

SUBJECT INDEX

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

- Advanced cooled turbine airfoil aerodynamic investigation. W. G. Hess (JA) 582
- Aerodynamic analysis of supersonic aircraft with subsonic leading edges. W. A. Sotomayer and T. M. Weeks (JA) 399
- Aerodynamic characteristics of fighter configurations during spin entries and developed spins. Ernie L. Anglin (JA) 769
- Aerodynamic design of a Mach 2.2 supersonic cruise aircraft. R. L. Radkey, H. R. Welge, and R. L. Roensch (JA) 351
- Aerodynamics of slender lifting surface in accelerated flight. Shigenori Ando (AIAA J, TN) 751
- Analytical model for entropy noise of subsonic nozzle flow. H. Y. Lu (AIAA J) 1235
- Canard-wing shape optimization for aerodynamic requirements. B. M. E. de Silva and Ralph L. Carmichael (JA, SYN) 705
- Comment on "Potential flow around axisymmetric bodies: direct and inverse problems." William Squire (AIAA J, TC) 1120
- Reply by authors to W. Squire. M. Fouad Zedan and Charles Dalton (AIAA J, TC) 1120
- Comparative study of the aerodynamics and hydrodynamics of a tunnel boat hull. T. H. Reif and D. A. Guenther (JH, EN) 166
- Comparison of predicted and flight test trajectories of stores jet-tisoned from aircraft. Sridhar M. Ramachandra (JA, SYN) 641
- Computation of a two-dimensional potential flow using elementary vortex distributions. Pradeep Raj and Robin B. Gray (JA, EN) 698
- Computational transonic optimization and wind-tunnel test of a semispan wing. H. P. Haney, E. G. Waggoner, and W. F. Ballhaus (JA) 606
- Deflected thrust effects on a close-coupled canard configuration. James L. Thomas, John W. Paulson Jr., and Long P. Yip (JA) 287
- Design of subsonic airfoils for high lift. Robert H. Liebeck (JA, SP) 547
- Detailed measurements on a circular cylinder in cross flow. V. S. Murthy and W. C. Rose (AIAA J, SYN) 549
- Effect of angle of attack and Mach number on slender-wing unsteady aerodynamics. Lars E. Ericsson and J. Peter Reding (JA) 358
- Effect of wing fins on lift-generated wakes. Vernon J. Rossow (JA) 160
- Effects of jet decay rate on jet-induced loads on a flat plate. J. M. Kuhlman and R. W. Warcup (JA) 293
- Experiment on the gust response of a transport airplane by free-flight model. Makoto Kobayakawa and Hiroshi Maeda (JA, EN) 540
- Experimental evidence of turbulent source coherence affecting jet noise. Helmut V. Fuchs and Ulf Michel (AIAA J, SYN) 871
- Experimental observations of wall interference at transonic speeds. R. F. Starr (JA) 822
- Flow breakdown for wings in ground effect. M. C. Sullivan (JA, EN) 859
- Flow measurements in leading-edge vortices. P. M. Sforza, W. Stasi, J. Papienza, and M. Smorto (AIAA J) 218
- Fountain and upwash flowfields of multijet arrangements. F. A. Wohlbe and M. J. Siclari (JA) 468
- Further consideration of "spilled" leading-edge vortex effects on dynamic stall. L. E. Ericsson and J. P. Reding (JA, ERR) 64
- Ground effects on lift for turbofan powered-lift STOL aircraft. John P. Campbell, James L. Hassel Jr., and James L. Thomas (JA) 78
- Incompressible irrotational axisymmetric flow about a body of revolution: the inverse problem. M. Fouad Zedan and Charles Dalton (JH) 41
- Integrated scramjet installation effect on the subsonic performance of a hypersonic aircraft. P. J. Johnston, J. L. Pittman, and J. K. Huffman (JA) 326; JA, ERR 640
- Inviscid flow through wide-angle diffuser with actuator disk. A. L. Loeffler, Jr. and D. Vanderbilt (AIAA J, TN) 1111
- Inviscid interaction of trailing vortex sheets approximated by point vortices. Pradeep Raj and J. D. Iversen (JA, EN) 857
- Laser-velocimeter surveys of merging vortices in a wind tunnel. Victor R. Corsiglia, James D. Iversen, and Kenneth L. Orloff (JA) 762
- Leeside flowfield and heat transfer of a Delta wing at $M_\infty = 10$. K. Y. Narayan (AIAA J) 160
- Lift enhancement by an externally trapped vortex. Vernon J. Rossow (JA) 618
- Lifting-line theory of oblique wings. H. K. Cheng (AIAA J, TN) 1211
- Lifting surface theory for thrust-augmenting ejectors. Paul M. Bevilacqua (AIAA J) 475
- Load distribution on a close-coupled wing canard at transonic speeds. Blair B. Gloss and Karen E. Washburn (JA) 234

