

# SUBJECT INDEX

## AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

### *Aerodynamics*

- Accelerated iterative calculation of transonic nacelle flowfields. D. A. Caughey and Antony Jameson (AIAA J) 1474
- Aerodynamic effects of inviscid parallel shear flows. M. H. Williams, M. R. Chi, C. S. Ventres, and E. H. Dowell (AIAA J) 1159
- Aerodynamics of a finite aspect ratio jet flap at low flight speeds. F. L. Addessio and J. G. Skifstad (JA) 936
- Airfoil design by optimization. P. Ramamoorthy and K. Padmavathi (JA, EN) 219
- Applications of an improved nonlinear lifting-line theory. C. Edward Lan and Manuel H. Fasse (JA, EN) 404
- Approximate solution for the shape of flexible towing cables. Yahli Narkis (JA, EN) 923
- Bodies of revolution with wavy after bodies at large incidences. V. S. Holla and B. S. Varambally (JA, EN) 603
- Boundary-value problem of configurations with compressible free vortex flow. Guenter W. Brune and Paul E. Rubbert (AIAA J, TN) 1521
- Calculated heating on the afterbody nozzle of a hypersonic aircraft concept. N. A. Talcott Jr. and J. L. Hunt (JA, EN) 1247
- Calculation of lift induced drag from sparse span loading data. J. L. Lundry (JA, EN) 309
- Calculation of unsteady subsonic flow about harmonically oscillating wing/body configurations. R. Roos, B. Bennekens, and R. J. Zwaan (JA) 447
- Calculation of vortex breakdown locations for flow over delta wings. James D. Wilson (JA, EN) 102
- Cartesian mesh solution for axisymmetric transonic potential flow around inlets. T. A. Reyhner (AIAA J) 624
- Comment on "Experimental determination of improved aerodynamic characteristics utilizing biplane wing configurations". R. B. Addoms (JA, TC) 223
- Comment on "LTA aerodynamic data revisited." F. R. Goldschmied (JA, TC) 607
- Comment on "Simplified methods of predicting aircraft rolling moments due to vortex encounters." Alexander H. Flax (JA, TC) 1151
- Reply by author to A. H. Flax. Timothy M. Barrows (JA, TC) 1152
- Comments on "Experimental investigation of subsonic turbulent separated boundary layers on an airfoil." F. R. Goldschmied (JA, TC) 927
- Reply by authors to F. R. Goldschmied. H. C. Seetharam and W. H. Wentz Jr. (JA, TC) 928
- Comments on "Flow separation over axisymmetric after-body models." F. R. Goldschmied (JA, TC) 830
- Reply by authors to F. R. Goldschmied. Walter M. Presz Jr. and Edward T. Pitkin (JA, TC) 831
- Compressible laminar boundary layers with suction on swept and tapered wings. Kalle Kaups and Tuncer Cebeci (JA) 661
- Conductance of long inclined tubes in collisionless flow. D. C. Pack and K. Yamamoto (PS, V.51:PT I) 247
- Convective merging of vortex cores in lift-generated wakes. Vernon J. Rossow (JA) 283
- Convergence acceleration of relaxation solutions for transonic flow computations. Mohamed M. Hafez and H. K. Cheng (AIAA J) 329
- Coupled compressor-diffuser flow instability. E. M. Greitzer (JA) 233
- Dynamic response of nonuniform rotor blades. Demeter G. Fertis (JA, SYN) 417
- Effect of simulated jet engines on the flowfield behind a swept-back wing. Z. El-Ramly and W. J. Rainbird (JA) 343
- Effect of stiffening on sound transmission into a cylindrical shell in flight. L. R. Koval (AIAA J, SYN) 899
- Energy-turn-rate characteristics and turn performance of an aircraft. Kirit S. Yajnik (JA) 428
- Estimation of transonic aircraft aerodynamics to high angles of attack. John A. Axelson (JA) 553
- Evaluation of flight spoilers for vortex alleviation. Delwin R. Croom (JA, EN) 823
- Experimental investigation of subsonic turbulent separated boundary layers on an airfoil. H. C. Seetharam and W. H. Wentz Jr. (JA) 51
- Far-field matching method for transonic computations. A. Allen W. Chen, Lawrence J. Dickson, and Paul E. Rubbert (AIAA J) 1491
- Fluid mass associated with an axisymmetric parachute canopy. Paul C. Klimas (JA) 577
- Further consideration of "spilled" leading-edge vortex effects on dynamic stall. Lars E. Ericsson and J. Peter Reding (JA, EN) 601
- Goethert's rule with an improved boundary condition. Wilson C. Chin (AIAA J, TN) 1516
- Investigation of slender-body vortices. John E. Fidler, Richard G. Schwind, and Jack N. Nielsen (AIAA J) 1736
- Investigation of the near-field wake behind a full-scale test aircraft. An. Lawrence J. Mertaugh, Rustom B. Damania, and Frederick L. Paillet (JA) 894
- Lift corrections to transonic equivalence rule: Examples. H. K. Cheng (AIAA J) 366
- Load distributions on slender delta wings having vortex flow. John Kuhlman (JA, EN) 699
- Measurements of sound radiation from cavities at subsonic speeds. Yung H. Yu (JA) 838
- Minimum drag bodies of given length and base using Newtonian theory. J. Pike (AIAA J, SYN) 769
- Nacelle integration study on a Mach 2.2 supersonic cruise aircraft. H. R. Welge, R. L. Radkey, and P. A. Henne (JA) 1085
- Near free molecular heating of a blunt body of arbitrary geometry. Andrew Klavins (PS, V.51:PTI) 405
- Noise of swirling exhaust jets. H. Y. Lu, J. W. Ramsay, and D. L. Miller (AIAA J) 642
- Novel concept for subsonic inlet boundary-layer control. A. Brent A. Miller (JA, EN) 403
- Numerical evaluation of transonic wave drag. S. S. Desai, S. Viswanathan, and M. A. Ramaswamy (JA, EN) 215
- Numerical solution for viscous transonic flow. Wilson C. Chin (AIAA J, TN) 1360
- Numerical studies of three-dimensional breakdown in trailing vortex wakes. J. E. Hackett and P. F. Evans (JA) 1093
- On the not-so-slender wing theory. D. D. Liu (AIAA J, TN) 261
- Optimal flight-path-angle transitions in minimum-time airplane climbs. John V. Breakwell (JA) 782
- Oscillatory subsonic piecewise continuous kernel function method. E. Nissim and I. Lottati (JA, SYN) 515
- Parabolic-series method for transonic wedge flow. D. D. Liu (AIAA J, TN) 736
- Parameter identification technology used in determining in-flight airload parameters. Gary D. Park (JA) 251
- Prediction of elastic-airplane longitudinal dynamics from rigid-body aerodynamics. Robert L. Swaim and Donald G. Fullman (JA) 868
- Recent studies of subsonic vortex lift including parameters affecting stable leading-edge vortex flow. John E. Lamar (JA) 1205
- Reduced truck fuel consumption through aerodynamic design. Louis L. Steers and Edwin J. Saltzman (JE) 312
- Remarks on thin airfoil theory. Rajendra K. Bera (JA, EN) 508; (JA, ERR) 1248
- Reynolds number effects on boattail drag of wing-bodies. David E. Reubush (JA) 455
- Scramjet integration on hypersonic research airplane concepts. J. P. Weidner, W. J. Small, and J. A. Penland (JA) 460
- Similarity in vortex asymmetries over slender bodies and wings. Earl R. Keener and Gary T. Chapman (AIAA J, TN) 1370
- Simplified methods of predicting aircraft rolling moments due to vortex encounters. Timothy M. Barrows (JA) 434
- Spanwise cambered delta wing with leading-edge separation. Joe Fernandez and V. S. Holla (JA) 276
- Stability of a future generation spacecraft attitude control system. A. S. C. Sinha and A. Nadkarni (AIAA J, TN) 1502
- Subvortex technique for the close approach to a discretized vortex sheet. Brian Maskew (JA) 188
- Supersonic wave drag for nonplanar singularity distributions. Wilson C. Chin (AIAA J, TN) 884
- Theoretical aerodynamics of over-wing-blowing configurations. C. Edward Lan (JA, SYN) 517
- Transonic potential flow around axisymmetric inlets and bodies at angle of attack. T. A. Reyhner (AIAA J) 1299
- Unsteady aerodynamic considerations in the design of a drag-reduction spike. J. Peter Reding, Rolf A. Guenther, and Bernard J. Richter (JSR) 54
- Unsteady aerodynamics of slender delta wings at large angles of attack. L. E. Ericsson and J. P. Reding (JA, ERR) 832
- Variable thickness shear layer aerodynamics revisited. E. H. Dowell and M. R. Chi (AIAA J, TN) 745
- Vortex interactions in multiple vortex wakes behind aircraft. Donald L. Ciffone (JA) 440
- Vortex lattice prediction of subsonic aerodynamics of hypersonic vehicle concepts. Jimmy L. Pittman and James L. Dillon (JA, EN) 1017
- Wind-tunnel investigation of vortex refraction effects on aircraft noise propagation. R. W. Jeffery, E. G. Broadbent, and A. F. Hazell (JA) 737
- Wind-tunnel study of a circulation-controlled elliptical airfoil. T. A. Stevenson, M. E. Franke, W. E. Rhynard Jr., and J. R. Snyder (JA) 881
- Wing-jet interaction theory for USB configurations. A. C. Edward Lan and James F. Campbell (JA, ERR) 319

