

- Seasat-A attitude control system. R. Weiss, J. J. Rodden, R. J. Hendricks, and S. W. Beach (JGC) 6
- Study, optimization, and design of a laser heat engine. Robert T. Taussig, Philip E. Cassady, and John F. Zumdick (PS, V. 61) 498
- Systems efficiency and specific mass estimates for direct and indirect solar-pumped closed-cycle high-energy lasers in space. Daryl J. Monson (PS, V. 61) 333

### *Spacecraft Temperature Control*

- Contamination/degradation measurements on operational satellite thermal control surfaces. D. G. T. Curran and J. M. Millard (PS, V. 60) 263
- Effective conductivity of regularly packed spheres: basic cell model with constriction. Y. Ogniewicz and M. M. Yovanovich (PS, V. 60) 209
- Effects of space radiation on thin polymers and nonmetallics. Lawrence B. Fogdall and Sheridan S. Cannaday (PS, V. 60) 290
- Flexible deployable-retractable space radiators. J. W. Leach and R. L. Cox (PS, V. 60) 243
- Instrument canister thermal control. W. Harwell, R. Haslett, and S. Ollendorf (PS, V. 60) 305
- Low-temperature phase-change material package. P. J. Brennan, H. J. Suelau, and R. McIntosh (PS, V. 60) 371
- Precise satellite thermal control system using cascaded heat pipes. W. H. Steele and H. B. McKee (PS, V. 60) 325
- Re-entrant groove heat pipe. W. Harwell, W. B. Kaufman, and L. K. Tower (PS, V. 60) 131
- Shuttle elevon cove aerodynamic heating by ingested flow. Carl D. Scott, Linus P. Murray, and James D. Milhoan (PS, V. 59) 27

### *Spacecraft Testing, Flight and Ground*

- Comments on "An analytical and experimental study for surface heat flux determination." James V. Beck (JSR, TC) 381
- Reply by authors to James V. Beck. S. D. Williams and Donald M. Curry (JSR, TC) 382
- Control system design in the presence of severe structural dynamics interactions. John F. Yocum and Loren I. Slafer (JGC) 109
- Flight performance of the stabilization system of the communications technology satellite. F. R. Vigneron and R. A. Millar (JGC) 404
- In-flight gyro drift rate calibration on the Viking orbiters. William G. Breckenridge and Alfred J. Treder (JGC) 433
- Modal confidence factor in vibration testing. Sam R. Ibrahim (JSR) 313
- Satellite positive-ion beam system. T. D. Masek and H. A. Cohen (JSR) 27
- Sneak circuit and software sneak analysis. S. G. Godoy and G. J. Engels (JA) 509

### *Space Station Systems, Manned*

- Analysis of a magnetically suspended, high-performance instrument pointing system. Suresh M. Joshi (JGC) 150
- Energy conversion at a lunar polar site. James D. Burke (PS, V. 61) 95
- Steps toward space colonization: colony location and transfer trajectories. T. A. Heppenheimer (JSR)

## STRUCTURAL MECHANICS AND MATERIALS

### *Aeroelasticity and Hydroelasticity*

- Active flutter control using generalized unsteady aerodynamic theory. John W. Edwards, John V. Breakwell, and Arthur E. Bryson Jr. (JGC) 32
- Aeroelastic stability characteristics of an oblique-wing aircraft. J. B. Crittenden, T. A. Weisshaar, E. H. Johnson, and M. J. Rutkowski (JA) 429
- Application of optimization technology to wing/store flutter prediction. Richard R. Chipman and John B. Malone (JA) 786
- Comment on "Aeroelastic stability characteristics of an oblique-wing aircraft". H. P. Y. Hitch (JA, TC) 864
- Reply by authors to H. P. Y. Hitch. Erwin Johnson and Terry A. Weisshaar (JA, TC) 864
- Comment on "A finite-element approach for nonlinear panel flutter." G. Prathap (AIAA J, TC) 863
- Reply by author to G. Prathap. Chuh Mei (AIAA J, TC) 864
- Comment on "Reply by author to A. H. Flax". Alexander H. Flax (AIAA J, TC) 94
- Comparative study between two different active flutter suppression systems. E. Nissim (JA) 843
- Dynamics of an initially stressed fluid-immersed cylindrical shell. H. Reismann and G. J. Meyers (JH) 118
- Effect of various misalignments on static aeroelastic characteristics of guided launch vehicles. N. G. Humbad (JSR, EN) 252
- Estimate of orbiter static aeroelastically properties via FLEXSTAB. Ralph K. Cavin III and J. N. Holyoak (JA) 275

