

Chronological Index

T02-001 Numerical Simulation of High-Temperature Gas Flows in a Millimeter-Scale Thruster. A. A. Alexeenko and D. A. Levin, *Pennsylvania State University*; S. F. Gimelshein, *George Washington University*; R. J. Collins, *University of Minnesota*; and G. N. Markelov, *Institute of Theoretical and Applied Mechanics, Russia* (16, 1, p. 10) Article

T02-002 Novel Groove-Shaped Screen-Wick Miniature Heat Pipe. Rengasamy Ponnappan, *Air Force Research Laboratory* (16, 1, p. 17) Article

T02-003 Fractal Models for the Effective Thermal Conductivity of Bidispersed Porous Media. Boming Yu, and Ping Cheng *The Hong Kong University of Science and Technology, China* (16, 1, p. 22) Article

T02-004 Ultrafast Laser Heating on Metal Films: Effects of Microvoids. D. Y. Tzou, *University of Missouri-Columbia* (16, 1, p. 30) Article

T02-005 Thermal Response and Inequivalence of Pulsed Ultraviolet-Laser Calorimeters. D. H. Chen, *University of Florida*; M. L. Dowell and C. L. Cromer, *National Institute of Standards and Technology*; and Z. M. Zhang, *University of Florida* (16, 1, p. 36) Article based on AIAA Paper 2001-2759

T02-006 Transient Coupled Radiation-Conduction in Semitransparent Spherical Particle. L. H. Liu, and H. P. Tan, *Harbin Institute of Technology, China*; T. W. Tong, *George Washington University* (16, 1, p. 43) Article

T02-007 Modeling of Flow and Radiation in the Atlas Plume. A. A. Alexeenko, N. E. Gimelshein, and D. A. Levin, *Pennsylvania State University*; and R. J. Collins, R. Rao, and G. V. Candler, *University of Minnesota*, S. F. Gimelshein, *George Washington University*; J. S. Hong and T. Schilling, *Institute of Defense Analyses* (16, 1, p. 50) Article

T02-008 Modeling of Ultraviolet Radiation in Steady and Transient High-Altitude Plume Flows. S. F. Gimelshein, *George Washington University*; D. A. Levin, *Pennsylvania State University*; J. A. Drakes, *Arnold Engineering Development Center*; G. F. Karabadzah and Yu Plastinin, *TsNIIMASH, Russia* (16, 1, p. 58) Article

T02-009 Generalized Model for Infrared Perception from an Engine Exhaust. Srinath S. Heragu and K. V. L. Rao, *Aeronautical Development Agency, India*; B. N. Raghunandan, *Indian Institute of Science, India* (16, 1, p. 68) Article

T02-010 Experimental Investigation of Air Radiation from Behind a Strong Shock Wave. Kazuhisa Fujita, Sunichi Sato, and Takashi Abe, *The Institute of Space and Astronautical Science, Japan*; and Yuta Ebinuma, *Aoyama Gakuin University, Japan* (16, 1, p. 77) Article based on AIAA Paper 98-2467

T02-011 Direct Simulation Monte Carlo Dissociation Model Evaluation: Comparison to Measured Cross Sections. Ingrid J. Wysong, *U.S. Air Force Research Laboratory, Edwards Air Force Base*; Rainer A. Dressler, and Y. H. Chiu, *U.S. Air Force Research Laboratory, Hanscom Air Force Base*; and Iain D. Boyd, *University of Michigan* (16, 1, p. 83) Article

T02-012 Unified Calculation of Hypersonic Flowfield for a Reentry Vehicle. Toshiyuki Suzuki, Michiko Furudate, and Keisuke Sawada, *Tohoku University, Japan* (16, 1, p. 94) Article based on AIAA Paper 2001-0980

T02-013 Ground Testing Facility for Modeling Real Projectile Flight Heating in Earth Atmosphere. Friedrich Seiler, Udo Werner and Gunther Patz, *French-German Research Institute of Saint-Louis, France* (16, 1, p. 101) Article based on AIAA Paper 2000-2516

T02-014 Novel Pressure-Sensitive Paint for Cryogenic and Unsteady Wind Tunnel Testing. Keisuke Asai, Yutaka Amao, and Yoshimi Iijima, *National Aerospace Laboratory, Japan*; Ichiro Okura, *Tokyo Institute of Technology, Japan*; and Hiroyuki Nishide, *Waseda University, Japan* (16, 1, p. 109) Article based on AIAA Paper 2000-2527