### *Cabin Environment, Crew Training and Life Support*

- Computer simulation of electro-optical viewing systems. W. Marvin Bunker (JA) 394
- Effect of display color on pilot performance and describing functions. Wendell D. Chase (JA) 333

Failure detection by pilots during automatic landing: Models and experiments. Eliezer G. Gai and Renwick E. Curry (JA) 135  
 Pool fire induced cockpit degradation. Anthony San Miguel (JA) 1133  
 Time-delay problems encountered in integrating the advanced simulator for undergraduate pilot training. D.R. Gum and W. B. Albery (JA) 327

### Civil Missions and Transportation

Dynamics of a slung load. L. Feaster, C. Poli, and Kirchhoff (JA) 115  
 Feasibility of modern airships: Preliminary assessment. Mark D. Ardema (JA) 1140  
 Guidance logic for spiral approaches. Walter M. Hollister and William C. Hoffman (JA) 972  
 Our amazing air transportation system. Raymond D. Kelly (JA, William Littlewood Memorial Lecture) 1157

### Configuration Design

Airfoil design by optimization. P. Ramamoorthy and K. Padmavathi (JA,EN) 219  
 Effects of wing bend on the aerodynamic characteristics of a low-aspect-ratio oblique wing. Edward J. Hopkins (JA, SYN) 225  
 Feasibility of modern airships: Preliminary assessment. Mark D. Ardema (JA) 1140  
 High-performance jet-V/STOL development. J. E. Waesche and D. Migdal (JA) 97  
 Mach 6 flowfield survey at the engine inlet of a research airplane. Charles B. Johnson and Pierce L. Lawing (JA, EN) 412  
 Nacelle integration study on a Mach 2.2 supersonic cruise aircraft. H. R. Welge, R. L. Radkey, and P. A. Henne (JA) 1085  
 Practical considerations regarding wing-in-ground effect aircraft. Eugene H. Handler (JH) 35  
 Recent studies of subsonic vortex lift including parameters affecting stable leading-edge vortex flow. John E. Lamar (JA) 1205  
 Reconfigurable redundancy management for aircraft flight control. J. A. Bosch and W. J. Kuehl (JA) 966  
 Reduced truck fuel consumption through aerodynamic design. Louis L. Steers and Edwin J. Saltzman (JE) 312  
 Spaceborne Earth applications ranging system (SPEAR). F. O. Vonbun, W. D. Kahn, P. D. Argentiero, and D. W. Koch (JSR) 492  
 Test results on computer graphics productivity for aircraft parts design and automated machining. Aaron Feder. (JA) 77  
 Trimmed drag considerations. Frederick H. Lutze (JA) 544  
 Vertical takeoff lift augmentation: the "sculptured deck" concept. Peter R. Greene (JA) 111

### Deceleration Systems

Altitude loss of parachute-load systems using clustered parachutes. K.-H. Fu and R. Koch (JA, SYN) 3  
 Amplifying ribbon extensometer for measuring film and fabric strain. Vernon L. Alley Jr. and Austin D. McHatton (JA) 194  
 Application of dimensional analysis to predict airplane stopping distance. Mahinder K. Wahi (JA) 209  
 Computer model of a fully deployed parachute. Colin Tory and Ray Ayres (JA) 675  
 Demonstration of procedure for designing impact-bag attenuation systems with predictable performance. F. J. Stimler (JA) 502  
 Documentation of the feasibility research on a destructible parachute. William B. Pepper and Robert J. Buxton (JA, EN) 1015  
 Fluid mass associated with an axisymmetric parachute canopy. Paul C. Klimas (JA) 577  
 Helium bubble survey of a parachute-opening flowfield using computer graphics techniques. Paul C. Klimas and David F. Rogers (JA) 952  
 Lifting parachute for very-low-altitude, very-high-speed deliveries. A. R. E. Rychnovsky (JA) 184  
 Optimal digital flight control for advanced fighter aircraft. R. Gran, H. Berman, and M. Rossi (JA) 32  
 Parachute cluster dynamic analysis. D. F. Wolf and H. R. Spahr (JA, SYN) 321  
 Parachute deployment process testing technique. Ralph J. Speelman III (JA, EN) 401  
 Prediction of the drag coefficient of a 20° conical ribbon parachute. Lajpat R. Utreja (JSR, SYN) 129  
 Terminal control of a gliding parachute in a nonuniform wind. A. E. Pearson, K. C. Wei, and R. M. Koopersmith (AIAA J) 916

