- Time-controlled descent guidance in uncertain winds. Giuseppe Menga and Heinz Erzberger (JGC) 123
- Wind power limitations associated with vortices. J. L. Loth (JE) 216
- Wind tunnel performance data for two- and three-bucket Savonius rotors. Robert E. Sheldahl, Bennie F. Blackwell, and Louis V. Feltz (JE) 160

FLUID DYNAMICS

Aeroacoustics

- Acoustic attenuation in a nonuniform gas containing droplets. F. A. Lyman and D. -M. Chen (AIAA J) 503
- Acoustic scattering of point sources by a moving prolate spheroid. S. L. Padula and C. H. Liu (AIAA J, SYN) 551
- Acoustics loads on upper-surface-blown powered-lift systems. Conrad M. Willis, James A. Schoenster, and John S. Mixson (JA) 670
- Aeroacoustics of axisymmetric single- and dual-flow exhaust nozzles. Philip R. Gliebe and Thomas F. Balsa (JA) 743
- Boundary conditions for mode-matching analyses of coupled acoustic fields in ducts. Roy J. Beckemeyer and David T. Sawdy (AIAA J) 912
- Comment on "High-frequency subsonic flow past a pulsating thin airfoil." Bhimsen K. Shivamoggi (AIAA J, TC) 1310
- Conditional sampling for jet noise sources characterization. Léon Avezard, Claude Dahan, Georges Elias, Annie Lelarge, Jean Maulard, and Mariano Pérulli (AIAA J, SYN) 1121
- Determination of turbofan inlet acoustics using finite elements. R. K. Sigman, R. K. Majjigi, and B. T. Zinn (AIAA J) 1139
- Development of a technique for in-flight jet noise simulation - part II. R. Mani, W. S. Clapper, E. J. Stringas, and G. Banerian (JA) 589
- Effect of longitudinal stringers on sound transmission into a thin cylindrical shell. L. R. Koval (JA) 816
- Experimental investigation of noise reduction from two parallel-flow jets. W. V. Bhat (AIAA J) 1160
- Experimental investigation of the trailing edge noise mechanism. J. C. Yu and C. K. W. Tam (AIAA J) 1046
- Experimental study of aerodynamic noise vs drag relationships for circular cylinders. James D. Revell, Roland A. Prydz, and Anthony P. Hays (AIAA J) 889
- Experiments on the transmission of sound through jets. Dietrich W. Bechert, Ulf Michel, and Eberhard Pfizenmaier (AIAA J, SYN) 873
- Flight effects on jet noise radiated from convecting quadrupoles. R. Dash (AIAA J, SYN) 875
- Flow visualization in long-neck Helmholtz resonators with grazing flow. Kenneth J. Baumeister and Edward J. Rice (AIAA J) 233
- Forward flight effects on externally blown flap noise. Martin R. Fink (JA, SYN) 545
- Gas turbine core noise source isolation by internal-to-far-field correlations. Belur N. Shivashankara (JA) 597
- Helicopter noise: state-of-the-art. A. R. George (JA, SP) 707
- High-frequency subsonic flow past a pulsating thin airfoil. Allen Plotkin (AIAA J, TN) 405
- High-frequency subsonic flow past a pulsating thin airfoil II: gust-type upwash. Allen Plotkin (AIAA J, TN) 753
- Influence of internally generated pure tones on the broadband noise radiated from a jet. S. P. Parthasarathy, R. Cuffel, and P. F. Massier (AIAA J, TN) 538
- Investigation of fan noise sources by blade pressure measurements. P. Raffy, S. Lewy, J. Lambourion, and M. Chatanier (AIAA J, SYN) 777
- Investigation of rotor noise source mechanisms with forward speed simulation. F. -R. Grosche and H. Stiewitt (AIAA J) 1255
- Jet noise source modification due to forward flight. R. S. Larson, C. J. McColgan, and A. B. Packman (AIAA J) 225
- Minimum on-axis noise for a propeller or helicopter rotor. Martin R. Fink (JA, EN) 700
- Multimodal far-field acoustic radiation pattern using mode cutoff ratio. Edward J. Rice (AIAA J) 906

