Chronological Index

A82-018 Thermal Decomposition Kinetics of Polybutadiene Binders. K. N. Ninan and K. Krishnan, *Vikram Sarabhai Space Center* (JSR **19**, 1, p. 92) Engineering Note
Technical Comment by E. W. Price, *Georgia Institute of Technology* (JSR **20**, 3, p. 320)

A82-106 Analysis of Combustion in Recirculating Flow for Rocket Exhaust in Supersonic Streams. A. C. H. Mace, *Ministry of Defence*; and N. C. Markatos, D. B. Spalding, D. G. Tatchell, *CHAM Ltd.* (JSR **19**, 6, p. 557) Article based on AIAA Paper 81-1386 Errata (JSR, **20**, 3, p. 320)

A83-001 Optimization Using Sensitivity Analysis. Max D. Musgrove and James M. Reed, *Boeing Aerospace Company*; and Charles C. Hauser III, *Westinghouse Plant Apparatus Division* (JSR **20**, 1, p. 3) Synoptic based on AIAA Paper 81-0516 CP811

A83-002 Dynamic Wind Tunnel Tests of the Simulated Shuttle External Cable Trays. K. J. Orlik-Ruckemann, *National Recearch Council of Canada*; and J. G. LaBerge, *National Research Council of Canada* (JSR **20**, 1, p. 5) Article based on AIAA Paper 81-1879 CP816

A83-003 Deployment of a Spin Parachute in the Altitude Region of 260,000 Ft. Mendel N. Silbert, *NASA Goddard Space Flight Center* (JSR **20**, 1, p. 11) Article based on AIAA Paper 81-1942

A83-004 Space Shuttle Entry Aerodynamic Comparisons of Flight 1 with Preflight Predictions. Paul O. Romere, David B. Kanipe and James C. Young, *NASA Lyndon B. Johnson Space Center* (JSR **20**, 1, p. 15) Article based on AIAA Paper 81-2476

A83-005 Space Shuttle Orbiter Charging. I. Katz and D. E. Parks, *S-CUBED* (JSR **20**, 1, p. 22) Article based on AIAA Paper 82-0119

A83-006 Geosynchronous Environment for Severe Spacecraft Charging. M. S. Gussenhoven, *Boston College*; and E. G. Mullen, *Air Force Geophysics Laboratory, Hanson Air Force Base* (JSR **20**, 1, p. 26) Article based on AIAA Paper 82-0271

A83-007 Analysis of Secondary Flows for Tube-Launched Rocket Configurations. H. H. Korst, *The University of Illinois at Urbana*; and John J. Bertin, *The University of Texas at Austin* (JSR **20**, 1, p. 35) Article based on AIAA Paper 81-1222

A83-008 Erosive Burning of Composite Solid Propellants: Mechanism, Correlation, and Grain Design Applications. R. Arora, X. Wu, F. X. White and K. K. Kuo, *The Pennsylvania State University* (JSR **20**, 1, p. 43) Article based on AIAA Paper 81-1581

A83-009 Prediction of a Propellant Tank Pressure History Using State Space Methods. Paul N. Estey, David H. Lewis Jr. and Maureen Connor, *Jet Propulsion Laboratory, California Institute of Technology* (JSR **20**, 1, p. 49) Article

A83-010 Effects of Plume Impingement on a Momentum Bias Communications Satellite. S. M. Fox, *RCA Corporation* (JSR **20**, 1, p. 55) Article based on AIAA Paper 81-1383

A83-011 Innovative Air Data System for the Space Shuttle Orbiter. C. David Pruett, Henry Wolf and Michael L. Heck, *Analytical Mechanics Associates*; and Paul M. Siemers III, *NASA Langley Research Center* (JSR **20**, 1, p. 61) Article based on AIAA Paper 81-2455

A83-012 Specular Effects of Shuttle Orbiter Radiators on a Typical Payload. L. D. Turner, W. R. Humphries and J. W. Littles, *NASA Marshall Space Flight Center* (JSR **20**, 1, p. 70) Article based on AIAA Paper 81-1074

A83-013 Inert Gas Thruster Technology. Harold R. Kaufman, Raymond S. Robinson and Donald C. Trock, *Colorado State University* (JSR **20**, 1, p. 77) Article based on AIAA Paper 81-0721