- Instrumental variables algorithm for modal parameter identification in flutter testing. Wayne Johnson and Narendra K. Gupta (AIAA J) 800
- Prediction of elastic-airplane lateral dynamics from rigid-body aerodynamics. Robert L. Swaim and George H. Staab (JA) 392
- Static aeroelastic analysis of guided slender launch vehicles. N. G. Humbad (JSR) 12
- Supersonic flutter of heated circular cylindrical shells with temperature-dependent material properties. Ulf Olsson (AIAA J) 360
- Synthesis of aerodynamic transfer functions for elastic flight vehicles. Jack Morito Ii (JA) 777
- Two synthesis techniques applied to flutter suppression on a flight research wing. Irving Abel, Boyd Perry III, and Harold N. Murrow (JGC) 340

### *Materials, Properties of*

- Crack propagation in double-based propellants. S. W. Beckwith and D. T. Wang (JSR) 355
- Demonstration of a cooled laminated integral axial turbine. R. W. Vershure, Jr., H. R. Fisk, and J. A. Vonada (JA) 735
- Finite deformation of anisotropic plastic rotating disks. William W. Feng (AIAA J, TN) 1205
- Hypervelocity impact tests on space shuttle orbiter RCC thermal protection material. Donald H. Humes (JSR, EN) 250
- Interaction of bubbles with solidification interfaces. J. M. Papazian and W. R. Wilcox (AIAA J) 447
- Quantification of fastener-hole quality. J. L. Rudd and T. D. Gray (JA) 143
- Steady creep bending stresses in linearly viscous composites. R. L. Sierakowski and I. K. Ebcioğlu (AIAA J, TN) 403
- Theoretical models for metal growth in space—comparison to ground experiments. R. I. Miller and M. H. Johnston (AIAA J) 439

### *Structural Composite Materials*

- Bond thickness effects upon stresses in single-lap adhesive joints. I. U. Ojalvo and H. L. Eidinoff (AIAA J) 204
- Durable and damage-tolerant composite commercial aircraft structure design approach. J. E. McCarty and R. W. Johnson (JA) 33
- Effect of initial stresses on the small deformations of a composite rod. S. Nair and G. Hegemier (AIAA J) 212
- Environmentally controlled fatigue tests of composite box beams with built-in flaws. J. D. Labor and R. M. Verette (JA) 257
- Fatigue characteristics of graphite/epoxy laminates under compression loading. M. S. Rosenfeld and S. L. Huang (JA) 264
- Impact behavior of graphite/epoxy simulated fan blades. T. S. Cook and J. L. Preston Jr. (JA) 269
- Some design considerations for large space structures. Harold G. Bush, Martin M. Mikulas Jr., and Walter L. Heard Jr. (AIAA J) 352
- Steady creep bending stresses in linearly viscous composites. R. L. Sierakowski and I. K. Ebcioğlu (AIAA J, TN) 403
- Transient temperatures in laminated composite conical shells due to aerodynamic heating. B. Basava Raju, Ramesh Chandra, and M. Subba Rao (AIAA J, SYN) 547
- Transverse compressional damping in the vibratory response of elastic-viscoelastic-elastic beams. B. E. Douglas and J. C. S. Yang (AIAA J) 925

