986-89) and AIAA representative to the National Heat Transfer Conference (1990-93). He was an Associate Editor of the Journal of Energy Resources Technology (1986-92) and Editor of Heat Transfer-Recent Contents (1992-95). He is an Editor for Experimental and Fluid Sciences and Microscale Thermophysical Engineering and an Associate Editor for the Journal of Heat Transfer and the Journal of Heat and Fluid Flow. Dr. Peterson is a Fellow of the American Society of Mechanical Engineers and AIAA and a recipient of the AIAA Award for Best Technical Paper in Thermophysics (1991) and of the AIAA Thermophysics Award (1996). He is the author or coauthor of over 125 papers in archival journals, seven book chapters, and a textbook on heat pipes.

ALLIE M. SMITH, Emeritus Dean of Engineering and Professor of Mechanical Engineering at the University of Mississippi, received his B.S. in mechanical engineering from North Carolina State University in 1956 and his M.S. in 1961 and his Ph.D. in 1966 from North Carolina State University in mechanical and aerospace engineering. Before joining the University of Mississippi in 1979, he worked for ARO for 14 years as a thermal physics supervisor and as a research manager. His research work has been in the area of radiative heat transfer, particularly the experimental and theoretical understanding of cryodeposits. Dr. Smith has been active in the AIAA thermophysics community: member of the AIAA Thermophysics Technical Committee (1973-75, 1985-88), Chairman of the AIAA Thermophysics Technical Committee (1976-77), and General Chairman of the 10th AIAA Thermophysics Conference (1975). He served as an Associate Editor of the AIAA Journal (1975-77), Editor for two thermophysics volumes in the AIAA Progress in Astronautics and Aeronautics book series (1976, 1977), General Chairman of the 17th Aerospace Sciences Meeting (1979), and Chairman of the AIAA Terrestrial Energy Systems Committee (1981-82). Dr. Smith is a Fellow of AIAA and the American Society of Mechanical Engineers and recipient of the AIAA Thermophysics Award (1978) and the AIAA Hermann Oberth Award (1985). He is the author or coauthor of over 75 publications.

# **Editorial Advisory Board**

**DONALD K. EDWARDS,** Professor Emeritus of Mechanical Engineering at the University of California, Irvine (UCI), received his B.S. in 1954, M.S. in 1956, and Ph.D. in 1959 from the University of California, Berkeley, all in mechanical engineering. In 1959 he joined the faculty of the University of California, Los Angeles, where he was promoted to Professor in 1968 and served as Chairman of Chemical, Nuclear, and Thermal Engineering (1975–78). At UCI he served as Chairman of Mechanical Engineering and Associate Dean of Engineering before retiring in 1991. He received the American Society of Mechanical Engineers Heat Transfer Division's Memorial Award (1973) and was the first recipient of the AIAA Thermophysics Award (1976). He was a Technical Editor for the *Journal of Heat Transfer* (1975–81) and an Associate Editor for the *International Journal of Solar Energy* (1983–85). He is a Fellow of AIAA and ASME and a member of the Editorial Advisory Board for the *International Journal of Heat and Mass Transfer*.

JOHN T. HOWE, Consultant at ELORET Thermal Sciences, received his B.S. from the University of Michigan in 1950 and his M.S. in 1956 and the degree of Engineer in 1958 from Stanford University, all in engineering mechanics. He has been visiting scholar, text author, and lecturer for "Hypervelocity Atmospheric Flight and Real Gas Phenomena" at Stanford University. During his 41 years with NASA, he has held numerous technical managerial positions at Ames Research Center and NASA Headquarters, including Chief Scientist and member of the Management Council at NASA Ames Research Center (1991–1998). He is known for his pioneering research contributions to the aerothermodynamics of planetary atmospheric entry, including radiative energy transfer, reactive gas flows, and innovative thermal protection systems. He led the supporting research effort for the Galileo Probe Entry into the Jupiter Atmosphere in 1995—100-fold more severe than the Apollo Entry—for which he received the NASA Outstanding Leadership Medal (1996). He is active in analysis and experimental research on ocean upwelling along the west coast of North America. He was a member of the AIAA Thermophysics Technical Committee (1982–84) and an Associate Editor of the Journal of Spacecraft and Rockets (1982–84). He is a recipient of the AIAA Thermophysics Award (1986) and is a Fellow of AIAA.