T02-015 Natural Convection Inside Vertical Isothermal Ducts of Constant Arbitrary Cross-Section. M. M. Yovanovich and P. Teertstra, *University of Waterloo, Canada*; Y. S. Muzychka, *Memorial University of Newfoundland, Newfoundland* (16, 1, p. 116) Article based on AIAA Paper 2001-0368

T02-016 Stokes Flow Induced by a Sliding Smooth Plate over a Finned Plate. Jun Sang Park, *Halla University, Korea*; and Jae Min Hyun, *Korea Advanced Institute of Science & Technology, Republic of Korea* (16, 1, p. 122) Article

T02-017 Unsteady, Conjugated Duct Heat Transfer Solution with Wall Heating. James Sucec, *University of Maine*; and Hong-Zhao Weng, *General Electric Aero Energy Products* (16, 1, p. 128) Article

T02-018 Growth Rate of Crystallization in Disodium Hydrogenphosphate Dodecahydrate. Satoshi Hirano, *National Institute of Advanced Industrial Science and Technology, Japan*; and Takeo S. Saitoh, *Tohoku University, Japan* (16, 1, p. 135) Article

T02-019 Capillary Limit of the Evaporator Wick in Alkali Metal Thermal-to-Electric Converters. Jean-Michel Tournier and Mohamed S. El-Genk, *University of New Mexico* (16, 1, p. 141) Article

T02-020 Rectangular Jet Impingement Heat Transfer on a Vehicle Windshield. Subrata Roy, Karim Nasr, and Paresh Patel, *Kettering University*; and Bashar AbdulNour, *Ford Motor Company* (16, 1, p. 154) Technical Note

T02-021 Numerical Model of the Plasma Jet Generated by an Electrothermal-Chemical Igniter. Michael J. Nusca, Michael J. Mcquaid, and William R. Anderson, *U.S. Army Research Laboratory* (16, 1, p. 157) Technical Note based on AIAA Paper 2000-2675

T02-022 Rarefaction, Compressibility, and Viscous Heating in Gas Microfilters. Imtiaz Ahmed and Ali Beskok, *Texas A&M University* (16, 2, p. 161) Article

T02-023 Numerical Simulation of Gas Flow over Microscale Airfoils. Quanhua Sun and Iain D. Boyd, *University of Michigan*; and Graham V. Candler, *University of Minnesota* (16, 2, p. 171) Article based on AIAA Paper 2001-3071

T02-024 Electrohydrodynamically Augmented Micro Heat Pipes. Zhiquan Yu, Kevin Hallinan, Wilbur Bhagat, and Reza Kashani, *The University of Dayton* (16, 2, p. 180) Article

T02-025 Experimental Investigation of an Air Microjet Array Impingement Cooling Device. John E. Leland and Rengasamy Ponnappan, *U.S. Air Force Research Laboratory*; and Kevin S. Klasing, *Universal Energy Systems, Inc.* (16, 2, p. 187) Article based on AIAA Paper 99-0476

T02-026 Photochemical and Photothermal Model for Pulsed-Laser Ablation. M. Sadoqi, *St. John's University*; S. Kumar, *Polytechnic University*; and Y. Yamada, *National Institute of Advanced Industrial Science and Technology, Japan* (16, 2, p. 193) Article

T02-027 Identification of Polyurethan Foam Radiative Properties—Influence of Transmittance Measurements Number. D. Baillis and J. F. Sacadura, *Institut National des Sciences Appliquées de Lyon, France* (16, 2, p. 200) Article

T02-028 Modeling of Constriction Resistance in Coated Joints. Erik L. Olsen and Suresh V. Garimella, *Purdue University*; and C. V. Madhusudana, *University of New South Wales, Australia* (16, 2, p. 207) Article

T02-029 Heat Transfer in Adhesively Bonded Honeycomb Core Panels. K. Daryabeigi, *NASA Langley Research Center* (16, 2, p. 217) Article based on AIAA Paper 2001-2825

T02-030 Three-Dimensional Forced Convection Flow Adjacent to Backward-Facing Step. B. F. Armaly, A. Li, and J. H. Nie, *University of Missouri-Rolla* (16, 2, p. 222) Article