- Noise due to interaction of boundary-layer turbulence with a compressor rotor. N. Moiseev, B. Lakshminarayana, and D. E. Thompson (JA) 53
- Parabolic approximation for sound propagation in the atmosphere. M. K. Myers and G. L. McAninch (AIAA J) 836
- Propagation of waves in cylindrical hard-walled ducts with generally weak undulations. Ali H. Nayfeh and Osama A. Kandil (AIAA J) 1041
- Status of some current research in jet noise. Gordon Banerian (AIAA J, SP) 877
- Unsteady surface pressure characteristics on aircraft components and far-field radiated airframe noise. Hanno H. Heller and Werner M. Dobrzynski (JA) 809

Boundary Layers and Convective Heat Transfer—Laminar

- Aerothermal environment for the Pioneer Venus multiprobe mission. James N. Moss, E. Vincent Zoby, Kenneth Sutton, and E. Clay Anderson (PS, V. 59) 3
- Carbon vaporization into a nonequilibrium, stagnation-point boundary layers. Tateyuki Suzuki (AIAA J, TN) 754
- Comments on "Controlling the separation of laminar boundary layers in water: heating and suction." Andrzej Wortman (JH, TC) 87
- Reply by authors to A. Wortman. J. Aroesty and S. A. Berger (JH, TC) 88
- Effect of conducting wall on a stratified fluid in a cylinder. Constance W. Miller (PS, V. 60) 190
- Experimental determination of the discharge coefficients for critical flow through an axisymmetric nozzle. S. P. Tang and J. B. Fenn (AIAA J) 41
- Heat and mass transfer in close proximity impinging two-dimensional laminar jets. M. I. O. Ero (AIAA J, TN) 611
- Interaction of a rough subliming surface and a laminar boundary layer. Paul A. Libby (AIAA J) 130
- Low temperature simulation of subliming boundary-layer flow in Jupiter atmosphere. Ching Jen Chen (AIAA J) 259
- Natural convection studies in nuclear spent-fuel shipping casks: computation and experiment. David W. Larson, David K. Gartling, and Walter P. Schimmel Jr. (JE) 147
- Nose-tip shapt optimization for minimum transpiration coolant requirements. R. L. Baker and R. F. Kramer (PS, V. 59) 404
- Numerical method for boundary-layers with blowing-the exponential box scheme. T. M. El-Mistikawy and M. J. Werle (AIAA J, TN) 749
- Stagnation point boundary layer on a subliming surface with numerous small roughness elements. D. R. Kassoy and Paul A. Libby (AIAA J, TN) 630
- Surface-tension induced convection at reduced gravity. Simon Ostrach and Avind Pradhan (AIAA J) 419
- Two-phase working fluids for the temperature range 100°-350°C. E. W. Saaski and L. Tower (PS, V. 60) 63
- Two-stream mixing: A variational solution. R. D. Small (AIAA J, TN) 83
- Unsteady boundary layers with flow reversal and the associated heat-transfer problem. J. C. T. Wang and S. F. Shen (AIAA J) 1025
- Unsteady laminar boundary layer with separation and reattachment. Tuncer Cebeci (AIAA J, TN) 1305
- Unsteady three-dimensional compressible stagnation-point boundary layers. G. Nath and M. Kumari (AIAA J, TN) 1007
- Velocity and temperature streaming in oscillating boundary layers. Demetri P. Telionis and Maria S. Romaniuk (AIAA J) 488
- Vortices induced in a stagnation region by wakes. H. M. Nagib and P. R. Hodson (PS, V. 59) 66