A83-014 Electromagnetic Noise from an Ion Engine System. I. Kudo Electrotechnical Laboratory (Japan), *K. Machida*, Y. Toda and H. Murakami, *Electrotechnical Laboratory (Japan)* (JSR **20**, 1, p. 84) Article based on AIAA Paper 81-0724

A83-015 Research in Structures and Materials for Future Space Transportation Systems--An Overview. H. Neale Kelly, Donald R. Rummler and L. Robert Jackson, *NASA Langley Research Center* (JSR **20**, 1, p. 89) Article based on AIAA Paper 79-0859 CP797

A83-016 Subsonic Rolling Moments for Wing Roll Control of a Cruciform Missile Model. V. G. Sekaran, *The Queen's University of Belfast* (JSR **20**, 2, p. 97) Synoptic

A83-017 Pressure Measurements of a Rotating Liquid for Impulsive Coning Motion. William P. D'Amico Jr., William G. Beims and Thomas H. Rogers, *Ballistic Research Laboratory, Aberdeen Proving Ground* (JSR **20**, 2, p. 99) Synoptic based on AIAA Paper 82-0246

A83-018 Computation of Hypersonic Viscous Flow over a Body with Mass Transfer and/or Spin. M. D. Kim and C. H. Lewis, *Virginia Polytechnic Institute and State University* (JSR **20**, 2, p. 101) Article based on AIAA Paper 81-1044

A83-019 Flat Spin of Slender Bodies at High Angles of Attack. Hirotoshi Kubota, Isao Arai and Masayoshi Matsuzaka, *University of Tokyo* (JSR **20**, 2, p. 108) Article based on AIAA Paper 82-0054

A83-020 Optimum Wing Sizing of a Single-Stage-to-Orbit Vehicle. Alan W. Wilhite, *NASA Langley Research Center* (JSR **20**, 2, p. 115) Article based on AIAA Paper 82-0174

A83-021 Aerodynamic Characteristics for a Slender Missile with Wrap-Around Fins. Umberto Catani, *BPD Difesa Spazio (Italy)*; John J. Bertin, *The Univeristy of Texas at Austin*; Roberto De Amicis and Sergio Masullo, *BPD Difesa Spazio (Italy)*; and Stanley A. Bouslog, *The University of Texas at Austin* (JSR **20**, 2, p. 122) Article based on AIAA Paper 82-0319

A83-022 Store Separation from Cavities at Supersonic Flight Speeds. Robert L. Stallings Jr., *NASA Langley Research Center* (JSR **20**, 2, p. 129) Article based on AIAA Paper 82-0372

A83-023 Atmospheric Definition for Shuttle Aerothermodynamic Investigations. Joseph M. Price, *NASA Langley Research Center* (JSR **20**, 2, p. 133) Article

A83-024 Studies on Thermal Decomposition of Double-Base Propellants. V. R. Pai Verneker and K. Kishore, *Indian Institute of Science*; and C. B. V. Subhas, *Defence Research and Development Laboratory (India)* (JSR **20**, 2, p. 141) Article

A83-025 Thermal Storage Life of Solid-Propellant Motors. R. A. Heller and M. P. Singh, *Virginia Polytechnic Institute and State University* (JSR **20**, 2, p. 144) Article based on AIAA Paper 81-1188

A83-026 Pulsing Techniques for Solid-Propellant Rocket Motors: Modeling and Cold-Flow Testing. Joseph D. Baum, *University of Dayton Research Institute*; Richard L. Lovine, *Aerojet Tactical Systems*; and Jay N. Levine, *Air Force Rocket Propulsion Laboratory, Edwards Air Force Base* (JSR **20**, 2, p. 150) Article based on AIAA Paper 82-0359

A83-027 MOSES (Manned Orbital Space Escape System)--A Hypothetical Application. Roland T. Mayer, *General Electric Company* (JSR **20**, 2, p. 158) Article based on AIAA Paper 81-0438

A83-028 Assessment of Future Solid Rocket Motor Flight Instrumentation/Data Needs. Warren L. Allen, *Morton Thiokol Inc.* (JSR **20**, 2, p. 164) Article based on AIAA Paper 81-1550

A83-029 July 1981 NASA Workshop on Passive Remote Sensing of the Troposphere. L. S. Keafer Jr. and H. G. Reichle Jr., *NASA Langley Research Center* (JSR **20**, 2, p. 172) Article based on AIAA Paper 81-0207