### Economics

Comment on "Advanced subsonic transports - A challenge for 1990's." J. Mayers (JA, TC) 414  
 - - Reply by author to J. Mayers. Richard E. Black and John E. Stern (JA, TC) 416  
 Our amazing air transportation system. Raymond D. Kelly (JA, William Littlewood Memorial Lecture) 1157

### Flight Operations

All-weather automatic landing concepts and operations: Review of aerospace experience. Y. Negre (JA) 323  
 Convective merging of vortex cores in lift-generated wakes. Vernon J. Rossow (JA) 283  
 Digital data broadcast: An aid to area navigation. Donald W. Richardson, Miguel Huges, and Robert A. Elliott (JA) 533  
 Effect of display color on pilot performance and describing functions. Wendell D. Chase (JA) 333  
 Evaluation of flight spoilers for vortex alleviation Delwin R. Croom (JA, EN) 823  
 Helicopter response to an airplane's trailing vortex. Wayne R. Mantay, G. Thomas Holbrook, Richard L. Campbell, Robert L. Tomaine (JA) 357  
 Our amazing air transportation system. Raymond D. Kelly (JA, William Littlewood Memorial Lecture) 1157  
 Stability and control of maneuvering high-performance aircraft. Robert F. Stengel and Paul W. Berry (JA) 787

### Fuels and Fuel Systems

Laser diagnostic technique for the measurement of droplet and particle size distribution. A. J. Swithenbank, J. M. Beer, D. S. Taylor, D. Abbot, and G. C. McCreath (PS, V.53) 421  
 Optical emissions from burning jet fuel. R. M. F. Linford, C. F. Dillow, and T. M. Trumble. (JA) 481  
 Preliminary study of smoke formed in the combustion of various jet fuels. W. J. Dodds, J. E. Peters, M. B. Colket III, and A. M. Mellor (JE) 115

### General Aviation

All-weather automatic landing concepts and operations: Review of aerospace experience. Y. Negre (JA) 323  
 Comment on "Experimental determination of improved aerodynamic characteristics utilizing biplane wing configurations." R. B. Addoms (JA, TC) 223  
 Crashworthiness engineering of automobiles and aircraft: Progress and promise. R. J. Melosh (JA) 693  
 Digital data broadcast: An aid to area navigation. Donald W. Richardson, Miguel Hughes, and Robert A. Elliott (JA) 533  
 Lightning-hazard assessment: A first-pass probabilistic model. Lee McKague (JA,EN) 1022  
 Performance of plain-type spoilers applied to the GA(W)-1 wing. Danny H. Neuhart and Robert B. Oetting (JA,EN) 1019  
 Trimmed drag considerations. Frederick H. Lutze (JA) 544

### Ground Effect Machines

Control of lateral motions of the TERRAFOIL transit vehicle. J. E. Furman Jr., B. J. Hartz, and R. N. Clark (JSR) 118  
 Feasibility study of a hybrid airship operating in ground effect. D. E. Calkins (JA) 809  
 Practical considerations regarding wing-in-ground effect aircraft. Eugene H. Handler (JH) 35  
 Use of a water basin for ground effect testing of VTOL models. Dirk J. Renselaer (JA, SYN) 513

### Ground Support

Cost-effective built-in test for advanced aircraft electrical systems. James R. Perkins and John L. Jones (JA) 1221  
 Fog dispersal: A technology assessment. Alan I. Weinstein (JA) 38

### Guidance and Control

Analysis of optimal evasive maneuvers based on a linearized two-dimensional kinematic model. J. Shinar and D. Steinberg (JA) 795  
 Application of a model-based flight director design technique to a longitudinal hover task. Ronald A. Hess (JA) 265  
 Calculation of differential-turning barrier surfaces. Henry J. Kelley and Leon Lefton (JSR) 87  
 Comment on "Generalized inverse of a matrix: The minimization approach." Peter Murdoch (AIAA J, TC) 1216  
 Control of lateral motions of the TERRAFOIL transit vehicle. J. E. Furman Jr., B. J. Hartz, and R. N. Clark (JSR) 118  
 Convergence of gradient-type methods on singular parameter optimization problems. Bang-Dar Cheng and William F. Powers (AIAA J) 854  
 Coplanar tail-chase aerial combat as a differential game. A. W. Merz and D. S. Hague (AIAA J) 1419  
 Dynamics of linear systems with semiactive force generators. Ross R. Allen (AIAA J) 137  
 Fault-tolerant system reliability modeling/analysis. C. Johan Masreliez and Bo E. Bjurman (JA) 803  
 Guidance logic for spiral approaches. Walter M. Hollister and William C. Hoffman (JA) 972  
 Impact of CCV requirements on flight control system design. J. A. Boudreau (JA) 1051

- Lyapunov-designed MRAS-linearized error equation results. B. K. Colburn and J. S. Boland III (AIAA J, TN) 1337
- Maximum likelihood estimation of lift and drag from dynamic aircraft maneuvers. Kenneth W. Iliff (JA) 1175
- Minimum required capture radius in a coplanar model of the aerial combat problem. John V. Breakwell and Antony W. Merz (AIAA J) 1089
- Optimal digital flight control for advanced fighter aircraft. R. Gran, H. Berman, and M. Rossi (JA) 32
- Optimal switching criteria for two-position configuration controls. Louis N. Glaros Jr. (JSR, EN) 124
- Prediction of turbulent boundary layers at low Reynolds numbers. Richard H. Pletcher (AIAA J, ERR) 767
- Reconfigurable redundancy management for aircraft flight control. J. A. Bosch and W. J. Kuehl (JA) 966
- Spline method for nonlinear optimal thrust vector controls for atmospheric interceptor guidance. H. Schneider and P. B. Reddy (AIAA J, SYN) 449
- Stability and control of maneuvering high-performance aircraft. Robert F. Stengel and Paul W. Berry (JA) 787
- Stability of a future generation spacecraft attitude control system. A. S. C. Sinha and A. Nadkarni (AIAA J, TN) 1502
- Terminal control of a gliding parachute in a nonuniform wind. A. E. Pearson, K. C. Wei, and R. M. Koopersmith (AIAA J) 916
- Wind modeling and lateral control for automatic landing. W. E. Holley and A. E. Bryson Jr. (JSR) 65