Boundary Layers and Convective Heat Transfer—Turbulent

- Aerothermal environment for the Pioneer Venus multiprobe mission. James N. Moss, E. Vincent Zoby, Kenneth Sutton, and E. Clay Anderson (PS, V. 59) 3
- Analysis of a film-cooled nosetip in a particle erosion environment. R. M. Grabow (PS, V. 59) 328
- Boundary-layer flows from fixed to moving surfaces including gap effects. J. S. Tennant, W. S. Johnson, and D. D. Keaton (JH) 81
- Calculation of general three-dimensional turbulent boundary layers. A. K. Rastogi and W. Rodi (AIAA J) 151
- Calculation of incompressible rough-wall boundary-layer flows. Tuncer Cebeci and K. C. Chang (AIAA J) 730
- Calculation of two-dimensional turbulent boundary layers. Sedat Biringen and Josef Levi (AIAA J, TN) 1016
- Comment on "Turbulent boundary layer with injection and surface roughness." L. C. Squire (AIAA J, TC) 639
- Reply by authors to L. C. Squire. J. A. Schetz and B. Nerney (AIAA J, TC) 640
- Comparison of rocket nozzle heat transfer calculation methods. Tarit K. Bose (JSR, EN) 253
- Computations of Magnus effects for a yawed, spinning body of revolution. Walter B. Sturek, Harry A. Dwyer, Lyle D. Kayser, Charles J. Nietubicz, Robert P. Reklis, and Klaus O. Opalka (AIAA J) 687

- Conditional measurements in a heated axisymmetric turbulent mixing layer. K. R. Sreenivasan, R. A. Antonia, and S. E. Stephenson (AIAA J, SYN) 869
- Correlations among turbulent shear stress, turbulent kinetic energy, and axial turbulence intensity. K.M.M. Alshamrani (AIAA J, TN) 859
- Detailed measurements on a circular cylinder in cross flow. V. S. Murthy and W. C. Rose (AIAA J, SYN) 549
- Drag reduction by polymer diffusion at high Reynolds numbers. J. Wu, D. H. Fruman, and M. P. Tulin (JH, EN) 134
- Effect of wall temperature on a supersonic turbulent boundary layer. A. J. Laderman (AIAA J) 723
- Extended mixing-length applications to compressible turbulent boundary layers. J. C. Adams Jr. and B. K. Hodge (AIAA J, SYN) 643
- Flowfield prediction of separating turbulent shear layers. Michael A. Collins and Roger L. Simpson (AIAA J, SYN) 291
- Inlet boundary-layer shapes on four aircraft forebodies at Mach 6. Pierce L. Lawing and Charles B. Johnson (JA, EN) 62
- Inviscid-viscous interaction in transonic flows about finite three-dimensional wings. W. Kordulla (AIAA J) 369
- Joint probability densities and quadrant contributions in a heated turbulent round jet. K. R. Sreenivasan and R. A. Antonia (AIAA J, SYN) 867
- Mach number and wall temperature effects on turbulent heat blockage. R. P. Fogaroli and A. L. Laganelli (PS, V. 59) 156
- Measured Reynolds stress tensors in a three-dimensional turbulent boundary layer. C. I. Ezekwe, F. J. Pierce, and J. E. McAllister (AIAA J, SYN) 645
- Measurement and calculation of furnace-flow properties. P. Hutchinson, E. E. Khalil, and J. H. Whitelaw (PS, V. 58) 211
- Method for the numerical solution of turbulent flow problems. J. C. Wu and A. Sugavanam (AIAA J) 948
- Modeling of an asymmetric turbulent near wake using the interaction hypothesis. G. David Huffman and B. Sung-Hong Ng (AIAA J, SYN) 193
- Neutral atmospheric effects on the dissipation of aircraft vortex wakes. A. J. A. Bilanin, M. E. Teske, and J. E. Hirsh (AIAA J) 956
- Nose-tip shape optimization for minimum transpiration coolant requirements. R. L. Baker and R. F. Kramer (PS, V. 59) 404
- Numerical investigation of turbulence models for shock-separated boundary-layer flows. J. R. Viegas and T. J. Coakley (AIAA J, SYN) 293
- Numerical solution of three-dimensional shock wave and turbulent boundary-layer interaction. C. M. Hung and R. W. MacCormack (AIAA J) 1090
- Plane cascade solution with injection. E. McFarland, W. Tabakoff, and A. Hamed (JE, TN) 189
- Prediction of turbulent boundary layers in the vicinity of separation. R. L. Simpson and M. A. Collins (AIAA J, SYN) 289
- Reacting turbulent boundary-layer approach to solid propellant erosive burning. Robert A. Beddini (AIAA J) 898
- Reynolds number and pressure gradient effects on compressible turbulent boundary layers. M. Acharya, M. I. Kussoy, and C. C. Horstman (AIAA J, SYN) 1217