### *Structural Design*

- ASOP-3: a program for optimum structural design to satisfy strength and deflection constraints. Gabriel Isakson, Harry Pardo, Edwin Lerner, and Vipera B. Venkayya (JA) 422
- Bond thickness effects upon stresses in single-lap adhesive joints. I. U. Ojalvo and H. L. Eidinoff (AIAA J) 204
- Comment on "A paradoxical case in a stability analysis." David J. Johns (AIAA J, TC) 1115
- Reply by author to D. J. Johns. R. Parnes (AIAA J, TC) 1115
- Comment on "A paradoxical case in a stability analysis." Alexander H. Flax (AIAA J, TC) 1116
- Reply by author to A. H. Flax. R. Parnes (AIAA J, TC) 1117
- Continuum modeling of three-dimensional truss-like space structures. Adnan H. Nayfeh and Mohamed S. Hefzy (AIAA J) 779
- Design plastic stress concentration factors using Ramberg-Osgood stress-strain parameters. Ralph Papirno (AIAA J, TN) 273
- Finite-element analysis of coupled thermoviscoelastic structures undergoing sustained periodic vibrations. Thomas L. Cost and James M. Heard (AIAA J) 795
- Fuel savings from truck aerodynamic drag reducers and correlation with wind-tunnel data. Frank T. Buckley, Jr., William H. Walston, Jr., and Colin H. Marks (JE) 321
- Heat-sink structural design concepts for a hypersonic research airplane. Allan H. Taylor and L. Robert Jackson (JA) 199
- In-plane functions of circular sector plates. M. N. Reddy (AIAA J, TN) 608
- Measurement and effect of residual stresses on turbine components. Sharon L. Cole, Glenn E. Bowie, Kevin R. Kondas, and David W. Hoepfner (AIAA J) 555

- Minimum mass square plate with fixed fundamental frequency of free vibration. M. H. Foley (AIAA J, TN) 1001
- Minimum weight design of cylindrical shell with multiple stiffener sizes. Kazuo Kunoo and T. Y. Yang (AIAA J) 35
- Multilevel approach to minimum weight design including buckling constraints. L. A. Schmit Jr. and R. K. Ramanathan (AIAA J) 97
- Natural frequencies of a cantilever with an asymmetrically attached tip mass. G. L. Anderson (AIAA J, TN) 281
- Non-Gaussian gust model for aircraft response analysis. W. S. Pi and Chintsun Hwang (AIAA J, SYN) 641
- Norm optimization method in structural design. Moshe B. Fuchs and Maurice A. Brull (AIAA J) 20
- Optimal frequency separation of cylindrical shells. Michael Pappas (AIAA J, TN) 999
- Optimal weighted orthogonalization of measured modes. Menahem Baruch and Itzhack Y. Bar-Itzhack (AIAA J) 346
- Parachute canopy stress measurements at steady state and during inflation. H. G. Heinrich and David P. Saari (JA) 534
- Quantification of fastener-hole quality. J. L. Rudd and T. D. Gray (JA) 143
- Segmented tungsten nose tips for high-performance flight vehicles. M. M. Sherman and J. C. Schutzler (PS, V. 59) 382
- Structural design for a hypersonic research airplane. L. Robert Jackson and Allan H. Taylor (JA) 366
- Tracking potential crack growth damage in U. S. Air Force aircraft. J. P. Gallagher, A. F. Grandt Jr., and R. L. Crane (JA) 435
- Vulnerability analysis of optimized structures. V. B. Venkayya, N. S. Khot, and F. E. Eastep (AIAA J) 1189