- Minimum trimmed drag and optimum c.g. position. Gottfried Sachs (JA) 456
- Nonlinear resonance as the cause of multiple pure tones. P. G. Vaidya and K. S. Wang (JA) 526
- Potential flow around axisymmetric bodies: direct and inverse problems. M. Fouad Zedan and Charles Dalton (AIAA J) 242
- Potential flow design method for multicomponent airfoil sections. J. L. Kennedy and D. J. Marsden (JA) 47
- Prediction methods for jet V/STOL propulsion aerodynamics. Max F. Platzer and Richard J. Margason (JA, SP) 69
- Prediction of boundary-layer flow separation in V/STOL engine inlets. D. C. Chou, R. W. Luidens, and N. O. Stockman (JA) 474
- Prediction of elastic-airplane lateral dynamics from rigid-body aerodynamics. Robert L. Swaim and George H. Staab (JA) 392
- Pressure distribution on a symmetrical butterfly wing. Ion Paraschivoiu and Ertugrul Bilgen (JA, EN) 444
- Quasisteady theory for incompressible flow past airfoils with oscillating jet flaps. J. M. Simmons and M. F. Platzer (AIAA J) 237
- Remarks on conical supersonic wings with subsonic leading edges. Bernhard Wagner (JA, EN) 319
- Remarks on thin airfoil theory. Rajendra K. Bera (JA, ERR) 320
- Reverse Magnus force on a magnetically suspended ogive cylinder at subsonic speeds. E. P. Birtwell, J. B. Coffin, E. E. Covert, and C. W. Haldeman (AIAA J) 111
- Round jet in a cross flow: influence of injection angle on vortex properties. Dolores Krausche, Richard L. Fearn, and Robert P. Weston (AIAA J, TN) 636
- Space shuttle orbiter aerodynamic development. T. E. Surber and D. C. Olsen (JSR) 40
- STOL potential of the circulation control wing for high-performance aircraft. Robert J. Englar, Lynn A. Trobaugh, and Rodney A. Hemmerly (JA) 175
- Subsonic, high-angle-of-attack flow investigation at several Reynolds numbers. A. Mark H. Clarkson, Gerald N. Malcolm, and Gary T. Chapman (AIAA J) 53
- Subsonic vortex-flow design study for slender wings. John E. Lamar (JA) 611
- Theoretical investigations of real gas effects in cryogenic wind tunnels. Bernhard Wagner and Wolfgang Schmidt (AIAA J) 580
- Transonic computational analysis of F-111 TACT. A. W. Chen, E. N. Tinoco, and H. Yoshihara (JA) 601
- Transonic lifting line theory-numerical procedure for shock-free flows. R. D. Small (AIAA J, TN) 632
- Transonic multifoil augmentor wing. J. E. Farbridge and Ronald C. Smith (JA) 755
- Turbulent airfoils for general aviation. Richard Eppler. (JA) 93
- Vortex rollup over and behind wings related to non-linear aerodynamic characteristics. C. Zorea and J. Rom (JA, SYN) 193
- V/STOL aerodynamic testing techniques at British Aircraft Corporation. P. G. Knott (JA) 339
- Wind-tunnel technique for determining stability derivatives from cable-mounted models. Robert M. Bennett, Moses G. Farmer, Richard L. Mohr, and W. Earl Hall Jr. (JA) 304
- Wing design by numerical optimization. Raymond M. Hicks and Preston A. Henne (JA) 407

Cabin Environment, Crew Training, and Life Support

- Investigation of interior noise in a twin-engine light aircraft. John S. Mixson, C. Kearney Barton, and Rimas Vaicaitis (JA) 227
- Passenger ride quality in transport aircraft. Ira D. Jacobson, A. Robert Kuhlthau, Larry G. Richards, and D. William Conner (JA) 724

Civil Missions and Transportation

- Arrow wings for supersonic cruise aircraft. B. R. Wright, F. Bruckman, and N. A. Radovcich (JA) 829
- Powered lift and mechanical flap concepts for civil short-haul aircraft. John A. Conlon and Jeffrey V. Bowles (JA) 168
- Transportation and the U.S. petroleum resource: an aviation perspective. M. P. Miller and R. A. Mays (JE) 259

Configuration Design

- Aerodynamic analysis of several hypersonic research airplane concepts from $M = 0.2$ to 6.0 . Jim A. Penland, James L. Dillon, and Jimmy L. Pittman (JA) 716
- Aerodynamic design of a Mach 2.2 supersonic cruise aircraft. R. L. Radkey, H. R. Welge, and R. L. Roensch (JA) 351
- Application of dual fuel (JP-LH₂) for hypersonic cruise vehicles. John P. Weidner (JA) 686

