DOI: 10.2514/1.47356

This paper, which was published in the July–August 2009 issue of the *Journal of Guidance, Control, and Dynamics*, inadvertently had an error in an equation. The original equation was printed on page 1181 after “where p is the atmospheric density, h is the satellite attitude.” The corrected equation is printed below:

$$\xi = \frac{\mu}{p} (1 + 2e \cos \theta + e^2)$$