### *Handling Qualities, Stability and Control*

- Aerodynamic coupling between lateral and longitudinal degrees of freedom. K. J. Orlik-Ruckemann (AIAA J) 1792
- Aerodynamic stability of tethered bodies. G. N. V. Rao (JA, EN) 315
- Airspeed control under wind shear conditions. David J. Moorhouse (JA, EN) 1244
- Airspeed stability under wind shear conditions. Malcolm J. Abzug (JA, EN) 311
- Analytical method for ride quality of flexible airplanes. An. Robert L. Swaim, David K. Schmidt, Philip A. Roberts, and Andrew J. Hinsdale (AIAA J) 4
- Application of a model-based flight director design technique to a longitudinal hover task. Ronald A. Hess (JA) 265
- Application of active controls technology to aircraft ride smoothing. Ira D. Jacobson and Maris Lapins (JA) 775
- Attitude instability in steady rolling and roll resonance. Tiberiu Hacker (JA) 23
- Comment on "Generalized inverse of a matrix: The minimization approach." Peter Murdoch (AIAA J, TC) 1216
- Comment on "Simplified methods of predicting aircraft rolling moments due to vortex encounters." Alexander H. Flax (JA, TC) 1151
- Reply by author to A. H. Flax. Timothy M. Barrows (JA, TC) 1152
- Dynamics of a slung load. L. Feaster, C. Poli, and R. Kirchhoff (JA) 115
- Effect of a nonconstant  $C_{m\alpha}$  on the stability of rolling aircraft. Bijan Davari and E. V. Laitone (JA) 1169
- Effect of display color on pilot performance and describing functions. Wendell D. Chase (JA) 333
- Finite-time noninertial adaptive control. Ljubomir T. Grujic (AIAA J) 354
- Handling quality criterion for heading control. Roger H. Hoh and Irving L. Ashkenas (JA) 142
- Helicopter response to an airplane's trailing vortex. Wayne R. Mantay, G. Thomas Holbrook, Richard L. Campbell, and Robert L. Tomaine (JA) 357
- Investigation of the influence of simulated turbulence on handling qualities. Ira D. Jacobson and Dinesh S. Joshi (JA) 272
- Lateral equilibrium of axisymmetrical swept wings aileron control vs geometric twist. Terrence A. Weissnar (JA) 122
- Maximum likelihood estimation of lift and drag from dynamic aircraft maneuvers. Kenneth W. Iliff (JA) 1175
- New concept of static stability and its flight testing in supersonic flight. A. Gottfried Sachs (JA) 874
- Oscillating delta wings with attached shock waves. D. D. Liu and W. H. Hui (AIAA J) 804
- Prediction of elastic-airplane longitudinal dynamics from rigid-body aerodynamics. Robert L. Swaim and Donald G. Fullman (JA) 868
- Prediction of jump phenomena in roll-coupled maneuvers of airplanes. A. A. Schy and M. E. Hannah (JA) 375
- Prediction of tethered-aerostat response to atmospheric turbulence. James DeLaurier (JA, EN) 407
- Proposed scheme for maneuver-dependent control of stability. A. Mohammad Nabih Wagdi (JA, EN) 1149
- Reconfigurable redundancy management for aircraft flight control. J. A. Bosch and W. J. Kuehl (JA) 966
- Root locus property of the extended bass algorithm. A. Ernest S. Armstrong (AIAA J, TN) 1659
- Simplified methods of predicting aircraft rolling moments due to vortex encounters. Timothy M. Barrows (JA) 434

- Software techniques for sensor redundancy management of flight control systems. E. Y. Shapiro (JA) 632
- Stability and control of maneuvering high-performance aircraft. Robert F. Stengel and Paul W. Berry (JA) 787
- Stability of the pilot-aircraft system in maneuvering flight. John R. Broussard and Robert F. Stengel (JA) 959
- System identification for nonlinear aerodynamic flight regimes. W. Earl Hall Jr. and Narendra K. Gupta (JSR) 73
- Trimmed drag considerations. Frederick H. Lutz (JA) 544

### *Helicopters*

- General rotor model system for wind-tunnel investigations. A. John C. Wilson (JA) 639
- Guidance logic for spiral approaches. Walter M. Hollister and William C. Hoffman (JA) 972
- Recent developments in rotary-wing aeroelasticity. Peretz P. Friedmann (JA, SA) 1027
- Stability of hingeless rotor blades in hover with pitch-link flexibility. Dewey H. Hodges and Robert A. Ormiston (AIAA J) 476
- Static aeroelastic twist effects on helicopter rotor-induced velocity. K. S. Nagaraja and G. Alvin Pierce (JA, EN) 217
- Study of helicopter rotor rotational noise. A. A. Lee, W. L. Harris, and S. E. Widnall (JA) 1126

### *Landing Dynamics*

- Airspeed control under wind shear conditions. David J. Moorhouse (JA, EN) 1244
- Airspeed stability under wind shear conditions. Malcolm J. Abzug (JA, EN) 311
- Application of dimensional analysis to predict airplane stopping distance. Mahinder K. Wahi (JA) 209
- Crashworthiness engineering of automobiles and aircraft: Progress and promise. R. J. Melosh (JA) 693
- Demonstration of procedure for designing impact-bag attenuation systems with predictable performance. F. J. Stimler (JA) 502
- Optimization of an oleo-pneumatic shock absorber of an aircraft during landing. C. Venkatesan (JA, EN) 822
- Wind modeling and lateral control for automatic landing. W. E. Holley and A. E. Bryson Jr. (JSR) 65

### *Lighter-than-Airships*

- Feasibility of modern airships: Preliminary assessment. Mark D. Ardema (JA) 1140
- Feasibility study of a hybrid airship operating in ground effect. D. E. Calkins (JA) 809
- Prediction of tethered-aerostat response to atmospheric turbulence. James DeLaurier (JA, EN) 407
- Tethered aerostats used in TCOM systems. E. M. Arnold (JA) 1239

### *Military Missions*

- Analysis of optimal evasive maneuvers based on a linearized two-dimensional kinematic model. J. Shinar and D. Steinberg (JA) 795
- Approximate solution for the shape of flexible towing cables. Yahli Narkis (JA, EN) 923
- Calculation of differential-turning barrier surfaces. Henry J. Kelley and Leon Lefton (JSR) 87
- Comments on the notion of "loft ceiling." J. Shinar, J. Levin, and A. Marari (JA, TC) 510
- Reply by author to Shinar, Levin, and Marari. H. J. Kelley (JA, TC) 512
- Coplanar tail-chase aerial combat as a differential game. A. W. Merz and D. S. Hague (AIAA J) 1419
- Estimation of weapon-radius vs maneuverability tradeoff for air-to-air combat. Henry J. Kelley and Leon Lefton (AIAA J) 145
- Lightning-hazard assessment: A first-pass probabilistic. Lee McKague (JA, EN) 1022
- Optimal trajectories for the dive-bombing mission of a fighter aircraft. U. R. Prasad and P. S. Subramanyam (JA, EN) 221

### *Navigation, Communication, and Traffic Control*

- Aggregate flow model for evaluating ATC planning strategies. Peter J. Wong, George J. Couluris, and David K. Schmidt (JA) 527
- Criteria relating wake vortex encounter hazard to aircraft response. Robert I. Sammonds, Glen W. Stinnett Jr., and William E. Larson (JA) 981
- Design of a demod/remod receiver operating on burst QPSK data. Charles L. Weber (PS, V. 54) 479
- Digital data broadcast: An aid to area navigation. Donald W. Richardson, Miguel Hughes, and Robert A. Elliot (JA) 533
- Estimation of weapon-radius vs maneuverability tradeoff for air-to-air combat. Henry J. Kelley and Leon Lefton (AIAA J) 145
- Flight experience with aircraft time-of-arrival control. Frank Neuman and Homer Q. Lee (JA) 104
- Optimal-path precision terrain-following system. James E. Funk (JA) 128