- Application of latin squares methodology in design optimization. M. K. Greenway, Jr. and S. J. Koob (JA) 654
- Arrow wings for supersonic cruise aircraft. B. R. Wright, F. Bruckman, and N. A. Radovich (JA) 829
- Canard-wing shape optimization with aerodynamic requirements. B. M. E. de Silva and Ralph L. Carmichael (JA, SYN) 705
- Characteristics of fighter aircraft. G. O. Madelung (JA; Wright Brothers Lectureship in Aeronautics) 129
- Comment on "Ideal tail load for minimum aircraft drag." Richard S. Shevell (JA, TC) 639
- Reply by author to R. S. Shevell. E. V. Laitone (JA, TC) 639
- Ideal tail load for minimum aircraft drag. E. V. Laitone (JA, EN) 190
- Inlet boundary-layer shapes on four aircraft forebodies at Mach 6. Pierce L. Lawing and Charles B. Johnson (JA, EN) 62
- Minimum trimmed drag and optimum c.g. position. Gottfried Sachs (JA) 456
- Positive tail loads for minimum induced drag of subsonic aircraft. E. V. Laitone (JA) 837
- Rigid airship concept for future naval operations. W. L. Marcy (JA) 298
- Space Shuttle orbiter aerodynamic development. T. E. Surber and D. C. Olsen (JSR) 40
- Subsonic vortex-flow design study for slender wings. John E. Lamar (JA) 611
- Deceleration Systems**
- Compressibility effects on parachute transient pressures. Paul C. Klimas (JA, EN) 702
- Parachute canopy stress measurements at steady state and during inflation. H. G. Heinrich and David P. Saari (JA) 534
- Parachute opening shock calculations with experimentally established input functions. H. G. Heinrich and David P. Saari (JA) 100
- Economics**
- Laser aircraft propulsion. Abraham Hertzberg and Kenneth Sun (PS, V. 61) 243
- New approach to assurance technology on "The Hornet". Donald Malvern and John Capellupo (JA) 805
- Flight Operations**
- Design criteria for aircraft warning, caution, and advisory alerting systems. J. E. Veitengruber (JA) 574
- Flight test of stick force stability in attitude-stabilized aircraft. H. A. Mooij and M. F. C. van Gool (JA) 562
- KC-135 boom operator's head-up display. Richard L. Newman (JA, EN) 124
- Fuels and Fuel Systems**
- Alternative fuels and combustion problems. John P. Longwell (PS, V. 62) 3
- Future fuels in gas turbine engines. William S. Blazowski and Lawrence Maggitti (PS, V. 62) 21
- Simple model for the rate of turbulent combustion. D. Brian Spalding (PS, V. 58) 105
- General Aviation**
- Integrated approach to the problem of aircraft icing. D. W. Newton (JA) 374
- Investigation of interior noise in twin-engine light aircraft. John S. Mixson, C. Kearney Barton, and Rimas Vaicaitis (JA) 227
- Mathematical simulation for crashworthy aircraft seat design. David H. Laananen (JA) 567
- Ground Effect Machines**
- Basic study of the VTOL ground effect problem for planar flow. D. R. Kotansky and W. W. Bower (JA) 214
- Comments on "Feasibility study of a hybrid airship operating in ground effect." M. D. Ardema (JA, TC) 126
- Reply by author to M. D. Ardema. D. E. Calkins (JA, TC) 127
- Recent United Kingdom hovercraft development. R. L. Wheeler (JH, SP) 3
- Some nonlinear effects in stability and control of wing-in-ground effect vehicles. Rolf Staufenbiel (JA, EN) 541
- Guidance and Control**
- Algorithm for an approximation of the minimal controller problem. Robert E. Skelton (JGC, EN) 90
- Active flutter control using generalized unsteady aerodynamic theory. John W. Edwards, John V. Breakwell, and Arthur E. Bryson Jr. (JGC) 32
- Condensation of free body mass matrices using flexibility coefficients. John D. Sowers (AIAA J, TN) 272
- Control law for an intercept system. K. C. Wei and A. E. Pearson (JGC) 298
- Control logic to track outputs of a command generator. Thomas L. Trankle and Arthur E. Bryson Jr. (JGC) 130
- Curvilinear projection developments. Henry J. Kelley, Leon Lefton, and Ivan L. Johnson Jr. (JGC) 80
- Design and piloted simulation of a VTOL flight-control system. Vernon K. Merrick and Ronald M. Gerdes (JGC) 209
- Digital computer application in the F-15 engine air inlet control system. C. J. Scherz and L. E. Williams (JGC) 420
