

Chronological Index

J02-001 Turbulence Ingestion Noise, Part 1: Experimental Characterization of Grid-Generated Turbulence. John P. Wojno and Thomas J. Mueller, *University of Notre Dame*; and William K. Blake, *Naval Surface Warfare Center* (40, 1, p. 16) Article

J02-002 Turbulence Ingestion Noise, Part 2: Rotor Aerocoustic Response to Grid-Generated Turbulence. John P. Wojno and Thomas J. Mueller, *University of Notre Dame*; and William K. Blake, *Naval Surface Warfare Center* (40, 1, p. 26) Article

J02-003 Three-Dimensional Numerical Simulation of the Jet Screech Phenomenon. Hao Shen and Christopher K. W. Tam, *Florida State University* (40, 1, p. 33) Article based on AIAA Paper 2001-0820

J02-004 Transducer for Direct Measurement of Skin Friction in Hypervelocity Impulse Facilities. C. P. Goyne, R. J. Stalker, and A. Paull, *University of Queensland, Australia* (40, 1, p. 42) Article

J02-005 Study of Direct-Measuring Skin-Friction Gauge with Rubber Sheet for Damping. Samantha Magill, Matthew Maclean, Joseph Schetz, Rakesh Kapania, Alexander Sang, and Wade Pulliam, *Virginia Polytechnic Institute and State University* (40, 1, p. 50) Article

J02-006 Relaxation of Turbulent Boundary Layer Submitted to Sudden Distortion at the Wall. N. Nait Bouda and T. Benabid, *University of Sciences and Technology Boumediène, Algeria*; and L. Fulachier, *Institut de Recherches sur les Phénomènes Hors Equilibre, France* (40, 1, p. 58) Article

J02-007 Numerical Simulation of the Interaction of Microactuators and Boundary Layers. Duncan A. Lockerby and Peter W. Carpenter, *University of Warwick, England, UK*; and Christopher Davies, *Coventry University, England, UK* (40, 1, p. 67) Article based on AIAA Paper 2000-4330

J02-008 Magnetohydrodynamic Control of Hypersonic Flows and Scramjet Inlets Using Electron Beam Ionization. Sergey O. Macheret, Mikhail N. Shneider, and Richard B. Miles, *Princeton University* (40, 1, p. 74) Article based on AIAA Paper 2001-0492

J02-009 Nonlinear Filtering for Low-Velocity Gaseous Microflows. Carolyn R. Kaplan and Elaine S. Oran, *U.S. Naval Research Laboratory* (40, 1, p. 82) Article

J02-010 Higher-Order Piezoelectric Plate Theory Derived from a Three-Dimensional Variational Principle. R. C. Batra and S. Vidoli, *Virginia Polytechnic Institute and State University* (40, 1, p. 91) Article

J02-011 Refined Structural Model for Thin-and Thick-Walled Composite Rotor Blades. Sung Nam Jung, *Chonbuk National University, Republic of Korea*; and V. T. Nagaraj and Inderjit Chopra, *University of Maryland* (40, 1, p. 105) Article

J02-012 Response and Failure Characteristics of Internally Pressurized Elliptical Composite Cylinders. Jennifer M. McMurray, and Michael W. Hyer, *Virginia Polytechnic Institute and State University* (40, 1, p. 117) Article

J02-013 Fuzzy Finite Element Method for Frequency Response Function Analysis of Uncertain Structures. David Moens and Dirk Vandepitte, *Katholieke Universiteit Leuven, Belgium* (40, 1, p. 126) Article

J02-014 Refined Plate Theory and its Variants. Rameshchandra P. Shimpi, *Indian Institute of Technology Bombay, India* (40, 1, p. 137) Article

J02-015 Design Optimization of Springback in a Deepdrawing Process. Kyung K. Choi and Nam H. Kim, *University of Iowa* (40, 1, p. 147) Article

J02-016 Displacement-Based Optimization for Truss Structures Subjected to Static and Dynamic Constraints. Samy Missoum and Zafer Gürdal, *Virginia Polytechnic Institute and State University* (40, 1, p. 154) Article

J02-017 Thermal Buckling of Functionally Graded Plates. R. Javaheri, *Islamic Azad University, Iran*; and M. R. Eslami, *Amirkabir University of Technology, Iran* (40, 1, p. 162) Article

J02-018 Models of Secondary Vorticity Evolution During Normal Vortex-Cylinder Interaction. J. S. Marshall, *University of Iowa* (40, 1, p. 170) Technical Note

J02-019 Two-Step Method for Static Topological Reanalysis. Hua Dong Lian, *Jilin University, PRC*; Xiao Wei Yang, *South China University of Technology, PRC*; and Su Huan Chen, *Jilin University, PRC* (40, 1, p. 172) Technical Note

J02-020 Assessment of Local Blowing and Suction in a Turbulent Boundary Layer. Kyoungyoun Kim, Hyung Jin Sung, and Myung Kyoon Chung, *Korea Advanced Institute of Science and Technology, Republic of Korea* (40, 1, p. 175) Technical Note

J02-021 Surface-Shear-Stress Pulses in Adverse-Pressure-Gradient Turbulent Boundary Layers. V. A. Sandborn, *Colorado State University* (40, 1, p. 177) Technical Note

J02-022 Influence of the Wall Condition on $k-\omega$ Turbulence Model Predictions. Frédéric Thivet, Mirna Daouk, and Doyle D. Knight, *Rutgers University* (40, 1, p. 179) Technical Note

J02-023 Turbulent Flow of Power-Law Fluids Through Circular Pipes. Z.U.A. Warsi, *Mississippi State University* (40, 1, p. 181) Technical Note

J02-024 Periodic Vibration of Plates with Large Displacements. Pedro Ribeiro, *Universidade do Porto, Portugal* (40, 1, p. 185) Technical Note

J02-025 Mean Flow Features Around the Inline Wheels of Four-Wheel Landing Gear. Barry S. Lazos, *NASA Langley Research Center* (40, 2, p. 193) Article

J02-026 Wall-Normal-Free Reynolds-Stress Model for Rotating Flows Applied to Turbomachinery. G. A. Gerolymos, and I. Vallet, *Université Pierre-et-Marie-Curie, France* (40, 2, p. 199) Article

J02-027 Role of Actuation Frequency in Controlled Flow Reattachment over a Stalled Airfoil. Michael Amitay, *Georgia Tech Research Institute*, and Ari Glezer, *Georgia Tech* (40, 2, p. 209) Article

J02-028 Three-Dimensional Rectangular Duct Code with Application to Impedance Eduction. Willie R. Watson, *NASA Langley Research Center* (40, 2, p. 217) Article

J02-029 Study of the Error and Efficiency of Numerical Schemes for Computational Aeroacoustics. James R. DeBonis, *NASA John H. Glenn Research Center at Lewis Field*; and James N. Scott, *The Ohio State University* (40, 2, p. 227) Article

J02-030 Computation of Flow Noise Using Source Terms in Linearized Euler's Equations. Christophe Bogey, Christophe Bailly, and Daniel Juvé, *Ecole Centrale de Lyon, France* (40, 2, p. 235) Article

J02-031 Unsteady Flow Evolution in a Porous Chamber with Surface Mass Injection, Part 2: Acoustic Excitation. Sourabh Apte, and Vigor Yang, *The Pennsylvania State University* (40, 2, p. 244) Article

J02-032 Predictions of Transitional Flows in Low-Pressure Turbines Using Intermittency Transport Equation. Y. B. Suzen, *University of Kentucky*; G. Xiong, *Network Appliance, Inc.*; and P. G. Huang, *University of Kentucky* (40, 2, p. 254) Article based on AIAA Paper 2000-2654

J02-033 Aperture Effects on the Aerooptical Distortions Produced by a Compressible Shear Layer. Edward J. Fitzgerald and Eric J. Jumper, *University of Notre Dame* (40, 2, p. 267) Article based on AIAA Paper 2000-0991

J02-034 Numerical Investigation of Turbulent Mixing in a Jet/Wake Vortex Interaction. C. Ferreira Gago, S. Brunet, and F. Garnier, *Onera, France* (40, 2, p. 276) Article

J02-035 Vortex Structure on a Delta Wing at High Angle of Attack. M. Özgören, *Lehigh University*; B. Sahin, *Cukurova University, Turkey*; and D. Rockwell, *Lehigh University* (40, 2, p.) Article

J02-036 Nonlinear Fluctuation-Dissipation Theory to the Second Order. Abdulmuhsen H. Ali, *Kuwait University, Kuwait* (40, 2, p. 293) Article

J02-037 Analytical and Computational Aspects of Collaborative Optimization for Multidisciplinary Design. Natalia M. Alexandrov, *NASA Langley Research Center*; and Robert Michael Lewis, *College of William and Mary* (40, 2, p. 301) Article

J02-038 Diode Laser-Driven Microthrusters: A New Departure for Micropropulsion. Claude Phipps, *Photonic Associates*, and James Luke, *University of New Mexico* (40, 2, p. 310) Article

J02-039 Dynamic Analysis of Flexible Beams Undergoing Free Overall Motion Employing Linear Strain Measures. Seok Seo and Hong Hee Yoo, *Hanyang University, Republic of Korea* (40, 2, p. 319) Article

J02-040 Model Reduction for Dynamical Systems with Local Nonlinearities. Zu-Qing Qu, *Shanghai Jiao Tong University, PRC* (40, 2, p. 327) Article

J02-041 Teleoperation of a Truss Structure by Force Command in ETS-VII Robotics Mission. Masahiro Nohmi, *Kagawa University, Japan*; and Kohtaro Matsumoto, *National Aerospace Laboratory, Japan* (40, 2, p. 334) Article

J02-042 Buckling of Composite Plates with Local Damage, and Thermal Residual Stresses. Sérgio Frascino Müller de Almeida, *Instituto Tecnológico de Aeronáutica, Brazil*; and Jorn S. Hansen, *University of Toronto, Canada* (40, 2, p. 340) Article

J02-043 Prediction of Compressive Failure in Laminated Composites at Room and Elevated Temperature. Junghyun Ahn and Anthony M. Waas, *University of Michigan* (40, 2, p. 346) Article

J02-044 Large-Scale Structural Analysis by Parallel Multifrontal Solver Through Internet-Based Personal Computers. Seung Jo Kim, Chang Sung Lee, *Seoul National University, Republic of Korea*; and Jeong Ho Kim, *Korean Institute of Science and Technology Information, Korea* (40, 2, p. 359) Article