**Noise**

- Amplification of jet noise by a higher-mode acoustical excitation. Dietrich W. Bechert and Eberhard Pfizenmaier (AIAA J) 1268
- Broadband noise generation by a vortex model of cavity flow. Jay C. Hardin and Jean P. Mason (AIAA J) 632
- Coherence between internal and external noise generated by a gas turbine combustor. Warren C. Strahle, M. Muthukrishnan, and Douglas H. Neale (AIAA J) 1018
- Coherent structures in jet turbulence and noise. Ralph R. Armstrong, Alfons Michalke, and Helmut V. Fuchs (AIAA J) 1011
- Compact combustion noise suppressor. R. P. Gerend and B. N. Shivashankara (JA) 161
- Core noise measurements on a YF-102 turbofan engine. Meyer Reshotko, Allen Karchmer, Paul F. Penko, and Jack G. McArdle (JA, SYN) 611
- Effect of stiffening on sound transmission into a cylindrical shell in flight. L. R. Koval (AIAA J, SYN) 899
- Effects of external boundary-layer flow on jet noise in flight. V. Sarohia and P. F. Massier (AIAA J) 659
- Evaluation of proposed standards for aircraft flyover noise analysis systems. D. J. Stouder and J. C. McCann (JA) 713
- Fan acoustics signatures in an anechoic wind tunnel. Donald A. Dietrich, Marcus F. Heidmann, and John M. Abbott (JA) 1109
- Fan stage redesigned to decrease stator lift fluctuation noise. James H. Dittmar and Richard P. Woodward (JA) 746
- Flight effects on JTED engine jet noise measured in a 40 × 80 tunnel. Frank G. Strout and Adolph Atencio Jr. (JA) 762
- High-frequency broadband rotor noise. A. R. George and Y. N. Kim (AIAA J) 538
- Impedance theory and measurements on porous acoustic liners. Andrew B. Bauer (JA) 720
- Improved correlation for the broadband noise of high-speed fans. An. R. B. Ginder and D. R. Newby (JA) 844
- Integral equation methods in duct acoustics for nonuniform ducts with variable impedance. Dennis W. Quinn (AIAA J, TN) 278
- Jet noise characteristics of unsuppressed duct burning turbofan exhaust system. A. B. Packman, H. Kozlowski, and O. Gutierrez (JA) 227
- Jet noise source distribution from far-field cross correlations. L. Maestrello and Chen-Huei Liu (AIAA J, SYN) 771
- Measurements of plane-wave noise radiating from a jet nozzle. R. A. Pinker and W. D. Bryce (AIAA J, SYN) 133
- Measurements of sound radiation from cavities at subsonic speeds. Yung H. Yu (JA) 838
- Modal synthesis for combined structural-acoustic systems. Joseph A. Wolf Jr. (AIAA J, TN) 743
- Noise and surface pressure response of an airfoil to incident turbulence. Robert W. Paterson and Roy K. Amiet (JA) 729
- Noise characteristics of a can-type combustor. Belur N. Shivashankara and Robert W. Crouch (JA) 751
- Noise generated by boundary-layer interaction with perforated acoustic liners. A. B. Bauer and R. L. Chapkis (JA) 157
- Noise produced by turbulent flow into a propeller or helicopter rotor. R. K. Amiet (AIAA J, SYN) 307
- Nonlinear sonic-boom propagation including the asymmetric effects. A. Ferri, L. Ting, and R. W. Lo (AIAA J) 653
- Nozzle exit flow profile shaping for jet noise reduction. R. W. Crouch, C. L. Coughlin, and G. C. Paynter (JA) 860
- Outlook for simulation of forward flight effects on aircraft noise. The. D. G. Crighton, J. E. Ffowcs Williams, and I. C. Cheeseman (JA) 1117
- Over-the-wing target-type thrust reverse aeroacoustic characteristics. Michael D. Falarski (JA) 757
- Predicting the acoustics of arbitrarily shaped bodies using an integral approach. William A. Bell, William L. Meyer, and Ben T. Zinn (AIAA J) 813
- Prediction and measurement of direct combustion noise in turbopropulsion systems. D. C. Mathews and N. F. Rekos Jr. (JA) 850
- Predictions of aeroacoustic characteristics of coaxial jets. C. Y. Chen (AIAA J, SYN) 297
- Preface and workshop report for the 3rd AIAA Aeroacoustics Conference. Warren C. Strahle (JA) 705
- Sonic boom theory: Its status in prediction and minimization. Christine M. Darden (JA) 569
- Sound radiation from aircraft wheel-well/landing-gear configurations. Hanno H. Heller and Werner M. Dobrzynski (JA) 768
- Sound radiation from ducts for the case of low Mach number. M. M. Wabnah and W. C. Strahle (AIAA J) 553
- Structural verification of a fiberglass/polymide acoustic inlet for the DC-10. William R. Dunbar (JA) 595
- Study of helicopter rotor rotational noise. A. A. Lee, W. L. Harris, and S. E. Widnall (JA) 1126
- Wave-envelope technique for wave propagation in nonuniform ducts. A. J. E. Kaiser and A. H. Nayfeh (AIAA J) 533
- Wind-tunnel investigation of vortex refraction effects on aircraft noise propagation. R. W. Jeffery, E. G. Broadbent, and A. F. Hazell (JA) 737

**Performance**

- Aerodynamic stability of tethered bodies. G. N. V. Rao (JA, EN) 315
- Calculation of differential-turning barrier surfaces. Henry J. Kelley and Leon Lefton (JSR) 87
- Ceramic thermal-barrier coatings for cooled turbines. Curt H. Liebert and Francis S. Stepka (JA) 487
- Comment on "Advanced subsonic transports - A challenge for the 1990's." J. Mayers (JA, TC) 414
- - Reply by author to J. Mayers. Richard E. Black and John A. Stern (JA, TC) 416
- Comments on the notion of "loft ceiling." J. Shinar, J. Levin, and A. Marari (JA, TC) 510
- - Reply by author to Shinar, Levin, and Marari. H. J. Kelley (JA, TC) 512
- Effects of wind bend on the aerodynamic characteristics of a low-aspect-ratio oblique wing. Edward J. Hopkins (JA, SYN) 225
- Estimation of weapon-radius vs maneuverability tradeoff for air-to-air combat. Henry J. Kelley and Leon Lefton (AIAA J) 145
- Extended energy management methods for flight performance optimization. Anthony J. Calise (AIAA J) 314
- Minimum required capture radius in a coplanar model of the aerial combat problem. John V. Breakwell and Antony W. Merz (AIAA J) 1089
- Optimal flight-path-angle transitions in minimum-time airplane climbs. John V. Breakwell (JA) 782
- Performance of plain-type spoilers applied to the GA(W)-1 wing. Danny H. Neuhart and Robert B. Oetting (JA, EN) 1019
- Prediction of tethered-aerostat response to atmospheric turbulence. James DeLaurier (JA, EN) 407
- Robust code for constrained optimization. Donald A. Pierre (AIAA J, TN) 877
- Wind-tunnel study of a circulation-controlled elliptical airfoil. T. A. Stevenson, M. E. Franke, W. E. Rhynard Jr., and J. R. Snyder (JA) 881