A83-030 Augmented Electrothermal Hydrazine Thruster Development. H. D. Schmitz and M. Steenborg, *ERNO Raumfahrttechnik GmbH* (JSR **20**, 2, p. 178) Article based on AIAA Paper 81-1409

A83-031 SCATHA Conductive Spacecraft Materials Development. William L. Lehn, *Air Force Wright Aeronautical Laboratories* (JSR **20**, 2, p. 182) Article based on AIAA Paper 82-0263

A83-032 Aerodynamics of Asymmetric Sabot Discard. E. M. Schmidt and P. Plostins, *Ballistic Research Laboratory, Aberdeen Proving Ground* (JSR **20**, 2, p. 187) Engineering Note based on AIAA Paper 82-1301

A83-033 Scattering of Radiation by Particles in Low-Altitude Plumes. R. B. Lyons, J. Wormhoudt and J. Gruninger, *Aerodyne Research Inc.* (JSR **20**, 2, p. 189) Engineering Note

A83-034 Limiting Payload Deceleration During Ground Impact. Alan Mironer and Robert Urquhart, *Analytical Systems Engineering Corporation*; and Roy Walters, *Air Force Geophysics Laboratory, Hanscom Air Force Base* (JSR **20**, 3, p. 193) Synoptic based on AIAA Paper 81-1918

A83-035 Rigid Body Collision Model for Submunition Dispersion Simulation. James W. Purvis, *Sandia National Laboratories* (JSR **20**, 3, p. 195) Article based on AIAA Paper 82-0363

A83-036 Impingement of an Oblique Shock Wave on a Cylinder. C. M. Hung, *NASA Ames Research Center* (JSR **20**, 3, p. 201) Article based on AIAA Paper 82-0025

A83-037 Hypersonic Viscous Flows Past General Bodies at Angle of Attack and Yaw. M. D. Kim and C. H. Lewis, *Virginia Polytechnic Institute and State University* (JSR **20**, 3, p. 207) Article

A83-038 Comparisons of STS-1 Experimental and Predicted Heating Rates. E. Vincent Zoby, *NASA Langley Research Center* (JSR **20**, 3, p. 214) Article based on AIAA Paper 82-0002

A83-039 Benchmark Determination of Shuttle Orbiter Entry Aerodynamic Heat-Transfer Data. David A. Throckmorton, *NASA Langley Research Center* (JSR **20**, 3, p. 219) Article based on AIAA Paper 82-0003

A83-040 An Empirical Method for Computing Leeside Centerline Heating on the Space Shuttle Orbiter. Vernon T. Helms III, *NASA Langley Research Center* (JSR **20**, 3, p. 225) Article based on AIAA Paper 81-1043

A83-041 Analysis of STS-2 Experimental Heating Rates and Transition Data. E. Vincent Zoby, *NASA Langley Research Center* (JSR **20**, 3, p. 232) Article based on AIAA Paper 82-0822

A83-042 Substellite Studies of Wave, Plasma, and Chemical Injections from Spacelab. Stanley D. Shawhan, *University of Iowa*; James L. Burch, *Southwest Research Institute*; and Robert W. Fredricks, *TRW* (JSR **20**, 3, p. 238) Article based on AIAA Paper 82-0085

A83-043 Bit Error Rate Evaluation of GSTDN/TDRSS Communication Links. Randall E. Coffey and George M. Lawrence, *University of Colorado*; and James R. Stuart, *Jet Propulsion Laboratory, California Institute of Technology* (JSR **20**, 3, p. 245) Article based on AIAA Paper 82-0331

A83-044 Hydrocarbon Rocket Engines for Earth-to-Orbit Vehicles. James A. Martin, *NASA Langley Research Center* (JSR **20**, 3, p. 249) Article based on AIAA Paper 81-1371

A83-045 Service Life Analysis of Rocket Motors with Internal Gas Generation. George E. Weeks and Thomas L. Cost, *The University of Alabama*; and Donald L. Martin Jr., *U. S. Army Missile Command, Redstone Arsenal* (JSR **20**, 3, p. 257) Article based on AIAA Paper 81-1546

A83-046 MX Launcher Gas Generator Development. J. A. McKinnis and A. R. O'Connell, *Martin Marietta Aerospace* (JSR **20**, 3, p. 259) Article based on AIAA Paper 81-1577