- Digital control law synthesis in the w'domain. R. F. Whitbeck and L. G. Hofmann (JGC) 319
- Display augmentation in manual control of remotely piloted vehicles. S. J. Merhav and A. J. Grunwald (JA) 182
- Effect of radar disturbances on ground-controlled precision-landing delivery. Cort L. Durocher (JGC) 289
- Electrostatic roll sensor for supersonic vehicles Part I: feasibility and flight tests. J. L. Frierson, F. G. Moore, and R. L. Van Meter (JA) 195
- Experimental investigation of control-display requirements for VTOL instrument transition. J. Victor Lebacqz and Edwin W. Aiken (JGC) 261
- Feasibility demonstration of the Earth-referenced maneuvering flight-path display. J. F. Walter Jr. and W. G. Mulley (JA) 503
- Fluidic applications in aerospace. John M. Goto (JA, EN) 121
- Identification and stochastic control of an aircraft flying in turbulence. Kenneth W. Iliff (JGC) 101
- Kalman filter divergence and aircraft motion estimators. Arthur E. Bryson Jr. (JGC) 71
- Minimum-time loop maneuvers of jet aircraft. Sachio Uehara, Homer J. Stewart, and Lincoln J. Wood (JA) 449
- Model reference adaptive identifier design and analysis. Bruce K. Colburn and J. S. Boland III (JGC, EN) 379
- More about flight-path-angle transitions in optimal airplane climbs. John V. Breakwell (JGC) 205
- Multivariable quadratic synthesis of an advanced turbofan engine controller. R. L. DeHoff and W. E. Hall Jr. (JGC) 136
- New transformation invariant in the orbital boundary-value problem. Richard H. Battin, Thomas J. Fill, and Stanley W. Sheppard (JGC) 50
- Nonlinear method for parameter identification applied to a trajectory estimation problem. David G. Hull and Walton E. Williamson (JGC, EN) 286
- Observer stabilization of singularly perturbed systems. M. J. Balas (JGC, EN) 93
- Optimal flare in presence of wind shears. Bohdan G. Kunciw (JGC, EN) 284
- Optimal updating of INS using sighting devices. Itzhack Y. Bar-Itzhack (JGC) 305
- Orthogonal filters for model error compensation in the control of nonrigid spacecraft. Robert E. Skelton and Peter W. Likins (JGC) 41
- Performance analysis of particularly simple Kalman filter. Peter S. Maybeck (JGC) 391
- Redundant integrated flight-control/navigation inertial sensor complex. R. E. Ebner and J. G. Mark (JGC) 143; JGC, ERR 384
- Schuler tuned vertical indicating system. S. J. Monaco, D. R. Audley, and S. Okubo (JGC) 413
- Strapdown navigation technology: a literature survey. S. C. Garg, L. D. Morrow, and R. Mamen (JGC, SA) 161
- Testing of the YC-14 flight control system software. D. L. Martin and D. Gangsaas (JGC) 242
- Time-controlled descent guidance in uncertain winds. Giuseppe Menga and Heinz Erzberger (JGC) 123
- Two synthesis techniques applied to flutter suppression on a flight research wing. Irving Abel, Boyd Perry III, and Harold N. Murrow (JGC) 340
- Handling Qualities, Stability and Control**
- Advanced methods of model structure determination from test data. Narendra K. Gupta, W. Earl Hall Jr., and Thomas L. Trankle (JGC) 197
- Backside parameter viewed from optimal control. Kanichiro Kato and Koji Sato (JA, SYN) 67
- Comparison of ground-based and in-flight simulation of VTOL hover control concepts. Lloyd Corliss, Richard K. Greif, and Ronald M. Gerdes (JGC) 217
- Constant-control rolling maneuver. Tiberiu Hacker (JGC) 313
- Design and piloted simulation of a VTOL flight-control system. Vernon K. Merrick and Ronald M. Gerdes (JGC) 209
- Discrete maneuver pilot models for flying qualities evaluation. E. D. Onstott and W. H. Faulkner (JGC) 97
- Display augmentation in manual control of remotely piloted vehicles. S. J. Merhav and A. J. Grunwald (JA) 182
- Dual-loop model of the human controller. R. A. Hess (JGC) 254
- Experimental investigation of control-display requirements for VTOL instrument transition. J. Victor Lebacqz and Edwin W. Aiken (JGC) 261
- Flight evaluation of flight-path control for the STOL approach and landing. James A. Franklin and Robert C. Innis (JA) 5
- Flight test of stick force stability in attitude-stabilized aircraft. H. A. Mooij and M. F. C. van Gool (JA) 562

