Special Issues on MHD Power Generation

In the fall of 1968 a special joint issue of the *AIAA Journal* and of the *Proceedings of the IEEE* will be devoted to the subject of magnetohydrodynamics (MHD) electrical power generation.

It is planned to publish the papers jointly in both Journals. The *Proceedings of the IEEE* will publish all papers accepted for this special issue while the *AIAA Journal* will publish as many as possible, subject to available space. Fields to be covered include generator theory and experiments, open and closed cycle systems, liquid metal generators, and plasma property studies. Those working currently in these fields are asked to consider submitting papers for these special issues of the Journals. Send four copies of the complete manuscript by April 1, 1968 to the Managing Editor, Scientific Publications, AIAA, 1290 Avenue of the Americas, New York, New York 10019.