A83-047 Theoretical and Experimental Evaluation of an Indoor Rocket Test Stand. P. A. O. G. Korting and H. J. Reitsma, *Prins Maurits Laboratory TNO (The Netherlands)* (JSR **20**, 3, p. 266) Article

A83-048 Methods for Validating Computer Simulation Models of Missile Systems. Douglas C. Montgomery, *Georgia Institute of Technology*; and Latricha Greene, *Army Missile Laboratory, U. S. Army Missile Command* (JSR **20**, 3, p. 272) Article

A83-049 Man-Made Debris in Low Earth Orbit--A Threat to Future Space Operations. Robert C. Reynolds, *Battelle's Columbus Laboratories*; Norman H. Fischer, *Battelle Columbus Laboratories*; and Eric E. Rice, *Battelle's Columbus Laboratories* (JSR **20**, 3, p. 279) Article

A83-050 Test/Flight Thermal Data Comparisons for Viking and SCATHA. R. D. Rempt, *Martin Marietta Aerospace* (JSR **20**, 3, p. 286) Article based on AIAA Paper 81-2479

A83-051 Artificial Electron Beams as Probes of the Magnetosphere. John R. Winckler, *University of Minnesota* (JSR **20**, 3, p. 293) Article based on AIAA Paper 82-0142

A83-052 Measured Performance of a Multimegawatt MPD Thruster. R. L. Burton, K. E. Clark and R. G. Jahn, *Princeton University* (JSR **20**, 3, p. 299) Article based on AIAA Paper 81-0684

A83-053 Characterization of Advanced Electric Propulsion Systems. Pradosh K. Ray, *Tuskgee Institute* (JSR **20**, 3, p. 305) Article based on AIAA Paper 82-1246

A83-054 Design and Testing of a Water Tip Jet Propeller. C. A. Gongwer, *Innerspace Corporation*; and J. A. Nowatzki, *Bendix Corporation* (JSR **20**, 3, p. 310) Engineering Note based on AIAA Paper 81-1530

A83-055 Scaling Analysis of Thermoacoustic Convection in a Zero-Gravity Environment. Robert J. Krane and Masood Parang, *University of Tennessee* (JSR **20**, 3, p. 316) Engineering Note based on AIAA Paper 82-0919

A83-056 Exceedance Statistics of Accelerations Resulting from Thruster Firings on the Apollo-Soyuz Mission. George H. Fichtl and Robert L. Holland, *NASA Marshall Space Flight Center* (JSR **20**, 3, p. 318) Engineering Note

A83-059 Real Gas Flows Over Complex Geometries at Moderate Angles of Attack. S. Swaminathan, M. D. Kim and Clark H. Lewis, *Virginia Polytechnic Institute and State University* (JSR **20**, 4, p. 321) Synoptic based on AIAA Paper 82-0392

A83-060 Accuracy Criteria For Evaluating Supersonic Missile Aerodynamic Coeffient Predictions. Robert J. Krieger and John E. Williams, *McDonnell Douglas Astronautics Company* (JSR **20**, 4, p. 323) Article based on AIAA Paper 81-1894 CP816

A83-061 Nonequilibrium Viscous Shock-Layer Flows over Blunt Sphere-Cones at Angle of Attack. S. Swaminathan, M. D. Kim and Clark H. Lewis, *Virginia Polytechnic Institute and State University* (JSR **20**, 4, p. 331) Article

A83-062 Aerodynamics of Wraparound Fins. B. Bar-Haim and A. Seginer, *Technion-Israel Institute of Technology* (JSR **20**, 4, p. 339) Article

A83-063 Axisymmetric Nose Inlet Effects on Supersonic Airloads. Martin R. Fink and Warren E. Anderson, *United Technologies* (JSR **20**, 4, p. 346) Article based on AIAA Paper 82-1302

A83-064 Plume/Flowfield Jet Interaction Effects on the Space Shuttle Orbiter during Entry. David B. Kanipe, *NASA Lyndon B. Johnson Space Center* (JSR **20**, 4, p. 351) Article based on AIAA Paper 82-1319

A83-065 Equivalent Angle-of-Attack Method for Estimating Nonlinear Aerodynamics of Missile Fins. M. J. Hemsch and J. N. Nielsen, *Nielsen Engineering & Research, Inc.* (JSR **20**, 4, p. 356) Article based on AIAA Paper 82-1338