- Handling qualities of aircraft in the presence of simulated turbulence. Ira D. Jacobson and Dinesh S. Joshi (JA, EN) 254
- Identification and stochastic control of an aircraft flying in turbulence. Kenneth W. Iliff (JGC) 101
- Positive tail loads for minimum induced drag of subsonic aircraft. E. V. Laitone (JA) 837
- Prediction of elastic-airplane lateral dynamics from rigid-body aerodynamics. Robert L. Swaim and George H. Staab (JA) 392
- Prediction of jump phenomena in aircraft maneuvers, including nonlinear aerodynamic effects. J. W. Young, A. A. Schy, and K. G. Johnson (JGC) 26
- Some nonlinear effects in stability and control of wing-in-ground effect vehicles. Rolf Staufenbiel (JA, EN) 541
- Stability augmentation by eigenvalues control and model matching. Mohammad Nabih Wagdi (JGC, EN) 381
- Wind-tunnel measurement of dynamic cross-coupling derivatives. E. S. Hanff and J. K. Orlik-Ruckemann (JA) 40
- Wind-tunnel technique for determining stability derivatives from cable-mounted models. Robert M. Bennett, Moses G. Farmer, Richard L. Mohr, and W. Earl Hall Jr. (JA) 304

Helicopters

- Analysis of unsteady airloads of helicopter rotors in hover. Balusu M. Rao and Paul R. Schatzle (JA) 206
- Diagnostic system requirements for helicopter propulsion systems. John A. Murphy (JA) 333
- Dynamic loads scaling methodology for helicopter rotors. Louis Mirandy (JA) 106
- Helicopter noise: state-of-the-art. A. R. George (JA, SP) 707
- Nonlinear dynamic response of a wind turbine rotor under gravitational loading. Inderjit Chopra and John Dugundji (AIAA J, SYN) 773
- Surface pressure measurements at the tip of a model helicopter rotor in hover. T. P. Shivananda, H. M. McMahon, and R. B. Gray (JA) 460

Landing Dynamics

- Comparison of linear and nonlinear dampers for landing gears. C. Venkatesan (JA, EN) 696
- Control logic to track outputs of a command generator. Thomas L. Trankle and Arthur E. Bryson Jr. (JGC) 130
- Correlation model for turbulence along the glide path. Lloyd D. Reid (JA) 13
- Flight evaluation of flight-path control for the STOL approach and landing. James A. Franklin and Robert C. Innis (JA) 5
- Optimal flare in presence of wind shears. Bohdan G. Kunciw (JGC, EN) 284

Lighter-than-Airships

- Aerodynamic hull design for HASPA LTA optimization. Fabio R. Goldschmied (JA) 634
- Comment on "Potential flow around axisymmetric bodies: direct and inverse problems." William Squire (AIAA J, TC) 1120
- Reply by authors to W. Squire. M. Fouad Zedan and Charles Dalton (AIAA J, TC) 1120
- Comments on "Feasibility study of a hybrid airship operating in ground effect." M. D. Ardema (JA, TC) 126
- Reply by author to M. D. Ardema. D. E. Calkins (JA, TC) 127
- Incompressible irrotational axisymmetric flow about a body of revolution: the inverse problem. M. Fouad Zedan and Charles Dalton (JA) 41
- Potential flow around axisymmetric bodies: direct and inverse problems. M. Fouad Zedan and Charles Dalton (AIAA J) 242
- Rigid airship concept for future naval operations. W. L. Marcy (JA) 298

Military Missions

- Characteristics of fighter aircraft. G. O. Madelung (JA; Wright Brothers Lectureship in Aeronautics) 129
- Deployment forces in towing systems. Yahli Narkis (JA, EN) 123
- High-energy fuels for cruise missiles. G. W. Burdette, H. R. Lander, and J. R. McCoy (JE) 289
- Rigid airship concept for future naval operations. W. L. Marcy (JA) 298
- Tactical air warfare of the future. James D. Hughes (JA) 134

Navigation, Communication, and Traffic Control

- Effect of radar disturbances on ground-controlled precision-landing delivery. Cort L. Durocher (JGC) 289
- Kalman filter divergence and aircraft motion estimators. Arthur E. Bryson Jr. (JGC) 71
- Radar Beacon tracking with downlinked heading and airspeed. Walter M. Hollister and Michael S. Venturino (JGC) 21
- Schuler tuned vertical indicating system. S. J. Monaco, D. R. Audley, and S. Okubo (JGC) 413

- Stochastic properties of conflict frequency at multiple connected air route intersections. David K. Schmidt (JA) 682
- Strapdown navigation technology: a literature survey. S. C. Garg, L. D. Morrow, and R. Mamen (JGC, SA) 161