T02-031 Transonic Film Cooling Effectiveness From Shaped Holes on a Simulated Turbine Airfoil. Tetsuji Furukawa and Phillip M. Ligrani, *University of Utah* (16, 2, p. 228) Article

T02-032 Nonequilibrium Kinetics and Heat Transfer in O₂/O Mixtures near Catalytic Surfaces. E. Kustova and E. Nagnibeda, *Saint Petersburg University, Russia*; I. Armenise, and M. Capitelli, *University of Bari, Italy* (16, 2, p. 238) Article

T02-033 Shock Standoff on Hypersonic Blunt Bodies in Nonequilibrium Gas Flows. George R. Inger, Charlotte Higgins, and Richard Morgan, *University of Queensland, Australia* (16, 2, p. 245) Article based on AIAA Paper 2001-0812

T02-034 Examination of Water Dissociation Models in Shock Heated Air. Deborah A. Levin, *Pennsylvania State University*; Sergey F. Gimelshein, *George Washington University*; and Natalia E. Gimelshein, *Pennsylvania State University* (16, 2, p. 251) Article

T02-035 Thermodynamic Model of Hydrazine that Accounts for Liquid–Vapor Phase Change. D. Giordano, *European Space Research and Technology Center, The Netherlands*; and M. De Serio, *University of Bari, Italy* (16, 2, p. 261) Article based on AIAA Paper 2001-3016

T02-036 Thermal Disturbances in Near Critical Fluids. Howard Wagner and Yildiz Bayazitoglu, *Rice University* (16, 2, p. 273) Article

T02-037 Analysis of a Three-Dimensional Thermally Asymmetric Parallelepiped (Applicable to Fins). H. S. Kang, *Kangwon National University, Republic of Korea*; and D. C. Look Jr., *University of Missouri-Rolla* (16, 2, p. 280) Technical Note

T02-038 Demythcizing the Gibbs Potential for the Determination of Chemical Equilibrium Conditions. M. Capitelli, *University of Bari, Italy*; and D. Giordano, *European Space Research and Technology Center, The Netherlands* (16, 2, p. 283) Technical Note based on AIAA Paper 2001-2753

T02-039 Thermal Effects of Particles on Hypersonic Ablation. T. F. Zien, *Naval Surface Warfare Center* (16, 2, p. 285) Technical Note based on AIAA Paper 2001-2833

T02-040 Three-Dimensional Discrete Ordinates Method in Transient Radiative Transfer. Zhixiong Guo, *Rutgers University*; and Sunil Kumar, *Polytechnic University* (16, 3, p. 289) Article

T02-041 Transient Coupled Heat Transfer in Three-Layer Composite with Opaque Specular Surfaces. Jian-Feng Luo, Xin-Lin Xia, and He-Ping Tan, *Harbin Institute of Technology, People's Republic of China*; and Timothy W. Tong, *Colorado State University* (16, 3, p. 297) Article

T02-042 Use of Blackbody Optical Fiber Thermometers in High Temperature Environments. Matthew R. Jones and David G. Barker, *Brigham Young University* (16, 3, p. 306) Article

T02-043 Parametric Analysis of Heat Transfer on Multistage Cryogenic Radiator. Paulo Couto and B. H. Mantelli, *Federal University of Santa Catarina, Brazil*; E. E. Marotta, *IBM Corporation Inc.*; and J. J. Fuller, *General Electric Power Systems* (16, 3, p. 313) Article

T02-044 Experimental and Numerical Investigation of the Bridgman Growth of a Transparent Material. James E. Simpson and Suresh V. Garimella, *Purdue University*; and Henry C. de Groh III, *NASA John H. Glenn Research Center at Lewis Field* (16, 3, p. 324) Article

T02-045 Single-Bubble Dynamics During Pool Boiling Under Low Gravity Conditions. D. M. Qiu and V. K. Dhir, *University of California Los Angeles*; and D. Chao, M. M. Hasan, E. Neumann, G. Yee, and A. Birchenough, *NASA John H. Glenn Research Center at Lewis Field* (16, 3, p. 336) Article

T02-046 Analysis of Wire-Bonded Micro Heat Pipe Arrays. Y. X. Wang and G. P. Peterson, *Rensselaer Polytechnic Institute* (16, 3, p. 346) Article