**TOM J. LOVE,** George Lynn Cross Professor Emeritus of Aerospace, Mechanical, and Nuclear Engineering and Halliburton Professor of Engineering at the University of Oklahoma, received his B.S. from the University of Oklahoma in 1948, his M.S. from the University of Kansas in 1956, and his Ph.D. from Purdue University in 1963, all in mechanical engineering. In 1956 he joined the faculty of the University of Oklahoma, where he was promoted to Professor (1965) and served as Director of the School of Aerospace, Mechanical, and Nuclear Engineering (1963–72). He was a member of the AIAA Thermophysics Technical Committee (1970–72), an Associate Editor for the AIAA Journal (1972–75), and an Associate Editor for the American Society of Mechanical Engineers Journal of Bioengineering (1976–79). He is a Fellow of AIAA and ASME. Dr. Love is a recipient of the AIAA Thermophysics Award (1984) and of the ASME Memorial Heat Transfer Award (1989).

JAMES N. MOSS, Senior Research Engineer for Aerothermodynamics at the NASA Langley Research Center, received his B.S. in engineering science from the Tennessee Polytechnic Institute in 1962, his M.S. in aerospace engineering from the University of Virginia in 1968, and his Ph.D. in aerospace engineering from Virginia Polytechnic Institute and State University in 1972. He also received an M.S. in engineering administration in 1988 from George Washington University. Dr. Moss joined NASA in 1962, where his early research assignments dealt with ablating systems. His current research concernstransitional and rarefied flows. Dr. Moss has been active in the AIAA thermophysics community: member of the AIAA Thermophysics Technical Committee (1978–80), Technical Program Chairman of the 16th AIAA Thermophysics Conference (1981), General Program Chairman of the 20th AIAA Thermophysics Conference (1985), Co-Editor of a thermophysics volume in the AIAA Progress in Astronautics and Aeronautics book series (1986), Chairman of the AIAA Thermophysics Technical Committee (1986–88), and Associate Editor of the *Journal of Thermophysics and Heat Transfer* (1986–89). He is a Fellow of AIAA and a member of the International Advisory Committee on Rarefied Gas Dynamics. Dr. Moss is a recipient of the AIAA Thermophysics Award (1989) and the NASA Exceptional Engineering Achievement Medal (1990).

ROBERT SIEGEL, Heat Transfer Consultant, received his B.S. in 1950 and M.S. in 1951 from the Case Institute of Technology and his Sc.D. from the Massachusetts Institute of Technology in 1953, all in mechanical engineering. He worked at NASA John H. Glenn Research Center at Lewis Field from 1955 to 1999 and became a Senior Research Scientist. Before joining NASA, he worked for General Electric as a heat transfer engineer and analyst. He has been an active researcher in heat transfer since 1950. The majority of his research is in radiative heat transfer, reduced-gravity boiling, transient convection, and solidification. He invented the first drop tower. He served as an Associate Technical Editor for the *Journal of Heat Transfer* (1973–83) and an Associate Editor of the *Journal of Thermophysics and Heat Transfer* (1986–98). Dr. Siegel is a Fellow of AIAA and the American Society of Mechanical Engineers and a member of the Honorary Advisory Boards of the *International Journal of Heat and Mass Transfer* and *International Communications in Heat and Mass Transfer*. He is the recipient of the ASME Heat Transfer Division's Memorial Award (1970), the NASA Exceptional Scientific Achievement Award (1986), a Space Act Award (1993), the AIAA Thermophysics Award (1993), and the ASME/AIChE Max Jakob Memorial Award (1996).