J02-045 Efficient Method for Dynamic Condensation of Nonclassically Damped Vibration Systems. Zu-Qing Qu, *Shanghai Jiao Tong University, Peoples Republic of China*; and R. Panneer Selvam, *University of Arkansas* (40, 2, p. 368) Article

J02-046 Multiobjective Topology Optimization of a Beam Under Torsion and Distortion. Tae Soo Kim and Yoon Young Kim, *Seoul National University, Republic of Korea* (40, 2, p. 376) Article

J02-047 Structural Optimization with Frequency Constraints Using the Finite Element Force Method. R. Sedaghati and A. Suleman, and B. Tabarrok, *University of Victoria, Canada* (40, 2, p. 382) Article

J02-048 Shape Optimization of Transonic Compressor Blade Using Quasi-Three-Dimensional Flow Physics. J. Chung and K. D. Lee, *University of Illinois at Urbana-Champaign* (40, 2, p. 389) Technical Note

J02-049 Semistructured Grid Generation in Three Dimensions Using a Parabolic Marching Scheme. David S. Thompson and Bharat K. Soni, *Mississippi State University* (40, 2, p. 391) Technical Note based on AIAA Paper 2000-1004

J02-050 Evaluation of Finite Element Predictions of Analog Specimen Residual Stress Bondline Failures. David E. Richardson, Bradley R. Hoskins, and Russell A. Crook, *Thiokol Propulsion* (40, 2, p. 393) Technical Note based on AIAA Paper 98-1945

J02-051 Aerodynamics of a Jet in the Vortex Wake of a Wing. Frank Y. Wang and K.B.M.Q Zaman, *NASA Glenn Research Center at Lewis Field* (40, 3, p. 401) Article

J02-052 Computational Study of Intake Duct Effects on Fan Flutter Stability. M. Vahdati, A. I. Sayma, C. Bréard, and M. Imregun, *Imperial College of Science, Technology and Medicine* (40, 3, p. 408) Article

J02-053 Experimental and Theoretical Study of Gust Response for a High-Aspect-Ratio Wing. Deman Tang, and Earl H. Dowell, *Duke University* (40, 3, p. 419) Article

J02-054 High Subsonic Jet Experiments: Turbulence and Noise Generation Studies. S. Narayanan, *United Technologies Research Center*; T. J. Barber, *University of Connecticut*; and D. R. Polak, *United Technologies Research Center* (40, 3, p. 430) Article

J02-055 Quantitative Interferometry in the Severe Acoustic Environment of Resonant Supersonic Jets. Carolyn R. Mercer, *NASA Glenn Research Center at Lewis Field*; and Ganesh Raman, *Illinois Institute of Technology* (40, 3, p. 438) Article

J02-056 Applications of High-Order Optimized Upwind Schemes for Computational Aeroacoustics. M. Zhuang, *Michigan State University*; and R. F. Chen, *ETA, Inc.* (40, 3, p. 443) Article

J02-057 Parallel Computation of Forward Radiated Noise of Ducted Fans with Acoustic Treatment. Yusuf Özyörük, *Middle East Technical University, Turkey* (40, 3, p. 450) Article

J02-058 Noise from the Fine-Scale Turbulence of Nonaxisymmetric Jets. Christopher K.W. Tam and Nikolai N. Pastouchenko, *Florida State University* (40, 3, p. 456) Article

J02-059 Aeroacoustics of Wall-Bounded Turbulent Flows. Z. W. Hu and C. L. Morfey, and N. D. Sandham, *Southampton University, England, UK* (40, 3, p. 465) Article based on AIAA Paper 2001-2172

J02-060 Numerical Simulation of Two-Dimensional Blade-Vortex Interactions Using Unstructured Adaptive Meshes. Woo Seop Oh, Joo Sung Kim, and Oh Joon Kwon, *Republic of Korea Advanced Institute of Science and Technology, Republic of Korea* (40, 3, p. 474) Article

J02-061 Experiments on Passive Hypervelocity Boundary-Layer Control Using an Ultrasonically Absorptive Surface. A. Rasheed and H. G. Hornung, *California Institute of Technology*; A. V. Fedorov, *Moscow Institute of Physics and Technology, Russia*; and N. D. Malmuth, *Rockwell Scientific Company* (40, 3, p. 481) Article based on AIAA Paper 2001-0274

J02-062 Direct Surface Triangulation Using Stereolithography Data. Yasushi Ito and Kazuhiro Nakahashi, *Tohoku University, Japan* (40, 3, p. 490) Article based on AIAA Paper 2000-0924

J02-063 Improvements in Parallel Chimera Grid Assembly. Nathan C. Prewitt, *Mississippi State University*; Davy M. Belk, *U.S. Air Force Research Laboratory*; and Wei Shyy, *University of Florida* (40, 3, p. 497) Article

J02-064 Parametric Study of Heat Release Preceding a Blunt Body in Hypersonic Flow. Ryoji Takaki, and Meng-Sing Liou, *NASA John H. Glenn Research Center at Lewis Field* (40, 3, p. 501) Article

J02-065 Two-Dimensional Synthetic Jet Simulation. Conrad Y. Lee and David B. Goldstein, *University of Texas at Austin* (40, 3, p. 510) Article

J02-066 Dynamics of Slender Bodies Separating from Rectangular Cavities. V. I. Shalaev and A. V. Fedorov, *Moscow Institute of Physics and Technology, Russia*; and N. D. Malmuth, *Rockwell Scientific Company* (40, 3, p. 517) Article based on AIAA Paper 2001-2996

J02-067 Harmonic Perturbations in Turbulent Wakes. Nicolas Reau, *Tel-Aviv University, Israel*; and Anatoli Tumin, *University of Arizona* (40, 3, p. 526) Article based on AIAA Paper 2000-2539

J02-068 Neural Network Detection of Shockwaves. Carl Berdahl, *U. S. Air Force Research Laboratory* (40, 3, p. 531) Article based on AIAA Paper 99-3168

J02-069 Turbulence Models in Pulsating Flows. Alberto Scotti, *University of North Carolina*; and Ugo Piomelli, *University of Maryland* (40, 3, p. 537) Article

J02-070 Efficient Uncertainty Analysis Methods for Multidisciplinary Robust Design. Xiaoping Du and Wei Chen, *University of Illinois at Chicago* (40, 3, p. 545) Article

J02-071 Asymptotic Theory for Laminated Piezoelectric Circular Cylindrical Shells. Zhen-Qiang Cheng and J. N. Reddy, *Texas A&M University* (40, 3, p. 553) Article

J02-072 Feasible Region in General Design Space of Lamination Parameters for Laminated Composites. Cezar Gabriel Diaconu, Masaki Sato, and Hideki Sekine, *Tohoku University, Japan* (40, 3, p. 559) Article

J02-073 Residual Strength Prediction of Aircraft Fuselages Using Crack-Tip Opening Angle Criterion. Chuin-Shan Chen, *National Taiwan University, Taiwan, Republic of China*; and Paul A. Wawrzynek and Anthony R. Ingraffea, *Cornell University* (40, 3, p. 566) Article

J02-074 Rise of Total Pressure Near the Stagnation Point on a Sphere. James C. Williams and III, *Auburn University* (40, 3, p. 576) Technical Note

J02-075 Symmetry Properties of the Transitional Sphere Wake. R. Mittal and J. J. Wilson, *University of Florida*; and F. M. Najjar, *University of Illinois at Urbana-Champaign* (40, 3, p. 579) Technical Note

J02-076 New Self-Referencing Pressure-Sensitive-Paint Measurement. Chelakara S. Subramanian, *Florida Institute of Technology*; and Tahani R. Amer, Donald M. Oglesby, Cecil G. Burkett, and Jr., *NASA Langley Research Center* (40, 3, p. 582) Technical Note based on AIAA Paper 2000-2526

J02-077 Quasi-Failure Analysis on Resonant Demolition of Random Structural Systems. Yimin Zhang, Qiaoling Liu, *Jilin University, People's Republic of China*; and Bangchun Wen, *Northeastern University, People's Republic of China* (40, 3, p. 585) Technical Note

J02-078 Topology Optimization for Maximum Natural Frequency Using Simulated Annealing and Morphological Representation. Guang Yu Cui and Kang Tai, *Nanyang Technological University*; and Bo Ping Wang, *University of Texas at Arlington* (40, 3, p. 586) Technical Note

J02-079 Progress in Hypersonic Studies Using Electron-Beam-Excited X-Ray Detection. N. Gorchakova, L. Kuznetsov, and V. Yarygin, *Institute of Thermophysics, Russia*; and B. Chanetz, T. Pot, and R. Bur, J. P. Taran, D. Pigache, D. Schultz, J. Moss, *ONERA, France* (40, 4, p. 593) Article

J02-080 Experimental and Computational Investigation of Supersonic Impinging Jets. F. S. Alvi, *Florida A&M University and Florida State University*; and J. A. Ladd and W. M. Bower, *The Boeing Company* (40, 4, p. 599) Article based on AIAA Paper 2000-2224

J02-081 Unsteady Force on Slender Aircraft with Free Vortices in Inviscid Flow. T. W. G. de Laat, *Royal Netherlands Military Academy, The Netherlands*; and R. Coene, *Delft University of Technology, The Netherlands* (40, 4, p. 610) Article

J02-082 Tail Buffet Alleviation of High Performance Twin Tail Aircraft Using Piezostack Actuators. S. Hanagud, M. Bayon de Noyer, and H. Luo, *Georgia Institute of Technology*; D. Henderson, *U.S. Air Force Research Laboratory*; and K. S. Nagaraja, *Rohini International* (40, 4, p. 619) Article

J02-083 Structural and Aeroelastic Modeling of General Planform Wings with Morphing Airfoils. Frank H. Gern, *Virginia Polytechnic Institute and State University*; and Daniel J. Inman and Rakesh K. Kapania, *Virginia Polytechnic and State University* (40, 4, p. 628) Article

J02-084 Nonlinear Inviscid Aerodynamic Effects on Transonic Divergence, Flutter, and Limit-Cycle Oscillations. Jeffrey P. Thomas, Earl H. Dowell, and Kenneth C. Hall, *Duke University* (40, 4, p. 638) Article

J02-085 Assessment of the Accuracy of Representing a Helical Vortex by Straight Segments. D. H. Wood and D. Li, *University of Newcastle, Australia* (40, 4, p. 647) Article