Noise

- Acoustic attenuation in a nonuniform gas containing droplets. F. A. Lyman and D. -M. Chen (AIAA J) 503
- Acoustic scattering of point sources by a moving prolate spheroid. S. L. Padula and C. H. Liu (AIAA J, SYN) 551
- Aeroacoustics of axisymmetric single- and dual-flow exhaust nozzles. Philip R. Gliebe and Thomas F. Balsa (JA) 743
- Analytical model for entropy noise of subsonic nozzle flow. H. Y. Lu (AIAA J) 1235
- Boundary conditions for mode-matching analyses of coupled acoustic fields in ducts. Roy J. Beckemeyer and David T. Sawdy (AIAA J) 912
- Computation of nonlinear one-dimensional waves in near-sonic flows. A. H. Nayfeh, B. S. Shaker, and J. E. Kaiser (AIAA J) 1154
- Development of a technique for inflight jet noise simulation - Part I. W. S. Clapper, R. Mani, E. J. Stringas, and G. Banerian (JA) 85
- Development of a technique for inflight jet noise simulation - Part II. R. Mani, W. S. Clapper, E. J. Stringas, and G. Banerian (JA) 589
- Effect of longitudinal stringers on sound transmission into a thin cylindrical shell. L. R. Koval (JA) 816
- Experimental evidence of turbulent source coherence affecting jet noise. Helmut V. Fuchs and Ulf Michel (AIAA J, SYN) 871
- Experimental results of large-scale structures in jet flows and their relation to jet noise production. V. Sarohia and P. F. Massier (AIAA J) 831
- Experimental study of aerodynamic noise vs drag relationships for circular cylinders. James D. Revell, Roland A. Prydz, and Anthony P. Hays (AIAA J) 889
- Forward flight effects on externally blown flap noise. Martin R. Fink (JA, SYN) 545
- Gas turbine core noise source isolation by internal-to-far-field correlations. Belur N. Shivashankara (JA) 597
- Helicopter noise: state-of-the-art. A. R. George (JA, SP) 707
- Investigation of interior noise in twin-engine light aircraft. John S. Mixson, C. Kearney Barton, and Rimas Vaicaitis (JA) 227
- Minimum on-axis noise for a propeller or helicopter rotor. Martin R. Fink (JA, EN) 700
- Multimodal far-field acoustic radiation pattern using mode cutoff ratio. Edward J. Rice (AIAA J) 906
- Nonlinear resonance as the cause of multiple pure tones. P. G. Vaidya and K. S. Wang (JA) 526
- Nonlinear structural response to sonic booms. Yogendra Nath (AIAA J, SYN) 865
- Parabolic approximation for sound propagation in the atmosphere. M. K. Myers and G. L. McAninch (AIAA J) 836
- Powered lift and mechanical flap concepts for civil short-haul aircraft. John A. Conlon and Jeffrey V. Bowles (JA) 168
- Reduction of cabin noise and vibration by intrinsic structural tuning. G. SenGupta (AIAA J, SYN) 545
- Separation of hydrodynamic, entropy, and combustion noise in a gas turbine combustor. M. Muthukrishnan, W. C. Strahle, and D. H. Neale (AIAA J) 320
- Solid rocket motor combustion chamber aeroacoustics. Warren C. Strahle and John C. Handley (AIAA J, SYN) 1123
- Some flight simulation experiments on jet noise from supersonic underexpanded flows. V. Sarohia (AIAA J) 710
- Status of some current research in jet noise. Gordon Banerian (AIAA J, SP) 877
- Supersonic jet noise suppression by coaxial cold/heated jet flows. D. S. Dosanjh, P. K. Bhutiani, and K. K. Ahuja (AIAA J, TN) 268
- Unsteady surface pressure characteristics on aircraft components and far-field radiated airframe noise. Hanno H. Heller and Werner M. Dobrzynski (JA) 809

Performance

- Advanced cooled turbine airfoil aerodynamic investigation. W. G. Hess (JA) 582
- Aerodynamics of slender lifting surface in accelerated flight. Shigenori Ando (AIAA J, TN) 751
- Comment on "Ideal tail load for minimum aircraft drag." Richard S. Shevell (JA, TC) 639
- Reply by author to R. S. Shevell. E. V. Laitone (JA, TC) 639
- Curvilinear projection developments. Henry J. Kelley, Leon Lefton, and Ivan L. Johnson Jr. (JGC) 80
- Ideal tail load for minimum aircraft drag. E. V. Laitone (JA, EN) 190
- Minimum-time loop maneuvers of jet aircraft. Sachio Uehara, Homer J. Stewart, and Lincoln J. Wood (JA) 449
- Minimum trimmed drag and optimum c.g. position. Gottfried Sachs (JA) 456
- More about flight-path-angle transitions in optimal airplane climbs. John V. Breakwell (JGC) 205
- Positive tail loads for minimum induced drag of subsonic aircraft. E. V. Laitone (JA) 837