CHANG-LIN TIEN, University Professor and NEC Distinguished Professor of Engineering at the University of California, Berkeley, received his B.S. from National Taiwan University in 1955, his M.M.E. from the University of Louisville in 1957, and his M.A. and Ph.D. in 1959 from Princeton University. He joined the University of California, Berkeley, in 1959, where he was promoted to Professor in 1968 and was appointed A. Martin Berlin Chair Professor in 1987. He served as Chairman of Mechanical Engineering (1974-81), as Vice Chancellor-Research (1983-85), and as Chancellor (1990–97). He also served as Executive Vice Chancellor and Distinguished Professor at the University of California, Irvine (1988-90). He was a member of the AIAA Thermophysics Technical Committee (1970-72), General Chairman of the 7th AIAA Thermophysics Conference (1972), General Chairman of the AIAA 12th Aerospace Sciences Meeting (1974), Editor of a volume in the AIAA Progress in Astonautics and Aeronautics book series (1973), and an Associate Editor for the Journal of Quantitative Spectroscopy and Radiative Transfer (1971–92). He is a recipient of the American Society of Mechanical Engineers Heat Transfer Division's Memorial Award (1974), the AIAA Thermophysics Award (1977), and the ASME/AlChE Max Jakob Memorial Award (1981). He is a recipient of many honorary doctoral degrees from universities in the United States and abroad. He is an AIAA Fellow, an ASME Honorary Member, and a member of the National Academy of Engineering. He is Editor of the Annual Review of Heat Transfer, Editor for the International Journal of Heat and Mass Transfer, and Editor-in-Chief of Experimental Heat Transfer and of Microscale Thermophysical Enginering.

RAYMOND VISKANTA, W.F.M. Goss Distinguished Professor of Engineering at Purdue University, received his B.S. from the University of Illinois in 1955, and his M.S. in 1956 and Ph.D. in 1960 from Purude University, all in mechanical engineering. After a brief period with Argonne National Laboratory, he joined the faculty of Purdue University, where he was promoted to Professor in 1966. He was a member of the AIAA Thermophysics Technical Committee (1972–75), General Chairman of the 2nd AIAA/the American Society of Mechanical Engineers Thermophysics and Heat Transfer Conference (1978), and Editor of two volumes in the AIAA Progress in Astronautics and Aeronautics book series (1979). He is a recipient of the ASME Heat Transfer Division's Memorial Award (1976), the AIAA Thermophysics Award (1979), the American Society for Engineering Education Senior Research Award (1984), the ASME/AlChE Max Jakob Memorial Award (1986), the ASME Melville Medal (1988), and the 1991 Nusselt-Reynolds Prize of the Assembly of World Conferences on Experimental Heat Transfer, Fluid Mechanics and Thermodynamics. Dr. Viskanta is a Fellow of ASME and AIAA, a member of the National Academy of Engineering, a foreign member of the Academy of Engineering Sciences of the Russian Federation, and a Dr.-Ing. E.h. (Honorary Doctor of Engineering Degree) from Technical University of Munich. He was an Associate Editor for the Journal of Quantitative Spectroscopy and Radiative Transfer (1969-72), an Associate Technical Editor for the Journal of Heat Transfer (1981-87) and Experimental Heat Transfer (1987-90), and the Technical Editor of the ASME Journal of Heat Transfer (1990-95). He is a member of the Editorial Advisory Boards of the International Journal of Heat and Mass Transfer, International Journal of Heat and Fluid Flow, AIAA Journal, Numerical Heat Transfer, and KSME International Journal and was Chair of the Committee on Microgravity Research and member of the Space Studies Board of the National Research Council (1997-2000).

M. MICHAEL YOVANOVICH, Professor of Mechanical Engineering at the University of Waterloo, Ontario, Canada, receivedhis B.S. from Queen's University in 1957, his M.S. from the State University of New York at Buffalo in 1963, and his M.E. and Sc.D. from the Massachusetts Institute of Technology in 1965 and 1967, respectively. After a brief period with the University of Poitiers in France, he joined the faculty of the University of Waterloo, where he was promoted to Professor in 1972. He was a member of the AIAA Thermophysics Technical Committee (1971–74, 85–88, 91–94), General Chairman of the first AIAA/the American Society of Mechanical Engineers Thermophysics and Heat Transfer Conference (1974), and Editor of a thermophysics volume in the AIAA Progress in Astronautics and Aeronautics book series (1975). He is a recipient of the AIAA Thermophysics Award (1984) and the AIAA Award for Best Technical Paper in Thermophysics (1983 and 1994). Dr. Yovanovich is a Fellow of the American Association for the Advancement of Science, AIAA, and ASME. He was an Associate Technical Editor of the ASME Journal of Heat Transfer (1984–86) and Associate Senior Editor of the ASME Journal of Electronic Packaging (1988–93). He was a member of the Editorial Advisory Boards of the Transactions of the Canadian Society of Mechanical Engineers and the International Journal of Heat and Fluid Flow.