J02-086 Body-Vortex Interaction, Sound Generation, and Destructive Interference. Hsiao C. Kao, *NASA John H. Glenn Research Center at Lewis Field* (40, 4, p. 652) Article

J02-087 Algorithms and Application of Sparse Matrix Assembly and Equation Solvers for Aeroacoustics. W. R. Watson, D. T. Nguyen, and C. J. Reddy, ; V. N. Vatsa, *NASA Langley Research Center*; and W. H. Tang, *Hong Kong University of Science and Technology, Hong Kong, People's Republic of China*, (40, 4, p. 661) Article

J02-088 Acoustic Analogy and Alternative Theories for Jet Noise Prediction. Philip J. Morris, *Pennsylvania State University*; and F. Farassat, *NASA Langley Research Center* (40, 4, p. 671) Article

J02-089 Mixing Enhancement of Compressible Jets by Using Unsteady Microjets as Actuators. Mohammed K. Ibrahim, Ryoji Kunimura, and Yoshiaki Nakamura, *Nagoya University, Japan* (40, 4, p. 681) Article

J02-090 Dynamic One-Equation Nonviscosity Large Eddy Simulation Model. Eric Pomraning and Christopher J. Rutland, *University of Wisconsin* (40, 4, p. 689) Article

J02-091 Accurate Numerical Simulation of Compressible Transitional Flows in Turbomachinery. P. De Palma, *Politecnico di Bari, Italy* (40, 4, p. 702) Article

J02-092 Wake Alleviation Properties of Triangular-Flapped Wings. J. M. Ortega, and R. L. Bristol and Ö. Savas, *University of California at Berkeley* (40, 4, p. 709) Article

J02-093 Combustion Response of Ammonium Perchlorate. Michael Shusser and Fred E. C. Culick, *California Institute of Technology*; and Norman S. Cohen, *Cohen Professional Services* (40, 4, p. 722) Article based on AIAA Paper 2000-3694

J02-094 Reliability-Based Optimization of Uncertain Systems In Structural Dynamics. Hector A. Jensen, *F. Santa Maria University* (40, 4, p. 731) Article

J02-095 Determination of an Optimal Topology with a Predefined Number of Cavities. Hyunsun Kim, *University of Bath, England, UK*; Osvaldo M. Querin, *University of Leeds, England, UK*; Grant P. Steven, *University of Sydney, Australia*; and Yi M. Xie, *Victoria University, Australia* (40, 4, p. 739) Article based on AIAA Paper 2000-4734

J02-096 Mixer-Ejector Wall Pressure and Temperature Measurements Based on Photoluminescence. Ray R. Taghavi, *The University of Kansas*; Ganesh Raman, *Illinois Institute of Technology*; and Timothy J. Bencic, *NASA John H. Glenn Research Center at Lewis Field* (40, 4, p. 745) Article

J02-097 Higher-Order Eigensensitivity Analysis of a Defective Matrix. Zhen-yu Zhang and Hui-sheng Zhang, *Fudan University, People's Republic China* (40, 4, p. 751) Article

J02-098 Estimating Natural Frequencies and Mode Shapes from Forced Response Calculations. J. Gregory McDaniel, Ferry Widjaja, Paul E. Barbone, and Allan D. Pierce, *Boston University* (40, 4, p. 758) Article

J02-099 Structural Similitude and Scaling Laws for Sandwich Beams. Y. Frostig, *Technion—Israel Institute of Technology, Israel*; and G. J. Simitses, *University of Cincinnati* (40, 4, p. 765) Article

J02-100 Robust Optimization in Discrete Design Space for Constrained Problems. Kwon-Hee Lee, *Dong-A University, Republic of Korea*; and Gyung-Jin Park, *Hanyang University, Republic of Korea* (40, 4, p. 774) Article

J02-101 Modeling of Infrared Radiation in a Space Transportation System Environment. S. F. Gimelshein, *George Washington University*; D. A. Levin, *Pennsylvania State University*; and R. J. Collins, *University of Minnesota* (40, 4, p. 781) Article

J02-102 Inverse Transonic Airfoil Design Using Parallel Simulated Annealing and Computational Fluid Dynamics. X. Wang, M. Damodaran and S. L. Lee, *Nanyang Technological University, Republic of Singapore* (40, 4, p. 791) Technical Note

J02-103 Improved Formulation for Boundary-Layer-Type Flows. H. Dumitrescu and V. Cardos, *Romanian Academy, Romania* (40, 4, p. 794) Technical Note

J02-104 Aeroelastic Response and Flutter of Swept Aircraft Wings. Piergiorgio Marzocca and Liviu Librescu, *Virginia Polytechnic Institute and State University*; and Walter A. Silva, *NASA Langley Research Center* (40, 5, p. 801) Article

J02-105 Aeroelastic Response of Nonlinear Wing Sections Using a Functional Series Technique. Piergiorgio Marzocca and Liviu Librescu, *Virginia Polytechnic Institute and State University*; and Walter A. Silva, *NASA Langley Research Center* (40, 5, p. 813) Article

J02-106 Experimental Characterization of the Sound Power Radiated by Impinging Supersonic Jets. Jean Varnier and Wilfrid Ragueneau, *ONERA, France* (40, 5, p. 825) Article

J02-107 Temporal Turbulent Flow Structure for Supersonic Rough-Wall Boundary Layers. Robert M. Latin, *U.S. Air Force Office of Scientific Research*; and Rodney D.W. Bowersox, *The University of Alabama* (40, 5, p. 832) Article

J02-108 Drag Reduction by Spanwise Wall Oscillation in Wall-Bounded Turbulent Flows. Jung-Il Choi, *Korea Advanced Institute of Science and Technology, Korea*; Chun-Xiao Xu, *Tsinghua University, People's Republic of China*; and Hyung Jin Sung, *Korea Advanced Institute of Science and Technology, Korea* (40, 5, p. 842) Article

J02-109 Instability of Accelerated Boundary Layers Induced by Surface Suction. P. J. D. Roberts and J. M. Floryan, *University of Western Ontario, Canada* (40, 5, p. 851) Article

J02-110 Numerical Simulation of Adaptive Control: Application to Unstable Solid Rocket Motors. M. Mettenleiter, *Ecole Centrale Paris, France*; F. Vuillot, *ONERA, France*; and S. Candel, *Ecole Centrale Paris, France* (40, 5, p. 860) Article

J02-111 High-Order Semi-Implicit Schemes for Unsteady Compressible Flow Simulations. Haibo Dong and Xiaolin Zhong, *University of California* (40, 5, p. 869) Article

J02-112 Computation of Unsteady Nonlinear Flows in Cascades Using a Harmonic Balance Technique. Kenneth C. Hall, Jeffrey P. Thomas, and W. S. Clark, *Duke University* (40, 5, p. 879) Article

J02-113 Parallelization of Rotorcraft Aerodynamics Navier-Stokes Codes. Kivanc Ekici and Anastasios S. Lyrintzis, *Purdue University* (40, 5, p. 887) Article

J02-114 Numerical Modeling of Axisymmetric and Three-Dimensional Flows in Microelectromechanical Systems Nozzles. Alina A. Alexeenko and Deborah A. Levin, *Pennsylvania State University*; Sergey F. Gimelshein, *George Washington University*; Robert J. Collins, *University of Minnesota*; and Brian D. Reed, *NASA John H. Glenn Research Center at Lewis Field* (40, 5, p. 897) Article

J02-115 Schemes to Compute Unsteady Flashing Flows. Michel Barret, *Institut Universitaire de Technologie Sénart, France*; and Eric Faucher and Jean-Marc Hérard, *Electricite de France, France* (40, 5, p. 905) Article

J02-116 Direct Numerical Simulations of O₂/H₂ Temporal Mixing Layers Under Supercritical Conditions. Nora Okong'o, Kenneth Harstad, and Josette Bellan, *Jet Propulsion Laboratory, California Institute of Technology* (40, 5, p. 914) Article

J02-117 Large-Eddy Simulation of the Flow Around a Bluff Body. Siniša Krajnović and Lars Davidson, *Chalmers University of Technology, Sweden* (40, 5, p. 927) Article based on AIAA Paper 2001-0432

J02-118 Probabilistic Methods for Design Assessment of Reliability with Inspection. Y.-T. Wu, M. P. Enright, and H. R. Millwater, *Southwest Research Institute* (40, 5, p. 937) Article

J02-119 Specific Impulse and Other Characteristics of Elementary Propellants for Ablative Laser Propulsion. Andrew V. Pakhomov, Don A. Gregory, and Michael S. Thompson, *University of Alabama in Huntsville* (40, 5, p. 947) Article

J02-120 Free In-Plane Vibration of Rectangular Plates. Gang Wang and Norman M. Wereley, *University of Maryland* (40, 5, p. 953) Article based on AIAA Paper 2001-1476

J02-121 Single- and Multicelled Composite Thin-Walled Beams. Vitali V. Volovoi and Dewey H. Hodges, *Georgia Institute of Technology* (40, 5, p. 960) Article

J02-122 Compressive Response of Honeycombs Under In-plane Uniaxial Static and Dynamic Loading, Part 1: Experiments. Jaeung Chung and Anthony M. Waas, *University of Michigan* (40, 5, p. 966) Article

J02-123 Compressive Response of Honeycombs Under In-plane Uniaxial Static and Dynamic Loading, Part 2: Simulations. Jaeung Chung and Anthony M. Waas, *University of Michigan* (40, 5, p. 974) Article

J02-124 Delamination Analysis of Sandwich Beam: High Order Theory. Fu Minghui and Liu Zuoqiu, *Zhongshan University, People's Republic of China*; and Yin Jiuren, *Xiangtan University, People's Republic of China* (40, 5, p. 981) Article

J02-125 Cantilever Boundary Condition, Deflections, and Stresses of Sandwich Beams. John Dugundji, *Massachusetts Institute of Technology* (40, 5, p. 987) Article

J02-126 Analysis and Testing of a Postbuckled Stiffened Panel. M. Lillico, R. Butler, and G. W. Hunt, *University of Bath, England, UK*; and A. Watson, D. Kennedy, and F. W. Williams, *Cardiff University, England, UK* (40, 5, p. 996) Article based on AIAA Paper 2000-1659