A83-066 Design for Temperature and Thermal Buckling Constraints Employing a Noneigenvalue Formulation. Raphael T. Haftka, *Virginia Polytechnic Institute and State University* (JSR **20**, 4, p. 363) Article

A83-067 In-Flight Pressure-Time Recording for Short Burning-Time Rocket Motors. C. D. Bancroft and G. J. Williams, *Ministry of Defence, PERME (United Kingdom)* (JSR **20**, 4, p. 368) Article based on AIAA Paper 81-1551

A83-068 Aging Studies on Carboxy Terminated Polybutadiene (CTPB) Binder and Propellant. K. Kishore, V. R. Pai Verneker, V. Gayathri, K. R. Shubha and K. Sridhara, *Indian Institute of Science* (JSR **20**, 4, p. 371) Article

A83-069 Design Summary of the INTELSAT V Spacecraft. Christopher F. Hoeber and Neil J. Barberis, *Ford Aerospace & Communications Corporation* (JSR **20**, 4, p. 376) Article based on AIAA Paper 82-0537 CP821

A83-070 Scattered Visible and Ultraviolet Solar Radiation from Condensed Attitude Control Jet Plumes. C. E. Kolb and R. B. Lyons, *Aerodyne Research, Inc.*; J. B. Elgin, *Physical Sciences, Inc.*; R. E. Huffman, D. E. Paulsen and A. McIntyre, *Air Force Geophysics Laboratory, Hanscom Air Force Base* (JSR **20**, 4, p. 383) Article

A83-071 Shuttle Subsonic Horizontal Wind Estimation. G. Mel Kelly and John T. Findlay, *Analytical Mechanics Associates, Inc.*; and Harold R. Compton, *NASA Langley Research Center* (JSR **20**, 4, p. 390) Article

A83-072 Assessment of the Thermal Decomposition and Combustion Behavior of Double-Base Propellants. V. R. Pai Verneker and K. Kishore, *Indian Institute of Science*; and C. B. V. Subhas, *Defence Research and Development Laboratory (India)* (JSR **20**, 4, p. 398) Engineering Note

A83-073 Matrix/Fiber Interface Effects on Kevlar 49 Pressure Vessel Performance. N. A. Mumford, P. C. Hopkins and B. A. Lloyd, *Morton Thiokol/Wasatch Division* (JSR **20**, 4, p. 399) Engineering Note based on AIAA Paper 82-1069

A83-074 Prediction of Ice/Frost Growth on Insulated Cryogenic Tanks. P. J. Huffman and M. A. Dietenberger, *University of Dayton Research Institute* (JSR **20**, 4, p. 401) Engineering Note

A83-075 Calculation of Transient Thermal Stresses in Solid Rocket Propellants. Thomas L. Cost, *The University of Alabama* (JSR **20**, 4, p. 403) Engineering Note based on AIAA Paper 82-1098

A83-076 Modeling Solid-Fuel Ramjet Combustion, Including Radiation to the Fuel Surface. Michael E. Metochianakis and David W. Netzer, *Naval Postgraduate School* (JSR **20**, 4, p. 405) Engineering Note

A83-077 Nonequilibrium Radiative Heating during Outer Planet Atmospheric Entry. H. F. Nelson, *University of Missouri-Rolla* (JSR **20**, 4, p. 407) Engineering Note

A83-078 Effect of Low Reynolds Number Turbulence Amplification on the Galileo Probe Flowfield. R. N. Gupta and J. N. Moss, *NASA Langley Research Center* (JSR **20**, 4, p. 409) Engineering Note

A83-079 Procedure for Generating Ground Wind Environments for Shuttle Liftoff Studies. George H. Fichtl and Clark Brown, *NASA Marshall Space Flight Center* (JSR **20**, 4, p. 411) Engineering Note

A83-080 Comprehensive Missile Aerodynamics Programs for Preliminary Design. M. F. E. Dillenius and M. J. Hemsch, *Nielsen Engineering & Research, Inc.*; W. C. Sawyer, J. M. Allen and A. B. Blair Jr., *NASA Langley Research Center* (JSR **20**, 4, p. 414) Engineering Note based on AIAA Paper 82-0375