T02-047 Thermal Periodic Contact of Exhaust Valves in Spark Ignition Air Cooled Engines. I. Paradis and I. R. Wagner, *Clemson University*; and E. E. Marotta, *IBM* (16, 3, p. 356) Article based on AIAA Paper 2000-0878

T02-048 Exact Solution for Nonlinear Thermal Diffusion and Its Use for Verification. Robert L. McMasters and Zhengfang Zhou, *Michigan State University*; Kevin J. Dowding, *Sandia National Laboratories*; and Craig Somerton and James V. Beck, *Michigan State University* (16, 3, p. 366) Article

T02-049 Heat Transfer Analysis on a Moving Flat Sheet Emerging into a Quiescent Fluid. F. Méndez and C. Treviño, *Universidad Nacional Autónoma de México, México* (16, 3, p. 373) Article

T02-050 Solidified Layer Growth and Decay Characteristics During Freeze Coating of a Binary Substance. C. Tangthieng and F. B. Cheung, *Pennsylvania State University*; and Y. C. Shih, *National Taipei University of Technology, Taiwan, Republic of China* (16, 3, p. 379) Article

T02-051 Performance of Pin Fin Cast Aluminum Coldwalls, Part 1: Friction Factor Correlations. B. Elliot Short Jr., *Raytheon Company*; Peter E. Raad, *Southern Methodist University*; and Donald C. Price, *Raytheon Company* (16, 3, p. 389) Article

T02-052 Performance of Pin Fin Cast Aluminum Coldwalls, Part 1: Colburn j -Factor Correlations. B. Elliott Short Jr., *Raytheon Company*; Peter E. Raad, *Southern Methodist University*; and Donald C. Price, *Raytheon Company* (16, 3, p. 397) Article

T02-053 Heat Transfer in Two-Pass Turbulated Channels Connected by Holes. Srinath V. Ekkad, David Kontrovitz, Hasan Nasir, Gautam Pamula, and Sumanta Acharya, *Louisiana State University* (16, 3, p. 404) Article

T02-054 Highly Expanded Flashing Liquid Jets. J. R. Simões-Moriera, M. M. Vieira and E. Angelo, *Universidade de São Paulo* (16, 3, p. 415) Article based on AIAA Paper 2001-3036

T02-055 Distributions of Recovery Temperature on a Flat Plate by Underexpanded Supersonic Impinging Jet. Byung Gi Kim, Man Sun Yu, Yong Il Cho, and Hyung Hee Cho, *Yonsei University, Republic of Korea* (16, 3, p. 425) Article

T02-056 Response of Heatshield Material at Stagnation Point of Pioneer-Venus Probes. Hyo-Keun Ahn, Chul Park, and Keisuke Sawada, *Tohoku University, Japan* (16, 3, p. 432) Article

T02-057 Operational Behavior of Inductively Heated Plasma Source IPG3 for Entry Simulations. G. Herdrich, M. Auweter-Kurtz, H. L. Kurtz, T. Laux, and M. Winter, *University of Stuttgart, Germany* (16, 3, p. 440) Article based on AIAA Paper 99-3497

T02-058 Features of Gaseous Mixtures Combustion Initiated by High-Current Slipping Surface Discharge. S. I. Grytsinin, I. A. Kossyi, M. A. Misakyan, V. P. Silakov, N. M. Tarasova, and S. M. Temchin, *Russian Academy of Sciences, Russia* (16, 3, p. 450) Article based on AIAA Paper 2001-2947

T02-059 Approach for Calculating Thermophysical Properties with the Help of Statistical Thermodynamics. Jurij Avsec and Milan Marčič, *University of Maribor, Slovenia* (16, 3, p. 455) Article based on AIAA Paper 2000-2509

T02-060 Calculation of Elastic Modulus and other Thermophysical Properties for Molecular Crystals. Jurij Avsec and Milan Marčič, *University of Maribor, Slovenia* (16, 3, p. 463) Article based on AIAA Paper 2000-2507

T02-061 Two Temperature Saha Equations: Effects on Thermophysical Properties of H_2 Plasmas. M. Capitelli, *University of Bari, Italy*; G. Colonna, *Cinsiglio Nazionale delle Ricerche, Italy*; C. Gorse, P. Minelli, and D. Pagano, *University of Bari, Italy*; and D. Giordano, *European Space Research and Technology Center, The Netherlands* (16, 3, p. 469) Technical Note based on AIAA Paper 2001-3018