#### *Structural Durability (including Fatigue and Fracture)*

- Bayesian estimation of crack initiation times from service data. R. A. Heller and G. H. Stevens. (JA) 794
- Comparative study of fatigue crack closure. J. E. Rueping, B. M. Hillberry, S. C. Mettler, and W. H. Stevenson (AIAA J, TN) 413
- Durable and damage-tolerant composite commercial aircraft structure design approach. J. E. McCarty and R. W. Johnson (JA) 33
- Engine life, usage, and cycle selection. M. L. Roberts (JA) 240
- Environmentally controlled fatigue tests of composite box beams with built-in flaws. J. D. Labor and R. M. Verette (JA) 257
- Fatigue characteristics of graphite/epoxy laminates under compression loading. M. S. Rosenfeld and S. L. Huang (JA) 264
- Impact behavior of graphite/epoxy simulated fan blades. T. S. Cook and J. L. Preston Jr. (JA) 269
- Measurement and effect of residual stresses on turbine components. Sharon L. Cole, Glenn E. Bowie, Kevin R. Kondas, and David W. Hoeppner (AIAA J) 555
- Quantification of fastener-hole quality. J. L. Rudd and T. D. Gray (JA) 143
- Tracking potential crack growth damage in U. S. Air Force aircraft. J. P. Gallagher, A. F. Grandt Jr., and R. L. Crane (JA) 435

#### *Structural Dynamics*

- Aeroelastic stability characteristics of an oblique-wing aircraft. J. B. Crittenden, T. A. Weisshaar, E. H. Johnson, and M. J. Rutkowski (JA) 429
- Analysis of structural shock transmission. Peter Crimi (JSR) 79
- Application of optimization technology to wing/store flutter prediction. Richard R. Chipman and John B. Malone. (JA) 786
- Asymptotic method for predicting amplitudes of nonlinear wheel shimmy. James T. Gordon Jr. and Howard C. Merchant (JA) 155
- Automatic choice of global shape functions in structural analysis. B. O. Almroth, P. Stern, and F. A. Brogan (AIAA J) 525
- Calculated transient response of an A-6 landing gear door. Joseph G. Connor Jr. (JA, SYN) 65
- Comment on "Aeroelastic stability characteristics of an oblique-wing aircraft". H. P. Y. Hitch (JA, TC) 864
- Reply by authors to H. P. Y. Hitch. Erwin Johnson and Terry A. Weisshaar (JA, TC) 864
- Comment on "a finite-element approach for nonlinear panel flutter." G. Prathap (AIAA J, TC) 863
- Reply by author to G. Prathap. Chuh Mei (AIAA J, TC) 864
- Comment on "Dynamic characteristics of rotor blades: integrating matrix method." William F. White Jr. (AIAA J, TC) 541
- Reply by author to W. F. White Jr. V. R. Murthy (AIAA J, TC) 542
- Comment on "Effect of stabilizer dihedral and static lift on T-tail flutter." William P. Rodden (JA, TC) 447
- Comment on "Estimation of fundamental frequencies of beams and plates with varying thickness." Alexander H. Flax (AIAA J, TC) 1022
- Reply by author to A. H. Flax. Franklin E. Eastep (AIAA J, TC) 1024

- Continuum modeling of three-dimensional truss-like space structures. Adnan H. Nayfeh and Mohamed S. Hefzy (AIAA J) 779
- Continuum models for beam- and platelike lattice structures. Ahmed K. Noor, Melvin S. Anderson, and William H. Greene (AIAA J) 1219
- Improvement of plate and shell finite elements by mixed formulations. S. W. Lee and T. H. H. Pian (AIAA J) 29
- In-plane functions of circular sector plates M. N. Reddy (AIAA J, TN) 608
- Multilevel approach to minimum weight design including buckling constraints. L. A. Schmit Jr. and R. K. Ramanathan (AIAA J) 97
- Rod and beam finite element matrices and their accuracy. Atis A. Liepins (AIAA J, TN) 531
- Traction boundary conditions in hybrid-stress finite-element model. Satya N. Atluri and H. C. Rhee (AIAA J, TN) 529

### Thermal Stresses

- Continuum models for beam- and platelike lattice structures. Ahmed K. Noor, Melvin S. Anderson, and William H. Greene (AIAA J) 1219
- Finite-element analysis of coupled thermoviscoelastic structures undergoing sustained periodic vibrations. Thomas L. Cost and James M. Heard (AIAA J) 795
- Heat-sink structural design concepts for a hypersonic research airplane. Allan H. Taylor and L. Robert Jackson (JA) 199
- Segmented tungsten nose tips for high-performance flight vehicles. M. M. Sherman and J. C. Schutler (PS, V. 59) 382
- Steady creep bending stresses in linearly viscous composites. R. L. Sierakowski and I. K. Ebcioglu (AIAA J, TN) 403
- Stress analysis study in cooled radial inflow turbine. A. Hamed, Y. Sheoran, and W. Tabakoff (JA, SYN) 803
- Structural design for a hypersonic research airplane. L. Robert Jackson and Allan H. Taylor (JA) 366