A83-081 Electrostatic Charging and Radiation Shielding Design Philosophy for a Synchronous Satellite. W. R. Elkman, E. M. Brown, D. V. Z. Wadsworth, E. C. Smith and P. F. Adams, *Hughes Aircraft Company* (JSR **20**, 5, p. 417) Article based on AIAA Paper 82-0116

A83-082 Summary of Environmentally Induced Electrical Discharges on the P78-2 (SCATHA) Satellite. H. C. Koons, *The Aerospace Corporation* (JSR **20**, 5, p. 425) Article based on AIAA Paper 82-0264

A83-083 Transient Pulse Monitor Data from the P78-2 (SCATHA) Spacecraft. R. C. Adamo, *SRI International*; and J. R. Matarrese, *Science Applications, Inc.* (JSR **20**, 5, p. 432) Article based on AIAA Paper 82-0265

A83-084 A Summary of Spacecraft Charging Results. P. F. Mizera, *The Aerospace Corporation* (JSR **20**, 5, p. 438) Article based on AIAA Paper 82-0268

A83-085 Contamination Measurements During Operation of Hydrazine Thrusters on the P78-2 (SCATHA) Satellite. D. J. Carre and D. F. Hall, *The Aerospace Corporation* (JSR **20**, 5, p. 444) Article based on AIAA Paper 82-0079

A83-086 Pulsed Plasma Thruster Ignitor Plug Ignition Characteristics. M. E. Brady, *Boeing Aerospace Company*; and G. Aston, *Jet Propulsion Laboratory, California Institute of Technology* (JSR **20**, 5, p. 450) Synoptic based on AIAA Paper 82-0924

A83-087 Effects of External Burning on Spike-Induced Separated Flow. J. Peter Reding and Dennis M. Jecmen, *Lockheed Missiles & Space Company, Inc.* (JSR **20**, 5, p. 452) Synoptic based on AIAA Paper 82-1360

A83-088 Chemical Equilibrium Laminar or Turbulent Three-Dimensional Viscous Shock-Layer Flows. R. R. Thareja, K. Y. Szema and C. H. Lewis, *Virginia Polytechnic Institute and State University* (JSR **20**, 5, p. 454) Article based on AIAA Paper 82-0305

A83-089 Optimization of Waverider Configurations Generated from Axisymmetric Conical Flows. B. S. Kim, M. L. Rasmussen and M. C. Jischke, *The University of Oklahoma* (JSR **20**, 5, p. 461) Article based on AIAA Paper 82-1299

A83-090 Hypersonic Dynamic Testing of Ablating Models with Three-Degree-of-Freedom Gas Bearing. F. J. Regan and M. V. Krumins, *Naval Surface Weapons Center* (JSR **20**, 5, p. 470) Article based on AIAA Paper 82-1367

A83-091 A Spacelab Principal Investigator's Guidance for Planning Scientific Experiments Using the Shuttle. Stanley D. Shawhan, *The University of Iowa* (JSR **20**, 5, p. 477) Article based on AIAA Paper 81-0272

A83-092 Classification of Orbits with Regard to Collision Hazard in Space. V. A. Chobotov, *The Aerospace Corporation* (JSR **20**, 5, p. 484) Article

A83-093 Orbital and Cloud Cover Sampling Analyses for Multisatellite Earth Radiation Budget Experiments. Edwin F. Harrison and Patrick Minnis, *NASA Langley Research Center*; and Gary G. Gibson, *Kentron Technical Center* (JSR **20**, 5, p. 491) Article

A83-094 Unfurlable Offset Antenna Design for L- and C-Band Application. W. Schafer and H. Herbig, *Messerschmitt-Bilkow-Blohm GmbH (FRG)*; A. Roederer, *European Space Research and Technology Centre (The Netherlands)*; and K. Pontoppidan, *TICRA (Denmark)* (JSR **20**, 5, p. 496) Article based on AIAA Paper 82-0443 CP821

A83-095 A High-Speed, Time-Division Multiple-Access Communication Link Demonstration. W. Callanan, *The Western Union Telegraph Company*; D. Rose and Z. Sarkozy, *TRW Electronics and Defense* (JSR **20**, 5, p. 503) Article based on AIAA Paper 82-0548 CP821

A83-096 Product Decompositions for Certain Types of Coordinate Transformation. Terrence W. Barbee, *Space Applications Corporation* (JSR **20**, 5, p. 510) Article

