

AIChE JOURNAL

MARCH 1977 • VOL. 23, NO. 2

The AIChE Journal, a publication of the American Institute of Chemical Engineers, is devoted to fundamental research and developments having immediate or potential value in chemical engineering.

PUBLISHER

F. J. Van Antwerpen

EDITOR

Robert H. Kadlec

MANAGING EDITOR

Sylvia Fourdrinier

PRODUCTION EDITOR

Maura Mullen

EDITORIAL BOARD

Andreas Acrivos
Charles A. Eckert
James R. Fair
George R. Gavallas
Leon Lapidus
Dan Luss
William H. Manogue
Keith McHenry, Jr.
Arthur B. Metzner
John M. Prausnitz
Dale F. Rudd
Kenneth A. Smith

Publication Office, 215 Canal street, Manchester, New Hampshire. Published in January, March, May, July, September, and November by the American Institute of Chemical Engineers, 345 East 47 Street, New York, New York 10017. Manuscripts should be submitted to Robert H. Kadlec, Editorial Offices, Room 3036, East Engineering Building, The University of Michigan, Ann Arbor, Michigan 48109. Statements and opinions in the *AIChE Journal* are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscription: one year, \$60; special member rate, \$10; additional yearly postage, Canada \$4.00, Pan American Union \$4.00, other foreign \$4.00 (foreign subscriptions payable in advance). Single copies: \$15.00. Single copies more than one year old: \$18.00. Second-class postage paid at New York, N. Y. and additional mailing offices. Copyright 1977 by the American Institute of Chemical Engineers. National headquarters of AIChE is concerned about nondelivery of copies of the *AIChE Journal* and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to AIChE Journal, 345 East 47 Street, New York, N. Y. 10017.

AIChE Symposium Series

Recent Studies

155. Oil Shale and Tar Sands. The oil shale part of this volume describes processes to treat the shale in place, includes a summary report on a surface retorting process, and describes properties of oil shale important to process technologies. The papers on tar sands review current information on reserves, technology, and commercial production in North America.

1976. 78 pp.

AIChE members, \$4; nonmembers, \$20.

156. Air Pollution Control and Clean Energy. This volume describes the latest advances in pollution control technology and its application for the control of sulfur oxide emissions, particulates, emissions from the stationary sources, and application of catalysts to environmental and energy problems. 1976. 455 pp.

AIChE members, \$10; nonmembers, \$20.

157. New Horizons for the Chemical Engineer in Pulp and Paper Technology. Papers spanning the full system of pulp and paper production—from woodlands to papermaking—with emphasis on new approaches and technology in pulping, bleaching, and chemical recovery, with consideration of the unit operations involved.

1976. 139 pp.

AIChE members, \$6.50; nonmembers, \$20.

158. Biochemical Engineering—Energy, Renewable Resources, and New Foods. Sources of raw material, methane production, direct photoconversion, pretreatment for cellulose, single-cell protein from cellulose, and scale-up and development studies of biological conversion of cellulose.

1976. 127 pp.

AIChE members, \$6.50; nonmembers, \$20.

Order from

American Institute of Chemical Engineers
345 East 47 Street
New York, New York 10017

Also available: standing orders for members. Each book in the series is mailed on publication and billed at a discount of 10 percent.