Powered lift and mechanical flap concepts for civil short-haul aircraft. John A. Conlon and Jeffrey V. Bowles (JA) 168
 STOL potential of the circulation control wing for high-performance aircraft. Robert J. Englar, Lynn A. Trobaugh, and Rodney A. Hemmerly (JA) 175

Powerplant Design

Computation of nonlinear one-dimensional waves in nearsonic flows. A. H. Nayfeh, B. S. Shaker, and J. E. Kaiser (AIAA J) 1154
 Demonstration of a cooled laminated integral axial turbine. R. W. Vershure, Jr., H. R. Fisk, and J. A. Vonada (JA) 735
 Engine life, usage, and cycle selection. M. L. Roberts (JA) 240
 Modeling and simulation of multicell fluidized-bed steam generator. Asok Ray, David A. Berkowitz, and Venilal H. Sumaria (JE) 269
 Nonlinear resonance as the cause of multiple pure tones. P. G. Vaidya and K. S. Wang (JA) 526
 Prediction of performance of low-pressure-ratio thrust-augmenter ejectors. J. A. C. Kentfield (JA) 849
 Separation of hydrodynamic, entropy, and combustion noise in a gas turbine combustor. M. Muthukrishnan, W. C. Strahle, and D. H. Neale (AIAA J) 320

Propeller and Rotor Systems

Analysis of unsteady airloads of helicopter rotors in hover. Balusu M. Rao and Paul R. Schatzle (JA) 206
 Comment on "Effects of radial appendage flexibility on shaft whirl stability." P. Kulla (AIAA J, TC) 1117
 --Reply by authors to P. Kulla. F. J. Wilgen and A. L. Schlack, Jr. (AIAA J, TC) 1119
 Dynamic loads scaling methodology for helicopter rotors. Louis Mirandy (JA) 106
 Forward flight effects on externally blown flap noise. Martin R. Fink (JA, SYN) 545
 Minimum on-axis noise for a propeller or helicopter rotor. Martin R. Fink (JA, EN) 700
 Surface pressure measurements at the tip of a model helicopter rotor in hover. T. P. Shivananda, H. M. McMahon, and R. B. Gray (JA) 460

Simulation

Aerodynamic characteristics of fighter configurations during spin entries and developed spins. Ernie L. Anglin (JA) 769
 Comparison of ground-based and in-flight simulation of VTOL hover control concepts. Lloyd Corliss, Richard K. Greif, and Ronald M. Gerdes (JGC) 217
 Design and piloted simulation of a VTOL flight-control system. Vernon K. Merrick and Ronald M. Gerdes (JGC) 209
 Development of a technique for inflight jet noise simulation - Part I. W. S. Clapper, R. Mani, E. J. Stringas, and G. Banerian (JA) 85
 Handling qualities of aircraft in the presence of simulated turbulence. Ira D. Jacobson and Dinesh S. Joshi (JA, EN) 254
 Management of swirling flows with application to wind tunnel design. R. A. Wigeland, M. Ahmed, and H. M. Nagib (AIAA J) 1125
 Mathematical simulation for crashworthy aircraft seat design. David H. Laananen (JA) 567
 Modeling and simulation of multicell fluidized-bed steam generator. Asok Ray, David A. Berkowitz, and Venilal H. Sumaria (JE) 269
 Model reference adaptive identifier design and analysis. Bruce K. Colburn and J. S. Boland III (JGC, EN) 379

Structural Design (including Loads)

Advanced design composite material aircraft study. E. Bannink, R. Hadcock, and H. Forsch (JA) 661
 Deployment forces in towing systems. Yahli Narkis (JA, EN) 123
 Developing normalized crack growth curves for tracking damage in aircraft. J. P. Gallagher and H. D. Stainaker (JA) 114
 In-plane functions of circular sector plates. M. N. Reddy (AIAA J, TN) 608
 Measurement and effect of residual stresses on turbine components. Sharon L. Cole, Glenn E. Bowie, Kevin R. Kondas, and David W. Hoepfner (AIAA J) 555

Structural Materials

Advanced design composite material aircraft study. E. Bannink, R. Hadcock, and H. Forsch (JA) 661
 Fatigue characteristics of graphite/epoxy laminates under compression loading. M. S. Rosenfeld and S. L. Huang (JA) 264