A83-097 Development of Aerodynamic Uncertainties for the Space Shuttle Orbiter. James C. Young and Jimmy M. Underwood, *NASA Johnson Space Center* (JSR **20**, 6, p. 513) Article based on AIAA Paper 82-0563 CP822

A83-098 Space Shuttle Entry Longitudinal Aerodynamic Comparisons of Flight 2 with Preflight Predictions. Paul O. Romere and James C. Young, *NASA Lyndon B. Johnson Space Center* (JSR **20**, 6, p. 518) Article based on AIAA Paper 82-0565 CP822

A83-099 Orbiter Entry Leeside Heat-Transfer Data Analysis. D. A. Throckmorton and E. V. Zoby, *NASA Langley Research Center* (JSR **20**, 6, p. 524) Article based on AIAA Paper 83-0484

A83-100 Turbulence Modeling of Flowfields with Massive Surface Ablation. R. N. Gupta, *NASA Langley Research Center* (JSR **20**, 6, p. 531) Article based on AIAA Paper 82-0198

A83-101 Experimental Surface Pressures on Cone-Derived Waveriders for $M_\infty = 3$-5. M. C. Jischke and M. L. Rasmussen, *The University of Oklahoma;* and D. C. Daniel, *Air Force Armament Laboratory* (JSR **20**, 6, p. 539) Article based on AIAA Paper 82-0249

A83-102 Space Platform Accommodations. Wayne Bailey, *Teledyne Brown Engineering*; and Max E. Nein, *NASA Marshall Space Flight Center* (JSR **20**, 6, p. 546) Article based on AIAA Paper 82-1814

A83-103 Automatic Thermal Control Switches. Lawrence D. Wing, *Goddard Space Flight Center* (JSR **20**, 6, p. 553) Article based on AIAA Paper 82-1764 CP828

A83-104 A Constitutive Formulation for High-Elongation Propellants. S. R. Swanson, *University of Utah*; and L. W. Christensen, *Hercules Incorporated* (JSR **20**, 6, p. 559) Article

A83-105 Test Verification of LOX/RP-1 High-Pressure Fuel/Oxidizer-Rich Preburner Designs. B. R. Lawver, *Aerojet Liquid Rocket Company* (JSR **20**, 6, p. 567) Article based on AIAA Paper 82-1153

A83-106 Swirl Combustor Flow Visualization Studies in a Water Tunnel. J. A. Schetz, P. W. Hewitt and R. Thomas, *Virginia Polytechnic Institute and State University* (JSR **20**, 6, p. 574) Article based on AIAA Paper 82-1238

A83-107 Low-Cost Titanium Propellant Tankage. A. E. Leach and R. J. Szpakowski, *Bell Aerospace Textron* (JSR **20**, 6, p. 583) Article based on AIAA Paper 82-1228

A83-108 Lifting Entry Vehicle Mass Reduction Through Integrated Thermostructural/Trajectory Design. Kathryn E. Wurster, *NASA Langley Research Center* (JSR **20**, 6, p. 589) Article based on AIAA Paper 80-0363

A83-109 Mission Analysis Techniques for Attached Shuttle Payloads. Scott D. Lambros, *NASA Goddard Space Flight Center* (JSR **20**, 6, p. 597) Article based on AIAA Paper 82-1759 CP828

A83-110 The Electrothermal Ramjet. P. J. Wilbur, C. E. Mitchell and B. D. Shaw, *Colorado State University* (JSR **20**, 6, p. 603) Article based on AIAA Paper 82-1216

A83-111 The Flexible Magnetic Field Thruster. John R. Brophy and Paul J. Wilbur, *Colorado State University* (JSR **20**, 6, p. 611) Article based on AIAA Paper 82-1936

A83-112 A Frequency-Division Multiple-Access System Concept for 30/20 GHz High-Capacity Domestic Satellite Service. G. Berk, P. N. Jean, E. Rotholz and B. E. White, *The MITRE Corporation* (JSR **20**, 6, p. 619) Article based on AIAA Paper 82-0447 CP821

A83-113 Improved Satellite Repeater Amplitude-Frequency Measurement. P. Daly, *University of Leeds*; and D. G. Tits, *Interim Eutelsat* (JSR **20**, 6, p. 626) Engineering Note

A83-114 HZE Particle Shielding Using Confined Magnetic Fields. L. W. Townsend, *NASA Langley Research Center* (JSR **20**, 6, p. 629) Engineering Note
