

## Editor-in-Chief

**DONALD C. FRASER** is the Leader of the Control and Flight Dynamics Division of the Charles Stark Draper Laboratory as well as a Lecturer in the MIT Department of Aeronautics and Astronautics. He holds the S.B. and S.M. degrees in Aeronautics and Astronautics and an Sc.D in Instrumentation, all from MIT. He has been involved in the design and fabrication of control systems for a wide variety of applications from the Apollo spacecraft to fly-by-wire aircraft to power reactors. Before assuming his present Editorship, Dr. Fraser was Editor-in-Chief of the *Journal of Spacecraft and Rockets*.

## Associate Editors

**RONALD O. ANDERSON**, Chief of the Flight Systems Integration and Analysis Branch, Air Force Flight Dynamics Laboratory (AFFDL), is a graduate of the University of Wisconsin (M.E.B.S. and M.E.M.S.). He has authored numerous papers and reports on control theory applications, reliability analysis, and human response to flight control. Mr. Anderson also is an Associate Professor at the Air Force Institute of Technology. In 1969, he received the AFFDL General Foulois Award.

**D. LEWIS MINGORI**, Associate Professor in the Mechanics and Structures Department at UCLA, received his B.S. degree at the University of California, Berkeley, his M.S. at UCLA and his Ph.D at Stanford University. Prior to joining the UCLA faculty, Dr. Mingori was on the Technical Staff at The Aerospace Corporation. His research activities include the attitude dynamics and control of spinning and dual-spin spacecraft, gravity gradient spacecraft, and large flexible spacecraft. His is a former Associate Editor of the *Journal of Spacecraft and Rockets*.

**JASON L. SPEYER**, Associate Professor, Department of Aerospace Engineering and Engineering Mechanics, University of Texas, received his B.S. from MIT and his Ph.D from Harvard. Previously, Dr. Speyer was on the Charles Stark Draper Laboratory research staff and served as a lecturer at MIT. In 1972-73, he was on leave as Senior Weizmann Fellow at the Weizmann Institute of Science, Israel. Dr. Speyer is a former Associate Editor for the *Journal of Spacecraft and Rockets*.

## Editor-at-Large

**RICHARD H. BATTIN**, Associate Department Head, Charles Stark Draper Laboratory, and Lecturer in Aeronautics and Astronautics at MIT, is the author of *Astronautical Guidance*, which detailed many of the techniques applied to the Apollo guidance and navigation system, and is coauthor of *Random Process in Automatic Control*. In 1972, he was a recipient of the Louis W. Hill Space Transportation Award for the navigation software for the Apollo 8 mission. Dr. Battin is a former *AIAA Journal* Associate Editor.

**STEPHEN S. OSDER**, Engineering Manager for Advanced Systems and Avionics at Sperry Flight Systems, received the B.S.E.E. degree from the City College of New York and the M.S.E.E. degree from Johns Hopkins University. Mr. Osder's responsibilities include the development of aerospace vehicle guidance and control systems, integrated digital avionics systems, advanced computers, and computer controlled automatic test systems.

**HENRY J. KELLEY**, Vice President of Analytical Mechanics Associates, Inc., holds degrees in Aeronautical Engineering and Mathematics from New York University. Prior to joining his present organization, Dr. Kelley worked for Grumman Aerospace Corporation, last serving as Assistant Chief of Research. He has published numerous papers on optimization theory and aerospace applications. In 1973, he received AIAA's Mechanics and Control of Flight Award. He is a former Associate Editor of the *AIAA Journal*.