J02-127 Anisotropy-Induced Spiral Buckling in Compression-Loaded Cylindrical Shells. P. M. Weaver, (40, 5, p. 1001) Article

J02-128 Control of Flow Around an Airfoil Using Piezoceramic Actuators. Jin Choi, Woo-Pyung Jeon, and Haechon Choi, *Seoul National University, Republic of Korea* (40, 5, p. 1008) Technical Note

J02-129 Slug Frequency Measurement Techniques in Horizontal Gas-Liquid Flow. V. Bertola, *Ecole Normale Supérieure, France*; and E. Cafaro, *Politecnico di Torino, Italy* (40, 5, p. 1010) Technical Note based on AIAA Paper 2001-3035

J02-130 Minimum Drag Power-Law Shapes for Rarefied Flow. D. S. Bowman and Mark J. Lewis, *University of Maryland* (40, 5, p. 1013) Technical Note

J02-131 Boundary-Layer Instability On a Sharp Cone at Mach 3.5 with Controlled Input. T. C. Corke, and D. A. Cavalieri and E. Matlis, *University of Notre Dame* (40, 5, p. 1015) Technical Note

J02-132 Influence of Spike Shape at Supersonic Flow Past Blunt-Nosed Bodies: Experimental Study. Snežana S. Milićev and Miloš D. Pavlović, *University of Belgrade, Yugoslavia* (40, 5, p. 1018) Technical Note

J02-133 Equivalence Between the Combined Approximations Technique and Krylov Subspace Methods. Prasanth B. Nair, *University of Southampton, England, UK* (40, 5, p. 1021) Technical Note

J02-134 Comparative Study of Image Compression Techniques for Digital Particle Image Velocimetry. William M. Humphreys and Jr., *NASA Langley Research Center*; and Ahmed M. Naguib, *Michigan State University* (40, 6, p. 1026) Article

J02-135 Wavelet Multiresolution Analysis of Stereoscopic Particle-Image-Velocimetry Measurements in Lobed Jet. Hui Li, *The Ohio State University*; and Hui Hu, Toshio Kobayashi, Tetsuo Saga, and Nobuyuki Taniguchi, *University of Tokyo, Japan* (40, 6, p. 1037) Article based on AIAA Paper 2001-0696

J02-136 Advanced Algorithms for Microscale Particle Image Velocimetry. S. T. Wereley and L. Gui, *Purdue University*; and C. D. Meinhardt, *University of California, Santa Barbara* (40, 6, p. 1047) Article based on AIAA Paper 2001-0243

J02-137 Particle Image Velocimetry in Mach 3.5 and 4.5 Shock-Tunnel Flows. J. Haertig, M. Havermann, C. Rey and A. George, *French-German Research Institute of Siant-Louis, France* (40, 6, p. 1056) Article

J02-138 Air Photolysis and Recombination Tracking : A New Molecular Tagging Velocimetry Scheme. N. M. Sijtsema, N. J. Dam, R. J.H. Klein-Douwel, and J. J. ter Meulen, *University of Nijmegen, The Netherlands* (40, 6, p. 1061) Article

J02-139 Molecular Tagging Velocimetry Measurements in Supersonic Microjets. Walter R. Lempert, Naibo Jiang, Subin Sethuram, and Mo Samimy, *The Ohio State University* (40, 6, p. 1065) Article

J02-140 Investigation of Gaseous Acoustic Damping Rates by Transient Grating Spectroscopy. Yuanyuan Li and William L. Roberts, *North Carolina State University*; and Michael S. Brown, *Innovative Scientific Solutions, Inc.* (40, 6, p. 1071) Article

J02-141 Stark Broadening and Stimulated Raman Pumping in High-Resolution N₂ Coherent Anti-Stokes Raman Scattering Spectra. M. A. Woodmansee, *General Electric Corporate Research and Development Center*; R. P. Lucht, *Texas A&M University*; and J. C. Dutton, *University of Illinois at Urbana-Champaign* (40, 6, p. 1078) Article based on AIAA Paper 2001-0418

J02-142 Filtered Thomson Scattering in an Argon Plasma. Sohail H. Zaidi and Z. Tang, *Princeton University*; A. P. Yalin, *Stanford University*; P. Barker, *Heriot-Watt University, England, UK*; and R. B. Miles, (40, 6, p. 1087) Article

J02-143 Porous Pressure Sensitive Paint for Characterizing Unsteady Flow Fields. Hirotaka Sakaue, James W. Gregory, and John P. Sullivan, *Purdue University*; and Surya Raghu, *Advanced Fluidics* (40, 6, p. 1094) Article based on AIAA Paper 2001-0554

J02-144 Characterization of a Silicon Micromachined Thermal Shear-Stress Sensor. Mark Sheplak, Venkataraman Chandrasekaran, Anthony Cain, Toshikazu Nishida, Louis N. Cattafesta, and III, *University of Florida* (40, 6, p. 1099) Article based on AIAA Paper 2001-0247

J02-145 Determining Aerodynamic Loads Based on Optical Deformation Measurements. Tianshu Liu, D. A. Barrows, A. W. Burner, and R. D. Rhew, *NASA Langley Research Center* (40, 6, p. 1105) Article

J02-146 Model for the Active Control of the Flow-Induced Noise Transmitted Through Double Partitions. Cedric Maury, Paolo Gardonio, and Stephen John Elliott, *University of Southampton, England, UK* (40, 6, p. 1113) Article based on AIAA Paper 2001-2111

J02-147 Heterogeneous Propellant Combustion. T. L. Jackson and J. Buckmaster, *University of Illinois at Urbana-Champaign* (40, 6, p. 1122) Article

J02-148 Mean Flow Development in Dual-Stream Compressible Jets. Erina Murakami and Dimitri Papamoschou, *University of California* (40, 6, p. 1131) Article based on AIAA Paper 2000-2060

J02-149 Large Eddy Simulation of Flow Around an Airfoil Near Stall. Ivan Mary and Pierre Sagaut, *ONERA, France* (40, 6, p. 1139) Article based on AIAA Paper 2001-2559

J02-150 Newton-Krylov Algorithm for Aerodynamic Design Using the Navier-Stokes Equations. M. Nemec and D. W. Zingg, *University of Toronto Department of Aerospace Studies, Canada* (40, 6, p. 1146) Article

J02-151 Recent Improvements in Aerodynamic Design Optimization on Unstructured Meshes. Eric J. Nielsen and W. Kyle Anderson, *NASA Langley Research Center* (40, 6, p. 1155) Article based on AIAA Paper 2001-0596

J02-152 Large-Scale Structures and Growth of a Flat Plate Compressible Wake. S. L. Gai, D. P. Hughes, and M. S. Perry, *University of New South Wales, Australian Defence Force Academy, Australia* (40, 6, p. 1164) Article

J02-153 Influence of a Counterflow Plasma Jet on Supersonic Blunt-Body Pressures. V. M. Fomin and A. A. Maslov, *Institute of Theoretical and Applied Mechanics, Russia*; N. D. Malmuth, *Rockwell Scientific Company*; and V. P. Fomichev, A. P. Shashkin, and T. A. Korotaeva, A. N. Shiplyuk, and G. A. Pozdnyakov, *Institute of Theoretical and Applied Mechanics, Russia* (40, 6, p. 1170) Article based on AIAA Paper 99-4883

J02-154 Plasma Injection for Hypersonic Blunt-Body Drag Reduction. J. S. Shang, *U.S. Air Force Research Laboratory* (40, 6, p. 1178) Article

J02-155 System Identification of a Vortex Lattice Aerodynamic Model. Jer-Nan Juang, *NASA Langley Research Center*; Denis Kholodar, and Earl H. Dowell, *Duke University* (40, 6, p. 1187) Article

J02-156 Enforcing Structural Connectivity to Update Damped Systems Using Frequency Response. Philip D. Cha and Joshua P. Switkes, *Harvey Mudd College* (40, 6, p. 1197) Article

J02-157 Piezoelectric Sensor and Actuator Spatial Design for Shape Control of Piezolaminated Plates. Abhijit Mukherjee and Shailendra Joshi, *Indian Institute of Technology Bombay, India* (40, 6, p. 1204) Article

J02-158 Damping Analysis of Composite Plates with Zig-Zag Triangular Element. D. G. Lee and J. B. Kosmatka, *University of California* (40, 6, p. 1211) Article

J02-159 Boundary Condition Effects in Free Vibrations of Higher-Order Soft Sandwich Beams. Vladimir S. Sokolinsky and Steven R. Nutt, *University of Southern California*; and Yeoshua Frostig, *Technion-Israel Institute of Technology, Israel* (40, 6, p. 1220) Article

J02-160 Thermal-Stresses in Functionally Graded Beams. Bhavani V. Sankar, *University of Florida*; and Jerome T. Tzeng, *U.S. Army Research Laboratory* (40, 6, p. 1228) Article

J02-161 Induced Velocity in the Plane of an Elliptically Loaded Lifting Line. T. Sugimoto, *Kanagawa University, Japan* (40, 6, p. 1233) Technical Note

J02-162 Assessment of Reaction Mechanisms for Counterflow Methane-Air Partially Premixed Flames. H. S. Xue and S. K. Aggarwal, *University of Illinois at Chicago*; R. J. Osborne and T. M. Brown, *NASA Marshall Space Flight Center*; and R. W. Pitz, *Vanderbilt University* (40, 6, p. 1236) Technical Note

J02-163 Computation of Shock-Sound Interaction Using Finite Volume Essentially Nonoscillatory Scheme. Yong Seok Kim and Duck Joo Lee, *Korea Advanced Institute of Science and Technology, Korea* (40, 6, p. 1239) Technical Note

J02-164 Configuration Design Sensitivity Analysis for Dynamic Systems Using CAD-Based Velocity Field. Semyung Wang, Sunghyun Ki, and Kwanheng Lee, *Kwangju Institute of Science and Technology, Republic of Korea* (40, 6, p. 1241) Technical Note

J02-165 Hybrid Reanalysis Method for Eigenproblems of Topological Modifications. Xiaowei Yang, *South China University of Technology, People's Republic of China*; and Huadong Lian, *Jilin University, People's Republic of China* (40, 6, p. 1244) Technical Note

J02-166 Toward More Effective Genetic Algorithms for the Optimization of Piezoelectric Actuator Locations. Rakesh K. Kapania, and Lizeng Sheng, *Virginia Polytechnic Institute and State University* (40, 6, p. 1246) Technical Note based on AIAA Paper 2001-1627