Subsystem Design

Comparison of linear and nonlinear dampers for landing gears. C. Venkatesan (JA, EN) 696
 Design and evaluation of sensor systems for state and parameter estimation. Narendra K. Gupta and W. Earl Hall Jr. (JGC) 397

Design criteria for aircraft warning, caution, and advisory alerting systems. J. E. Veitengruber (JA) 574
 Fluidic applications in aerospace. John M. Goto (JA, EN) 121
 New approach to assurance technology on "the Hornet". Donald Malvern and John Capellupo (JA) 805

Testing, Flight and Ground

Advanced methods of model structure determination from test data. Narendra K. Gupta, W. Earl Hall Jr., and Thomas L. Trankle (JGC) 197
 Development of a technique for inflight jet noise simulation - Part I. W. S. Clapper, R. Mani, E. J. Stringas, and G. Banerian (JA) 85
 Development of a technique for inflight jet noise simulation-Part II. R. Mani, W. S. Clapper, E. J. Stringas, and G. Banerian (JA) 589
 Effect of radar disturbances on ground-controlled precision-landing delivery. Cort L. Durocher (JGC) 289
 Experiment on the gust response of a transport airplane by free-flight model. Makoto Kobayakawa and Hiroshi Maeda (JA, EN) 540
 Experimental observations of wall interference at transonic speeds. R. F. Starr (JA) 822
 Instrumental variables algorithm for modal parameter identification in flutter testing. Wayne Johnson and Narendra K. Gupta (AIAA J) 800
 Integrated approach to the problem of aircraft icing. D. W. Newton (JA) 374
 Low-speed test limit of V/STOL model located vertically off-center. Shojiro Shindo and William H. Rae Jr. (JA, EN) 253
 New Approach to assurance technology on "The Hornet". Donald Malvern and John Capellupo (JA) 805
 Optimization procedure to correct stiffness and flexibility matrices using vibration tests. Menahem Baruch (AIAA J, TN) 1208
 Pressure distribution on a symmetrical butterfly wing. Ion Paraschivoiu and Ertugrul Bilgen (JA, EN) 444
 Reingestion and footprint characteristics of the VAK 191B. R. A. Weinraub (JA) 222
 Reverse Magnus force on a magnetically suspended ogive cylinder at subsonic speeds. E. P. Birtwell, J. B. Coffin, E. E. Covert, and C. W. Haldeman (AIAA J) 111
 Ride quality flight testing. Robert L. Swaim (JGC, EN) 159
 Simulation of turbine engine operational loads. R. L. Swain and J. G. Mitchell (JA, EN) 381
 Sneak circuit and software sneak analysis. S. G. Godoy and G. J. Engels (JA) 509
 Testing of the YC-14 flight control system software. D. L. Martin and D. Gangsaas (JGC) 242
 Theoretical investigations of real gas effects in cryogenic wind tunnels. Bernhard Wagner and Wolfgang Schmidt (AIAA J) 580
 Tunnel interference assessment by boundary measurements. C. F. Lo (AIAA J, TN) 411
 V/STOL aerodynamic testing techniques at British Aircraft Corporation. P. G. Knott (JA) 339
 Wind-tunnel technique for determining stability derivatives from cable-mounted models. Robert M. Bennett, Moses G. Farmer, Richard L. Mohr, and W. Earl Hall Jr. (JA) 304

Vibration

Asymptotic method for predicting amplitudes of nonlinear wheel shimmy. James T. Gordon Jr. and Howard C. Merchant (JA) 155
 Condensation of free body mass matrices using flexibility coefficients. John D. Sowers (AIAA J, TN) 272
 Dynamic analysis of an in-flight refueling system. J. Eichler (JA) 311
 Frequencies of annular plate and curved beam elements. J. F. Wilson and D. P. Garg (AIAA J, TN) 270
 Modal confidence factor in vibration testing. Sam R. Ibrahim (JSR) 313
 Nonlinear structural response to sonic booms. Yogendra Nath (AIAA J, SYN) 865
 Normal modes vibration analysis of the JT9D/747 propulsion system. John L. White and Edward S. Todd (JA) 28
 Optimization procedure to correct stiffness and flexibility matrices using vibration tests. Menahem Baruch (AIAA J, TN) 1208
 Reduction of cabin noise and vibration by intrinsic structural tuning. G. SenGupta (AIAA J, SYN) 545
 Transverse compressional damping in the vibratory response of elastic-viscoelastic-elastic beams. B. E. Douglas and J. C. S. Yang (AIAA J) 925
 Vibration statistics of thin plates with complex form. Aleksander Waberski (AIAA J) 788

ENERGY

Alternate Fuels

Alternative fuels and combustion problems. John P. Longwell (PS, V. 62) 3
