

A.I.Ch.E. JOURNAL

CHEMICAL ENGINEERING RESEARCH AND DEVELOPMENT /

MARCH 1958

CONTENTS

Radiant Heat Exchange in a Gas-filled Enclosure	H. C. Hottel and E. S. Cohen
Heat Transfer Between Fluidized-solids Beds and Boundary Surfaces—Correlation of Data	Leonard Wender and G. T. Cooper
Entrapment of Gas in the Spreading of a Liquid over a Rough Surface	S. G. Bankoff
Distribution of Eddy Viscosity and Mixing Length in Smooth Tubes	R. R. Rothfus, D. H. Archer, and K. G. Sikchi
Control of Flow Distribution by Mixing Headers	S. C. Hyman, A. R. Gruber, and Leon Joseph
Convective Heat Transfer from High-temperature Air Inside a Tube	H. E. Zellnik and S. W. Churchill
Heat Transfer from Superheated Vapors to a Horizontal Tube	Garen Balekjian and D. L. Katz
A New Electric Analogue Model for Nonsteady State Flow Problems	Irving Fatt
A Graphical Method for Solution of Freezing Problems	P. A. Longwell
Film Boiling from Vertical Tubes	Y. Y. Hsu and J. M. Westwater
Heat and Momentum Transfer in the Flow of Gases Through Packed Beds	M. B. Glaser and George Thodos
Fluid-particle Heat Transfer in Packed Beds	E. B. Baumeister and C. O. Bennett
Local Boiling Coefficients on a Horizontal Tube	R. P. Lance and J. E. Myers
Natural-convection Heat Transfer in Regions of Maximum Fluid Density	R. S. Schechter and H. S. Isbin
Rates of Flow Through Microporous Solids	E. R. Gilliland, R. F. Baddour, and J. L. Russell
Film-penetration Model for Mass and Heat Transfer	H. L. Toor and J. M. Marchello
Effect of Superatmospheric Pressures on Nucleate Boiling of Organic Liquids	R. B. Mesler and J. T. Banchemo
Mass Transfer from a Soluble Solid Sphere	F. H. Garner and R. D. Suckling