T02-062 Extended Slip Boundary Conditions for Microscale Heat Transfer. Yildiz Bayazitoglu and Gokturk Tunc, *Rice University* (16, 3, p. 472) Technical Note

T02-063 Transient Coupled Radiation and Conduction in a Two-Layer Semitransparent Material. Ping-Yang Wang and Hui-Er Cheng, *Shanghai Jiaotong University, Republic of China*; and He-Ping Tan, *Harbin Institute of Technology, Republic of China* (16, 3, p. 475) Technical Note

T02-064 Axial Thermal Dispersion Conductivity of Open-Cellular Porous Materials. Kouichi Kamiuto and San San Yee, *Oita University, Japan* (16, 3, p. 478) Technical Note

T02-065 Heat Transfer Predictions in a Laminar Hypersonic Viscous/Inviscid Interaction. Datta V. Gaitonde and Patrick W. Canupp, *U.S. Air Force Research Laboratory, Wright-Patterson Air Force Base*; and Michael S. Holden, *Calspan-University of Buffalo Research Center* (16, 4, p. 481) Article

T02-066 Computation of Nonequilibrium High-Temperature Axisymmetric Boundary Layer Flows. P. F. Barbante, and G. Gegrez, *von Karman Institute for Fluid Dynamics, Belgium*; G. S. R. Sarma, *Deutsches Zentrum für Luft und Raumfahrt, Germany* (16, 4, p. 490) Article based on AIAA Paper 2000-2437

T02-067 Numerical Simulations of Magnetic Flow Control in Hypersonic Chemically Reacting Flows. Henri-Marie Damevin and Klaus A. Hoffmann, *Wichita State University* (16, 4, p. 498) Article

T02-068 Comparison of Surface Chemical Kinetic Models for Ablative Reentry of Graphite. Mark A. Havstad and Robert M. Ferencz, *Lawrence Livermore National Laboratory* (16, 4, p. 508) Article

T02-069 Heat Transfer Measurements in Hypersonic Flow Using Luminescent Coating Techniques. J. P. Hubner, B. F. Carroll, and K. S. Schanze, *University of Florida* (16, 4, p. 516) Article

T02-070 Influence of the Alternating Power Supply Component on Plasma Arc Characteristic. Wenhua Zhao, Liming Chen, and Guanzhong Zhang, *Tsinghua University, Republic of China* (16, 4, p. 523) Article

T02-071 Modified P_N for Correlation Transfer in One-Dimensional Scattering and Absorbing Media. F. Dorri-Nowkooari and R. L. Dougherty, *University of Kansas* (16, 4, p. 529) Article based on AIAA Paper 94-2096

T02-072 Optimization of Micro Heat Pipe Radiators in a Radiation Environment. Y. X. Wang and G. P. Peterson, *Rensselaer Polytechnic Institute* (16, 4, p. 537) Article

T02-073 Experimental Study of Evaporative Heat Transfer in Sintered Copper Bidispersed Wick Structures. Xiao-lin Cao, Ping Cheng, and Tian-Shou Zhao, *The Hong Kong University of Science & Technology, Republic of China* (**16**, 4, p. 547) Article

T02-074 Thermocapillary Convection in Liquid Bridges with Undeformable Curved Surfaces. Bok-Cheol Sim, *Hanyang University, Korea*; and Abdelfattah Zebib, *Rutgers University* (**16**, 4, p. 553) Article

T02-075 Buoyancy and Marangoni Effects in an Evaporating Drop. R. Savino, D. Paterna, and N. Favaloro, *Universita di Napoli "Federico II"* (**16**, 4, p. 562) Article

T02-076 Thermal Analysis of the ALR8(SI) Plutonium Storage Container. D. L. James and S. Stevkovski, *Texas Tech University* (**16**, 4, p. 575) Article

T02-077 Solidification of Couette Flow in an Annulus with Inner Cylinder Rotation. Carsie A. Hall III, *University of New Orleans*; and Calvin Mackie, *Tulane University* (**16**, 4, p. 587) Article

T02-078 Effect of Diamond Coatings on Thermal Contact Conductance of Tungsten Carbide Substrates. Kee-Chiang Chung, *National Yunlin University of Science and Technology, Taiwan, Republic of China* (**16**, 4, p. 594) Article