## THERMOPHYSICS AND THERMOCHEMISTRY

### Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

- Ablation performance of tungsten, copper-infiltrated tungsten, and other systems in arc jets. I. Auerbach (PS, V. 59) 274
- Arc-heater code-validation tests of heat-shield materials. J. P. Kesselring, R. E. Maurer, K. E. Suchsland, G. J. Hartman, and D. L. Peterson (PS, V. 59) 261
- Carbon vaporization into a nonequilibrium, stagnation-point boundary layers. Tateyuki Suzuki (AIAA J, TN) 754
- Comment on "Radiative ablation of melting solid." Benjamin T. F. Chung and L. T. Yeh (AIAA J, TC) 638
- Reply by authors to B. T. F. Chung and L. T. Yeh. Anant Prasad and S. N. Sinha (AIAA J, TC) 639
- Effect of temperature-dependent heat capacity on aerodynamic ablation of melting bodies. Anant Prasad (AIAA J, TN) 1004
- High-pressure arc test performance of carbon-carbon nose tips. D. E. Nestler (PS, V. 59) 351
- Impulse transfer from pulsed CO<sub>2</sub> laser irradiation at reduced ambient pressures. Ven H. Shui, Lee A. Young, and James P. Reilly (AIAA J, SYN) 649
- In-depth oxidation distribution of reinforced carbon-carbon material. J. E. Medford (PS, V. 59) 289
- Integral solutions of ablation problems with time-dependent heat flux. T. F. Zien (AIAA J) 1287
- Low temperature simulation of subliming boundary-layer flow in Jupiter atmosphere. Ching Jen Chen (AIAA J) 259
- Methods for predicting radiation-coupled flowfields about planetary entry probes. W. E. Nicolet, L. R. Waterland, and R. M. Kendall (PS, V. 59) 120
- Pyrolysis and oxidation of aromatic compounds. David M. Golden (PS, V. 62) 233
- Segmented tungsten nose tips for high-performance flight vehicles. M. M. Sherman and J. C. Schutler (PS, V. 59) 382
- Survey of solid-propellant aging studies. K. Kishore and G. Prasad (JSR, SYN) 261

### Experimental Methods of Diagnostics

- Ablation measurement on the gasjet nose tip. John C. Donohoe, Thomas A. Blackstock, and J. Wayne Keyes (PS, V. 59) 368
- Direct mass spectrometric measurements in a highly expanded rocket exhaust plume. T. Dwayne McCay, Homer M. Powell, and Michael R. Busby (JSR) 133
- Experimental investigation of flow turbulence effects on premixed methane-air flames. K. O. Smith and F. C. Gouldin (PS, V. 58) 37
- Laser based diagnostic techniques for combustion research. S. Lederman (PS, V. 58) 291

- Laser velocimeter measurements of the structure of turbulent spray flames. F. K. Owen (PS, V. 58) 229
- Resonance refractivity studies of sodium vapor for enhanced flow visualization. G. Blendstrup, D. Bershader, and P. W. Langhoff (AIAA J, TN) 1106

### Heat Conduction

- Changes of surface shapes due to contact loading with thermal and pressure cycling. A. Williams and N. Idrus (PS, V. 60) 229
- Comment on "Radiative ablation of melting solid." Benjamin T. F. Chung and L. T. Yeh (AIAA J, TC) 638
- Reply by authors to B. T. F. Chung and L. T. Yeh. Anant Prasad and S. N. Sinha (AIAA J, TC) 639
- Effect of melt removal by aerodynamic shear on melt-through of metal plates. Nelson H. Kemp (PS, V. 59) 225
- Effect of temperature-dependent heat capacity on aerodynamic ablation of melting bodies. Anant Prasad (AIAA J, TN) 1004
- Integral solutions of ablation problems with time-dependent heat flux. T. F. Zien (AIAA J) 1287
- Laser-induced impulse to a phenolic surface. Peter K. Wu and Peter E. Nebolsine (AIAA J, TN) 1101
- Transient temperatures in laminated composite conical shells due to aerodynamic heating. B. Basava Raju, Ramesh Chandra, and M. Subba Rao (AIAA J, SYN) 547