**Powerplant Design**

- Expendable gasifier: A cost approach to turbine power. The H. F. Due Jr. and D. C. Hall (JA) 1234
- Experimental and analytical study of an axisymmetric thrust augmentor. Harry R. Skoblenick and Philip G. Hill (JA) 474
- Fan stage redesigned to decrease stator lift fluctuation noise. James H. Dittmar and Richard P. Woodward (JA) 746
- Integral equation methods in duct acoustics for nonuniform ducts with variable impedance. Dennis W. Quinn (AIAA J, TN) 278
- Interactions between screech tones and ejector performance. Brian Quinn (JA) 467
- Jet noise characteristics of unsuppressed duct burning turbofan exhaust system. A. B. Packman, H. Kozlowski, and O. Gutierrez (JSR) 227
- Measurements of a plane-wave noise radiating from a jet nozzle. R. Pinker and W. D. Bryce (AIAA J, SYN) 133
- Nacelle integration study on a Mach 2.2 supersonic cruise aircraft. H. R. Welge, R. L. Radkey, and P. A. Henne (JA) 1085
- Performance of annular combustor-dump diffusers. C. R. Fishenden and S. J. Stevens (JA) 60
- Predictions of aeroacoustic characteristics of coaxial jets. C. Y. Chen (AIAA J, SYN) 297
- Structural verification of a fiberglass/polymide acoustic inlet for the DC-10. William R. Dunbar (JA) 595
- Thrust augmenting ejector analogy. Hermann Viets (JA, EN) 409

**Propeller and Rotor Systems**

- Characteristic wake data for local blade propeller stalling. Jean Rebont, Christian Maresca, and Daniel Favier (JA) 56
- Comment on "Potential flow about impulsively started rotors." August F. Lehman (JA, TC) 318
- - Reply by author to A. F. Lehman. J. M. Summa (JA, TC) 319
- Dynamic response of nonuniform rotor blades. Demeter G. Fertis (JA, SYN) 417
- Dynamics of an elastic seesaw rotor. Norimichi Kawakami (JA) 291
- Effect of modified aerodynamic strip theories on rotor blade aeroelastic stability. Peretz Friedmann and C. Yuan (AIAA J) 932
- Effects of radial appendage flexibility on shaft whirl stability. F. J. Wilgen and A. L. Schlack Jr. (AIAA J, TN) 1531
- Nonlinear flap-lag-axial equations of a rotating beam. K. R. V. Kaza and R. G. Kvaternik (AIAA J, TN) 871
- Recent developments in rotary-wind aeroelasticity. Peretz P. Friedmann (JA, SA) 1027
- Rotor/generator isolation for wind turbines. Louis Mirandy (JE) 180

**Simulation**

- Air pollution model parameter estimation using simulated LIDAR data. James F. Kibler and John T. Suttles (AIAA J) 1381
- AWAVS: An engineering simulator for design of visual flight training simulators. W. S. Chambers (JA) 1060

- Computer simulation of electro-optical viewing systems. W. Marvin Bunker (JA) 394
- Difference thresholds for judgments of sink rate during the flare. Everett Palmer and John Petitt (JA) 540
- Effect of display color on pilot performance and describing functions. Wendell D. Chase (JA) 333
- Investigation of the influence of simulated turbulence on handling qualities. Ira D. Jacobson and Dinesh S. Joshi (JA) 272
- Measure of psychological realism on a visual simulator. A. Everett Palmer and John Petitt (JA, SYN) 421
- Spaceborne Earth applications ranging system (SPEAR). F. O. Vonbun, W. D. Kahn, P. D. Argentiero, and D. W. Koch (JSR) 492
- Streamtube analysis of a hydrogen-burning scramjet exhaust and simulation technique. N. A. Talcott Jr. and J. L. Hunt (JA, EN) 918
- Time-delay problems encountered in integrating the advanced simulator for undergraduate pilot training. D. R. Gum and W. B. Albery (JA) 327
- Three velocity component, nonhomogeneous atmospheric boundary-layer turbulence modeling. M. Perlmutter, W. Frost, and G. H. Fichtl (AIAA J) 1444
- Thresholds to roll motion in a flight simulator. A. J. Gundry (JA) 624

### Structural Design (including Loads)

- Actively cooled airframe structures for high-speed flight. Robert J. Nowak and H. Neale Kelly (JA) 244
- Blast from moving guns. Dennis G. Mabey and Derek S. Capps (JA) 687
- C-5A active load alleviation system. T. E. Disney (JSR) 81
- Comment on "Generalized inverse of a matrix: The minimization approach." Peter Murdoch (AIAA J, TC) 1216
- Comment on "Simplified methods of predicting aircraft rolling moments due to vortex encounters." Alexander H. Flax (JA, TC) 1151
- Reply by author to A. H. Flax. Timothy M. Barrows (JA, TC) 1152
- Design curve for beams under impact loading. Pei Chi Chou and William J. Flis (AIAA J, SYN) 455
- Fatigue analysis of mechanically fastened joints utilizing PSD loads. Bharat M. Shah and J. L. Russ (JA) 1064
- Lateral equilibrium of asymmetrical swept wings: Aileron control vs geometric twist. Terrence A. Weisshaar (JA) 122
- Minimum-weight design of stiffened cylindrical panels under combined loads. George J. Simitzes and Izhak Sheinman (JA, SYN) 419
- Nonlinear dynamical theory for heterogeneous, anisotropic, elastic rods. A. G. A. Hegemier and S. Nair (AIAA J) 8
- Optimal control alleviation of tilting propertor gust response. Wayne Johnson (JA) 301
- Parameter identification technology used in determining in-flight airload parameters. Gary D. Park (JA) 251
- Prediction of fatigue crack growth at cold-worked fastener holes. J. B. Chang (JA) 903
- Scatter factor in the reliability assessment of aircraft structures. The A. M. Freudenthal (JA) 202
- Simplified methods of predicting aircraft rolling moments due to vortex encounters. Timothy M. Barrows (JA) 434
- Structural response to detonating high-explosive projectiles. Marcus J. Jacobson, Jun R. Yamane, and Jack Brass (JA) 816
- Surface pressure fluctuation generated by a jet impinging on a curved plate. Chi-Ming Ho, Dennis A. Plocher, and Howard L. Leve. (AIAA J, TN) 1348
- Thermostuctural and material considerations in the design of the F-14 aircraft transparencies. S. Z. Fixler (JA) 257

