

Book Reviews

Works intended for notice in this column should be sent direct to the Book-Review Editor (R. F. Bryan, Department of Chemistry, University of Virginia, McCormick Road, Charlottesville, Virginia 22901, USA). As far as practicable, books will be reviewed in a country different from that of publication.

Acta Cryst. (1996). **A52**, 508

Books Received

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

Crystallography. Second Edition. By WALTER BORCHARDT-OTT. Pp. xii + 307. New York: Springer-Verlag, 1995. Price US \$29.95. ISBN 3-540-59478-7. An

English language translation, by Dr R. O. Gould, of the fifth German language edition of *Kristallographie*. The first English language edition (translation of the fourth German edition) has been reviewed in this journal [*Acta Cryst.* (1994), **A50**, 552]. This new edition features an expanded treatment of crystal morphology with exercises on the use of stereographic, orthographic and gnomonic projections, but is otherwise indistinguishable in content from the first.