J02-167 Stability of Tapered Columns Under End-Concentrated and Variably Distributed Follower Forces. H. Qiao and Q. S. Li, *City University of Hong Kong, Hong Kong, People's Republic of China* (40, 6, p. 1250) Technical Note

J02-168 Subcritical Flow Around Bluff Bodies. Mustafa Sarioglu and Tahir Yavuz, *Karadeniz Technical University, Turkey* (40, 7, p. 1257) Article

J02-169 Navier-Stokes Analysis of Wind-Tunnel Interference on Transonic Airfoil Flutter. B. M. Castro, *Naval Postgraduate School*; J. A. Ekaterinaris, *Foundation for Research and Technology Hellas*; and M. F. Platzer, *Naval Postgraduate School* (40, 7, p. 1269) Article

J02-170 More Photogrammetry for Wind Tunnel Testing. Wim Ruyten, *Jacobs Sverdrup, Arnold Air Force Base* (40, 7, p. 1277) Article

J02-171 Time-Accurate Simulations and Acoustic Analysis of Slat Free Shear Layer. Mehdi R. Khorrami, *High Technology Corporation*; Bart A. Singer, *NASA Langley Research Center*; and Mert E. Berkman, *High Technology Corporation* (40, 7, p. 1284) Article based on AIAA Paper 2001-2155

J02-172 Effect of Upstream Conditions on the Outer Flow of Turbulent Boundary Layers. Luciano Castillo and David J. Walker, *Rensselaer Polytechnic Institute* (40, 7, p. 1292) Article

J02-173 Velocity Measurements in a Pressure-Driven Three-Dimensional Compressible Turbulent Boundary Layer. Brad A. Boswell, *Sandia National Laboratories*; and J. Craig Dutton, *University of Illinois at Urbana-Champaign* (40, 7, p. 1300) Article

J02-174 Accuracy of Parabolized Navier-Stokes Schemes for Stability Analysis of Hypersonic Axisymmetric Flows. Vahid Esfahanian and Kazem Hejranfar, *University of Tehran, Iran* (40, 7, p. 1311) Article

J02-175 Multiresolution Method on General Unstructured Meshes. B. L. Bihari, D. K. Ota, Z. Liu, and S. V. Ramakrishnan, *Hypercomp. Inc.* (40, 7, p. 1323) Article

J02-176 Nozzle Performance Modeling. Erich A. Wilson, Dan Adler, and Pinhas Bar-Yoseph, *Technion-Israel Institute of Technology, Israel* (40, 7, p. 1331) Article

J02-177 Mixing Process in a Lobed Jet Flow. Hui Hu, Tetsuo Saga, Toshio Kobayashi, and Nobuyuki Taniguchi, *University of Tokyo, Japan* (40, 7, p. 1339) Article

J02-178 Large-Eddy Simulation of a Turbulent Compressible Round Jet. James R. DeBonis, *NASA John H. Glenn Research Center at Lewis Field*; and James N. Scott, *The Ohio State University* (40, 7, p. 1346) Article

J02-179 Effects of Coflow on Turbulent Flame Puffs. J. C. Hermanson, R. Sangras and J. E. Usowicz, and H. Johari, *Worcester Polytechnic Institute* (40, 7, p. 1355) Article

J02-180 Active Flow Separation Control on Wall-Mounted Hump at High Reynolds Numbers. Avi Seifert, *Tel-Aviv University, Israel*; and LaTunia G. Pack, *NASA Langley Research Center* (40, 7, p. 1363) Article based on AIAA Paper 99-3403

J02-181 Scaling Aerooptic Aberrations Produced by High-Subsonic-Mach Shear Layers. Edward J. Fitzgerald and Eric J. Jumper, *University of Notre Dame* (**40**, 7, p. 1373) Article based on AIAA Paper 2000-2354

J02-182 Acoustic Noise-Source Identification in Aircraft-Based Atmospheric Temperature Measurements. Ronald J. Hugo, *University of Calgary, Canada*; and Scott R. Nowlin, Ila L. Hahn, Frank D. Eaton, and Kim A. McCrae, *U.S. Air Force Research Laboratory* (**40**, 7, p. 1382) Article

J02-183 Mixing of Transversely Injected Jets into a Crossflow Under Low-Density Conditions. T. M. Muruganandam, Srihari Lakshmi, A. A. Ramesh, S. R. Viswamurthy, R. I. Sujith, and B. M. Sivaram, *Indian Institute of Technology Madras, India* (**40**, 7, p. 1388) Article based on AIAA Paper 200-0203

J02-184 Structural Damage Detection by Genetic Algorithms. Kaazem Moslem and Ramin Nafaspour, *Ferdowsi University, Iran* (**40**, 7, p. 1395) Article

J02-185 Transcendental Eigenvalue Problem and Its Applications. Kumar Vikram Singh and Yitshak M. Ram, *Louisiana State University* (**40**, 7, p. 1402) Article

J02-186 Probabilistic Analysis of Composite Structure Ultimate Strength. S. Mahadevan and X. Liu, *Vanderbilt University* (**40**, 7, p. 1408) Article

J02-187 Flexural Failure Behavior of Laminated Composites Reinforced with Braided Fabrics. Zheng-Ming Huang, *Tongji University, People's Republic of China*; K. Fujihara, and S. Ramakrishna, *National University of Singapore, People's Republic of China* (**40**, 7, p. 1415) Technical Note

J02-188 Exact Solution for Thermoelastic Deformations of Functionally Graded Thick Rectangular Plates. Senthil S. Vel, *University of Maine*; and R. C. Batra, *Virginia Polytechnic Institute and State University* (**40**, 7, p. 1421) Article

J02-189 Coevolutionary Architecture for Distributed Optimization of Complex Coupled Systems. Prasanth B. Nair and Andy J. Keane, *University of Southampton, England, UK* (**40**, 7, p. 1434) Article

J02-190 First-Order-Theory-Based Thermoelastic Stability of Functionally Graded Material Circular Plates. M. M. Najafizadeh, *Islamic Azad University, Iran*; and M. R. Eslami, *Amirkabir University of Technology, Iran* (**40**, 7, p. 1444) Article

J02-191 Nodal Temperature Estimation Algorithms for Nonlinear Thermal Network Models. Miltiadis V. Papalexandris, Mark H. Milman, and Marie B. Levine, *Jet Propulsion Laboratory, California Institute of Technology* (**40**, 7, p. 1451) Article

J02-192 Low-Reynolds Number $k-\epsilon$ Model with Enhanced Near-Wall Dissipation. M. M. Rahman and T. Siikonen, *Helsinki University of Technology, Finland* (**40**, 7, p. 1462) Technical Note

J02-193 General Second-Order Projection Formulas for Unsteady Flows. Ming-Jiu Ni and Satoru Komori, *Kyoto University, Japan* (**40**, 7, p. 1464) Technical Note

J02-194 Atmospheric Stability Effects in Aircraft Near-Wake Modeling. Milton E. Teske, *Continuum Dynamics, Inc.*; and Harold W. Thistle, *U.S. Department of Agriculture Forest Service* (**40**, 7, p. 1467) Technical Note

J02-195 One-Dimensional Numerical Study of Compressible Flow Ejector. Sam Han, John Peddieson, and Jr., *Tennessee Technological University* (**40**, 7, p. 1469) Technical Note

J02-196 Extension of a Method for Determination of Flight Equipment Acceleration. Romualdo Ruotolo, *Politecnico di Torino, Italy* (**40**, 7, p. 1472) Technical Note

J02-197 Comment on "New Approach to Solution of the Falkner-Skan Equation" . George Emanuel, *University of Texas at Arlington* (**40**, 7, p. 1475) Technical Comment/Readers Forum

J02-198 Matchsticks, Scramjets, and Black Holes: Numerical Simulation Faces Reality. Elaine S. Oran, *Naval Research Laboratory* (**40**, 8, p. 1481) History/Lecture based on AIAA Paper 2002-0001

J02-199 Open-Loop Hover Testing of a Smart Rotor Model. Nikhil A. Koratkar and Inderjit Chopra, *University of Maryland* (**40**, 8, p. 1495) Article

J02-200 Jet-Cavity Interaction Tones. Ganesh Raman, *Illinois Institute of Technology*; and Edmane Envia and Timothy J. Bencic, *NASA John H. Glenn Research Center at Lewis Field* (**40**, 8, p. 1503) Article based on AIAA Paper 99-0604

J02-201 Deforming Mesh for Computational Aeroelasticity Using a Nonlinear Elastic Boundary Element Method. Xiao-Wei Gao, Ping-Chih Chen, and Lei Tang, *ZONA Technology, Inc.* (**40**, 8, p. 1512) Article

J02-202 Novel Approach for Reducing Rotor Tip-Clearance Induced Noise in Turbofan Engines. Mehdi R. Khorrami and Fei Li, *High Technology Corporation*; and Meelan Choudhari, *NASA Langley Research Center* (**40**, 8, p. 1518) Article based on AIAA Paper 2001-2148

J02-203 Modulation of Near-Wall Turbulence Structure with Wall Blowing and Suction. Yongmann M. Chung, *University of Warwick, England, UK*; Hyung Jin Sung, *Korea Advanced Institute of Science and Technology, Republic of Korea*; and P. -A. Krogstad, *Norwegian University of Science and Technology, Norway* (**40**, 8, p. 1529) Article

J02-204 Transition Prediction for Three-Dimensional Boundary Layers in Computational Fluid Dynamics Applications. J. D. Crouch, I. W.M. Crouch, and L. L. Ng, *Boeing Commercial Airplane Group* (**40**, 8, p. 1536) Article based on AIAA Paper 2001-2989

J02-205 Boundary Layer Transition Measurements in Hypervelocity Flows in a Shock Tunnel. David J. Mee, *The University of Queensland, Australia* (**40**, 8, p. 1542) Article

J02-206 Airfoil-Boundary Layer Subjected to a Two-Dimensional Asymmetrical Turbulent Wake. Vladimir I. Kornilov, *Russian Academy of Sciences, Russia*; and Guy Pailhas and Bertrand Aupoix, *Office National d'Etudes et de Recherches Aeronautiques, France* (**40**, 8, p. 1549) Article

J02-207 Numerical Investigation of the Turbulent Mixing Performance of a Cantilevered Ramp Injector. Bernard Parent and Jean P. Sislian, *University of Toronto, Canada*; and Jurgen Schumacher, *Honeywell Engines* (**40**, 8, p. 1559) Article