### Structural Materials

- Early detection of fatigue damage in composite materials. M. J. Salkind (JA, ERR) 319
- Experimental investigation on hybrid rocket engine wing highly aluminized fuel. Mendrik R. Lipi (JSR) 539
- New titanium alloy with improved fracture toughness: Ti-4.5Al-5Mo-1.5Cr. A. R. G. Berryman, J. C. Chesnutt, F. H. Froes, and J. C. Williams (JA) 1182
- Structural materials research for lighter-than-air vehicles. Vernon L. Alley Jr. and Austin D. McHatton (JA) 239
- Structural verification of a fiberglass/polymide acoustic inlet for the DC-10. William R. Dunbar (JA) 595
- Temperature/humidity effects on the strength of graphite/epoxy laminates. R. M. Verette (JA) 90

### Subsystem Design

- Consideration of clogging in boundary-layer control system design. Peter Crimi (JA, EN) 825
- Cost-effective built-in test for advanced aircraft electrical systems. James R. Perkins and John L. Jones (JA) 1221

- Electrochemical battery trends for aircraft and missile applications. Wayne S. Bishop (JA, EN) 922
- Free surface rotational flow around a ducted propeller. Roland Maria-Sube (JA, ERR) 320
- Minimum-weight design of stiffened cylindrical panels under combined loads. George J. Simitzes and Izhak Sheinman (JA, SYN) 419
- Optimization of an oleo-pneumatic shock absorber of an aircraft during landing. C. Venkatesan (JA, EN) 822
- Test results on computer graphics productivity for aircraft parts design and automated machining. Aaron Feder (JA) 77

### Testing, Flight and Ground

- Aeroheating model advancements featuring electroless metallic plating. C. J. Stalmach Jr. and W. D. Goodrich (JSR) 600
- Analytical determination of blockage effects in a perforated-wall transonic wind tunnel. E. M. Kraft and C. F. Lo (AIAA J) 511
- Application of active controls technology to aircraft ride smoothing. Ira D. Jacobson and Maris Lapins (JA) 775
- Comment on "LTA aerodynamic data revisited." F. R. Goldschmied (JA, TC) 607
- Comparison of wind-tunnel and flight-test heat-transfer measurements on a pylon-mounted store. R. K. Matthews and J. C. Key Jr. (JA) 565
- Computer-controlled system for the investigation of the flow behind wings. Z. M. El-Ramly and W. J. Rainbird (JA) 668
- Cryogenic hydrogen as a wind tunnel test gas. Richard C. Haut and Jerry B. Adcock (JA, SYN) 1155
- Effect of simulated jet engines on the flowfield behind a swept-back wing. Z. El-Ramly and W. J. Rainbird (JA) 343
- Effects of scaled heatshield tile misalignment on orbiter boundary-layer transition. W. D. Goodrich and C. J. Stalmach Jr. (JSR, EN) 638
- Electro-optical techniques for diesel engine research. A. E. Lennert, R. E. Sows, R. A. Belz, W. H. Goethert, and H. T. Bentley (PS, V. 53) 629
- Evaluation of proposed standards for aircraft flyover noise analysis systems. D. J. Stouder and J. C. McCann (JA) 713
- Experimental missile pitch- and roll-damping characteristics at large angles of attack. Bob L. Useton and Leroy M. Jenke (JSR) 241
- Flow survey of the vortex wake behind wings. Z. El-Ramly and W. J. Rainbird (JA) 1102
- General rotor model system for wind-tunnel investigations. A. John C. Wilson (JA) 639
- Interference-free wind-tunnel flows by adaptive-wall technology. W. R. Sears, R. J. Vidal, J. C. Erickson Jr., and A. Ritter (JA) 1042
- Investigation of minimum operating temperatures for cryogenic wind tunnels. Robert M. Hall and Edward J. Ray (JA) 560
- Measurement of post-separated flowfields on airfoils. H. C. Seetharam, W. H. Wentz Jr. and J. K. Walker (JA, EN) 95
- New concept of static stability and its flight testing in supersonic flight. A. Gottfried Sachs (JA) 874
- Optimal periodic proof test based on cost-effective and reliability criteria. J. -N. Yang (AIAA J) 402
- Optical technique for measuring vibratory motion in rotating machinery. An. Fritz Bien and Morton Camac (AIAA J) 1257
- Parameter identification technology used in determining in-flight-airload parameters. Gary D. Park (JA) 251
- Pool fire induced cockpit degradation. Anthony San Miguel (JA) 1133
- Reynolds number effects on boattail drag of wing-bodies. David E. Reubush (JA) 455
- Strain gage calibration of a complex wing. Jerald M. Jenkins, Albert E. Kuhl, and Alan L. Carter (JA) 1192
- Structural wing-fuselage static interaction by a combined method of tests and numerical analyses. I. Kalev, M. Baruch, and E. Blass (JA) 1186
- System identification for nonlinear aerodynamic flight regimes. W. Earl Hall Jr. and Narendra K. Gupta (JSR) 73
- Use of a water basin for ground effect testing of VTOL models. Dirk J. Renselaer (JA, SYN) 513
- Vortex interactions in multiple vortex wakes behind aircraft. Donald L. Ciffone (JA) 440
- Wind-tunnel wall interference effects on a supercritical airfoil at transonic speeds. James A. Blackwell Jr. and Gerald A. Pounds (JA) 929

### Vibration

- Adjustable spring rate suspension system. An. T. E. Shoup and G. E. Simmonds (AIAA J, TN) 865
- Coincidence problem and combination resonance. F. C. L. Fu and S. Nemat-Nasser (AIAA J) 1785
- Comment on "Orthogonality of generally normalized eigenvectors and eigenrows." P. C. Hughes (AIAA J, TC) 1216
- Dynamic response of nonuniform rotor blades. Demeter G. Fertis (JA, SYN) 417
- Dynamics of linear systems with semiactive force generators. Ross R. Allen (AIAA J) 137

- Effect of stiffening on sound transmission into a cylindrical shell in flight. L. R. Koval (AIAA J, SYN) 899
- Eigenrelations in structural dynamics. Jean-Guy Beliveau (AIAA J, TN) 1039
- Higher order theory for vibrations of thick plates. A. V. Krishna Murty (AIAA J, TN) 1823
- Influence of modeling and blade parameters on the aeroelastic stability of a cantilevered rotor. Peretz Friedmann (AIAA J) 149
- Optimal control alleviation of tilting propeller gust response. Wayne Johnson (JA) 301
- Orthogonality of generally normalized eigenvectors and eigenrows. Ibrahim Fawzy (AIAA J, TN) 276
- Random decrement technique for modal identification of structures. S. R. Ibrahim (JSR) 696
- Random vibration peaks in rotorcraft and the effects of nonuniform gusts. G. H. Gaonkar (JA) 68
- Rotor/generator isolation for wind turbines. Louis Mirandy (JE) 180
- Scaling a discrete structural model to match measured modal frequencies. J. E. Taylor (AIAA J, TN) 1647
- Subsonic transient lifting surface aerodynamics. T. H. Burkhart (JA) 44
- Unsteady aerodynamics of slender delta wings at large angles of attack. L. E. Ericsson and J. P. Reding (JA, ERR) 832