### Heat Pipes

- Axially grooved heat pipes: 1976. P. J. Brennan, E. J. Krolczek, H. Jen, and R. McIntosh (PS, V. 60) 3
- Comment on "Heat-pipe reactors for space power applications". Robert E. English (JE, TC) 191
- Reply by authors to R. E. English. W. A. Ranken and D. R. Koenig (JE, TC) 192
- Controllability analysis for passively and actively controlled heat pipes. A. M. Lehtinen (PS, V. 60) 344
- Effects of one-sided heat input and removal on axially grooved heat-pipe performance. Yasuhiro Kamotani (PS, V. 60) 23
- Excess liquid in heat-pipe vapor spaces. James E. Eninger and D. K. Edwards (PS, V. 60) 80
- Heat pipes for cooling of an electric motor. M. Groll, H. Krähling, and W. D. Münzel (JE) 363
- Instrument canister thermal control. W. Harwell, R. Haslett, and S. Ollendorf (PS, V. 60) 305
- Low-temperature phase-change material package. P. J. Brennan, H. J. Suelau, and R. McIntosh (PS, V. 60) 371
- Performance of gravity-assisted heat pipes operated at small tilt angles. Yasuhiro Kamotani (PS, V. 60) 96
- Precise satellite thermal control system using cascaded heat pipes. W. H. Steele and H. B. McKee (PS, V. 60) 325
- Re-entrant groove heat pipe. W. Harwell, W. B. Kaufman, and L. K. Tower (PS, V. 60) 131
- Thermal diode heat pipe for cryogenic applications. John A. Quadrini and Craig R. McCreight (PS, V. 60) 39
- Two-phase working fluids for the temperature range 100°-350°C. E. W. Saaski and L. Tower (PS, V. 60) 63
- Zero-G variable-conductance heat pipe using bubble pump injection. C. C. Roberts, Jr. (PS, V. 60) 112

### Radiation and Radiative Heat Transfer

- Absorption of solar radiation by alkali vapors. Arthur T. Mattick (PS, V. 61) 159
- Aerothermal environment for the Pioneer Venus multiprobe mission. James N. Moss, E. Vincent Zoby, Kenneth Sutton, and E. Clay Anderson (PS, V. 59) 3
- Analytical prediction of moisture absorption in composites. D. R. Tenney and J. Unnam (JA) 148
- Band model for calculating radiance and transmission of water vapor and carbon dioxide. Peter C. Sukanek and Larry P. Davis (PS, V. 59) 204
- Bidirectional reflectance of H<sub>2</sub>O cryofilms on specular and diffusing surfaces. A. M. Smith, B. E. Wood, and L. S. Fletcher (AIAA J) 510
- Comparison of calculated and measured rocket plume infrared radiation. R. D. Thorpe, W. J. Miller, and H. S. Pergament (PS, V. 59) 177
- Description and validation of a three-dimensional procedure for combustion chamber flows. M. M. M. Abou Ellail, A. D. Gosman, F. C. Lockwood, and I. E. A. Megahed (PS, V. 58) 163; (JE) 71
- Heat mirrored solar energy receivers. Philip O. Jarvinen (JE) 95
- Influence of refractive index on emittance: finite medium. B. F. Armaly (PS, V. 60) 151
- Infrared transmission of contaminated cryocooled optical windows. J. G. Pipes, J. A. Roux, A. M. Smith, and H. E. Scott (AIAA J) 984
- Linearized solution of conducting-radiating fins. Robert D. Karam and Robert J. Eby (AIAA J, TN) 536