J02-208 Effect of Surface Roughness on Unseparated Shock-Wave/Turbulent Boundary-Layer Interactions. H. Babinsky, *University of Cambridge, England, UK*; and G. R. Inger, *Iowa State University* (**40**, 8, p. 1567) Article

J02-209 Application of Large-Eddy Simulation to Supersonic Compression Ramps. Donald P. Rizzetta and Miguel R. Visbal, *U.S. Air Force Research Laboratory* (**40**, 8, p. 1574) Article based on AIAA Paper 2001-2858

J02-210 Microfabricated Shear Stress Sensors, Part 3: Reducing Calibration Uncertainty. Mehul P. Patel, Eli Reshotko, and Daniel Hyman, *Case Western Reserve University* (**40**, 8, p. 1582) Article

J02-211 Flight Test, Modal Analysis, and Model Refinement of the Mir Space Station. Hyoung M. Kim and Mohamed Kaouk, *The Boeing Company* (**40**, 8, p. 1589) Article based on AIAA Paper 98-1721 and 99-1453

J02-212 Closed-Loop Neurocontroller Tests on Piezoactuated Smart Rotor Blades in Hover. Michael G. Spencer, Robert M. Sanner, and Inderjit Chopra, *University of Maryland* (**40**, 8, p. 1596) Article

J02-213 Simultaneous Modeling of Mechanical and Electrical Response of Smart Composite Structures. Robert P. Thornburgh and Aditi Chattopadhyay, *Arizona State University* (**40**, 8, p. 1603) Article

J02-214 Static Shape Control of Composite Plates Using a Slope-Displacement-Based Algorithm. Clinton Y.K. Chee, Liyong Tong and Grant P. Steven, *University of Sydney, Australia* (**40**, 8, p. 1611) Article

J02-215 Viscoelastic Analysis of Multiphase Composites Using the Generalized Method of Cells. Carlos E. Orozco, *University of North Carolina*; and Marek-Jerzy Pindera, *University of Virginia* (**40**, 8, p. 1619) Article

J02-216 Finite Element Formulation for Thick Sandwich Plates on an Elastic Foundation. Victor Y. Perel, *U.S. Air Force Research Laboratory*; and Anthony N. Palazotto, *U.S. Air Force Institute of Technology* (**40**, 8, p. 1627) Article

J02-217 Analytical Evaluation of Damping in Composite and Sandwich Structures. Victor Birman, *University of Missouri-Rolla*; and Larry W. Byrd, *U.S. Air Force Research Laboratory* (**40**, 8, p. 1638) Article

J02-218 Prediction of Residual Strength and Curvilinear Crack Growth in Aircraft Fuselages. Chuin-Shan Chen, *National Taiwan University, Taiwan, Republic of China*; and Paul A. Wawrzynek and Anthony R. Ingraffea, *Cornell University* (**40**, 8, p. 1644) Article

J02-219 Stochastic Reduced Basis Methods. Prasanth B. Nair and Andrew J. Keane, *University of Southampton, England, UK* (**40**, 8, p. 1653) Article

J02-220 Collapse of Rectangular Aluminum Plates with Axial Cracks. Edmundo Corona, *University of Notre Dame*; W. Allen Waters and Jr., *Lockheed Martin Space Operations*; and James H. Starnes and Jr., *NASA Langley Research Center* (**40**, 8, p. 1665) Article

J02-221 Motion of Variable Geometry Truss for Momentum Management in Spacecraft. Kazuyuki Hanahara and Yukio Tada, *Kobe University, Japan* (**40**, 8, p. 1673) Technical Note

J02-222 Modal Actuator/Sensor by Modulating Thickness of Piezoelectric Layers for Smart Plates. Dongchang Sun, *University of Sydney*; Liyong Tong, *University of Sydney, Australia*; and Dajun Wang, *Peking University, People's Republic of China* (**40**, 8, p. 1676) Technical Note

J02-223 Prediction and Design of Metal Plate Vibration with Bonded Composite Sheets. M. Sasajima, T. Kakudate, and Y. Narita, *Hokkaido Institute of Technology, Japan* (**40**, 8, p. 1679) Technical Note

J02-224 Experimental Nonlinear Response of Tapered Ceramic Matrix Composite Plates to Base Excitation. S. Michael Spottswood, *U.S. Air Force Research Laboratory*; and Marc P. Mignolet, *Arizona State University* (**40**, 8, p. 1682) Technical Note based on AIAA Paper 2002-372

J02-225 Stability of Spring-Hinged Cantilever Column Under Combined Concentrated and Distributed Loads. G. Venkateswara Rao, and K. Kanaka Raju, *Vikram Sarabhai Space Centre, India* (**40**, 8, p. 1687) Technical Note

J02-226 Vortical Substructures in the Shear Layers Forming Leading-Edge Vortices. Anthony M. Mitchell, *U.S. Air Force Academy*; and Pascal Molton, *ONERA, France* (**40**, 8, p. 1689) Technical Note based on AIAA Paper 2001-2424

J02-227 Nonlinear Aeroelasticity and Unsteady Aerodynamics. Earl H. Dowell, and Deman Tang, *Duke University* (**40**, 9, p. 1697) History/Lecture based on AIAA Paper 2002-0003

J02-228 Direct Numerical Simulation of Turbulent Trailing-Edge Flow with Base Flow Control. Y. F. Yao and N. D. Sandham, *Southampton University, England, UK* (**40**, 9, p. 1708) Article

J02-229 Forward Flight Stability Characteristics for Composite Hingeless Rotors with Transverse Shear Deformation. Sung Nam Jung, *Chonbuk National University, Republic of Korea*; and Kyung Nam Kim and Seung Jo Kim, *Seoul National University, Republic of Korea* (**40**, 9, p. 1717) Article

J02-230 Numerical Simulation of Sonic Boom Focusing. Thierry Auger, *Airbus France Department of Acoustics & Environment, M0132/7, France*; and François Coulouvrat, *Centre National de la Recherche Scientifique, France* (**40**, 9, p. 1726) Article

J02-231 Analysis of the Two Similiarity Components of Turbulent Mixing Noise. K. Viswanathan, *The Boeing Company* (**40**, 9, p. 1735) Article

J02-232 Time-Accurate Inlet and Outlet Conditions for Unsteady Transonic Flow . J. Ballmann and G. Britten, *Rheinisch-Westfälische Technische Hochschule, Germany*; and I. Sofronov, *Russian Academy of Sciences, Russia* (**40**, 9, p. 1745) Article

J02-233 Local Time-Stepping Algorithm for Solving Probability Density Function Turbulence Model Equations. M. Muradoglu, and S. B. Pope, *Cornell University* (40, 9, p. 1755) Article

J02-234 Probabilistic Approach to Free-Form Airfoil Shape Optimization Under Uncertainty. Luc Huyse, *Southwest Research Institute*; Sharon L. Padula, *NASA Langley Research Center*; R. Michael Lewis, *College of William and Mary*; and Wu Li, *Old Dominion University* (40, 9, p. 1764) Article

J02-235 Flow Control with Electrohydrodynamic Actuators. Guillermo Artana and Juan D'Adamo, *University of Buenos Aires, Argentina*; and Luc Léger, Eric Moreau, and Gérard Touchard, *University of Poitiers, France* (40, 9, p. 1773) Article

J02-236 Higher Mean-Flow Approximation for a Solid Rocket Motors with Radially Regressing Walls. Joseph Majdalani and Anand B. Vyas, *Marquette University*; and Gary A. Flandro, *University of Tennessee Space Institute* (40, 9, p. 1780) Article based on AIAA Paper 2001-3870

J02-237 Spectrally Resolved Measurement of Flame Radiation to Determine Soot Temperature and Concentration. D. R. Snelling, *National Research Council, Canada*; K. A. Thomson, *University of Waterloo, Canada*; G. J. Smallwood, *National Research Council, Canada*; Ö. L. Gülder, *University of Toronto, Canada*; and E. J. Weckman and R. A. Fraser, *University of Waterloo, Canada* (40, 9, p. 1789) Article

J02-238 Numerical Study of Blast-Wave Propagation in a Double-Bent Duct. S. M. Liang, K. C. Weng, *National Cheng Kung University, Taiwan, People's Republic of China*; and K. Takayama, *Chinese Academy of Sciences, People's Republic of China* (40, 9, p. 1796) Article

J02-239 Vibrational Excitation, Thermal Nonuniformities and Unsteady Effects on Supersonic Blunt Bodies. Graham V. Candler, *University of Minnesota*; J. Daniel Kelley, *Stanford University*; Sergey O. Macheret and Mikhail N. Shneider, *Princeton University*; and Igor V. Adamovich, *The Ohio State University* (40, 9, p. 1803) Article

J02-240 Detachment of the Dynamic-Stall Vortex Above a Moving Surface. Aleksandr V. Obabko, and Kevin W. Cassel, *Illinois Institute of Technology*, (40, 9, p. 1811) Article based on AIAA Paper 2001-2711

J02-241 Numerical Prediction of Fluid-Resonant Oscillation at Low Mach Number. M. Inagaki, O. Murata, and T. Kondoh, *Toyota Central Research and Development Laboratories, Inc., Japan*; and K. Abe, *Kyushu University, Japan* (40, 9, p. 1823) Article

J02-242 Effects of Pressure-Sensitive Paint on Experimentally Measured Wing Forces and Pressures. Edward T. Schairer, *NASA Ames Research Center*; and Rabindra D. Mehta and Michael E. Olsen, *NASA Ames Research Center* (40, 9, p. 1830) Article

J02-243 Efficient Aerodynamic Design Method Using a Tightly Coupled Algorithm. Chun-ho Sung, *Rutgers University*; and Jang Hyuk Kwon, *Korea Advanced Institute of Science and Technology, Republic of Korea* (40, 9, p. 1839) Article

J02-244 Finite Element Modeling of Thermopiezomagnetic Smart Structures. M. Sunar, Ahmed Z. Al-Garni, M. H. Ali, and R. Kahraman, *King Fahd University of Petroleum and Minerals, Saudi Arabia* (40, 9, p. 1846) Article

J02-245 Control Stability Analysis of Smart Beams with Debonded Piezoelectric Actuator Layer. Dongchang Sun, *University of Sydney*; and Liyong Tong, *University of Sydney, Australia* (40, 9, p. 1852) Article