## ENERGY

### Alternate Fuels

- Establishment of a space manufacturing facility. Gerald W. Driggers and Jonathan E. Newman (PS, V. 57) 135

### Batteries

- Electrochemical battery trends for aircraft and missile applications. Wayne S. Bishop (JA, EN) 922
- Present trends in space batteries for the 1980's. R. L. Kerr and D. F. Pickett (JE) 347

### Combustion Efficiency

- Laser Raman thermometry experiments in simulated combustor environments. Alan C. Eckbreth (PS, V. 53) 517
- Laser scattering diagnostics for temperature and concentration measurements. D. L. Hartley (PS, V. 53) 467
- Methods for measuring turbulence in flames. R. Gunther (PS, V. 53) 103
- Propellant burning rate uniformity identified by ultrasonic acoustic emissions. Leonard H. Caveny, A. Jaan Saber, and Martin Summerfield (JSR) 434
- Sampling and measuring for NO<sub>2</sub> in combustion systems. N. P. Cernansky (PS, V. 53) 83
- Swirl flows in combustion: A review. David G. Lilley (AIAA J, SA) 1063
- Swirling flow combustion. George D. Lewis, James H. Shadowen, and Edward B. Thayer (JE) 201

### Conservation

- Energy: An emerging role for aerospace. John S. Foster Jr. (JE) 3
- Energy-efficient pump utilization. Gary S. Settles, Joseph T. Hamrick, William J. Barr, Martin Summerfield, and Martin Gunn (JE) 65
- Reduced truck fuel consumption through aerodynamic design. Louis L. Steers and Edwin J. Saltzman (JE) 312

### Cryogenics

- Isotope effect on the formation of hydrogen cluster beams. W. Obert (PS, V. 51: PT II) 1153
- Superconducting properties of Pb-Sn-In alloys directionally solidified abroad skylab. W. T. Anderson Jr. and J. L. Reger (PS, V. 52) 567

### Geothermal

- Finite-element solutions for geothermal systems. Jay C. Chen and James E. Conel (JE) 364

### MHD

- Analysis of the seeded combustion gas boundary layer near a cold electrode. Ken Okazaki, Yasuo Mori, Kazutomo Ohtake, and Kunio Hijikata (AIAA J) 1778
- Experimental investigations and stochastic modeling of fluctuations in an MHD generator. M. H. Scott (JE) 277
- MHD combustor effluent chemistry measurements using Raman scattering. A. A. Boiarski and R. H. Barnes (JE, TN) 263

- MHD power generation with fully ionized seed. H. Yamasaki and S. Shioda (JE) 301
- Stability of slag in turbulent MHD boundary layers. William S. Saric, Kenell J. Touryan, and Melvin R. Scott (JE) 108
- Subsonic MHD-diffuser performance with high blockage. Ezzat D. Doss (JE) 370

### Microwaves

- Alternative approaches to space-based power generation. Daniel L. Gregory (JE) 85
- On the feasibility of small power satellites. K. Eric Drexler and T. A. Heppenheimer (JE, TN) 200
- Perspectives on satellite solar power. Peter E. Glaser (JE) 75
- Photovoltaic, gravitationally stabilized, solid-state satellite solar power station. L. J. Cantafio, V. A. Chobotov, and M. G. Wolfe (JE) 352

### Nuclear Fission

- Background gas penetration of gas mixtures into underexpanded jets. T. L. Deglow (PS, V. 51: PT I) 93
- Formation and detection of high-energy cluster beams. O. F. Hagen, W. Henkes, and U. Pfeiffer (PS, V. 51: PT II) 1123
- Gaseous-fuel reactor systems for aerospace applications. Karlheinz Thom and Francis C. Schenck (JE, SA) 267
- Heat-pipe reactors for space power applications. Daniel R. Koenig, William A. Ranken, and Ernest W. Salmi (JE) 237
- Investigation of nozzles, jets, and channels for the separation of heavy isotopes. Ronald L. Fox and Roger R. Eaton (PS, V. 51: PT I) 35
- Isotope effect on the formation of hydrogen cluster beams. W. Obert (PS, V. 51: PT II) 1153
- Isotope separation by the velocity-slip process. P. Raghuraman, P. Davidovits, and J. B. Anderson (PS, V. 51: PT I) 79
- Separation nozzle—an aerodynamic device for large-scale enrichment of uranium-235. The. E. W. Becker, P. Bley, U. Ehrfeld, and W. Ehrfeld (PS, V. 51: PT I) 3
- Transport properties in nonisothermal rarefied plasmas. Wallace F. Walters (PS, V. 51: PT II) 991

### Nuclear Fusion

- Hot plasma-wall interactions for fusion reactors. R. A. Gross, J. Trier, N. Panayotou, B. Jensen, and B. Feinberg (JE) 196
- Subsonic gas target. P. C. Stangeby and V. Chatoorgoon (JE) 387

### Photovoltaic Power

- Alternative approaches to space-based power generation. Daniel L. Gregory (JE) 85
- Construction of satellite solar power stations from nonterrestrial materials. Brian O'Leary (JE) 155
- Economic viability of pursuing a space power system concept. George A. Hazelrigg Jr. (JE) 93
- Low-gravity homogenization and solidification of aluminum antimonide. Choh-Yi Ang and Lewis L. Lacy (PS, V. 52) 523
- Outdoor weathering performance of solar electric generators. Carl R. Maag Jr. (JE) 376
- Perspectives on satellite solar power. Peter E. Glaser (JE) 75
- Photovoltaic, gravitationally stabilized, solid-state solar power station. L. J. Cantafio, V. A. Chobotov, and M. G. Wolfe (JE) 352
- Sawtooth coverslide: A new means of coupling light into solar cells. The. A. Meulenberg Jr. (JE) 151
- Ultralight solar array (ULP) for future communication satellites. D. E. Koelle and H. v. Bassewitz (PS, V. 55) 151

### Rotating Machinery

- Analysis of transonic cascade flow using conformal mapping and relaxation techniques. David C. Ives and John F. Liutermoza (AIAA J) 647
- Effects of radial appendage flexibility on shaft whirl stability. F. J. Wilgen and A. L. Schlack Jr. (AIAA J, TN) 1531
- Entry region heat transfer in rotating radial tubes. Darryl E. Metzger and Robert L. Stan (JE) 297
- Small disturbances in turbomachine annuli with swirl. J. L. Kerrebrock (AIAA J) 794
- Spacecraft attitude control using a magnetically suspended momentum wheel. R. C. Quartararo (PS, V. 55) 87
- Temperature distribution study in a cooled radial inflow turbine rotor. A. Hamed, E. Baskharone, and W. Tabakoff (JA) 173

### Solar Thermal Power

- Alternative approaches to space-based power generation. Daniel L. Gregory (JE) 85
- Construction of satellite solar power stations from nonterrestrial materials. Brian O'Leary (JE) 155