J02-246 Damage Detection for Composite Plates Using Lamb Waves and Projection Genetic Algorithm. Y. G. Xu, G. R. Liu, and Z. P. Wu, *National University of Singapore, Republic of Singapore* (40, 9, p. 1860) Article

J02-247 Modeling of Tapered Sandwich Panels Using a High-Order Sandwich Theory Formulation. Ole Thybo Thomsen, *Aalborg University, Denmark*; and Jack R. Vinson, *University of Delaware* (40, 9, p. 1867) Article

J02-248 Midfrequency Vibrations of a Complex Structure: Experiments and Comparison with Numerical Simulations. Eric Savin, *ONERA, France* (40, 9, p. 1876) Article

J02-249 Temperature Profile Influence on Layered Plates Response Considering Classical and Advanced Theories. Erasmo Carrera, *Politecnico di Torino, Italy* (40, 9, p. 1885) Article

J02-250 Pressure Gradients in the Regenerator and Overall Pulse-Tube Refrigerator Performance. P. Mayzus, *University of Calgary, Canada*; L. Fang, *University of Calgary, Canada*; and X. Deng, O. R. Fauvel, and L. Bauwens, *University of Calgary, Canada* (40, 9, p. 1897) Article

J02-251 Method for the Determination of Viscoelastic Parameters Using the Principle of Correspondence. Rani W. Sullivan and David P. Johnson, *Mississippi State University* (40, 9, p. 1907) Technical Note

J02-252 Curvature Corrections for Algebraic Reynolds Stress Modeling: A Discussion. Antti Hellsten, *Helsinki University of Technology, Finland* (40, 9, p. 1909) Technical Note

J02-253 Large Amplitude Vibrations of Spring-Hinged Beams. G. Venkateswara Rao and K. Kanaka Raju, *Vikram Sarabhai Space Centre, India* (40, 9, p. 1912) Technical Note

J02-254 Material Property Identification of Composite Plates Using Neural Network and Evolution Algorithm. Byung Joon Sung, Jin Woo Park, and Yong Hyup Kim, *Seoul National University, Republic of Korea* (40, 9, p. 1914) Technical Note

J02-255 Linear Instability of Laterally Strained Constant Pressure Boundary-Layer Flows. P. K. Tyagi and J. Dey, *Indian Institute of Science, India* (40, 9, p. 1916) Errata

J02-256 Astrobiology—Exploring the Living Universe. David Morrison, *NASA Ames Research Center* (40, 10, p. 1921) Article

J02-257 Development and Characterization of Hartmann Tube Fluidic Actuators for High-Speed Flow Control. J. Kastner and M. Samimy, *The Ohio State University* (40, 10, p. 1926) Article based on AIAA Paper 2002-0128

J02-258 Large Eddy Simulation of Shock/Boundary-Layer Interaction. Eric Garnier and Pierre Sagaut, *ONERA, France*; and Michel Deville, *Ecole Polytechnique Fédérale de Lausanne, Switzerland* (40, 10, p. 1935) Article

J02-259 Numerical Method for Vorticity Confinement in Compressible Flow. Guangchu Hu and Bernard Grossman, *Virginia Polytechnic Institute and State University*; and John Steinhoff, *University of Tennessee Space Institute* (40, 10, p. 1945) Article

J02-260 Edge-based Multigrid and Preconditioning for Hybrid Grids. Pierre Moinier, *Oxford University, England, UK*; Jens-Dominik Muller, *Queen's University, England, UK*; and Michael B. Giles, *Oxford University Computing Laboratory, England, UK* (40, 10, p. 1954) Article

J02-261 Computation of Subsonic Inviscid Flow past a Cone Using High-Order Schemes. Jae Wook Kim and Philip J. Morris, *Pennsylvania State University* (40, 10, p. 1961) Article

J02-262 Anisotropic Solution-Adaptive Viscous Cartesian Grid Method for Turbulent Flow Simulation. Z. J. Wang, *Michigan State University*; and R. F. Chen, *ETA, Inc.* (40, 10, p. 1969) Article

J02-263 Turbulence in Plasma-Induced Hypersonic Drag Reduction. R. Appartaim, E. -D. Mezonlin, J. A. Johnson, and III, *Florida A&M University* (40, 10, p. 1979) Article based on AIAA Paper 2001-1799

J02-264 Modeling Rotating and Swirling Turbulent Flows: A Perpetuating Challenge. S. Jakirlić, *Darmstadt University of Technology, Germany*; K. Hanjalic, *Delft University of Technology, The Netherlands*; and C. Tropea, *Darmstadt University of Technology, Germany* (40, 10, p. 1984) Article

J02-265 Fast Convergence of Viscous Airfoil Design Problems. Andrea Dadone, *Politecnico di Bari, Italy*; and Bernard Grossman, *Virginia Polytechnic Institute and State University* (40, 10, p. 1997) Article

J02-266 Rarefied Gas Flow into Vacuum Through Thin Orifice Influence of Boundary Conditions. Felix Sharipov, *Universidade Federal do Paraná, Brazil* (40, 10, p. 2006) Article

J02-267 Forward-Running Detonation Drivers for High-Enthalpy Shock Tunnels. Z. L. Jiang, W. Zhao, C. Wang, and K. Takayama, *Chinese Academy of Sciences, People's Republic of China* (40, 10, p. 2009) Article

J02-268 Numerical Simulation of Unsteady Turbulent Flow Around a Maneuvering Prolate Spheroid. Shin Hyung Rhee and Takanori Hino, *National Maritime Research Institute, Japan* (40, 10, p. 2017) Article

J02-269 Flow Control of Circular Cylinders with Longitudinal Grooved Surfaces. Hee-Chang Lim and Sang-Joon Lee, *Pohang University of Science & Technology, Republic of Korea* (40, 10, p. 2027) Article

J02-270 Experimental Study of the Three-Dimensionality of Orthogonal Blade-Vortex Interaction. Tongguang Wang, C. J. Doolan, F. N. Coton, and R. A. M. Galbraith, *University of Glasgow, Scotland, UK* (40, 10, p. 2037) Article

J02-271 Dynamic Flexibility Method with Hybrid Shifting Frequency For Eigenvector Derivatives. De-Wen Zhang, *Beijing Institute of Structure and Environment, People's Republic of China*; and Fu-Shang Wei, *Kaman Aerospace Corporation* (40, 10, p. 2047) Article

J02-272 Computationally Inexpensive Metamodel Assessment Strategies. Martin Meckesheimer and Andrew J. Booker, *The Boeing Company*; and Russell R. Barton and Timothy W. Simpson, *Pennsylvania State University* (40, 10, p. 2053) Article

J02-273 Derivative of Eigensolutions of Nonviscously Damped Linear Systems. Sondipon Adhikari, *University of Cambridge, England, UK* (40, 10, p. 2061) Article

J02-274 Nanometer-Scale Spontaneous Vibrations in a Deployable Truss Under Mechanical Loading. Lisa M.R. Hardaway and Lee D. Peterson, *University of Colorado* (40, 10, p. 2070) Article based on AIAA Paper 2001-1315

J02-275 Using Intentional Mistuning in the Design of Turbomachinery Rotors. Matthew P. Castanier and Christophe Pierre, *University of Michigan* (40, 10, p. 2077) Article

J02-276 Impact Response of Adaptive Piezoelectric Laminated Plates. Dimitris A. Saravanos, *University of Patras, Greece*; and Andreas P. Christoforou, *Kuwait University, Kuwait* (40, 10, p. 2087) Article

J02-277 Energy-Dissipating Composite Members with Progressive Failure: Concept Development and Analytical Modeling. D. Stefan Dancila and Erian A. Armanios, *Georgia Institute of Technology* (40, 10, p. 2096) Article

J02-278 Validation of the Variational Asymptotic Beam Sectional Analysis. Wenbin Yu, Vitali V. Volovoi, Dewey H. Hodges, and Xianyu Hong, *Georgia Institute of Technology* (40, 10, p. 2105) Article based on AIAA Paper 2001-1530

J02-279 Shaping Optimal Design of Elastic Planar Frames with Frequency Constraints. D. Dinevski, M. M. Oblak, and M. Kegl, *University of Maribor, Slovenia* (40, 10, p. 2113) Article based on AIAA Paper 99-1392

J02-280 Secondary Buckling of Compression-Loaded Composite Plates. Nachiketa Tiwari, *Bose Corporation*; and Michael W. Hyer, *Virginia Polytechnic Institute and State University* (40, 10, p. 2120) Article based on AIAA Paper 2000-1457

J02-281 Large-Eddy Simulation of Rough-Wall Turbulent Boundary Layers. Changhoon Lee, *Yonsei University, Republic of Korea* (40, 10, p. 2127) Technical Note

J02-282 Computational Simulation of the Air Wake over a Naval Transport Vessel. Martin J. Guillot, *University of New Orleans* (40, 10, p. 2130) Technical Note

J02-283 Layer-by-Layer Analysis of a Simply Supported Thick Flexible Sandwich Beam. Hemendra Arya, R. P. Shimpi, and N. K. Naik, *Indian Institute of Technology Bombay, India* (40, 10, p. 2133) Technical Note

J02-284 Optimal Fiber Angles to Resist the Brazier Effect in Orthotropic Tubes. Luca S. Cecchini and Paul M. Weaver, *University of Bristol, England, UK* (40, 10, p. 2136) Technical Note

J02-285 Thermal Postbuckling of Uniform Columns: A Simple Intuitive Method. G. Venkateswara Rao and K. Kanaka Raju, *Vikram Sarabhai Space Centre, India* (40, 10, p. 2138) Technical Note

J02-286 Free Vibration Analysis of Rotating Cantilever Plates. Hong Hee Yoo, *Hanyang University, Republic of Korea*; and Sung Kyun Kim, *Korea Atomic Energy Research Institute, Republic of Korea* (40, 11, p. 2188) Article

J02-287 Limit-Cycle Oscillation Induced by Nonlinear Aerodynamic Forces. K. W. Dotson, R. L. Baker, and B. H. Sako, *The Aerospace Corporation* (40, 11, p. 2197) Article

J02-288 Computation of Trailing-Edge Noise Due to Turbulent Flow over an Airfoil. Assad A. Oberai, *Stanford University*; and Farzam Roknaldin and Thomas J.R. Hughes, *Stanford University* (40, 11, p. 2206) Article

J02-289 Altering Turbulence in a Compressible Base Flow Using Axisymmetric Sub-Boundary-Layer Disturbances. C. J. Bourdon and J. C. Dutton, *University of Illinois at Urbana-Champaign* (40, 11, p. 2217) Article

J02-290 Development of Curvature Sensitive Nonlinear Eddy-Viscosity Model. S. Fu and W. Q. Qian, *Tsinghua University, People's Republic of China* (40, 11, p. 2225) Article

J02-291 Error Control and Adaptivity for Low-Mach-Number Compressible Flows. Murat Sabanca, Gunther Brenner, and Franze Durst, *Friedrichs-Alexander University, Germany* (40, 11, p. 2234) Article

J02-292 Sensitivity of Turbulence in a Transpired Channel to Injection Velocity Small-Scale Nonuniformity. Zhiquan Deng, Ronald J. Adrian, and Christopher D. Tomkins, *University of Illinois at Urbana-Champaign* (40, 11, p. 2241) Article based on AIAA Paper 2001-1019

J02-293 Two-Dimensional Simulations of Wake Vortex Detection Using Radio Acoustic Sounding Systems. Said Boluriaan and Philip J. Morris, *Pennsylvania State University* (40, 11, p. 2247) Article

J02-294 Numerical Investigations on the Dynamics and Heat Transfer in a Turbulent Underexpanded Jet. Yann Bartosiewicz, Yves Mercadier, and Pierre Proulx, *Université de Sherbrooke, Canada* (40, 11, p. 2257) Article

J02-295 Effect of Cavitation on Vortex Dynamics in a Submerged Laminar Jet. T. Xing and S. H. Frankel, *Purdue University* (40, 11, p. 2266) Article

J02-296 Interaction of a Synthetic Jet with a Cross-Flow Boundary Layer. Douglas R. Smith, *University of Wyoming* (40, 11, p. 2277) Article

J02-297 Structure and Extinction of Heptane/Air Partially Premixed Flames. Hongshe Xue and Suresh K. Aggarwal, *University of Illinois at Chicago* (40, 11, p. 2289) Article

J02-298 Planar Blast/Vortex Interaction and Sound Generation. H. Chen and S. M. Liang, *National Cheng-Kung University, Taiwan, Republic of China* (40, 11, p. 2298) Article

J02-299 Ablative Laser Propulsion: Specific Impulse and Thrust Derived from Force Measurements. Andrew V. Pakhomov, M. Shane Thompson, Wesley Swift, Jr., and Don A. Gregory, *University of Alabama in Huntsville* (40, 11, p. 2305) Article

J02-300 Optimum Thickness of Pressure-Sensitive Paint for Unsteady Measurements. Edward T. Schairer, *NASA Ames Research Center* (40, 11, p. 2312) Article

J02-301 QR-Based Algorithm for Eigenvalue Derivatives. Bradley T. Burchett, *Rose-Hulman Institute of Technology*; and Mark Costello, *Oregon State University* (40, 11, p. 2319) Article

J02-302 Balanced Model Reduction via the Proper Orthogonal Decomposition. K. Willcox and J. Peraire, *Massachusetts Institute of Technology* (40, 11, p. 2323) Article based on AIAA Paper 2001-2611

J02-303 Buckling and Initial Postbuckling Behavior of Sandwich Beams Including Transverse Shear. Haiying Huang and George A. Kardomateas, *Georgia Institute of Technology* (40, 11, p. 2331) Article

J02-304 Free Vibration of Unsymmetrically Laminated Beams Having Uncertain Ply Orientations. Rakesh K. Kapania and Vijay K. Goyal, *Virginia Polytechnic Institute and State University* (40, 11, p. 2336) Article

J02-305 Nonisotropic Model of Microdebris from Impacts with Complex Targets. Gregory R. Kruse, *Computer Sciences Corporation*; and William P. Schonberg, *University of Missouri-Rolla* (40, 11, p. 2345) Article

J02-306 Nondestructive Determination of Buckling for Plates and Bars Including Shear. Menahem Baruch, *Technion-Israel Institute of Technology, Israel* (40, 11, p. 2354) Article

J02-307 Domain Decomposition for Reduced-Order Modeling of a Flow with Moving Shocks. David J. Lucia and Paul I. King, *Air Force Institute of Technology*; and Philip S. Beran, *Air Force Research Laboratory* (40, 11, p. 2360) Technical Note based on AIAA Paper 2001-2912

J02-308 Near-Exact Analytical Solutions of Linear Time-Variant Systems. Anand Natarajan, Rakesh K. Kapania, and Daniel J. Inman, *Virginia Polytechnic and State University* (40, 11, p. 2362) Technical Note based on AIAA Paper 2001-1295

J02-309 Predicting Ballistic Penetration and the Ballistic Limit in Composite Material Structures. Jeffrey R. Focht and Jack R. Vinson, *University of Delaware* (40, 11, p. 2366) Technical Note

J02-310 Modified Short Beam Shear Test for Measuring Interlaminar Shear Strength of Composites. Kunigal Shivakumar, Felix Abali, and Adrian Pora, *North Carolina A&T State University* (40, 11, p. 2368) Technical Note

J02-311 Review of State of Art of Smart Structures and Integrated Systems. Inderjit Chopra, *University of Maryland* (40, 11, p. 2145) Survey

J02-312 Health Monitoring of a Helicopter Rotor in Forward Flight Using Fuzzy Logic. Ranjan Ganguli, *Indian Institute of Science, India* (40, 12, p. 2373) Article

J02-313 Exploring Noise Sources Using Simultaneous Acoustic Measurements and Real-Time Flow Visualizations in a Jet. James Hileman, Brian Thurow, and Mo Samimy, *The Ohio State University* (40, 12, p. 2382) Article

J02-314 Numerical Investigation of Transonic Resonance with a Convergent-Divergent Nozzle. Ching Y. Loh, *Tiatch; and K. B.M.Q Zaman, NASA John H. Glenn Research Center at Lewis Field* (40, 12, p. 2393) Article

J02-315 Surface Topology on the Wheels of a Generic Four-Wheel Landing Gear. Barry Lazos, *NASA Langley Research Center* (40, 12, p. 2402) Article

J02-316 Relationship Between Upstream Turbulent Boundary-Layer Velocity Fluctuations and Separation Shock Unsteadiness. S. J. Beresh, N. T. Clemens, and D. S. Dolling, *The University of Texas at Austin* (40, 12, p. 2412) Article

J02-317 Numerical Investigation of High-Enthalpy Flows Generated by Expansion Tube. Hirotaka Otsu, *Shizuoka University, Japan; Takashi Abe, Institute of Space and Astronautical Science; and Yasuyuki Ohnishi, Akihiro Sasoh, and Kazuyoshi Takayama, Tohoku University* (40, 12, p. 2423) Article

J02-318 Stochastic Estimation of Large Structures in an Incompressible Mixing Layer. Michael G. Olsen, *Iowa State University; and J. Craig Dutton, University of Illinois at Urbana-Champaign* (40, 12, p. 2431) Article

J02-319 Flame and Soot Boundaries of Laminar Jet Diffusion Flames. F. Xu, Z. Dai, and G. M. Faeth, *University of Michigan* (40, 12, p. 2439) Article

J02-320 Large Eddy Simulation of a Road Vehicle with Drag-Reduction Devices. R. Verzicco, M. Fatica, G. Iaccarino, and P. Moin, *Stanford University; and B. Khalighi, General Motors Corporation* (40, 12, p. 2447) Article

J02-321 Control of an Oblique Shock/Boundary-Layer Interaction with Aeroelastic Mesoflaps. Derek Gefroh and Eric Loth, Craig Dutton, and Stephen McIlwain, *University of Illinois at Urbana-Champaign* (40, 12, p. 2456) Article

J02-322 Mechanism of Dynamic Instability of a Reentry Capsule at Transonic Speeds. Susumu Teramoto and Kozo Fujii, *The Institute of Space and Astronautical Science, Japan* (40, 12, p. 2467) Article

J02-323 Dilatation and Vortex Stretching Effects on Turbulence in One-Dimensional/Axisymmetric Flows. Jin-Hwa Kim, Jung Yul Yoo, and Shin-Hyoung Kang, *Seoul National University, Republic of Korea* (40, 12, p. 2476) Article

J02-324 Elliptic Instability of Counter-Rotating Vortices: Experiment and Direct Numerical Simulation. Florent Laporte, *European Center for Research and Advanced Training in Scientific Computation, France; and Thomas Leweke, Institut de Recherche sur les Phénomènes Hors Equilibre, France* (40, 12, p. 2483) Article

J02-325 Adaptive Experimental Design for Construction of Response Surface Approximations. Victor M. Pérez and John E. Renaud, *University of Notre Dame; and Layne T. Watson, Virginia Polytechnic Institute and State University* (40, 12, p. 2495) Article

J02-326 Spectrally Filtered Raman/Thomson Scattering Using a Rubidium Vapor Filter. Wonchul Lee and Walter R. Lempert, *The Ohio State University* (40, 12, p. 2504) Article

J02-327 Chaos in a Thermally Stressed Space Arc. Lazarus Teneketzi Tenek, *Aristotle University of Thessaloniki, Greece* (40, 12, p. 2511) Article

J02-328 Interlaminar Stress Analysis of Shell Structures with Piezoelectric Patch Including Thermal Loading. Heung Soo Kim, Xu Zhou, and Aditi Chattopadhyay, *Arizona State University* (40, 12, p. 2517) Article

J02-329 Structural System Reliability Quantification Using Multipoint Function Approximations. Ravi C. Penmetsa and Ramana V. Grandhi, *Wright State University* (40, 12, p. 2526) Article

J02-330 Can Harmonic Functions Constitute a Closed-Form Buckling Modes of an Inhomogeneous Columns? Ivo Calio, *University of Catania, Italy; and Isaac Elishakoff, Florida Atlantic University* (40, 12, p. 2532) Article

J02-331 Experimental Aerodynamics of Mesoscale Trailing Edge Actuators. Stephen A. Solovitz and John K. Eaton, *Stanford University* (40, 12, p. 2538) Technical Note

J02-332 Effect of the Initial Conditions on Turbulent Boundary Layers. David J. Walker and Luciano Castillo, *Rensselaer Polytechnic Institute* (40, 12, p. 2540) Technical Note based on AIAA Paper 2001-2912
